52336	Creamer, Diane	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project!! There are lower cost alternatives. My husband & I own a home in SLC proper and Alta. We have happily ridden the bus many times and would love to see that option increased rather than limited. It is efficient and affordable. Many of my family members love riding the bus.... There is no need to mar the beauty of LLC with a gondola, when busses and avalanche sheds can be implemented.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>More busses, more stops, please. Let's put our money towards preserving the Great Salt Lake which will impact all Utahans!</p> <p>Regards, Diane Creamer</p>	A32.3A; A32.3F

56009	Criddle, Malia	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Malia Criddle</p>	A32.3A; A32.3F

41254	Crist, Gwen	I am very opposed to the gondola as a transportation alternative in Little Cottonwood Canyon. This is a very expensive boondoggle for the rich and for the ski resorts and will lead to reduced access, degraded water quality, and permanent ecological damage to the ecosystem of the canyon. Please do not approve this plan for the gondola! There are better, less impactful, more equitable solutions to the traffic problems in the canyon, including more busses, timed access, carpooling, and more. The gondola is not the answer and will lead to a decreased quality of life for everyone along the Wasatch Front due to degraded water and environmental impacts.	A32.29VV

39235	Crockett, Kristopher	<p>I went to Switzerland this year. Gondolas were everywhere! I believe it is a mistake to put one in LCC. The time required to get to the mountain on a gondola was substantially higher. A large number of people still chose to ride the buses or drive to the base of the resort, so honestly the traffic was still there anyway. The lines to get on and off the gondolas at the beginning and end of the day were crazy long! I'm sure it will affect property values. Gondolas went right over peoples houses. We could literally see right in peoples homes and wave to them as we flew overhead. I truly believe the best solution is to widen the road. Make street parking near the resort illegal and force the resorts to build parking garages to alleviate the street parking. That was also normal in Switzerland. All of the resorts had multi story parking garages. Put that cost on the resort, since they are the ones profiting from all of the crowds. Snowbird had its best financial year ever in 2021/2022. Make them put up the necessary garages.</p>	A32.29VV

41984	Cronin, Tom	<p>I do not think the gondola plan is the best alternative when considering the project economics, the impact to roadless areas, and the impact to air quality.</p> <ol style="list-style-type: none"> 1. Economics - while I believe that UDOT has a good idea of road construction costs, I don't believe they have a very good idea of gondola construction. I fully expect that the capital cost of the gondola project to go way up. 2. Roads will have to be built or expanded to accommodate construction of towers and to provide maintenance access to gondola towers and emergency access to gondolas. Therefore the road impact was underestimated. 3. The air quality impact from buses is overestimated and should not be used as a justification for operating an electrically powered gondola. Whether the buses are fueled by diesel, gasoline, or propane is irrelevant because all three fossil fuels have a significant carbon footprint and thus they represent worst case scenarios for busses. Based on trends within the automotive market, it is highly likely that all buses will be electrically powered by 2030. Therefore, the favorability of the bus/snowshed alternative should improve because the carbon 	A32.3H; A32.10G

		<p>footprint is on par with an electrically powered gondola. It certainly cannot be considered worse for air pollution than the gondola. Furthermore it is also probable that these buses will be autonomously driven so the labor cost for so many buses will be much less than estimated.</p> <p>In summary, start work on the snow sheds since that will have to be done anyway. Then see where the technology goes before locking in on the next phase of construction.</p> <p>Thank you.</p>

41710	Crookston, Laurie	<p>I read the editorial in the Desert News about having a train instead of a Tram and completely agree with that idea.</p> <p>I think using a train to be a much better option. It would be less expensive, as trains have historically been used there before, it can haul more people and not interfere with the spectacular mountain views . I consider trains to be less of an eyesore than Trams; not to mention how badly Trams can affect the birds and their flight patterns in the canyons.</p> <p>Trains are also generally less expensive to use for the general population than trams and are less dangerous. (Remember the American pilot flying too low and taking out a tram full of people in Italy 1-2 years ago?) human error, for sure, but still a risk.</p> <p>Also, Being crowded in a tram is a far more claustrophobic experience, in my opinion, and many people don't tolerate heights. (Yes, even skiers can have some fears with heights- I know this personally) Short Trams are great for small groups heading up the mountain within the resort, but a canyon Tram doesn't make sense when a train could work even better Seriously, I could go on.</p> <p>Thank you for patience and attention to my input. (It was written in haste.)</p>	A32.29VV

(It was written in haste.)</p>	
41703	Crookston, Laurie	<p>Thank you. This is Laurie Kristen and I will probably send a text to elaborate a little more but I am calling to protest a tram of Little Cottonwood Canyon and I have several reasons, but just to be on the record and I'm hoping that we can just you get inundated with these protests. Thank you. I'm I'm happy that we have a way to to protest it and I will send you my text.</p>	A32.29VV
41707	Crookston, Laurie	<p>I read the editorial in the Desert News about having a train instead of a Tram and completely agree with that idea. If ever the written truth resonated with me, it was when I read the article.</p> <p>I think using a train to be a much better option than building a Tram. It would be less expensive, as trains have historically been used up the canyon before, and we already have a rail system up and going. A train also can haul more people and not interfere with the spectacular mountain views . I consider large canyon Trams to be a great eyesore, not to mention how badly Trams can affect birds and their flight patterns in the canyons.</p> <p>Trains are also less expensive to use for the general population than trams and are less dangerous. (Remember the American pilot flying too low and taking out a tram full of people in Italy a couple of years ago?) human error, for sure, but still a risk.</p> <p>Also, Being crowded in a tram is a far more claustrophobic experience, in my opinion, and many people don't tolerate heights. (Yes, even skiers can have some fears with heights- I know this personally) Short Trams are great for small groups heading up the mountain within the resort, but a canyon Tram doesn't make sense when a train could do the job better. Seriously, I could go on.</p> <p>Thank you for patience and attention to my input. (It was written in haste.)</p>	A32.29VV
44394	Crosby, Ethan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Ethan Crosby</p>	A32.3A; A32.3F

40375	Crossley, Michelle	UDOT fails to note significant impacts on USFS land, omitting the impacts of construction, paving, and new road construction on federal land in inventoried roadless areas, including an EPA superfund site. Given these errors and omissions in the UDOT NEPA process, I urge the USFS to conduct its own EIS and issue its own ROD to accurately represent and prevent these impacts to federal land and inventoried roadless areas. The USFS ROD needs to recommend against a gondola constructed in Little Cottonwood Canyon. How many times do the local taxpayers need to tell UDOT NO GONDOLA!!! If these resorts want a gondola, let them come up with a better solution and THEY PAY FOR IT!	A32.3G; A32.3H; A32.I

39339	Cruz, Timothy	<p>There is literally no need for a gondola. The so-called benefits for avalanche control days are minimal compared to just focusing on increased bus service and incentivizing alternative transportation more, rather than investing in an option that is overly expensive for limited use. You could make a mobility hub at the historic sandy station (parking garage) and increased bus service, toll the road, and make more money and more of an impact than building a gondola. The gondola is waste of money.</p>	A32.29VV
41609	Cryan, Wendy	<p>The gondola would violate the roadless rule and many of the things that make LCC special such as clean water, wildlife and so many recreational opportunities would disappear and future generations would be deprived of endless natural areas. Please explore other options, such as electric busses, which I can support. Thank you for considering alternatives. The gondola is not viable on many fronts</p>	A32.3A

41973	Czaja, Ben	<p>The gondola option only provides a solution to a small group of people who are traveling to a very specific locations in only one canyon. I think increased amount of buses would be the solution that helps more people. I think if you tolled both big cottonwood and little cottonwood it would decrease the car traffic and would increase bus timings in the canyon. Dedicated bus travel ways at the resorts would also significantly increase the ease of using the bus. The tolls for cars should be used to fund the busses. Creating faster buses more that are not stuck in car traffic would be the sensible solution. Please don't make an solution for Alta and snowbird be a solution for all of little and big cottonwood and the surrounding neighborhoods of cottonwood heights.</p>	A32.29VV

42209	D. Wightman, Christina	<p>There's honestly no right answer to this complex problem, and there's no way to know what the future holds, for our planet or for our climate. I live in Salt Lake now, but I'm a Canadian, from British Columbia. There's a few things that stick out for me.</p> <p>I know first hand how amazing having snow sheds is. And how well they work. When there's only one road that connects one half of your country to the other, you have to keep it open. TransCanada highway, Rogers Pass. What I didn't see on the show shed fact sheet was how many hours and wages are currently used for snow clearing when there's an avalanche over the road. Seems to me like it's an awful lot.</p> <p>Snow sheds will reduce road closure time, so that traffic can continue to flow.</p> <p>What about selective widening? For busses, and other transportation operations and shuttles. The other week we were waiting at a park and ride, for the canyon to open, and we saw all the shuttles go by 20 mins before the road officially opening, and I loved that! Please, send all the busses and shuttles up first, what incentive to take the shuttles! If I had have known that we would have taken the shuttle! We had a full car though, so don't worry, I sure wasn't driving up solo. I digress.</p> <p>Again, as a rural Canadian, we have a boat load of single lane roads, in some whack places, where there's maybe a passing lane every once in a while, when there's room, not between the cliff and the creek. In my experience, even a couple of more passing lanes would be an immense help. Or even some more pullouts for slower cars to pullover and let others by. There recently was a campaign in BC to encourage slower vehicles to pull aside and let cars go by, good signage with ample lead time before the pullout, and signage at the pullout, as well as a media campaign. It works.</p> <p>A few select passing lanes could be dedicated bus and shuttle passing.</p> <p>To be honest, I used to take the bus all the time, love it. Love the ease of not having to park, being able to walk right up to the lift. So easy. Over the last two years it's become awkward and dumb to get up and down the canyon, that I seem to ski elsewhere a lot.</p> <p>The terrible other drivers is a huge factor as well. Not sure how any canyon traffic problem can be solved without addressing this is something we should talk about more as well.</p> <p>What's drivers ed like in this state? Why are rental cars allowed up the canyon? Make it something like Hawaii, where rental cars aren't allowed 'off-road' which includes any non-paved</p>	A32.29VV

		<p>road! Or like in western Canada, if you put 4 (real) winter tires on your vehicle for the winter you get major vehicle insurance discounts.</p> <p>It's a cultural shift, which no doubt is the hardest shift, but come on, the other week we got behind someone in a 1990's 2 wheel drive sedan, with one chain on, on the passenger front wheel, and the driver was hanging out the window with their snow brush cleaning off the windshield as they were driving up!! Come on!</p> <p>The gondola isn't going to get the rental cars and the terrible drivers off the roads, it's not going to benefit everyone, and it's not going to stop avalanches from happening...sounds like it's not good for anything.</p> <p>My point is that this is a complex problem and is going to need more than one blanket solution to be effective no matter what action is taken. I think some more thought needs to go into the more qualitative questions/options around driver and vehicle capabilities, perceptions of time and access to get up and down the roads, perceived hassles and our individual experiences.</p> <p>Many thanks for reading/listening, and even opening up for comments. Much appreciated.</p> <p>Christina</p>	
51008	Dabrowski, Angelica	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Angelica Dabrowski</p>	A32.3A; A32.3F

42402	Dahle, Haley	<p>Please stop trying to ram this gondola through. The public has spoken. Multiple times. We don't want it! We are so lucky in this city to have Little Cottonwood Canyon, an amazing wilderness setting, just minutes from the city. Being able to quickly escape into nature is a major draw for many people that live here. The gondola will ruin the wilderness, the watershed, the climbing, the hiking, and wildlife living there. Please stop. There's got to be a human being in UDOT somewhere that understands how bad this idea is. And the worst part of it all is that it won't help traffic. It'll just clog up the resorts with more people. People will still drive unless they have either can't or have reasonable motivation not to. A \$50-100 gondola ticket with the same travel time as sitting in traffic isn't motivation. Give us plentiful parking and a mandatory shuttle that comes at frequent, dependable schedules. Have the bus stop at backcountry trailheads too. Run thru summer and winter. The shuttle system in Zion is amazing. Allow only residents and essential employees to drive personal vehicles. At the very least, add tolls for single passenger vehicles. Enforce traction laws! Increase bus service. All these easy, cheap options out there that you refuse to even try.</p>	A32.29VV

44373	Daley, Brendan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Brendan Daley</p>	A32.3A; A32.3F
41562	Daley, Lillian	The gondola would be in violation of the Roadless Rule. Roadless areas must be protected from development and a gondola shouldn't be considered an exception. I am concerned about the construction of a gondola ruining a protected area by negatively impacting outdoor recreation such as hiking and climbing, animal habitats, and our watershed.	A32.3A

Your solutions does nothing to resolve the problem of traffic and does nothing more than move the problems further into the neighborhoods disrupting the lives of everyone that will life in the general vicinity of the parking garage. That God knows will fill up before you can take your precious dollar signs and tax dollars to the resort. You blatantly ignore obvious solution including snow sheds and limiting traffic up the canyon while expanding public transportation outside of a novelty attraction being put in to drum up press and a slogan "Ride the world's longest Gondola" like some kind of cheap amusement park! I cannot wait to see the hotel city pop up around the base of the gondola as Salk lake city resort. The damage you will do the canyons natural beauty and activities enjoyed by hundreds of thousands every year is irresponsible and categorically greedy. I know that this means nothing the logistics have been shown and ignored as back door and open and plain donations have clouded the judgement of the powers at be for reprehensible lobbyists looking to profit off Tax Payer dollar. Ignoring the will of the people is categorically un-American and undermines the entire process of Democracy!</p>	A32.3A; A32.3F

41687	Damon, Kevin	<p>Having reviewed the additional information, I continue to see UDOT's approach to Little Cottonwood Canyon as offering a series of very expensive solutions which will limit access to recreational opportunities for many current users. In some cases the possible "improvement" eliminates a recreational area. In other cases it denies access to a current recreational area. In every case the solution is expensive. In every case with an estimated transit time, it would at least double the current time it takes me to reach Albion Basin. In the case of the Gondola, it is a fixed capacity system locking in single ingress / egress options at great cost and no future flexibility. It appears to benefit UDOT much more than it benefits Little Cottonwood Canyon users.</p> <p>The FHWA requirement to evaluate the bus alternatives using only diesel powered buses at their maximum service life looks like an attempt to prejudice any decision against the bus alternative. If the bus alternative needs to be so hobbled, will UDOT also evaluate the Gondola alternatives using the most optimistic and Utopian assumptions possible – say the gondola will be powered by renewable energy sources and built entirely of reclaimed materials making both material and operating costs negligible for the life of the system? That would seem a fine way to prejudice the decision making process to reach a Gondola conclusion.</p>	A32.10G

		Changes to the access of LCC should improve access. These alternatives all impede or slow access. They do not improve it.

39780	Dance, Heather	I live east of wasatch. Traffic has never been so crazy. Creating a Gándola to get up the canyon would not change traffic. It would keep it horribly the same, or increase it. It works move the snake from the canyon further down the canyon (on wasatch and every artillery road to get to wasatch). The idea it would help traffic is completely false! The math in Packing thousands of people to get up the canyon and down is flawed and doesn't add up. Please bring the buses back, add tolling, snow sheds, or tunnels with the amount of money the gandola works cost. Please listen to the people!! Do not destroy our canyon.	A32.29VV

40513	Dankmyer, Taylor	<p>I was excited to see the EIS further examine the alternatives' impact to IRAs in Little Cottonwood Canyon.</p> <p>The overall summary shows that the bus options are less impactful than the gondola. While all have an impact, bus impact is quite low.</p> <p>Given that we know there will be still some impact regardless of the alternative chosen, I still strongly support an option for expanded and expedited bus service. I was and still am a proponent of adding an additional (bus only) lane - even if we just added one lane that was used for uphill traffic in the morning and downhill traffic in the morning.</p> <p>Understanding that i likely not the choice UDOT will make, I still strongly support the bus.</p>	A32.3H

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>When it comes to impact on IRAs in the canyon, the Gondola is shown to have more impact by your own analysis + the analysis for the gondola strangely/regrettably leaves out any excavation that needs to be done for building gondola towers. It is claimed much of the work can be done by helicopter, but excavation work cannot be done via helicopter. It must be on the ground. That means some impact to IRAs and potentially even short term (or permanent roads to the gondola towers. This is an odd miss when it comes to the analysis on the roadless rule.</p> <p>Also, when it comes to maintenance of the towers, I imagine that can't be done via helicopter either. This means many access roads for the towers.</p> <p>All that said, I oppose the gondola strongly still. Beyond its impact to the canyon covered in this latest update/comment period, it is too narrow in focus, too disconnected from the rest of SLC's plans for buses and other transit options. A bus can always scale up a down very easily, unlike a gondola. This plus snow sheds, which are extremely popular in parts of Canada and around the world, would also help. Expand the number of buses that run per hour on rush hour + close the road to just busses and staff during rush periods. We can do so much so much quicker with a bus than compared to a gondola that will take years and years to build.</p> <p>Even better, Consider a bus connecting from all parts of the city to the canyon to make cross city public transit much easier!</p>	
40986	Dansie, Michael	<p>I'm writing to express my concern about the proposed plan to build a gondola in Little Cottonwood Canyon. This plan would have a severe negative impact on the ecosystem, environment, and air quality of the canyon. The Roadless Area Conservation Rule and the Air Quality Supplemental Information Technical Report would both be violated if this plan were to be implemented. I urge you to consider the consequences of this plan and to find an alternative solution that will protect the canyon and its resources. Thank you for your time and consideration.</p>	A32.3A

42193	Darling, Ethan	I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities	A32.3A
55386	Darling, Garrett	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Garrett Darling</p>	A32.3A; A32.3F

41188	Dassing, Rusty	<p>Why was the EIS limited to alternatives that did not include Trax up the existing rail line in LCC? This solution was found, by the much more inclusive analysis by Mountain Accord, to be the best option for mitigating traffic problems not just in LCC but also in Big Cottonwood Canyon and the Wasatch Back.</p> <p>Lawsuits to come, regardless of which alternative is selected, will certainly feature the fundamental flaw of this EIS of not presenting a comprehensive range of alternatives. At a minimum this should help hold up implementation of any decision until an avalanche risk reducing, economical, all community inclusive and environmentally compliant solution such as Trax is included.</p> <p>Please register these comments as a call for a better range of alternatives in the likely to come EIS do over.</p>	A32.29VV

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Bus services are fantastic and effective!</p> <p>Regards, Matt Davies</p>	
39861	Davies, Richard	<p>Minimum disruption to physical environment, air quality. No gondolas - unsightly and unbelievably expensive. So expensive that this option should be put to a vote of the people. Will electric buses work with recharging at top and bottom of route? Downhill braking will provide regenerative power.</p> <p>You need to find a better solution to the parking and traffic back-up problems for local residents. Charge a significant amount for personal vehicles, charge private car users but with exceptions for deliveries to the resorts, etc. Make cost of using the bus attractive. Have a bus route from downtown hotels to resorts.</p>	A32.3F; A32.10G

41477	Davis, Brett	<p>Please do not do the Gondola. It's not a scalable solution and only serves LCC, primarily in winter. Expanded buses, snow shed, extra lanes are a way better solution due to scalability for the future, serves both canyons, cheaper, etc. A train is also a really future proof solution cause it can be expanded throughout both canyons and into park city, and throughout salt lake city. As the SLC and park city areas develop into the future, a modern expansive train system would be ideal.</p>	A32.29VV

45131	Davis, Claire	<p>To whom it may concern,</p> <p>The Gondola is ridiculous, we could use the existing road and offer a shuttle service departing at the same rate as the gondola. Or enhance the bus services. Destroying natural areas is so unnecessary.</p> <p>Regards, Claire Davis</p>	A32.29VV
40505	Davis, Connor	<p>Hi UDOT,</p> <p>As a Utah taxpayer I would like to comment that I am against the Gondola solution. This solution is not equitable for all users and activities within LCC. I don't believe we should spend taxpayer dollars of the Utah citizens on a solution that benefits two private ski resorts and such a small percentage of our population. In addition a vast majority of the users will be tourist who are not subsidizing the cost of the gondola and gondola tickets. I believe the other solutions are much better and will ultimately keep the beauty of our canyon in tact for the next generations to enjoy. I also want to comment that we need to accept the fact that our canyons can only handle so much traffic and providing a way to allow more people up the canyon will only hurt this precious resource.</p>	A32.29VV
49385	Davis, Danielle	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 56051	Davis, Dylan	<p>To whom it may concern,</p> <p>As a Salt Lake native, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon.</p> <p>This proposed project getting so far with so much public opposition is a clear failure of governance in the Salt Lake valley. People who care about the outdoors and the mountains that surround the valley are the future of Utah, and construction of this gondola would leave a long lasting stain on the majority of the public's opinion on the Utah government as a whole.</p> <p>In addition, the gondola neglects the problem of the canyon next door, Big Cottonwood canyon. This season the ski traffic in Big Cottonwood has been as bad if not worse than that in Little Cottonwood. The Wasatch needs a comprehensive solution for both canyons.</p> <p>Please do not wait until the late 2030s to fix the traffic problem in the Cottonwoods. There are solutions that could be implemented by next season that would largely solve the issue.</p> <p>Regards, Dylan Davis</p>	A32.29VV
48613	Davis, Eli	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p>	A32.3A; A32.3F

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Eli Davis</p>	
39868	Davis, Eli	DO NOT BUILD THE GONDOLA! It would violate the roadless rule in addition to negatively impacting the wilderness areas for human recreation, animal life, and our watershed.	A32.29VV

39617	Davis, Greg	<p>First, let me make it clear that I truly believe our comments mean absolutely nothing other than to appease our frustration with udot and snowbird. How can you even consider a Gondola that is only going to serve 2 to 3% of the population only stop at private ski resort, snowbird and Alta it's not going to run during the summer it's not going to solve a traffic issue at the base of the canyon,(it will actually make it worse) and how dare you put more on the taxpayers we are already paying enough. My property tax went up 100 bucks this year. It's gone up \$300 in the last several years. you are pricing us out of our own communities. No one wants your gondola except for you the only person it benefits, is you. the only one that stands to profit off of this is you do not put this ██████ gondola up the peoples canyon (not snowbird) nobody that lives near the mouth of the canyon that wants it. Most of the people that live far from the canyon. Don't want it. The mayors in council people do not want it. ██████ u. We do not want it. Don't do it!!!!</p>	A32.29VV
41689	Davis, Greg	<p>Just say no to Gondola gate. What a scam. Destroy canyon. Ignore locals. Don't u dare put this on tax payers. My ██████ mortgage already goes up enough for school property taxes. 100 this yr alone. Soon u will price me out if my house. No gondola. No one wants except snowbird. 2% of Utah residence will use it. Doesn't stop at any trails. Will not run during avalanche control including the week canyon was shut down.</p>	A32.29VV

39809	day, joe	<p>As has been said by all opponents of this project, this is a bad idea that favors the resorts and no one else. They need people to access their product (snowy mountains with lift access) and they are the ones that will capitalize from the project. Therefore they should be the ones to fund it. I do not take part in resort activities and prefer human powered activity. There is absolutely no thought on my type of recreationalist. I will be very upset if any of my tax dollars are used to help Snowbird and Alta (=BAD NEIGHBORS) to get people to their resorts for their profit. They need to fatten the pot somehow and give locals the American right to access their public lands. Best case scenario would be to shut them down and return the land to the wild and make it all a wilderness area. Bottomline is its their problem, that they created, and they should be responsible for fixing this problem along with the funds to make it happen. Just my 2 cents along with everybody else's.</p>	A32.29VV

40199	de Nevers, Renee	<p>The proposed gondola is a terrible idea. It is difficult to imagine building a gondola in Little Cottonwood Canyon without causing a significant negative impact on the existing roadless areas and wildlife. The gondola should not get an exception to existing prohibitions on road building in wilderness areas that will have permanent and negative consequences. The aim should be less impact on a fragile and overstressed environment, not more! There are already too few places than can be preserved, and this should be a high priority. As to alternatives, electric busses seem like a far better idea, and don't create an enormous new structure that is a potential eyesore in a beautiful place. Please don't do this!</p>	A32.29VV

39708	De Vries, Blake	<p>The gondola would be an inappropriate use of tax-payer dollars and an unlawful overreach by the state government which invades the 2001 Roadless Rule for Little Cottonwood Canyon.</p> <p>Using taxpayers to fund a \$1B+ project that doesn't solve the issue and caters to two corporations for half of the year is entirely irresponsible and can be appropriately labelled a "taxpayer dollar fraud" as it, a) Does not represent what majority taxpayers desire b) Feeds the needs of two corporations rather than that of the citizens/payers</p> <p>c) Overreaches current rule</p> <p>Utah's governing bodies are becoming blinded with their unabashed craving for capitalistic economic growth, ignorance of public taxpayer opinion/need, and overreach of current policy. If the Gondola is approved, it will be a keystone example of our state government's democratic decay.</p>	A32.29VV
39731	De Vries, Kyle	I am against the gondola, and against any further talk about the gondola.	A32.29VV
41810	de Vries, Ryan	The Gondola is a dishonest decision to Utahns. The cost is way more than they first advertised and the impact on the canyon is very high. Utah does not want the Gondola. Please listen to our comments one of these rounds and realize it is not time for a gondola we don't have money for.	A32.29VV

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Mattie Dean</p>	
42141	Dean, Spencer	<p>I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	A32.3A; A32.3F; A32.10G

Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadle</p>	A32.3A; A32.3F; A32.10G
40003	Dearden, Dan	<p>I am a skier and a rock climber. With all of the road closures we have seen this year, it's clear that just adding more busses won't solve the problem. How about if we do a scenario like they do in Zion National Park. Don't change the current road. To keep the road open, add the snow sheds. Then only allow employees, residents, and lodging guest to drive personal vehicles up the canyon. All others have to ride the busses. At first I didn't like the shuttles in Zion. But now I really like how they manage the crowds and the limited roads and parking up Zion canyon. Personally, I would really love to ride a gondola up the canyon. I just can't justify the cost and the possible tax burden it would put on those who do not use the canyon.</p>	A32.29VV
49683	Dearden, Ethan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p>	A32.3A; A32.3F

42174	Decker, Timothy	<p>I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	A32.3A

39814	Dehner, Charlie	<p>In Little Cottonwood Canyon, Portions of Twin Peaks and Lone Peak, as well as White Pine have been designated as Inventoried Roadless Areas (IRA's). The construction of the gondola would directly violate the Roadless Rule and have a negative impact on these wilderness areas. The Forest Service has stated that road construction, as well as timber harvesting, have been prohibited to protect these areas from the impacts of construction. The construction of a gondola would require implementing towers, angle stations and snowsheds. Vegetation would have to be cleared, and I imagine roads would have to be put in to access various construction sites throughout Little Cottonwood Canyon. UDOT has failed to asses how the construction of their gondola would violate the existing rules regarding IRA's. A \$1 Billion+ transportation project within the listed IRA's will negatively impact the watershed, wildlife and the wilderness areas themselves. NO GONDOLA</p>	A32.29VV

40114	Del Fiol, Guilherme	<p>1) It is very unreasonable and unfair for Utah citizens to pay for any of these proposed improvements, given that a very small percentage of the Utah population ski in Snowbird and Alta. The gondola is the most unreasonable of all options since it only benefits those who ski and it will be useful only for a very small number of days during the year.</p> <p>2) This season's record snow fall will certainly raise arguments favoring the gondola, but this year's data can't be taken into account as the norm since it's a once in a lifetime event. We will likely be back to the new normal of 350 inches per season.</p> <p>3) Both the gondola and the lane expansion are expensive, patchwork solutions. The elephant in the room is that those two resorts cannot handle more people than they currently do. I don't see possible longterm solutions other than expanding the bus service to a certain extent and then limiting access.</p>	A32.29VV

42164	Dencic, Alex	<p>With the additional information provided, I believe it is more clear that the gondola is not the best proposed method of transportation for little cottonwood canyon.</p> <p>I would strongly prefer for UDOT to disincentivize private vehicle transport to ski resorts by not allowing private vehicle parking and offering a convenient and plentiful bus alternative (which was promised as a trial period but lacking this past season winter). The gondola is the most expensive, most limited and highest impact option presented all while failing to meet the needs of all canyon users.</p>	A32.29VV

40344	Dennis, Pat	<p>After reading the recent article in the KSL, regarding the tunnel, and the assessment made early on I implore you to revisit all the options again. The gondola is a very expensive, destructive and quite possibly a poor alternative to getting people up the mountain. We all make mistakes, or do not have all the information we need at the time a decision is made. This is where, sticking your head in the sand versus standing up and saying I may have made a mistake means all the difference in the world to your constituents.</p> <p>If you can't sense, the rising tide of negativity around this decision, someone is miss informing you. I am absolutely sure there will be a certain population who will be deeply upset about backing down on the gondola, but the vast majority will sing your praises.</p>	A32.29VV

39297	Dent, Alan	<p>For the love of God, can we please not add a \$25 toll to simply drive the canyon? I just don't understand why this is thought of as a good idea to take more money from people's wallets to visit public lands that we already supposedly own collectively. At the very least, if you are going to toll, then please make allowances for car pooling, i.e., if you car pool with a certain minimum number of folks (e.g., three) the toll should absolutely be waived. PLEASE!!! If the intent is truly to reduce traffic in the canyon, then carpooling is a valid solution the stated problem. I already spend a gazillion dollars to ski at Alta, and now I have to pay for parking on the weekends, next I'll have to pay a \$25 to \$35 dollars toll, and that amount will escalate as the years go by. \$25, really? Why so expensive??? It should be like \$3 or \$5 max. if you are going to have a toll. And it simply is not a good option for me to bring my entire family with multiple small children by riding a bus while trying to carry all kinds of gear. This simply becomes a miserable experience for all involved and takes the enjoyment out of the visiting the canyon. Please figure out a way to not impose more cost and hassles on families that are trying visit and enjoy their canyon.</p>	A32.29VV

40580	DeShazo, John	<p>It seems we just stopped the Tree Farm Gravel Pit and now we are facing an unpopular gondola. I live in Huntsville, Alabama. We have a cabin at 7,000 feet elevation in Mt. Aire Canyon. Our family, comprised of our daughters, their husbands and a total of four grandchildren of ours live in Salt Lake City.</p> <p>I could tell you the story of Birmingham, Alabama and we moved to Huntsville, away from that rat trap. When I graduated from the University of Alabama School of Dentistry in 1964, the population of Birmingham was a bit over 600,000. Today it is 235,000. The reason the population has declined is related to the failure of City fathers to deal progressively with both a long standing civil rights issue and AIR POLLUTION.</p> <p>Salt Lake City has almost precisely the same problem with Birmingham in connection with air pollution, a valley surrounded by mountains that creates a temperature inversion in the valley. Nevertheless, Salt Lake City is worse because the mountains are higher and steeper. In addition, Salt Lake City has extreme dust producers in every pathway into and out of the city. In addition, we have in Salt Lake, a much greater potential for wildfire.</p> <p>The primary industry of Utah and Salt Lake City has gradually evolved into recreation. In addition, Salt Lake is evolving into a medical center for the region, same as Birmingham, At the same time, the enthusiasts for formation of a heavy construction industry seem to be growing on every tree. We have a wonderful place to live in Utah, yet population growers will do their darndest to import all the suffering of other overpopulated areas.</p> <p>I say, STOP. There is no cause to spend public money on a gondola. Let's do better to slow the growth of Salt Lake, lest we end with the Birmingham style of city with a murder a day. That is 365 murders a year. No one will venture downtown if we let that happen. We have in Salt Lake better ways to spend money than a gondola.</p> <p>Sincerely, John W. DeShazo, DMD</p>	A32.29VV

39723	Desino, Brenda	<p>I live in Cottonwood Heights, Utah and am writing to let you know that I strongly oppose the proposed gondola in Little Cottonwood Canyon. In addition to not solving traffic congestion, threatening our critical watershed, and not serving all users of the canyons, the gondola would be built in three federally protected Roadless Areas where road and recreational construction is typically prohibited.</p> <p>The three protected areas (Twin Peaks, Lone Peak, and White Pine Roadless Areas) would have their beautiful natural qualities diminished by eight gondola towers, snow sheds, angle stations, and extensive vegetation removal. This is an unacceptable proposition, and lower impact alternatives must be considered.</p> <p>Rather than diminishing the roadless characteristics of Little Cottonwood Canyon with gondola construction, I urge you to consider lower-cost solutions that utilize existing infrastructure, like enhanced bus service, carpooling incentives, enforcement of the traction law, and required reservations to park at ski resorts.</p> <p>After all of the widespread opposition from local constituents, communities, and public officials, I'm disappointed that the gondola is still being considered. Please continue to advocate for common sense, environmentally friendly solutions that will benefit ALL canyon users year round.</p> <p>Thank you</p>	A32.29VV

39257	Dickerson, David	<p>Please don't move forward with the gondola. It only helps seasonal skiers accessing two privately owned ski resorts. It doesn't help hikers, bikers, climbers, etc during the other 8 months of the year. It doesn't help back country skiers get up the canyon either. This is a tax payer funded Disneyland ride to enrich two private companies. Don't scar this beautiful canyon for a gimmicky gondola ride.</p>	A32.29VV

55747	Diegel, Craig	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Craig Diegel</p>	A32.3A; A32.3F
39970	Diegel, Paul	<p>I'm writing to express my displeasure with the careless and disingenuous disregard the Little Cottonwood Transportation EIS has shown for following the 2001 Roadless Conservation Act.</p> <p>In Little Cottonwood Canyon, White Pine and portions of Twin Peaks and Lone Peak are designated as Inventoried Roadless Areas (IRA).</p> <p>During the EIS process, UDOT failed to asses how constructing a gondola would violate the Roadless Rule.</p> <p>A gondola would require implementing towers, angle stations, snowsheds, and clearing vegetation in protected IRAs.</p> <p>UDOT claims building a gondola does not violate the Roadless Rule since it is not for motor vehicles, and any vegetation and timber removal would be incidental.</p> <p>A \$1 billion+ transportation project within IRAs, which will negatively impact wilderness areas, inhabiting wildlife, and the watershed, directly contrasts with the spirit of the Roadless Rule and the areas it protects.</p> <p>In addition, evaluation of a scenario under the existing modeling where all ski buses would be powered by diesel fuel rather than the model default which consisted of diesel, compressed natural gas, and gasoline powered buses; and that all transit buses be evaluated at the maximum expected service life of 14 years rather than a variable age bus fleet carefully ignores the reality that a hybrid fleet scenario is highly likely. It appears that UDOT is deliberately biasing the alternatives to bolster their preferred alternative and is misrepresenting the alternative preferred by the vast majority of local residents and governments.</p> <p>These actions further reinforce the local belief that UDOT is actively attempting to circumvent Federal law and public sentiment to subsidize 2 local businesses with public funds.</p>	A32.3A; A32.3F; A32.3G; A32.3I; A32.10G
41990	Diegel, Tom	<p>The simple fact that the roadless rule has been in place for 2 decades yet now is being compromised by adding a new taxpayer-borne ski lift that will only directly affect paying ski resort patrons is indicative of the inherently-flawed nature of this plan. How many times do you have to hear that the people do not want this gondola!?! And that it will not significantly address the traffic issues, and will not open the canyon up during avy work? And that it's a violation of fundamental rules - like the roadless rule - where previous potential modifications were not even considered? The simple fact that you are opening this up now to public comment is indicative of how incomplete this process has been; "hey, we've been working on this for years, did anyone think that it might affect our he roadless part of the Forest Plan?"</p> <p>Please stop while you are behind.</p>	A32.3A; A32.3F
42349	Diehl, Rebecca	<p>Little Cottonwood Canyon is a rare gem in Utah. Each day, lands across the US are forever altered by human hands. A gondola in LCC would permanently rob present and future generations of a rare form of solitude and beauty found so close to an urban center. Many species of plants, insects and animals will also suffer dire consequences. Loss of biodiversity requires an urgent call to action. UDOT can take action by not building a gondola in LCC.</p> <p>I have been visiting LCC for over 20 years. I worked in the canyon for 6. The wilderness-type experiences that I have had hiking and skiing in the Canyon are priceless. Building a gondola in the roadless areas will gravely alter the unparalleled views and experiences.</p> <p>I say NO to the gondola because it won't solve traffic congestion and it will destroy critical habitat and valuable views and recreation opportunities in roadless areas. The people have spoken- the majority are opposed. No gondola.</p>	A32.29VV
54474	Dieker, Robert	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 41556	dillon, spencer	<p>The gondola will violate the roadless rule and be tied up in environmental litigation until the lake dries up and the snow stops falling. the decades it will take will surely eclipse whatever value it provides.</p> <p>It is also profoundly wasteful for the benefit. WHY NOT BUSSES AND SNOWSHEDS?? The gondola only caters to the ski areas and will not alievate summer crowding or congestion for other users. And it will not solve Alta's traffic bottleneck as there will still be a 'merge' at the snowbird terminal.</p>	A32.3A

42368	Disney, Julia	<p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule. As a years-long resident of Salt Lake County, we need to use logic and common sense that tolling and bussing would be a much easier solution and have much less impact on the beautiful Little Cottonwood Canyon.</p>	A32.3A

41698	Dixon, Lynn	<p>I strongly support the enhanced bus option. Everyone I know still takes their personal vehicle up the canyon. People complain about the traffic but they continue to drive themselves. Nothing will improve until we have less private vehicles going up the canyon. The gondola takes long and therefore, people will not use it unless they are forced. Rather than spending all the money on that gondola option, we need to limit personal vehicles going up the canyon especially on snow days. That is a low cost, accessible option to improve the situation... enhanced buses and enforced utilization of mass transportation. Like Zion's National Park...</p>	A32.29VV

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Rosemarie Dojcek</p>	
41997	Dolan Mitchell, Cate	<p>I am writing to request that the planning for the gondola be considered, especially because it would negatively impact areas protected by the Roadless Area Conservation Rule. Even though there will not be a final road, the gondola is still a transportation thoroughfare that will be running through these areas -- and the environment will inevitably be impacted on the ground during the construction of the gondola towers. The gondola still also only serves the two commercial resorts at the top of the canyon, but has a cost for all taxpayers, regardless of whether they utilize the ski resorts. Other more cost effective and less environmentally-impactful options exist to address the traffic congestion in the canyon - increased bussing, cost incentives for using the busses, busses that access all trailheads and not just the resorts, etc. Please reconsider the permanent environmental impact that the gondola would have on the Roadless Areas within Little Cottonwood Canyon.</p>	A32.3A; A32.3F

Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Gregory Dolan</p>	A32.3A; A32.3F
40418	dolan, kevin	<p>As a Utah resident, i'm totally against any proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	A32.3A
41237	dolan, kevin	<p>As long time residents of Sandy and Cottonwood heights, we are absolutely against funding, building and operating any type of gondola in LCC. We should not be destroying roadless areas and any other LCC sections with gondola towers just to ameliorate a several days of congestion in LCC. Utah taxpayers should not bear the burden of this boondoggle. Do not build the gondola. There are many more options to try first before committing to a monstrous project that most Utahns do not want or need.</p> <p>We wish to see UDOT's screening which measures polluting effect be based on non-diesel (electric or natural gas) buses, which is the transit of the future, when comparing the gondola to bus service. Right now UDOT FEIS is based on metrics utilizing diesel-only/14 year old buses. By the time the gondola would be built, closer to 2050, with all the federal incentives for non-polluting transit, electric buses will be even more technologically advanced than they are now. Proterra bus manufacturer has proved electric bus worthiness for steep canyon highways in recent years."</p>	A32.3A; A32.3F; A32.10G
40419	dolan, kevin	<p>I do not want gondola towers anywhere near protected roadless areas in LCC. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities. I'm also against Utah taxpayers paying for any type of Gondola. There are many other better and cheaper options to use that will reduce several traffic congestion ski days, and I'm a skier. thank you</p>	A32.3A; A32.3F
46702	Dolan, Kristina	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Kristina Dolan</p>	A32.3A; A32.3F

I also ski 60+ days a year in LCC. I also hike and visit and camp in the summer in LCC and Albion basin camp grounds.</p> <p>It is amazing to me that the public that is to pay for this does not want it yet the legislature and developers continue to push it.</p> <p>We know better now let's do better.</p> <p>We need better parking in sandy near bus depots where rides are always available like a subway. A gondola is about down canyon hotel and resort development which should not happen given the geology and canyon layout. That is what park city eden and other places can provide.</p> <p>No gondola for LCC</p> <p>Thank you.</p> <p>William Donahoo</p> <p>Regards, William Donahoo</p>

41656	Doppstadt, Daniel	I don't think the gondola is a good solution because of its expense and because of the damage it will cause to the surrounding environment. A better solution would be more investment in the UTA bus program and restricting upwards traffic during congested times. I moved to Utah in large part because of its natural beauty and access to world class ski resorts. I am disheartened at the prospect that UDOTs likely solution to the latter will involve destroying the former without actually solving the problem. Please consider the larger implications of this decision and recognize the irreversible damage this will do to Utah's desirability as a home and tourism destination.	A32.29VV

51970	Dougherty, Will	<p>To whom it may concern,</p> <p>Below this is Patagonia's canned call to action letter and I agree with it. I got to know the Little Cottonwood Canyon in my time as a student field geologist. The canyon is high on my list of road trip destinations this summer because of how beautiful it was when I first visited. I know how congested the road becomes. It seems to me that there are many drivers who would be happy to use a public transit alternative if it were more convenient and accessible. Additionally, to threaten a headwater for the major population center when your salt lake is withering strikes me as a bad idea. Genuinely, a magic carpet up the canyon is a better idea than this.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40034	Douglass, Carol	<p>The less environmental impact, the better. Bus service that meets demand and tolls will decrease traffic. The longer commute is well worth the slight inconvenience compared to the future of the canyon. Climate change could result in low snow totals in winter, fires in summer.</p>	A32.29VV
42362	Douglass, Robert	<p>UDOT LCC FEIS Air Quality Supplemental Report fails to analyze the best air quality option for LCC: electric buses: The UDOT Little Cottonwood Canyon (LCC) FEIS Air Quality Supplemental Informational Technical Report fails to evaluate the best air quality technology for the LCC Project: use of all electric buses. The supplement addresses the use of an all-diesel bus fleet for its bus alternatives analyzed in the FEIS. These are the most polluting of the bus options that UDOT could have chosen. Analysis by researchers at the University of Utah have determined that the gondola produces more pollution than an all-diesel bus fleet, but the pollution is created primarily at electrical power generation stations remote from LCC. These power stations in Utah primarily burn coal and are heavy polluters of both greenhouse gases and other environmentally damaging chemicals like sulfur compounds. The gondola is less polluting in the immediate vicinity of LCC than any of the bus alternatives, even though the gondola causes worse air quality over the region. The FEIS and the Supplemental Air Quality report ignore the significant CO2, sulfur, and other pollutants generated by burning coal in Utah power plants to power the electric motors of the gondola. No EIS is accurate nor complete without considering the full air quality and air pollutants of all alternatives from all sources for transit in LCC. The UDOT impact study either needs to be reopened and done correctly to fully analyze air quality impacts caused by the gondola regionally or else the USFS needs to conduct its own EIS and issue its own ROD.</p>	A32.10G

42388	Douglass, Robert	<p>New roads, timber harvesting, and clearance areas are much larger for snow sheds in the IRAs than UDOT's Supplemental IRA Report States – Snow Shed Berms: UDOT's FEIS "Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives" describing its preferred "snow shed with berms alternative". This alternative identifies several large berms lying within US Forest Service Identified Roadless Areas (IRAs). These berms are designed to channel the flow from several avalanche chutes onto and over several long snow sheds. Constructing these berms will require heavy equipment to remove timber, plow up the terrain to create the berm and so doing strip a large area of timber and vegetation on the north side of S.R.210. The berms must be paired with some rechanneling of the topography to induce avalanche slides to converge on the snow sheds. New roads in the IRA are required to access the locations for the berms and to grade the terrain to form berms and grade the terrain to funnel avalanche slides onto the snow sheds. These construction access roads will proceed uphill for some distance through the IRA on each side of the snow sheds. Cranes and helicopters cannot be used to create these berms and channelize the terrain, heavy equipment will need to drive up new access roads from S.R.210. After construction, not only will the road scars persist in the IRA for many years, the berm and channelization will alter the terrain permanently. The FEIS and Supplemental Report on IRA impacts does not accurately describe the process of constructing the berms nor the size of the impact on the IRA in violation of the RACR stipulations. Given the inadequacy and omissions in UDOT's FEIS and Supplemental Report, the US Forest Service needs perform its own assessment, develop its own EIS and generate its own ROD that will prevent these significant impacts to the IRA.</p>	A32.3H
42404	Douglass, Robert	<p>Golden eagles exist and nest in Little Cottonwood Canyon, including in IRAs, but the FEIS incorrectly asserts that they don't exist in LCC: Golden eagles have been observed by numerous visitors to Little Cottonwood Canyon (LCC) over many years, this commenter included. The Utah chapter of HawkWatch International has confirmed and monitored golden eagle nests within LCC. The Utah Division of Wildlife Resources (DWR) is aware of the presence of golden eagles and nesting pairs in LCC including the mouth of LCC. DWR informed UDOT of the presence of golden eagles in LCC during their EIS process but appears to have had no response from UDOT acknowledging their presence. To the contrary, the UDOT FEIS (Vol. 13, p.13-19, Table 13.3-6) states golden eagles "have NOT been observed in the area." The FEIS is in error omitting an assessment of ecological impacts on golden eagles in LCC and in the IRAs. This error represents negligence in the NEPA process, especially if UDOT has been informed of their presence. UDOT's gondola option B would span 8 miles of LCC, and present both a danger and a disruption to golden eagles. The towers, gondola cabins, and eight miles of six large, steel-rope cables present a danger to golden eagles in flight. UDOT's FEIS says the proposed gondolas would make about the same amount of noise as the highway, but because the highway is already in place and will remain so, the gondola effectively doubles the amount of noise in the Canyon. The FEIS is in error asserting that this noise, the moving visual distraction of the cabins, and the high towers and steel ropeways are not a significant distraction and danger to golden eagles. Nesting behavior would be affected detrimentally by the existence and operation of the gondola. Hunting, mating, and resting behavior would be disrupted or endangered as well. Small wildlife, the primary food supply of golden eagles in the Canyon, is concentrated along the bottom of the Canyon where vegetation is heavy, and water is plentiful year-round. This area is precisely the area that the gondola will traverse while hunting and diving to the ground for prey. Golden eagle behavior will be especially hazardous in the presence of 130-230ft towers, six steel ropeways, and moving gondola cabins. The FEIS ignores this ecological impact both in the IRAs and throughout the Canyon by asserting that it does not exist when it does. The Forest Service needs to conduct its own EIS in the light of this important oversight in UDOT's EIS.</p>	A32.29VV
42411	Douglass, Robert	<p>The UDOT FEIS and Supplemental Report on IRAs omits or misstates the danger and disruption of the proposed gondola alternatives in Little Cottonwood Canyon (LCC) to many raptors protected by the Migratory Bird Treaty Act of 1918. Among these raptors known to be resident for part or the entire year in LCC are red-tailed hawks, great horned owl, and the northern saw-whet owl. Red-tailed hawks consistently hunt and nest in LCC. Saw-whet owls occur in LCC at least during their mating season on an annual basis. Great horned owls are resident in LCC year-round and most certainly nest within the Canyon. Eight-miles of 6-runs of steel-rope cables supporting the gondola along with large moving gondola cabins and 130-230ft towers will pose a danger to raptors while they hunt and mate. The visual motion and noise of the gondola will also disrupt hunting, mating, resting, and nesting in LCC. The flashing lights on some or all of the towers will be especially disrupting to nighttime raptors, like the saw-whet and great horned owl. None of these avian residents of LCC, protected by the Migratory Bird Treaty Act, are listed as impacted by the gondola alternatives in UDOT's FEIS or the Supplemental Report on IRAs. The FEIS and its March 2023 RACR Supplement fails to list dozens of protected bird species that will be endangered or disrupted by a gondola. The UDOT FEIS fails to provide mitigations or even basic impact assessments for these protected species. The portions of the gondola inside the Identified Roadless Areas will have special impact on protected raptors and other species, because of the pristine nature of much of the IRAs. The construction of the gondola, along with required new roadways, excavations, timber harvesting, and berms will have a significant impact on protected avian species – impacts that the UDOT FEIS omits or discounts as insignificant. The US Forest Service must conduct its own environmental assessment and EIS to correct for UDOT's EIS omissions and errors.</p>	A32.29VV
41594	Douglass, Robert	<p>UDOT proposes to build a gondola angle station adjacent to Tanners Flat Campground (FEIS Vol. 16, Section 16.4.5). This angle station and the adjacent Tower 9 are within two of the US Forest Service (USFS) Identified Roadless Areas (IRA). The angle station will require new roads for access and construction. It will require a paved area for the angle station itself as well as for vehicle access and parking. Besides the normal impacts of timber harvesting, new road construction, and paving in an IRA, the angle station and its adjacent Tower 9 resides on top of and adjacent to a former ore smelting operation that according to UDOT states "has a high probability of contamination" with heavy metals (UDOT LCC FEIS, Vol 16, page 16-12).</p> <p>The EPA is aware of the site and conducted a preliminary assessment but concluded that a full assessment and remediation were not required at that time. At the time of EPA's preliminary assessment, the EPA had no reason to expect the site to ever be disturbed or occupied because the site resides on USFS land, lying within an IRA. There was no likelihood that it would be excavated or developed at that time. (UDOT LCC FEIS, Volume 16, page 16-6). Now, however, UDOT FEIS prefers an alternative requiring new roads for the construction, maintenance, and operation of Tower 9 and the Tanners Flat angle station. This will require extensive excavations and human presence precisely on this potential EPS super fund site. UDOT says of the preliminary finding from some years ago: "there could still be mining wastes at these sites that, if disturbed, would need to be managed in a protective manner. Also, this site is within the Tanners avalanche path." (FEIS Vol 16, p.16-6).</p> <p>UDOT failed to assess the environmental threat to human health, wildlife, and watershed posed by this "highly probable" threat. UDOT's FEIS finding of 'minimal impact' for the angle station and tower 9 in its FEIS IRA Supplemental Report is in error because it omits an assessment of exposing one of the most serious types of environmental hazards: lead and arsenic poisoning. For the same reason UDOT's finding of 'de minimis' impact of excavating this hazardous site adjacent to public recreation areas, such as Tanners Flat Campground, is incorrect. A NEPA process and an EIS that omits an assessment of such a threat is negligent.</p>	A32.3H

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		UDOT has declared its EIS complete, and therefore the USFS must conduct its own EIS. The USFS first must request that the EPA conduct a full environmental impact study of the site, given this new proposed land use. The EPA must then execute any required remediation. After the EPA has remediated the site and assessed the effectiveness of the remediation for UDOT's new land use, then the USFS can complete its own EIS and ROD. An accurate environmental assessment cannot be made until the EPA assesses the danger to public health, wildlife, and watershed from excavations and operations of the angle station and Tower 9 construction and until all required remediation is complete and its effectiveness can be assessed.	
42249	Douglass, Robert	Newly constructed roads will remain permanently in the IRAs and be larger than UDOT claims: UDOT's FEIS "Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives" falsely claims that no new roads will be built to access gondola towers on US Forest Service (USFS) land within the Identified Roadless Areas. That is incorrect. Roads will be required for construction – helicopters and cranes cannot excavate tower footprints, angle station footprints, and tower diversionary berms; a road will be needed for each for construction. After construction, new roads established for construction to each tower will continue to exist and be maintained permanently. Gondola towers will need regular inspections and special inspections after avalanche mitigation. All lift towers need road access for maintenance and repair. All lift towers need a right of way to access them for emergency operations. Helicopters cannot work closely to 130-230ft towers, much less ones that support miles of six-runs of large steel ropes. If helicopters are to be used for maintenance, inspections, and repairs, then UDOT will need to clear and level areas of timber and vegetation a safe distance away from each tower for the helicopter to land and/or deposit equipment. The helicopter landing/drop zone will itself need a new road to the base of the tower to move equipment and personnel to the tower. UDOT's supplemental report on IRAs fails to identify these non minimal harvests of additional timber and new roads and cleared working areas that will be needed either to reach the towers from the road or reach the tower from helicopter operations pads. These new roads will be permeant. Because of these omissions and flaws in UDOT's FEIS and IRA supplemental report, the USFS needs to conduct its own EIS and issue its own ROD to correctly assess the impacts of the new tower roads and the towers themselves.	A32.3H
41929	Douglass, Robert	UDOT's call for comments on the Supplemental Report on IRAs cites US Code, Title 23 Section 317 (23 USC §317) as its authority for appropriating land for the proposed gondola of the FEIS's preferred alternative. As part of that alternative, UDOT proposes instituting tolling on S.R.210 and USFS land. Title 23 explicitly prohibits tolling on such highways: 23 USC §301 – Freedom from tolls: "highways constructed under the provisions of this title shall be free from tolls of all kinds." Section 301 cites section 129 of USC 23 for exceptions to 'no tolls'. Section 129, however, does not allow as an exception to the "no tolling" statute that tolling can be introduced to limit traffic on a state roadway or for the purposes of diverting traffic to a gondola. If UDOT is correct in citing 23 USC 317 as the authority for appropriating federal land, then UDOT is in error including tolling in their preferred alternative for a gondola in Little Cottonwood Canyon. An amended EIS is required from UDOT or a new EIS is required from the US Forest Service citing clear authorities for new road building on appropriated Federal Land for tolling in conjunction with UDOT's preferred alternative in Little Cottonwood Canyon.	A32.29VV
41923	Douglass, Robert	5. UDOT's call for comments on the Supplemental Report on IRAs cites US Code, Title 23 Section 317 (23 USC §317) as its authority for appropriating land for the proposed gondola of the FEIS's preferred alternative. However, UDOT in their "Public Comment Period For Supplemental Information Reports Open Until April 18" provides the public with a website link to a UDOT site that redirects the public directly to Title 36 USC § 14.50 Authority. This part of Title 36 explicitly states that it subject to Subpart D – Under Title 23, U.S.C. (Interstate and Defense Highway Systems). This link conflicts and contradicts UDOT's text. In UDOT's call for comments: Text: "23 USC 317" Embedded link: https://udot-zgph.maillist-manage.com/click/18598208e933bd4c/18598208e93236df The link provided by UDOT does not cite a US Code that provides FHWA authority to allow UDOT to appropriate National Forest System land for transportation purposes in Little Cottonwood Canyon, because S.R.210 is not part of the National Highway System, being neither an Interstate nor a defense highway per U.S. Code Title 23 Section 103. To summarize, UDOT's "Public Comment Period For Supplemental Information Reports Open Until April 18" does not provide clear guidance to the public as to which US Codes actually apply. UDOT provides two references to two different US Codes that conflict in terms of authority for UDOT. Without clear guidance, and in fact with conflicting guidance, the public cannot provide informed comments to UDOT's Supplemental Information Reports. A new, corrected and unambiguous Public Comment Period is required.	A32.3G
42370	Douglass, Robert	UDOT LCC FEIS Air Quality Supplemental Report fails to accurately analyze the most beneficial air quality alternatives provided by the use of electric buses: The UDOT Little Cottonwood Canyon (LCC) FEIS Air Quality Supplemental Informational Technical Report fails to evaluate the best air quality technology for the LCC Project: use of all electric buses. The supplement addresses the use of an all-diesel bus fleet for its bus alternatives analyzed in the FEIS. These are the most polluting of the bus options that UDOT could have chosen. By choosing all diesel buses for the FEIS bus alternatives, UDOT has consciously chosen to bias its Environmental Impact Study away from bus solutions as far as air quality is concerned. UDOT clearly erred in the FEIS when it used a mix of diesel, CNG, and gasoline buses to compute its air quality impact. The FHWA correctly asked UDOT to reanalyze bus pollution using a fleet of all diesel buses to be consistent with UDOT's description of the bus alternatives in the FEIS. However, both FHWA and UDOT erred in not altering their description and analysis of bus alternatives to use an all-electric bus fleet. No clear reason was presented in the FEIS or the Supplemental Report for why electric buses – the least polluting option – were not chosen for UDOT bus alternatives. On two occasions, electric buses have been demonstrated to be fully capable of driving up all the Salt Lake area Wasatch canyons including Little Cottonwood Canyon. The mayors of Sandy and Alta rode on one of the demonstration electric bus trips. Speed, cornering, and energy user were demonstrably better with electric buses in these demonstrations compared to diesel buses. While electric buses at present have a greater purchase cost, a report by the US Department of Energy's Idaho National Energy Laboratory showed that electric buses were normally cheaper than diesel buses over their life cycle. Since the DOE report was done several years ago, diesel fuel costs have increased substantially, making electric buses even more cost effective for UDOT's LCC bus alternatives. For UDOT to ignore electric bus alternatives with their lower costs and far less air pollution is negligent on the part of UDOT's NEPA process and negligent in their supplemental report. UDOT should have supplemented both their bus alternative designs in the FEIS as well as providing a complete update of its air quality analysis. The UDOT impact study either needs to be reopened and done correctly to fully analyze air quality impacts caused by the gondola alternatives compared to electric bus alternatives or else the US Forest Service needs to conduct its own EIS and issue its own ROD to provide the best protection for Forest Service Identified Roadless Areas, public recreation areas, and National Wilderness Areas – all affect by UDOT's LCC project alternatives.	A32.10G
42395	Douglass, Robert	Diversion berms for UDOT's preferred alternative snow sheds will significantly and permanently alter the environment, including the watershed within the IRAs: UDOT's FEIS "Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives" describing its preferred "snow shed with berms alternative".	A32.3H

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>This alternative identifies berms in the IRA on the north side of S.R.210 designed to divert avalanche slides and debris and funnel them over a small number of snow sheds to the south side of S.R.210 into a different IRA. If constructed correctly, these berms will channel multiple avalanche chutes into a narrower area covered by the snow sheds. This will concentrate the accumulation of snow and avalanche debris (boulders and trees) into a more compact area with deeper accumulation on the south side of S.R.210 in a different IRA. The berms and channeling of the topography will also alter the watershed by altering the flow of both surface and subsurface water. The result could be increased erosion both inside the IRAs beyond the snow shed area as well as between them on both sides of S.R.210. UDOT failed to properly analysis the footprint and the impact of the berms and the modified topography between the berms on the watershed. These impacts affect drinking water (a source for tens of thousands of Salt Lake County residents), wildlife, vegetation, and human activity. The head of water resources for Salt Lake City, an authority on the LCC watershed, did analyze these impacts and determined that they were significant and not accurately represented in the FEIS. They have not been accurately assessed in the Supplemental Report on IRA impacts either. The concentration of snow and avalanche debris from multiple slides channeled into a narrower course by the berms and snowsheds has also not been properly analyzed. UDOT either needs to reopen its EIS process to fully analyze impacts of snow shed berm construction as well as long-term modifications caused by the action of the berms and topography modifications once built. Failing that, the US Forest Service must conduct its own environmental impact study and issue its own ROD that will protect this portion of the IRAs.</p>	
42246	Douglass, Robert	<p>More new roads for construction in IRAs than the UDOT's Supplement States: UDOT's FEIS "Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives" fails to identify numerous new roads that UDOT will build in the three US Forest Service (USFS) Identified Roadless Areas (IRAs) in Little Cottonwood Canyon (LCC) in violation of the Federal Act: 2001 Roadless Area Conservation Rule (RACR). UDOT's supplement incorrectly and misleadingly states that the towers in the USFS IRAs will be constructed without building access roads. They say the tower sections can be emplaced with a crane from S.R.210 or with a helicopter. While tower sections can indeed be emplaced with a crane or a helicopter, providing the budget allows for it, but UDOT's basis of estimate for gondola construction, discovered by GRAMMA request, does not appear to fund such helicopter operations. Even if budgeted, a helicopter or a crane cannot excavate the extensive holes needed for the tower footings. These footing must anchor 130–232-foot towers in a Canyon plagued with frequent winds, often up to 100mph or more, and frequent by violent storms. Heavy equipment will be needed in the IRAs to excavate holes the sizable footings and to remove the volume of soil and rock excavated. Delivering the materials to form and then fill the footings with concrete bases of sufficient mass will be prohibitively expensive by helicopter for all tower footings not directly reachable from S.R.210. Timber and other vegetation will have to be removed from both the area under and around the footings and on the road that construction equipment will use. The construction of towers in the canyon will cause irreputable damage to the canyon ecosystem. UDOT incorrectly assesses the environmental impact of tower construction as being limited to the precise footprint under the towers. This is a false assessment. UDOT neglects both the road and the area around the towers that will need to be cleared for heavy machinery to operate. If the heavy equipment is emplaced by a crane or helicopter, an area will need to be cleared of timber and vegetation to land the equipment and then for it to operate around the footings. This area will be significantly larger than the small area that UDOT identifies in its IRA supplemental report. This will impact the watershed, wildlife, and recreational values beyond the specific footprint of the tower identified by UDOT. UDOT has declared its environmental impact study complete and issued a final EIS report. To correct the errors and omissions in the UDOT FEIS and Supplemental Report on IRAs, the US Forest Service must conduct its own EIS and issue its own ROD.</p>	A32.3H
42406	Douglass, Robert	<p>UDOT's FEIS and Supplemental IRA Report incorrectly asserts that bald eagles in Little Cottonwood Canyon will not be impacted: The FEIS acknowledges the presence of bald eagles in Little Cottonwood Canyon (LCC). The FEIS states that LCC provides wintering habitat for bald eagles. UDOT states that bald eagles have been sighted in the Canyon. However, UDOT states that bald eagles would not suffer harm or disruption because they have never been reported within a 2-mile radius of the study area. Asserting that a massive 8-mile gondola directly adjacent to Little Cottonwood Creek would have no impact on bald eagles, just because they have not been reported to UDOT over that piece of the Canyon is a fallacious argument. Bald eagles travel tens of miles every day and they most certainly cross the Canyon over the gondola impact area, probably repeatedly during a day when in residence. The LCC Creek is a prime resource for bald eagles. The Creek runs within meters of the gondola in many places, well within the EIS impact study area. It is not credible that bald eagles will not pass directly over the gondola's route and attempt to dive past the towers, gondola cabins, and through the 6-runs of steel rope. When they do, they will be in danger of colliding with the 6 wires, 22 towers, and dozens of gondola cabins – collisions with steel cables are the second highest cause of raptor casualties. It is not credible to say that a gondola would pose no danger to bald eagles and other raptors. In addition, the noise (equivalent to adding an entire new road per UDOT's FEIS) and visual motion of the gondola would indisputably be distracting and disrupting to bald eagles and other raptors in the Canyon, whether hunting, mating, resting, or nesting. The US Forest Service needs to complete a more accurate and comprehensive impact study, issue its own EIS and ROD to protect bald eagles and their habitat in LCC as well as other raptors.</p>	A32.29VV
42390	Douglass, Robert	<p>New roads, timber harvesting, and clearance areas are much larger for snow sheds in the IRAs than UDOT's Supplemental IRA Report States – Snow Shed Berms: UDOT's FEIS "Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives" describing its preferred "snow shed with berms alternative". This alternative identifies several large berms lying within US Forest Service Identified Roadless Areas (IRAs). These berms are designed to channel the flow from several avalanche chutes onto and over several long snow sheds. Constructing these berms will require heavy equipment to remove timber, plow up the terrain to create the berm and so doing strip a large area of timber and vegetation on the north side of S.R.210. The berms must be paired with some rechanneling of the topography to induce avalanche slides to converge on the snow sheds. New roads in the IRA are required to access the locations for the berms and to grade the terrain to form berms and grade the terrain to funnel avalanche slides onto the snow sheds. These construction access roads will proceed uphill for some distance through the IRA on each side of the snow sheds. Cranes and helicopters cannot be used to create these berms and channelize the terrain, heavy equipment will need to drive up new access roads from S.R.210. Afte construction, not only will the road scare persist in the IRA for many years, the berm and channelization will alter the terrain permanently. The FEIS and Supplemental Report on IRA impacts does not accurately describe the process of constructing the berms nor the size of the impact on the IRA in violation of the RACR stipulations. Given the inadequacy and omissions in UDOT's FEIS and Supplemental Report, the US Forest Service needs perform its own assessment, develop its own EIS and generate its own ROD that will prevent these significant impacts to the IRA.</p>	A32.3H
42260	Douglass, Robert	<p>UDOT's Supplement on IRAs uses a flawed methodology for accessing IRA impacts: UDOT's FEIS Supplemental report on IRAs assesses the impact of new roads and timber harvesting in the USFS Identified Roadless Areas as minimal. It supports this conclusion by examining each tower in the IRAs and the Tanners Flat angle station and saying each one has a footprint that is minimal as a percentage of its entire IRA. This is a flawed methodology. It is equivalent to stating that a new power plant in an IRA has a minimal environmental impact because the footprint under each coal-fired boiler is minimal and the footprint under each steam turbine is minimal and the impact of the footprint under each smokestack is minimal and the footprint under a short access road into the power plant is minimal compared to the size of the IRA in which you were proposing to build it. The impact of major construction, like a power plant inside an IRA is NOT minimal, even if the impact of the footprint of each component is minimal. Running a new high-tension powerline miles through the Little Cottonwood Canyon with 22 towers, eight towers in Identified Roadless Areas, rising on average 181 feet is not minimal, no matter how small the footprint is of each isolated</p>	A32.3I

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>piece. UDOT's preferred gondola alternative, is far more intrusive to USFS IRAs than a high-tension powerline running through them. It is larger, far noisier, and has far more visual impact than a high-tension powerline with dozens of continuously moving cabins. Besides omitting a great deal of construction and ground-clearing in LCC Roadless Areas, UDOT uses a flawed analysis methodology to arrive at a plainly wrong conclusion of minimal proposed impact to LCC's IRAs. The Forest Service needs to do its own Environmental Impact Study and issue its own ROD recommending against such an environmentally destructive transportation highway like the gondola in LCC IRAs.</p>	
42401	Douglass, Robert	<p>Diversion berms for UDOT's preferred alternative snow sheds will permanently alter movement of wildlife within the IRAs and between the IRAs over S.R.210: UDOT's FEIS "Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives" describes its preferred "snow shed with berms alternative" as constructing long berms in the IRA on the north side of S.R.210. These berms are designed to divert avalanche slides and debris and funnel them over a small number of snow sheds onto the south side of S.R.210 into a different IRA. The berms will not only divert snow and debris, but they will also divert wildlife to the ends of these long snow sheds so that wildlife can cross S.R.210 – wildlife will no longer be able to cross the road over the long expanse of the snow sheds. This change in two IRAs will impact wildlife because it will concentrate road crossing on each end of the snow sheds. This concentration represents a probable increase in motorist to animal collisions resulting the increased death of wildlife and increased property damage and injuries to motorists. Because these impacts occur in multiple Little Cottonwood Canyon IRAs and because they were not properly accounted for in the Final EIS or the Supplemental IRA Report by UDOT, the US Forest Service needs to complete its own accurate EIS and issue a ROD that will not permit this damaging change to the environment from the UDOT LCC project.</p>	A32.29VV
41311	Douglass, Robert	<p>3. UDOT's preferred gondola alternative is a highway according to Federal statute definitions: Title 23 U.S. Code § 101 Definitions and declarations of policy: Section (a) (11) Highway, part (B) defines a "highway" as "a right-of-way". U.S. Title 49 Subtitle B/Chapter III/Subchapter B/Part 390/Subpart A/ § 390.5T Definitions: "Highway means any road, street, or way, whether on public or private property, open to public travel". The proposed gondola is "right-of-way" and a "way" and therefore is a highway under Title 23 and under Title 49. A "highway" is synonymous with a 'public road' per the Federal Motor Carrier Safety Administrations directive: FMCSA-RG-390.5T-Q026, issued 4 April 1997. As a highway or public road, the gondola itself falls under the Congressional Roadless Areas Conservation Act of 2001, adopted by the US Forest Service (USFS) as the RACR Rule of 2001 and 2005. UDOT fails to assess the gondola itself as a new 8, mile-long road that crosses all three IRAs in Little Cottonwood Canyon. This constitutes a serious omission and error in the NEPA process and the FEIS and supplementary reports.</p>	A32.3G
42360	Douglass, Robert	<p>UDOT LCC FEIS Air Quality Supplemental Report fails to analyze pollution caused by the preferred gondola option's air pollution caused by its use of electricity generated predominately by Utah coal-fired electrical generators: impact of use electric buses: The UDOT Little Cottonwood Canyon (LCC) FEIS Air Quality Supplemental Informational Technical Report fails to evaluate the best air quality technology for the LCC Project: use of all electric buses. The supplement addresses the use of an all-diesel bus fleet for its bus alternatives analyzed in the FEIS. These are the most polluting of the bus options that UDOT could have chosen. Analysis by researchers at the University of Utah have determined that the gondola produces more pollution than an all-diesel bus fleet, but the pollution is created primarily at electrical power generation stations remote from LCC. The gondola appears to be less polluting than any of the bus alternatives, even though it is more polluting. The FEIS and the Supplemental Air Quality report ignore the significant CO2, sulfur, and other pollutants generated by burning coal in Utah power plants to power the electric motors of the gondola. No EIS is accurate nor complete without considering the full air quality and air pollutants of all alternatives from source to use by transit in LCC. The UDOT impact study either needs to be reopened and done correctly to fully analyze air quality impacts cause by the gondola or else the USFS needs to conduct its own EIS and issue its own ROD.</p>	A32.10G
41572	Douglass, Robert	<p>2. Under the US Forest Service Roadless Areas Conservation Rule (RACR) rule of 2005, states could petition for modifications to the 2001 RACR as it applies to a specific state. In 2019, the State of Utah petitioned the USFS to modify the 2001 RACR to exclude certain areas from the Identified Roadless Areas (IRAs) in Utah altogether and to allow for road construction for the purposes of improving forest health in several other petitioned areas. While Utah's petition is still pending, it is notable that the State of Utah's petition requests no exemption of the three IRAs in Little Cottonwood Canyon (LCC) from the 2001 RACR protections. Utah's petition specifically includes the IRAs in LCC as part of their petition's map of accepted IRAs. Utah and UDOT clearly have no objection to the enforcement of the 2001 RACR in LCC.</p> <p>UDOT's FEIS presents no compelling reason to violate the intent and the letter of the 2001 RACR in Little Cottonwood Canyon by building multiple roads. Roads would be built under the gondola alternatives for towers, an angle station, tower berms, snow shed attachments, and large snow-shed berms. Regardless of how large or small the collective footprints of those roads would be, there is no rationale or public-good reason for violating the 2001 RACR. UDOT and the FEIS have little reason not to fully comply with 2001 RACR restrictions because UDOT presents an equally effective alternative to a gondola, enhanced busing, that requires zero new roadways, zero new timber harvesting, and imposes zero new impacts within IRAs. The gondola imposes multiple impacts on all three IRAs it crosses, as well as on two closely adjacent National Wilderness Areas and numerous public recreation areas it traverses. UDOT's FEIS and Supplemental Reports incorrectly assess that some of these impacts are minimal or de minimis. Some environmental impacts UDOT's FEIS and its Supplemental Reports omit all together. These inaccuracies and omissions of significant impacts to UDOT's gondola alternatives require the USFS to conduct its own environmental assessment abd environmental impact statement and issue its own ROD. The USFS ROD should considering the impacts of the gondola alternatives and weigh them against the zero new impacts of UDOT's enhanced bus alternative.</p>	A32.3.A; A32.3F
55281	Douglass, Robert	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple</p>	A32.3A; A32.3F

		<p>locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Robert Douglass</p>	
42255	Douglass, Robert	<p>Environmental impacts of the towers in IRAs are omitted from UDOT's Supplemental IRA Report as well as from the FEIS. UDOT neglects to assess and omits to account for the environmental impact of the towers themselves in the IRAs. It omits to account for the steel ropes (6 sets) and for the impact of large moving gondola cabins on wildlife and human recreation around the towers. The operation of the gondola over the towers will create visual and noise impacts similar to but greater than a new road at the site. Unlike a new road, the gondola cabins will be high in the air over the towers creating continuous, non-stop noise and moving visual impact throughout the entire day and many of the hours of nighttime winter operation. The flashing aircraft warning lights on many or all the towers will further disrupt wildlife, especially raptors, as well as human users, such as the unfortunate campers in the USFS Tanners Flat Campground. UDOT in its FEIS assessed the noise impact of the gondola to be no greater than the existing road (S.R.210). However, S.R.210 will still exist and will still generate noise, so the operating gondola will double the noise pollution in all three IRAs and along the new access roads for the IRAs. Unlike the road, the noise will be continuous from 8am to 8pm every day. It will also provide continuous moving visual impacts on wildlife and human activity greater than S.R.210 because of the tower heights and continuous movement throughout the day and many nighttime winter hours. Because of these omissions and flaws in UDOT's FEIS and IRA supplemental report, the USFS needs to conduct its own EIS and issue its own ROD to correctly assess the impacts of the new tower roads and the towers themselves.</p>	A32.3I
42252	Douglass, Robert	<p>Tower footprints, timber harvesting, and clearance areas are much larger for some towers in the IRAs than UDOT's Supplement States – Diversion Berms UDOT's FEIS "Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives" incorrectly assesses the size of timber and vegetation cleared areas around gondola towers and tower access roads because UDOT's IRA supplemental report omits the impact of avalanche diversionary berms that must be constructed to protect towers in avalanche chutes in IRAs. UDOT assesses the permanent impact on the IRAs as only the footprints specifically under the tower and stating that these are minimal as a percentage of the entire IRA. But UDOT omits footprints for new roads necessary for heavy equipment for excavating tower footings and then for ongoing maintenance, repair, inspection, and emergency operations. UDOT's Supplement states that some of the towers are in avalanche paths. As an example, tower 9 will be located in an avalanche chut that on April 15,2023 was buried in 20-30 feet of snow and avalanche debris, such as trees and boulders. Tower 9's site has been hit repeatedly in 2023 and repeatedly in prior years. Such huge flows of snow and hard debris, as has occurred in 2023, would damage or destroy one or more of a tower's support legs. Such damage would close the gondola for months to years. This threat to towers constructed in avalanche paths is well known in the lift industry, just not known to UDOT. Ski lifts and ore-bucket gondolas for mines that have to locate towers in avalanche chutes are always protected by constructing large diversion berms that move snow slides around and away from the tower base. Numerous pictures of towers protected by avalanche diversion berms can be found online and around mining sites like the ore bucket gondolas between Silverton and the ghost town of Silver Lake CO. UDOT's FEIS and IRA Supplemental Report neglects to account for the cost of such berms and for the road-like clearance required around towers in order to construct them by bulldozing up material to form them. Because UDOT's Supplement on IRAs omits the need for these diversion berms, the UDOT IRA assessment fails to account for their footprints and their impact. Their impact includes clearing an area of vegetation and timber around a tower that is much larger than the footprint under the tower – the only footprint UDOT assessed. To form the berms earth and stone will need to be scraped up and piled into the berms or substantial material needs to be trucked in, scaring a large area around each protected tower. The berms themselves will divert avalanching snow and debris, and they will also divert flowing water and subsoil drainage, altering a portion of the watershed. None of these impacts were identified, analyzed, nor mitigated in UDOT's Supplemental IRA report for UDOT's FEIS. Because of these omissions and flaws in UDOT's Final EIS and the IRA supplemental report, the USFS needs to conduct its own EIS and issue its own ROD to correctly assess the impacts of the tower roads, the towers themselves, and the avalanche diversion berms.</p>	A32.3H

40696	Dow, Doyle	<p>I have the following comments to make concerning the Roadless Area Conservation Rule and the Air Quality Report:</p> <p>1: I do not support the conclusion that the gondola would have little or no impact on the on the Wilderness Areas or the IRAs. The towers, construction and access and maintenance roads all have impacts that are to compatible with these areas. The scenic impacts of the gondola are not compatible with the IRAs and adjacent Wilderness Areas. The gondola is also a general scenic blight on the whole canyon.</p> <p>2: The conclusion that future buses will continue to be diesel is a fallacy. In the future, and certainly before a gondola would be built, bus service will be a non or very little polluting source. Electric or another source of power will be used in the buses.</p> <p>3. The whole gondola project would be huge waste of taxpayer money that could best be used elsewhere. A more realistic cost would be over 1 billion dollars and the cost to ride should be over \$100 dollars unless there was a massive taxpayer subsidy. Most residents of Utah do not ski and do not travel in the canyon in the winter and it would be unfair to tax them to support a project that goes to 2 private ski resorts. Enhanced bus service is less costly, could stop in more place, and could take passengers from multiple stops in the valley straight to the ski areas or other stops.</p>	A32.3A; A32.3F; A32.3G

39402	Dransfield, Janelle	<p>This is an irreversible decision that should without question be lead by a robust bussing system. Zion National Park is a great example of how a shuttle system can help not only improve transportation and reduce traffic, but in turn also increase tourism. A gondola would not serve the public. It would risk our water shed, damage habitats, and permanently sacrifice world class climbing. It would not reduce traffic. We need public transport alternatives!</p>	A32.29VV

41705	Draper, Del	<p>Del Draper</p> <p></p> <p>April 18, 2023</p> <p>Comments on Little Cottonwood Canyon EIS</p> <p>Identity of Commenter</p> <p>I am 71 years old and have had a family cabin at  since 1961. Over the decades I have driven up and down Little Cottonwood Canyon literally thousands of times and I am very familiar with traffic patterns in the Canyon. I am an avid skier and ski all Utah resorts. I both use the bus and drive my own car when I go skiing.</p> <p>Roadless Rules</p> <p>The proposed gondola will violate the Road Rules pertaining to the Twin Peas, White Pine and Lone Peak Inventoried Roadless Areas. From reading the report, it appears that UDOT believes the gondola would be exempt from the Roadless Rules because the gondola is not a road. This is an overly simplistic analysis. The purpose of the whole EIS process is to evaluate transportation solutions in Little Cottonwood Canyon.. The gondola is a proposed transportation solution and must be analyzed for its impact on roadless areas every bit as much as if it were a road. Further, it appears that 8 of the proposed gondola towers would be in the roadless areas. There would be blasting, grading and impacts related to the construction of the tower bases in roadless areas which are equivalent in impact to road construction. For these reasons the gondola is not exempt from the Roadless Rules.</p> <p>Air Quality Study</p> <p>A significant deficiency of UDOT's EIS is the use of only hydrocarbon fuels in evaluating the pollution generated by hydrocarbon fueled buses. Electric buses are a viable alternative and, as such must be evaluated. I recall the day about a year ago that a fully load ProTerra electrical bus showed up at Alta, demonstrating that electrical buses could reliably ascend Highway 210. Yet, despite this, in their answer to the FHA inquiry, UDOT did not include an analysis of the pollution, or the absence thereof, by the use of electrical buses. This relevant and important comparison of electrical buses to buses fueled by hydrocarbon gives an inadequate and incomplete analysis. A more in depth analysis is required. In this new UDOT scenario, all buses would be powered by diesel in 2050 and would be at their maximum age of 14 years. It's unacceptable for UDOT to claim that an electric bus option is outside of the scope of the Little Cottonwood Canyon project, but other fuel types are to be studied.</p>	A32.3G; A32.3H; A32.10G

40550	Driggs, Tom	<ol style="list-style-type: none"> 1. Little Cottonwood Canyon (LCC) is a priceless gem. Like the Hope Diamond, cutting the LCC in two with the gondola would greatly reduce the value of the irreplaceable "gem." 2. Roads and infrastructure for the gondola will cause significant negative impacts on USFS Inventoried Roadless Areas. Construction of the proposed gondola should not take place within the Roadless Areas. 3. The gondola would directly violate the Roadless Rule and take away from many of the qualities that are protected by RACR: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities. 4. While UDOT claims required new roads would cover a small percent of the total area of the three Inventoried Roadless Areas, the visual, noise, and watershed impacts would impact 	A32.3A; A32.3F; A32.3H; A32.3G; A32.3I

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>a significantly larger percentage of the three roadless areas.</p> <p>5. The construction of towers in the canyon will cause irreparable damage to the canyon ecosystem. Helicopters will not be capable of foundation excavation as suggested by UDOT. There will be a need for access roads during construction and subsequent maintenance activity.</p> <p>6. Access to gondola towers in USFS Inventoried Roadless Areas will be required in anticipation of emergency evacuations. Research shows that wire rope systems are not infallible and there will come a time when evacuation and emergency repair will require road access to the towers.</p> <p>7. UDOT is presenting data on a "worst case, all diesel bus scenario" designed to make the bus options look bad. UDOT NEPA process is in error in failing to generate a "best case scenario" using currently available, proven electric buses.</p> <p>7. The proposed gondola towers will be visible and audible from virtually the entire Roadless Areas and from much of the two National Wilderness Areas that closely parallel it – a violation of the intent of RACR.</p> <p>8. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of timber within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>9. A gondola angle station will lie inside a USFS Inventoried Roadless area ¼ mile from the Tanner Flat Campground, a public recreation area. The road to the angle station and paved area would require timber removal and impact visually on campers as shown by UDOT's renderings, and noise pollution will double according to UDOT's FEIS.</p> <p>10. The gondola angle station would not only pave over a portion of the roadless area, it requires excavation of an EPA superfund site that UDOT's FEIS says is likely contaminated with lead and arsenic. UDOT fails to assess the environmental impact of such a construction in an Inventoried Roadless Area.</p> <p>11. Even if the gondola system isn't defined as a 'road', it would be built for highway purposes and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan.</p> <p>12. The gondola is itself a major new transportation system built on top of Inventoried Roadless Areas. The world's largest gondola would impose even greater impacts than a paved road on the miles of Forest Service scenic and recreational values of the three Roadless Areas it crosses.</p> <p>13. Building gondola towers and an angle station in Roadless Areas will greatly impact over 1,200 different plants and animals.</p> <p>14. The Little Cottonwood Canyon watershed is essential to Salt Lake City. The City assessed the proposed gondola's impacts on the watershed to be highly detrimental to the development and continued well-being of the metro area.</p> <p>15. Taxpayers will pay each month to support a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, both directly from new roads and a major new transit system in the roadless areas.</p> <p>16. Simply, there are better, lower cost, less invasive alternatives that provide solutions to the current transportation problem....please do not cut the "gem"!</p>	<p>See Responses in Appendix A of the ROD</p>
55068	Driller, Tenaya	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Tenaya Driller</p>	A32.3A; A32.3F

40388	Dubock, John	<p>I've worked at Snowbird for 15 years. We lost the mass transit people about 7 years ago, they bought 70k cars, love the control, stopped riding buses and will NOT support a gondola. Limit skiers per day, 15 min buses like in the past now that the Internet is stable up the Canyon. Toll the road for frequent fliers. You can't sell the beauty of Utah, then resell it as a private money grubbing gondola. Lifts break down, stop and don't run during Interlodge. The public loves lining up for 4hr at the base, partying with their base camp, getting work done, sleeping, it's a mess! Only in Utah where 7% of the locals ski could a series of stupid solutions be even considered, time to pay to play!</p>	A32.29VV

41023	Dubrow, Paige	<p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower-cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. How will you access the towers for construction and maintenance? The answer is you would need a road.</p> <p>Ultimately, the gondola would be a remarkable blemish on the natural beauty that would cause irreparable damage and destruction to protected land. It would harm the watershed and destroy much-loved rock-climbing boulders. It would not serve the people of the Salt Lake Valley but rather would support a tourist demand while ignoring the needs of local recreationists. The gondola is not valuable to anyone who does not need or want to access the two ski resorts in Little Cottonwood Canyon. It would also not reduce the number of cars traveling the canyon at all. The gondola would not reduce traffic but would push traffic onto Wasatch Blvd as people try to access the base station. This would create the same amount of traffic with a greater negative impact on the neighborhoods and local commuters near the mouth of the canyon. The ski bus system has been gutted this year with fewer buses traveling up the canyon less frequently and that has been greatly felt by those trying to utilize that resource. Additionally, there is nothing to say that this gondola will not fall victim to vandalism, as has been demonstrated with the Sea to Sky gondola in British Columbia. All it takes is one passionate angry person and an angle grinder to cause millions of dollars of damage and render the gondola unusable.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. I also support UDOT being more forthcoming with the facts and not engaging in potentially corrupt dealings with those who would profit from the gondola at the cost of taxpayer dollars. Governor Cox stated yesterday, in regard to a potential MLB stadium, that taxpayers should not subsidize the rich when most of the benefits accrue directly for franchise owners. This is the same logic that should be applied to the gondola.</p>	A32.3H; ;A32.3A; A32.3F

40399	Dunn, William	<p>I'm AGAINST Gondola!!! My biggest concern are the tower footings and maintenance access - particularly towers 6,7,10 & 11. This short-sighted system will destroy the natural beauty of Little Cottonwood Creek and can only harm the experience that the canyon floor provides. As an analogy, I-15 was packed, so it was expanded, then it became packed again, and so on. It's carrying capacity is always stretched and so too will our canyons.</p> <p>How does the gondola benefit the other canyons? Obviously, this is a another attempt at side-stipping toward interconnect and ski area expansion.</p> <p>Given the speculative circumstances that it's an inevitability that skiers must be removed from their cars and transported by other means, I would favor the Cog Rail. It is less invasive and is a better form of transport than a box full of people hanging in the air subject to high winds and worse - terrorism. It disturbs me that the EIS underestimates the environmental impact of the tower footings and what's worse - completely ignores the reality of construction & maintenance. "A crane or a helicopter could be used to deliver materials for construction". Is this not the weakest link in the chain? The gondola proposal lacks serious credibility and is posited in error & dreaminess. It's an oversimplification for a long-term solution and should be dismissed in terms of a reasonable and effective plan better suited for this natural wonder of a canyon that deserves more intelligent and sensitive consideration.</p>	A32.3H; A32.3I

40305	earl, scot	<p>bad idea, lets expand bus service and build avalanche tunnels. If you had bus service every 10 minutes people would ride. Instead you cut bus service, which leads to more congestion. Was this planned? I think so. Additionally, the gondola is not scalable, you can't easily add more cars. Capacity is set. By expanding bus service, you can always add more busses. Additionally, this nothing to address the cluster that is big cottonwood. We have two canyons you know! As an avid skier and canyon user I am against the gondola.</p>	A32.29VV

40439	Eastham, Emma	I have grown up in Utah my entire life and have spent countless weeks in the canyons. One of my favorite things about the canyons is looking out the window and seeing the trees and being in nature. I do not want to look out the window and see that being destroyed. The gondola would take years to complete and get running. It would take less time to figure out another solution that works for both UDOT and the people of Utah.	A32.29VV

41618	Eastman, Joshua	The condition in little cottonwood canyon has reached a breaking point. Not only is Little Cottonwood Canyon, an embarrassment to anyone that likes to ski and use the mountains it's complete failure to remain open under after even the mildest of snowfall reflects poorly upon the whole state and completely make a total mockery of our covenanted status as "greatest snow on earth" every time it snows is when people want to ski and use the mountains the most! Every avenue and possibility that renders the general public access to the mountain in bad conditions should be esteemed not dismayed. The current operations that facilitate travel up and down canyon have failed miserably, and only get worse with each passing season.	A32.29VV

		<p>It is unbelievable that the worlds greatest snow on earth is unattainable so often to those that love and cherish it the most. Something, anything, has to be done to stop the joke that is now the little cottonwood canyon conundrum. I put my support behind any thing that will change the current conditions in a little cottonwood canyon and gives the people back access to what Utah should always be proud of. Enjoyment of the mountains and access for the people is what should matter not some small interests groups opinion. We the peoples ability to go skiing and enjoy the mountains is the issue. Enjoyment of the mountains and access to it for the people is what should matter period. not small interest groups opinions. The ongoing status quo is degenerating he worse and worse every year. Myself and thousands of others feel the same way stop the madness and build something better!</p>

I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. 54285	Eccles, Vic	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.	A32.3A; A32.3F

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Vic Eccles</p>

41621	Eckert, Jeff	<p>This is ridiculous. You want to spend half a billion dollars for two ski resorts. Forget the environment, forget the trailheads, forget people who don't want to frequent those businesses. And the taxpayers are paying? This is a terrible abuse of government power. Stop it. No gondola.</p>	A32.29VV
40137	Eckert, John	<p>A gondola stretching the length of Little Cottonwood Canyon would become a taxpayer boondoggle and a perpetual eyesore to those of us who love the scenic beauty of the canyon. Avalanche bridges over the existing roadway coupled with increased bus service and possibly a dedicated bus lane is a far better solution to this complicated problem!</p>	A32.29VV

40188	Edelman, Eric	I am writing in opposition to the gondola. I feel UDOT has forced this option on the taxpayers of Utah with little consideration of the needs or concerns of the individuals that need to pay for project. Additionally. Little Cottonwood Canyon would see excess damage to the natural beauty of the canyon that the previous evaluations have not taken into account.	A32.29VV
39796	Edelman, Eric	<p>I believe this project has missed the objective and has gone directly to taking taxpayer money to fund a project for two private businesses. I do not support the effort to take taxpayer money to fund such a project.</p> <p>I believe the gondola will destroy the watershed and wildlife habitat in LLC. This study has avoided evaluating the actual damage of building numerous towers within the canyon that will require additional infrastructure for each tower.</p>	A32.29VV

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Lauren Edmondson</p>	
39965	Edmunds, Margaret	<p>I am writing to object to the plan to construct gondola towers, snow sheds, and angle stations in roadless areas. In addition, the proposed vegetation removal that would take place within Inventoried Roadless Areas in Little Cottonwood Canyon would be devastating to the area's character. As you know, the Forest Plan prohibits road projects and recreation projects in these areas, and, as the EIS states, these projects are for highway purposes. UDOT and the USFS' proposals would diminish the roadless characteristics of Little Cottonwood Canyon. Roadless areas are protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units, it was NOT in these units and certainly not for the purposes of building a gondola, which detracts from, rather than enhances, the roadless characteristics of these Inventoried Roadless Areas. These places need to be protected! Please protect the beauty of these wilderness areas, rather than destroying their unique character.</p>	A32.29VV
52222	Edson, Stephanie	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 40071	Edwards, Matthew	<p>The report is quite detailed and impressive so thank you to start.</p> <p>the traffic on the south side of Wasatch Boulevard and Little cottonwood canyon where they are now funneling traffic has become problematic for my home, I live just south of the intersection. I purchased this home because it was near the resorts I love to ski, giving me ample access to 4 epic mountains. in previous years people would line up on the shoulder, this has stopped happening, they now take up the whole road. the police officers who are on duty that day should do laps to force skiers onto the shoulder like in the old day.</p> <p>I am also pleading with you to not install a gondola. this will lower home values around the area dramatically as most of the owners of these homes purchased these homes for skiing.</p>	A32.29VV

41521	Egri, Shawn	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Shawn Egri</p>	A32.3A; A32.3F

40136	Elam, Eileen	Based on the number of road closures due to avalanche danger, the gondola continues to be the best option. 100% for it!	A32.29VV
39961	Elander, Charles	I feel sorry fo Utahns having the gondola thing jammed down their Canyon. I have yet to meet anyone who thinks this is a smart idea. I have skied there anually since 1979 and i dont think the"red snake" is as bad as the people pushing the gondola say it is. How many buses would 1.5 billion buy??? Seems timely there was a shortage of buses at the same time as a huge need for a gondola. I think someone is behind this push with alot of money, and we know at least a couple of players that seem to gain the most. This will turn into a 1.5 billion dollar mess before its over.	A32.29VV

Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Joshua Eldredge</p>	A32.3A; A32.3F
39867	Eldredge, Ryan	<p>Allowing the construction of the gondola against the will of the majority is egregiously misguided and goes against cost-benefit analysis of sound environmental impact statements, cost of implementation, and viable alternatives, such as improved bus services. Please halt this misguided project.</p>	A32.29VV
43007	Eleta, Josefina	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Josefina Eleta</p>	A32.3A; A32.3F

		<p>locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Darcy Eliot</p>	
41633	Elkington, Robert	<p>Thank you for the opportunity to comment. This matter is of extreme importance to me, my family and my neighbors.</p> <p>It is my understanding that UDOT's proposed gondola would pass through Twin Peaks, White Pine, and Lone Peaks Inventoried Roadless Areas. Road construction and timber harvesting are prohibited in these areas to protect them from development under the 2001 Roadless Area Conservation Rule.</p> <p>Clearly, the 8-mile long gondola, with its 20 towers and 2 gigantic angle stations violates the roadless area rules and impacts Little Cottonwood Canyon (LCC) in a significant and permanent way. The gondola project would negatively impact the clean water, wildlife, view scape, and recreation opportunities found in our cherished LCC.</p> <p>The argument that the gondola and related construction and maintenance access areas are not roads and therefore not subject to the roadless rules is ridiculous on its very face. Isn't this kind of development exactly what those rules were intended to protect?</p> <p>The argument that the gondola and its numerous access areas and construction is insignificant when compared to the total acreage of the inventoried roadless areas is similarly absurd. The impacted roadless areas are highly visible and are accessible areas for current public use.</p> <p>While UDOT is evaluating the use of diesel buses, why not evaluate the use of electric buses? Such buses have been demonstrated to be effective and efficient. Include that information in the supplemental air quality analysis.</p> <p>It is clear to me that UDOT is trying too hard to make the ill-advised gondola alternative work. It is not the solution. The solution to traffic congestion in LCC will be found in immediately-implementable common sense solutions, not in billion dollar construction projects that forever scar LCC.</p>	A32.3A; A32.3F; A32.3G; A32.3H; A32.3I; A32.10G

39663	Ellen Burton, Jan	<p>Once again, I am writing to oppose the idea of a gondola. This will only help the skiers headed for the resorts! I used to be one of those people, but I also cross-country skied and hiked. The gondola will take away from the wilderness quality those people enjoy--Actually I do not see how this gargantuan gondola was even approved, given the environmental consequences.</p> <p>People flying in from other states may enjoy the gondola, but the people of Utah who frequent the canyon appear to be opposed. If this monstrosity goes up, the resorts should pay--not Utahns. It is an egregious plan.</p> <p>The road may need to be widened, buses increased, etc. I am not against all plans.</p> <p>Jan Ellen Burton</p>	A32.29VV

42285	Elliott Casey, Skylar	<p>I don't believe the gondola should be built in a roadless area. Removing the roadless area status to help build the gondola is a terrible precedent for these lands. I stand with Save our Canyons and their key points regarding the roadless area and the gondola.</p> <p>-8 gondola towers, snow sheds, 2 angle stations, and vegetation removal would take place within Inventoried Roadless Areas that exist in Little Cottonwood Canyon. The Forest Plan prohibits road projects and recreation projects in these areas, and, as the EIS states, these projects are for highway purposes.</p> <p>-UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon.</p> <p>-Roadless areas are protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas.</p>	A32.3A; A32.3F

40395	Ellison, Suzie	<p>I am adamantly opposed to the proposed gondola in LCC. I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a lifelong Utahn, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule among many other reasons.</p>	A32.29VV

41249	Elswood, Heather	<p>I vehemently oppose the gondola. It has NO business in the canyon. UDOT needs to utilize other lower cost alternatives that benefit the many, not just the very few and the resorts; and protect the ecology of the canyon. A gondola will destroy several areas and damage protected watershed. It will NOT reduce congestion. People will still be driving up the canyon: busses, cars, vans, etc will continue to carry up and down the canyon equipment, supplies, workers, recreationists, etc. The high cost of a one way ticket to ride a gondola, and limited ability to bring/carry equipment and belongings will deter people from using the gondola. You will still see increased traffic and congestion brought into the canyon and area of a gondola parking lot . You will take & destroy acres of land for massive parking lot, that will need continued management and maintenance for snow removal during winter months. Adding even more people cars n trucks into the canyon.</p> <p>Charging the tax paying citizens of Utah to cover the massive cost of a gondola that benefits so few, and damages environment and ecology is outrageous. A gondola only serves a select group of people who can afford the cost of ticket and benefits only 2 ski resorts.</p> <p>UTA and UDOT need to utilize the low cost systems already in place and expand ie electric busses that ARE fully capable of running in cold temperatures (despite the lies told by UTA). Setting up car pool incentives and occupancy based tolling, etc.</p> <p>A gondola will NOT solve the traffic congestion in little cottonwood canyon. It will not be operational during avalanche danger. Building a gondola, we will STILL have, if not MORE cars, vans, busses, trucks etc carrying people and supplies for work, recreational, and living up and down the canyon road.</p> <p>Road maintenance will cost the more. Gondola maintenance with year round employment/labor will be a much added cost.</p> <p>The only difference with a gondola? You DAMAGE and DESTROY areas in the canyon, you DESTROY protected watershed lands, it ultimately affects ecology and wildlife negatively. You take money from the people- Utah tax payers to pay for it, you mis used the 'roadless rule' to benefit your own greed n glory forcing more cost burden on the people of Utah. ... And who sees the ONE benefit of shuttling the select high paying more money spending recreationists to their facilities? The 2 resorts Alta and Snowbird.</p> <p>DO NOT build a gondola!!</p>	A32.29VV
53972	elton, Elizabeth	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p>	A32.3A; A32.3F

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Elizabeth elton</p>

		<p>Regards, Maisy Englund</p>	
41670	Engracia, Judith	<p>1. Why do you want to tax the people to enrich corporations Alta & Snowbird, when they are already wildly successful and that's why we have the traffic problem to begin with? They're growing and selling more passes than ever, hence the worsening traffic, yet they're pushing the problem they've created onto us taxpayers. So they reap the profits and we carry the burden of paying \$1 billion?</p> <p>2. If you can't even run and staff a bus service up the canyon, what makes you think you can run the longest gondola in the world? You're already showing us that the state isn't willing to pay for ongoing operation and maintenance of mass transit. You claim that we dont have money to keep the busses running, and yet we have the money to pay for a \$1B gondola?</p> <p>3. It sure looks like bus service has been cut, in order to worsen traffic and frustrate the public. It's like youre sabotaging busses on purpose so that we agree to the gondola. We haven't truly tried all the options correctly yet, you just want to jump to the billion dollar option right away. And I think I know why—no one is going to get rich off of busses, no one is going to get rich off of a toll booth at the bottom of the canyon, no one is going to get rich off of winter inspection permit stickers on each car, but real estate speculators own a bunch of land off of La Caille and these private businesses will exploit the gondola as a tourist attraction. This isn't about benefitting the public or easing traffic. It's about private businesses and corporations profiting off of the taxpayer's dime.</p>	A32.29VV

56217	Erickson, Steve	<p>Utah Audubon Council's Public Comment on Little Cottonwood Canyon FEIS</p> <p>Utah Audubon Council opposes the proposed gondola to serve ski resorts in Little Cottonwood Canyon. We object to the intrusion of the gondola towers into and adjacent to protected roadless areas. The construction and operation of the gondola will violate the Roadless Rule, degrade LCC creek and affect the Salt Lake valley's clean water supply, negatively impact</p>	A32.3A; A32.3H; A32.10G

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>flora and fauna in the canyon, encroach upon wilderness, harm the canyon's spectacular views, and greatly diminish the experience of visiting and recreating in LCC.</p> <p>If the three Roadless Areas in LCC (Twin Peaks, Lone Pine and White Pine) cannot be avoided or mitigated, as is the case with the gondola, this "preferred alternative" should be rejected.</p> <p>Regarding the Federal Highway Administration requests for further air quality analysis, UDOT should do more than just analyze air pollution impacts of a bus fleet of diesel fuel only. UDOT should analyze air quality impacts of a fleet of all-electric buses - and a mixed fuels fleet that includes electric buses. Over the time that precedes operation of the gondola, and certainly during the lifespan of the gondola, the bus fleet will transition to all-electric transit, so to fail to assess the environmental impacts for comparative/alternative options is indefensible.</p> <p>Thank you for the opportunity to comment.</p> <p>Respectfully,</p> <p>Steve Erickson, Policy Advocate Utah Audubon Council [REDACTED]</p>

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Brooke Erikson</p>	A32.3A; A32.3F

40295	Erney, Richard	<p>I am opposed to the proposed gondola up LCC for many reasons. I doubt that it will significantly reduce traffic up LCC. I suspect it is unaffordable for most locals to use regularly. Only the resorts & developers will benefit from the construction. I'm opposed to the lift structure & accompanying maintenance road encroaching upon 3 of our treasured wilderness areas. Please find a solution that works for both canyons. If a large infrastructure project is in the works, why haven't tunnels to the areas been seriously considered?</p>	A32.29VV

40429	Erpelding-Garratt, Elizabeth	I oppose the gondola project because it will negatively impact nature, since the gondola would be built within three federally protected Roadless Areas (Twin Peaks, Lone Peak, and White Pine roadless areas). Road construction is typically prohibited in these areas to protect air, water, wildlife, and recreation opportunities. The gondola should not qualify as an exception.	A32.3A

39369	Eskenazi, Suzanne	<p>I am opposed to the gondola! The installation of eight gondola towers, snow sheds, two angle stations, and vegetation removal goes against regulations that guide Inventoried Roadless Areas in Little Cottonwood Canyon. The roadless characteristics of LCC should not be diminished. To do so would show poor decision making in the long term vision of what we want the Wasatch to be like, not just for us, but for future generations. Roadless areas are protected under the 2001 Roadless Rule. Please protect our wilderness.</p>	A32.29VV

42323	Fabiano, Cory	<p>I do not want this gondola to obstruct the land with which I recreate. It would violate the roadless area conditions and drastically effect the wildlife in the area. I frequently hike and ski within these areas and have witnessed a great deal of wildlife activity that would be directly and negatively impacted by the construction and maintenance of a gondola. I was born in Utah and have seen the development of these lands over my lifetime and do not believe a gondola would have anything other than a negative impact on the canyon.</p>	A32.29VV

		<p>2% of the SLC population visits the cottonwood canyons each year. This means that the vast majority of tax payers paying for the gondola will NOT ever use it. A SIGNIFICANT amount of folks going up the canyons on a year-round basis are dispersed users - going to trailheads and places other than the resorts.... The Gondola does not improve canyon access for these users. This year, we have had countless avalanches cross the LCC road. Every time an avalanche hits a tower.... The entire gondola will need to be inspected. How long will this take..... The Gondola is short-sighted. It does not accommodate increased users/demand... you can not add cars to an already full gondola cable.</p> <p>Even if you don't care about the watershed, the pristine nature of LCC, or the eyesore that the gondola will undoubtedly cause... please consider that ESPECIALLY over the long term, the gondola will be less efficient at getting people into the canyon as a whole than our current methods for canyon access.</p> <p>Prioritize and incentivize those carpooling-tiered approaches based on # of passengers in the vehicle. Build additional facilities such as parking structures, transit hubs, with food and beverage options, restrooms, etc. And please think on a 50 - 100 year time horizon as opposed to a 5-year time horizon.</p> <p>NO GONDOLA - There are better, less costly, more equitable, safer, and superior solutions to this issue.</p>

53933	Fairbanks, Jonathan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Jonathan Fairbanks</p>	A32.3A; A32.3F
39283	Fairbanks, Mary	Do you keep bringing this up until you finally get what you want. WE DON'T WANT IT.	A32.29VV

40950	Farrell, Matthew	The proposed gondola towers will be visible and audible from virtually the entire Roadless Area and from much of the two National Wilderness Areas on either side. This is entirely against the spirit and letter of the roadless area conservation rules, as well as significantly affecting the wilderness areas. Increased bus service (especially with modern hybrid or electric busses) would be a dramatically better solution when it comes to protecting the existing roadless area and wilderness areas. 56183	Fasbender, Renee	<p>I've tried to verify and submit my response 10 or so times and nothing happens. I want my Comments to the EI A included. I'm absolutely opposed to the gondola. I think it is an invasive, expensive eyesore. There's not been one mention of having ski resorts cost share when all transport goes directly to the and there benefit. This does not benefit those using trailheads at all yet we would be paying. I think ican only support the enhanced bus, no widening. Being a climber in our world recognized Little Cottonwood Canyon removing so many boulders in widening the road would be a major and permanent loss. There was also no consideration to having greater parking structure capacity which if do e correctly could move traffic much faster and should be part of any solution, and should be funded by the resorts who are the beneficiaries of the skiers, etc. That could of moved traffic much faster and I can't believe it's not even on the list. Absolutely don't want to be looking at gondola structures as I travel the canyons.</p> <p>Renee Fasbender Reneefasbender@gmail.com</p>	A32.29VV

39778	Fay, Jonathan	<p>You have addressed the numerous ways you want to get more people, mostly tourists up little cottonwood canyon. You are ignoring ways to get residents home who my not work typical hours. UDOT has plagued alta all season with overnight closures. There are residents whom you are shutting out of being home with their loved ones because you are so concerned with getting people to the ski resort between 8am and 4pm. The canyon never used to close over night for interlodge. This is a new thing and it is ruining families. The gondola, a train none of your solutions actually address getting people to their homes.</p> <p>I can only imagine that once a "solution" is picked aka get more tourists up the canyon the canyon road will be closed even more with your solutions then being closed after tourist hours, not helping the people that call the canyon home at all. But dont worry you will have increased the capacity of tourists at the 2 business in the canyon.</p> <p>You should fix the problem and not make the canyon busier during gondola hours. If you are not following along the problem actually is that you cant open the road to peoples neighborhoods regularly. The problem is not how to get more people up the canyon between 8am and 4pm. Fix the problem.</p>	A32.29VV

		<p>As a Salt Lake City native and lover of the Little Cottonwood recreation and wilderness area, I urge you to consider lower cost, more effective solutions that do not disrupt these acres of precious wilderness. Lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts would be far easier solutions to support in our beloved canyon.</p>	
40941	Felt, Ed	<p>Camping or a picnic at Tanners Flat Campground was a wonderful escape from the City during my younger years. Some weekends the traffic could be heard, but often during the week, the sound of birds, chipmunks, Little Cottonwood Creek was what I experienced.</p> <p>I imagine a gondola would change the solitude of this wonderful campground, whirling of cable wheels on the towers, having sightseers in the cabins peering down at campers, but hopefully not litter, cigarette or marijuana butts being dropped from the cabins.</p> <p>Please help protect this canyon for my children and grandchildren, and future generations.</p>	A32.29VV

50987	Ferguson, Emily	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Emily Ferguson</p>	A32.3A; A32.3F
40797	Ferguson, Hugh	<p>Hi,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in both Little Cottonwood and Big Cottonwood canyons. The gondola will not improve traffic congestion. I think it would actually have the opposite effect increasing congestion in the upper canyon because of added congestion at the gondola terminal. Also it would increase congestion at the ski areas themselves with added customers buying lift tickets. It will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I would support some strategic snow sheds on the existing roads to help alleviate some traffic on big snow cycles.</p> <p>I would also support lower-cost solutions that utilize our existing infrastructure, such as carpool year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law.</p>	A32.3A; A32.3F

40376	Ferony, Scott	Inventoried Roadless Areas act as buffers for designated wilderness areas. Any incursion into these areas threatens the wilderness space. The narrow nature of this canyon means that the development of any infrastructure in the roadless areas will have a visual or residual impact on the wilderness experience as well as that in the inventoried roadless areas. Construction should not take place within Roadless Areas.	A32.29VV
52048	Ferrante, Marissa	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola	A32.3A; A32.3F

42352	Ferrin, Marcia	<p>I am an owner of a unit in Superior Point, Alta. For more than 30 years our family have felt honored to be a part of this unique and special canyon. To think you would hack into it and remove boulders and add metal to the pristine, sacred peaks is beyond cruel imagination. Religious leaders from our valley have expressed the same sentiment. Add to that the millions of dollars and public opinion against hacking into this beautiful canyon, it is disappointing that you would give way to big money and the few that benefit financially pushing this through. Settle on the fact that it will be a busy road traveling to the resorts. A parking reservation can be made and buses provided. Pretty simple. Enthusiasm for taking an hour gondola ride will NOT be popular. PLEASE</p>	A32.29VV

40428	Figgins, Abby	<p>My name is Abby Figgins and I am a long-time resident of Salt Lake County and the Wasatch front. I grew up in cottonwood heights and have also lived in Sandy and currently reside in [REDACTED]. Currently, I am an educator with Canyons School District.</p> <p>The reason that I have chosen to reside and work along the wasatch front is the proximity to the cottonwood canyons. I love recreating in these areas year round. I am accessing the canyons up to four times a week to backcountry ski, hike, mountain bike, and camp. These areas are very important to me and have been my whole life. I learned so much accessing these canyons as a child and learning to ski at the resorts in the canyons.</p> <p>These canyons are central to my life along the wasatch front and central to many others. The incredible recreation brings lots of tourism and is extremely valuable to the local community. Any decision regarding these canyons must be carefully thought out and have community support. The gondola is not the right option.</p> <p>The gondol is not remotely cost effective and the UDOT report itself shows that it will not decrease canyon congestion, it will only allow more patrons to the resorts. I am not for tax-payer money to support private businesses. Especially when it only helps resort patrons and not all outdoor recreationalists. The community has loudly and strongly voiced their opinion against the gondola. Why is it still an option if it doesn't mitigate traffic or have community support? Seems like the private sector is the only one to benefit and the only one to support it. Tax-payer money should not support private business.</p> <p>I agree that there is a lot of congestion in the canyon, especially in the morning of big snow days. But more buses, toll systems, carpool incentives, resort shuttles and other options should be fully examined and tried out before destroying the natural beauty of the canyon for something that serves two private businesses. Furthermore, the UDOT report shows that the gondola will not decrease traffic, just increase patronage to the resorts. We need to find ways to make the canyon more accessible for everyone, all season long.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-</p>	A32.3A; A32.3F

41699	Figgins, Joshua	<p>My name is Joshua Figgins. I am a resident of Draper. I appreciate the opportunity to leave a comment. I do not support the gondola.</p> <p>Little Cottonwood Canyon is a world class canyon with beauty and use goes way beyond the ski resorts. To build a gondola would permanently scar our incredible resource. Building a gondola is also ignorant of the effect that climate change will have on our future snowpack. I know this year we got a lot of snow but the amount of snow we are expected to get doesn't warrant a gondola. The canyon only gets slow during big snow days and we can't expect those to keep coming. The gondola doesn't get people down the canyon during avalanche mitigation. The gondola won't stop people from driving up the canyon. I believe that the resorts and UDOT can work together on common sense solutions for this problem besides a gondola. I believe that over time good bussing systems can be adopted by the public and people can enjoy taking the bus. I believe resorts and UDOT can work better together and informing guests that the lots are full and in order to ski at a resort public transit will be needed.</p> <p>In the end I do believe that that other common sense solutions would work without scarring our amazing canyon. All that would be lost is a couple of snow days do to avalanche mitigation, and I think most of us our just fine with that in order to protect our canyon. This canyon is so much more than skiing, and so much more important than anything Alta or Snowbird have to offer. Studies about the gondola have confessed that it won't fix our traffic woes. The location of the gondola also doesn't fix traffic at the mouth of the canyon. Let's keep our priorities to protect our beautiful resource and implement common sense solutions to protect our canyon.</p>	A32.29VV

This alone should be enough to cancel this project. Alta and Snowbird essentially created the traffic problem and the gondola as current planned only serves their limited interests at the expense of all other users. Public funds should not used for the sole benefit of private interests.</p> <p>Regards, Darrell Finlayson</p>	A32.3A; A32.3F

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Evan Fischer</p>	A32.3A; A32.3F
39704	Fischer, Jon	<p>I strongly oppose building roads in the areas the gondola towers will be. This will destroy the beauty of this canyon and take away the very thing that makes it so special.</p>	A32.3G
40514	Fischer, Kendall	<p>I'm against the construction of the proposed LCC gondola. I don't want years of construction for the creation of something that is a poor solution and creates additional noise pollution and visual obstruction.</p>	A32.29VV
48627	Fischer, Margaret	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 39634	Fischer-Colbrie, Tyler	<p>A gondola is a one-size-fits-few solution that will only help for a few weekends a year, only serve a portion of those who use the canyons, be useless outside of winter storm weekends, be far too costly for many resort visitors, and is a permanent solution that cannot adapt over time to canyon usage. This seems like a shameless grab to use land already earmarked for the project before it was approved, all while loading up with taxpayer money to support this boondoggle that will not effectively address canyon traffic issues</p>	A32.29VV

49587	Fitzgerald, Tiffany	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Tiffany Fitzgerald</p>	A32.3A; A32.3F

39599	Flanagan, Colleen	<p>I am against any Gondola that the taxpayers have to pay for. It's not fair to the residents of UT who do not ski pay for this gondola! I think the road should be widened. The Gondola is too expensive and too long of a ride to the ski resorts. Just widen the road!</p>	A32.29VV
39822	Flanagan, John	<p>Shouldnt snow sheds be the number 1 item to implement to keep the road open longer and more consistently? UDOT has done a great job implementing GazEx and Wyssen to up reliability, wouldn't snow sheds be the best thing to do in short term to increase reliability? That seems to be the bulk of closure is snow clearing. Gondola aside, just tolling and snow sheds would alleviate most of the issues in my opinion. I grew up in Utah and moved to Seattle and wait 1 hour + in traffic after an hour and a half drive to the resort so the LCC problem on peak days shouldn't be high on the priority of where UDOT is investing.</p>	A32.29VV
