39649	Rombough, Douglas	<p>Running into issues with the Inventoried Roadless Areas (IRAs) gives UDOT another opportunity to finally kill this bad transportation plan. As has been reiterated many times, you are using taxpayer dollars to build a gondola that only caters to a subset of canyon users, and greatly benefits private corporations. Now, not only are you taking from the many to give to the few through taxpayer money, you are taking from a great many more: the entire US population, who owns this roadless public land. It is time to stop this reverse Robin Hood. Little Cottonwood Canyon is mostly public land, and it should have a transportation solution that caters to all the public who want to access it.</p> <p>Cancel the gondola. Implement the enhanced bus plan with NO road widening. And stop the bus at trailheads for backcountry skiers. It is incredibly unfair to implement tolling, but not provide a bus to access the public land, only the private companies.</p> <p>This is clearly the best solution when you step back and stop being blinded by the idea that the gondola is "so sexy and European." It is the quickest to implement. It requires the least amount of construction and destruction. It moves no climbing boulders, so it does not ruin one persons recreation to provide for another. It serves all winter canyon users. And it has the flexibility to serve canyon users in all other seasons as well by just extending the season when the buses run. We are already having an issue with parking at trailheads on summer weekends, and the valley's population is only growing. To not even consider the flexibility of a transportation solution to solve multiple future issues is madness.</p>	A32.29VV

		Do not be captured by the sunk cost fallacy. The gondola is the inferior solution. It is okay to admit it this late in the game; you are not married to it, yet. Please have the courage to switch to the better alternative!	
40597	Romero, Erin	I do not support the costly and ineffective plan for a gondola in Little Cottonwood. As a UT resident, I believe it will primarily be used by tourists, and a better, more useable infrastructure would be a shuttle system that had more stops. The novelty of a gondola will wear off much faster than the time it takes to build, and UT will be left with an unused "ride" that doesn't take purple to the various destinations that locals frequent. 40235	Rose, Carolyn	I am strongly opposed to the gondola option. It will serve only Alta and Snowbird, and not solve the traffic problem for the rest of the canyon. It will permanently scar our beautiful canyon. Please try toll collection, enhanced bus service, or timed entry. These are long-term, tested solutions.	A32.29VV

50230	Roslewicz, Jillian	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Jillian Roslewicz</p>	A32.3A; A32.3F

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Sydney Rouse</p>	
47477	Routhier, Nate	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Nate Routhier</p>	A32.3A; A32.3F

39975	Royer, Gregg	<p>My suggestion would be snowsheds for the avalanche paths. You would have to make them tall to accommodate buses or heavy equipment being transported in the canyon but that seems like it would be cheaper, long-term investment used in Europe for avalanche control.</p> <p>Has cost of this been evaluated?</p>	A32.29VV
39251	Royer, Gregg	<p>As an out of state visitor I hope your still interested.</p> <p>I vote for the Gondola, either one.</p> <p>consider getting guests up and down the canyon regardless of weather with least long term impact. saves fuel, prevents more fossil fuel emissions. saves trailheads and climbing locations. You can still have buses and cars available in good weather. I can't believe cars will wait in line at base of canyon idling for hours waiting for udot to open road.</p>	A32.29VV

40289	Rush, Douglas	<p>I believe the best plan is more bus service (NOT less!) and more park and ride parking. This solution should be applied to both canyons! There is a large business park on 6200 S and this parking can be used on weekends. In addition I recommend making both canyon roads unidirectional with 2 lanes of uphill traffic for 1 hour in the morning and 2 lanes of downhill traffic for 1 hour in the late afternoon. In addition, UTA should try adhering to their bus schedule. Before this year riding the bus worked great 98% of the time. The bus solves both parking and traffic issues.</p>	A32.29VV

51748	Russon, Leif	<p>To whom it may concern,</p> <p>Dear Utah Department of Transportation, As a living, breathing, thinking human being I am disgusted by the planned construction of this gondola. As a native born Utahn I want only the best for the beautiful land I called home. This gondola would destroy the pristine landscape of one of Utah's greatest treasures, and for what? The option for the people wealthy enough to afford resorts and gondola tickets to avoid a bit of a traffic headache.</p> <p>There are so many options that would not only protect the landscape, but would support the local infrastructure. Bolstering the bus systems or adding car pool incentives to name a couple. Pull more cars off the road rather than add machinery that wouldn't help those of us that truly love the state of Utah's little cottonwood canyon.</p> <p>Please</p> <p>Regards, Leif Russon</p>	A32.29VV

		<p>exceptions or circumstances exist. Also, based on the opinion of industry experts and available online data, it is unlikely this gondola can be built without creating new roads in federally protected roadless areas.</p> <p>Little Cottonwood Canyon contains the White Pine IRA and portions of the Twin Peaks and Lone Peak IRAs. These areas are vital for preserving the natural integrity of the canyon and must be protected from any potential damage or destruction caused by the proposed gondola.</p> <p>The Utah Department of Transportation (UDOT) has released the Final Environmental Impact Statement (EIS) for Little Cottonwood Canyon, but it fails to adequately address the impacts of the proposed gondola on the IRAs in the canyon. Despite receiving over 13,000 comments during the public comment period, the project team has not conducted sufficient analysis of the potential impacts on IRAs under the RACR.</p> <p>Furthermore, UDOT has issued two supplemental information reports to evaluate the applicability of the RACR and the potential impacts to IRAs, indicating that the project team is not yet prepared to make a final determination on the issue.</p> <p>Public trust in UDOT is at stake, and UDOT has not adequately addressed not only the technical and legal challenges to the gondola, but it also has not addressed the opposition to the gondola of those who use LCC the most. Please work with leading LCC user groups like Wasatch Backcountry Alliance, Salt Lake Climbers Alliance, Students for the Wasatch, Friends of Alta, Friends of Little Cottonwood Canyon, Students for the Wasatch, Save Not Pave and Save Our Canyons to agree on transportation solutions that are actually wanted.</p> <p>It is imperative that UDOT fully comply with the RACR and conduct a thorough analysis of the impacts of the proposed gondola on the IRAs in Little Cottonwood Canyon. Failure to do so would be a violation of federal law and would have irreversible impacts on the natural resources and ecosystems of the canyon.</p> <p>I urge UDOT to reconsider the proposed gondola and implement common sense solutions that will not ruin LCC. Please take all necessary steps to protect the IRAs in Little Cottonwood Canyon.</p> <p>Thank you for your consideration.</p> <p>Sincerely, Brad T. Rutledge</p>

39427	Ryan, Sean	<p>Everyone, myself included, has already voiced the multitude of reasons why building a gondola in LCC is a horrid, unnecessary idea that does more bad than good. Now, with the release of these new documents, there is yet ANOTHER reason to not build the gondola. We do not need more man made structures in this small, sensitive canyon/environment. We do not want or need structures and towers built in the roadless areas (or any areas for that matter). Leave the poor canyon alone, increase bus service, and listen to the people for once. This is not an issue that needs to be solved with a gondola. The gondola is not the answer, no matter what your lobby groups say.</p>	A32.3A

40256	Rynders, Greg	<p>For the life of me I can't understand why our legislature believes a very expensive tram is a superior alternative to enhanced bus service with avalanche sheds. It is a less expensive alternative and if it fails, which it won't, would leave other options. In addition, why aren't Snowbird and Alta funding this very expensive alternative since they are the only beneficiaries. I believe the tram fails on all levels:</p> <ol style="list-style-type: none"> 1. The vast majority of the voting Utah residents do not want to pay for this project and in fact they don't want it. 2. It only services Alta and Snowbird, why aren't the other resorts screaming for equality. 3. Why aren't Alta and Snowbird paying for the tram. I am personally happy to help pay through taxes to pay for mitigation in Little and Big Cottonwood canyons. 4. The tram will diminish the esthetics of the canyon and the additional service roads will add to the pollution in the canyon. 5. The tram cannot move enough people. I believe this is a ploy to attract another Winter Olympics to Utah and invite the world to experience the Alps in the Wasatch. <p>I have said enough, the tram is a worthless idea before we implement more cost-effective ideas that place the cost squarely on Alta and Snowbird along with assistance from sales and hospitality taxes.</p>	A32.29VV

39500	S, Maranda	<p>No Gondola!! More parking!! A gondola It is not going to solve traffic problems, only cripple the Salt lake county tax payers. The gondola will not save the user time, money or accessibility. No tax payer money should be used for this!!! You're willing to degrade and use Utah tax payers money for an unnecessary tourist attraction that will not solve any of the problems we are facing? Absolutely outrageous this is even being. Discussed. More parking is what is needed at the resorts.</p>	A32.29VV

42212	Salkhordeh, Shyan	<p>My zipcode is [REDACTED] and I live on [REDACTED] in [REDACTED] UT. The gondola has no place in LCC and should not be exempt from the Roadless Rule - please focus your energy and time on solutions that benefit all users, without causing irreparable damage. After reviewing the reports it's easy to see that UDOT failed to fully examine the impacts of the Roadless Rule. The proposed gondola system would add towers & angle stations, while also clearing vegetation (snowsheds & widening the road are issues as well). LCC is one of Wasatch's most precious areas and this would impact multiple roadless areas in LCC (Twin Peaks, Lone Peak, and White Pine Roadless Areas). The gondola would permanently disrupt trailheads and recreation areas, won't operate during active avalanche mitigation, won't stop at non-resort backcountry trailheads (serving only two private resorts), will cause construction delays for the next decade, and will potentially increase crowds in the canyon without any studies being done on how many visitors the canyon can handle. These are just a few more reasons why this solution does not work.</p>	A32.29VV
55736	Salmon, Amalia	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Amalia Salmon</p>	A32.3A; A32.3F

41742	Salt, Alex	<p>While the Gondola will not be a road it traveling through many roadless areas would have the exact same consequences that the roadless area tries to protect. More than likely towers would have to be constructed in roadless areas. This would require the removal of timber, temporary roads built to the towers to get materials there, and bridges built across the creek to transport the materials to the constructions sites. The purpose of a roadless area is not just to prevent the construction of a road it is also meant in spirit to preserve a wilderness area by protecting its watershed and the natural resource like timber in the area. Building a gondola would cause damage by explicitly harvesting trees and preventing future growth of trees near towers and low points of the gondolas route. It would also damage our watershed as those roads will have to be permanent as maintenance will have to be preformed from time to time on the towers. Building temporary dirt or paved roads would cause destruction to the watershed as plants and trees would not be allowed to grow there. Destabilizing the ground with lack of roots so if there was a big rain storm or high run off it would increase the chances of the road washing out and a large amount of dirt flooding into the river or destroying a different patch of forest. I hope UDOT will look hard into these effects as a gondola would violate roadless area rules even though the gondola is not technically a road.</p>	A32.3A; A32.3H

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Nephertary Sanchez</p>	
53642	Sanchez, Rachel	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 39711	sanders, casey	<p>I am 100% opposed to building a gondola in little cottonwood canyon. This will have impacts on the wild nature of the canyon, our watershed, and only really benefits the privately ran ski resorts that already take advantage of taxpayers with sweetheart deals on leasing public lands. Close the roads to the canyons for everyone except permanent residents if there is a traffic problem. Taxpayers and public lands shouldn't suffer for the benefit of private corporations.</p>	A32.3A

41607	Sanders, Steven	<p>The spirit of the roadless rule for wilderness areas is to preserve and protect these unique and wonderful natural spaces. The Wasatch, with wilderness designated areas adjacent to a major metropolitan population center is a jewel that must be protected. The roadless area protections offers a way to reject the proposed Little Cottonwood Canyon gondola project, which would impinge upon the protected wilderness area. The overall negative impact of the gondola project, visually, environmentally, with benefits for the specialized interests of serving the two ski areas in the canyon is a disservice to not only the local population, but to the overall citizens of the state of Utah. In the interests of the many, use this opportunity to reject the Little Cottonwood Canyon gondola project.</p>	A32.3A; A32.3F; A32.3I

40961	Sanger, Emily	The gondola would not work. Watch this for proof: https://youtu.be/9yjZpBq1XBE	A32.29VV
40318	Sanger, Emily	As someone who has been recreating in LCC for nearly my whole life, I know that the gondola is not the best solution for LCC traffic. Allocate taxpayer dollars elsewhere, such as an improved bus system, rather than reducing the bus system and spending millions of dollars implementing something that will make the outdoors even more inaccessible.	A32.29VV
46780	Sanjay, Abhinav	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 42269	Sankovich, Kyle	The wide open views of LCC are something that all generations should have the opportunity to someday see. The gondola would detract from the natural beauty of the canyon. Additionally, the large amount of taxpayer money being used to complete the gondola project is unacceptable considering that many members of the surrounding communities will never use. There also has not been enough analysis completed to determine whether or not people would be willing to pay to the rates proposed to use the gondola service. This project should not move forward at this point.	A32.29VV

44808	Santoro, Jen	<p>To whom it may concern,</p> <p>I live in Cottonwood Heights at the base of LCC and I ski at Snowbird and in the backcountry. I used to use the bus and often would take my two very little kids with me. The bus was a very convenient, efficient method to get right to Snowbird. It also stopped at many trailheads. This year the bus was dramatically cut. The 953 is eliminated and thr 944 is cut in half. I hear the problem is bus drivers, and I would propose a solution: traffic hubs with parking away from the mouth of the canyons, bus only periods of the day, and subsidies to pay those drivers well and perhaps even help fund their training. This solution would also help BCC much more than a gondola in LCC.</p>	A32.3A; A32.3F

39725	Sather, Jen	Please do NOT consider building a gondola in Little Cottonwood Canyon. This favors a small group of users -- people who go to resorts -- and leaves out thousands of local users who visit other areas of the canyon. It would have a major negative impact on the beauty of this incredible place. If you love Utah and the natural treasure it is, please drop this gondola idea -- there are so many better solutions to transportation problems in the canyon.	A32.29VV

39535	Saunders, Abbie	<p>I think that the best solution is to improve the bus system. I think it would be beneficial to widen the road enough for ONE lane & make it a designated directional bus lane. This would allow for cars to still drive up & down the canyon in the regular lanes but the bus would have its own lane. Taking the bus doesn't appeal to people if they still have to sit in traffic. If there was a directional bus lane, buses could quickly drive up the canyon in the morning (then drive down in the regular lane where there isn't traffic yet). In the afternoon, the lane would then be a designated bus lane going down the canyon (& buses going up could use the regular lane without any delays due to the traffic flow). Enhancing the bus system would make this option much more appealing & only widening the road one extra lane would be adequate to solve the problem without negatively affecting the beauty of the canyon/bouldering areas as much.</p>	A32.29VV

40962	Scannell, Gordie	<p>NO GONDOLA. I think after a season like this, even with all the road closures, it should be obvious that a gondola is not the solution. Will the gondola operate during avalanche mitigation? High winds? Will the towers and angle stations be able to withstand avalanches? I foresee this being a big, expensive mistake that will do very little to help the current situation. The cons will outweigh the pros. The problems will outweigh the solutions. And, may I add, I am not anti-development...; bbt this is a development I cannot stand behind</p>	A32.29VV

		locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Brigham Schaalje	
39426	Schaecher, Jace	Do not put the gondola in. Your own report about vehicle traffic shows that it won't reduce the amount of cars, just the amount of people up the canyon. We don't need more people up there it's already really crowded. Install snow sheds and a better traction low that predicts weather rather than reacting to it.	A32.29VV
47748	Schaefer, Rachel	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 39889	Scheetz, Jessica	The problem is not the road. The problem is the number of people that Ski Utah, Snowbird and other tourism outlets have attracted due to their advertising. I have expressed this before, but Utah's public k-12 education system is the bottom 20% of the nation. Maybe put the money toward educating the future so that there are smarter individuals in Utah making decisions.	A32.29VV
40174	Scheetz, Jessica	Building this gondola is a detriment to the land and the locals. I would infer that a huge reason for the influx of traffic since 2018 is due to the Ikon/Epic passes, and then the "great COVID migrations" from other places. It appears that the resorts have projected their issue onto the state rather than solve their own problems. The state struggles to deal with any immediate, chronic problems, such as urban planning and logistics. All anyone has to do is experience the airport to realize the inefficient building concepts and planning and excessive spending they needed to include a nice "mall", even though it's an inefficient place. Meanwhile, the roads are a disaster, there's little to no water for building, yet they continue to allow building, and we have yet to see the rationale behind UDOT supporting this project compared to the other options; the ones that are much less costly and easier to construct. It's not a coincidence that Snowbird purchased the plot of land at the base of the canyon- they are going to make more money off a taxpayer funded project. Not to mention, we are at best average in public education: Louisiana, Mississippi, and Alabama spend more per student than Utah, to give perspective. 96% of Park City SD and Canyons SD tax money funds the poor, neglected public education in Utah. Yet, Utah passed a bill giving families that send their kids to private school \$2K. How does that equate? Clearly there's an issue with priorities because the focus is spending \$600 million on a Gondola. Perhaps intelligence and academics should be a priority so that in the future, students can find solve problems with innovative thinking overlapping fiscal responsibility.	A32.29VV

41371	Schein, Allan	<p>The Gondola may technically be an Invasive Species!</p> <p>The federal governments website https://www.invasivespeciesinfo.gov/what-are-invasive-species defines an Invasive Species as follows.</p> <p>As per Executive Order 13112 (Section 1. Definitions) on Feb 3, 1999 , an "invasive species" is a species that is:</p>	A32.3A; A32.3F; A32.3H; A32.3I

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>1) non-native (or alien) to the ecosystem under consideration and,</p> <p>2) whose introduction causes or is likely to cause economic or environmental harm or harm to human health.</p> <p>The purpose of this order is "to prevent the introduction of invasive species and provide for their control and to minimize the economic, ecological, and human health impacts that invasive species cause".</p> <p>So can the gondola be considered an invasive species? It is certainly invasive, poses a hazard to Little Cottonwood Canyon and Creek, many of its 24 towers violate the Roadless Areas designation and a gondola, for a fact, does not provide the solution to traffic management it is presented as being. It would physically and visually alter the canyon environment, violate zonings and federal law and fail to significantly solve any traffic issues.</p> <p>So, very much like a noxious species perpetuates itself with seeds, spores or creepers, Gondolaworks has proposed invading LCC with several dozen 25 story high mega-structures. In places we wouldn't allow an invasive weed to grow. Every one of the 24 tower structures requires an access road, a sizeable working perimeter and according to the EIS more than 200 acres in total will be impacted. Snowbird has claimed only 2 acres will be impacted. That's like saying a one acre field covered in Canada Thistle only takes up a square yard, because the thousand plants growing each only have a stem thickness of one inch. Its deceptive rhetoric and intentional misinformation. Simply considering any towers in LCC's designated Wilderness Roadless Areas is a public relations blunder and ill conceived idea born out of self interest with disregard for greater public and citizens wishes. Not to mention a Federal violation.</p> <p>Recently, an article was written about a "new fault" discovered at the gravel pit. There are 23 fault lines along the 200 mile long Wasatch Fault, and this was just another small fracture line within the well known and fully mapped Little Cottonwood fault. However, the Gondola's mega-towers will practically be built on the southern end of this fault, and certainly straddle it.</p> <p>In their TV ads, Gondolaworks makes a big deal about how distasteful and dehumanizing riding a bus to the ski areas is as opposed to the more comfortable and seemingly spacious gondola cars. We were told these tram cars carry 36 people. In the March 25th, 2023 Salt Lake Tribune article, Mr. Fields of Snowbird claims the cars have 20 seats and 16 more people will be standing. He also claims the ride will take 27 minutes but UDOT claims 55 minutes. Either way, in what now reveals itself as a pitifully small tram car, nearly half the people will have to stand with their skis, boots and backpacks toe to toe with everyone else in what is going to be a tram packed like a sardine. It makes an electric bus ride sound like the real holiday trip to the resort.</p> <p>Mr. Fields claims the Gondola can transport 3,000 to 4,000 people an hour. That calculates to a car leaving every 30 seconds or so. UDOT calculates the road only handles a bit over 700 cars an hour. It also means the base station facility will need to be the size of a cruise ship to handle the traffic, operation, storage and maintenance of what calculates to be more than 200 tram cars in motion to meet these numbers.</p> <p>Little if anything about the Gondola project makes sense. It's very much like planting a noxious weed in your yard because the flowers are pretty. Next thing you know, the drawbacks of planting it are revealed over time when you have a nuisance you can't get rid of or undo. That's what the Gondola is. The seed of a pretty idea being sold as the promise to everything you could want in a transportation system but will NOT solve the traffic problems that actually exist. It's an excuse to build a tourist attraction and extend a tentacle for growth beyond the ski areas natural boundaries. They have no place left to grow and what sounds like a good idea to some people is a logistical, environmental and economic nightmare in the making.</p> <p>No to towers in Little Cottonwood Canyon. No to the Gondola. After nearly 900 inches of snow this winter season, numerous road closures and days of interlodging, it still appears a tunnel would be the most efficacious solution for both canyons at once.</p> <p>Allan Schein Cottonwood Heights April 17, 2023</p>	See Responses in Appendix A of the ROD

40232	Schlaefke, Sarah	<p>Hi UDOT,</p> <p>Here we are again.</p> <p>And AGAIN I am telling you that the gondola is NOT the right solution to the LCC traffic issues. Over 80% of the Wasatch Front agrees with this sentiment. increasing bus service, tolling the canyon, or shuttle-only-ing the canyon are much more reasonable, less intrusive, less expensive options than building a gondola that won't even fix the issues in the canyon. Canyon closures will still happen, because if the canyon is closed for avalanche issues, you can have a gondola drop people off in an interlodged area. In fact, the math has been done and the gondola can't even transport as many people it says it can. The gondola cars will be horrible to maintain, and the damage to nature is just not worth it. Plus, this will cost EACH Utahn, even those who don't even live anywhere near LCC, >\$700 in taxes per year. That's just not just, not fair.</p>	A32.29VV

40064	Schmerse, Kevin	The Gondola is still the best option...The staff needed to drive busses will be even harder to staff in the future...The Gondola may be a more expensive version but is a better and more viable option...even if it was just for averting the avalanche danger we've seen this year.	A32.29VV
39932	Schmid, Renee	I believe the only way to get people up the LCC mountain is the gondola, A or B. Little Cottonwood Canyon is not the type of road that buses or other vehicles need to be driving on with crazy winter weather and avalanche danger. This year has proven that vehicles on the road are not a good idea, and a gondola would get people up without the worries of avalanches, road closures and other weather related issues. I truly believe the gondola is the way to go. Thanks.	A32.29VV

39391	Schmidt, Mike	<p>Do not build the Gondola!! The people of the Salt Lake Valley, and especially Sandy where I live, do not want the gondola. It's a terrible idea that would obstruct the beautiful views of the canyon. Plus, it would not solve the problem of traffic at all. There are far better ways to work on the traffic issues - tolls, increasing busses, making a bus lane, etc.</p> <p>I repeat, DO NOT build the gondola. We the people never asked for it and we don't want it.</p>	A32.29VV

41559	Schockmel, Kate	<p>This project is way too expensive, too invasive, and the push for it already seems corrupt. The gondola would ruin so much of the canyon and the state is asking the taxpayers to support a development that will financially benefit a handful of people. UDOT should be looking into clean buses and rail services up and down the state for the majority of the state's citizens. This is the second time I have commented on the Canyon project and I believe even the construction would be harmful to an already fragile environment. And finally, with climate change more and more apparent, with unpredictable weather patterns, could you even guarantee this project wouldn't become redundant before it is even completed? That's quite the gamble. Instead of looking for further development projects, perhaps the state could turn its attention to improving the environment already degraded from decades of crazy growth and poor building of infrastructure. Where's that at?</p>	A32.29VV

39604	Schultz, Steve	<p>First off, so you don't write me off as some crazy environmentalist, let me start out by saying I'm very conservative politically, and I'm not against development, mining, oil & gas, etc. However, the Cottonwood Canyons are an exception. These canyons are a jewel and must be protected at all costs. We must say no to new development and say yes to more wilderness. The gondola will be a major eyesore and ruin the wild character of the canyon. It's also for the sole benefit of two private ski resorts; of course which will be backed-up / subsidized by the taxpayers. I love my car, I love the freedom it provides, and I hate the thought of having to ride a shuttle bus up the canyon, but that's the reality we're dealing with due to population growth, and one I'm willing to live with to prevent this boondoggle. Thank you.</p>	A32.29VV

40504	Scibisz, Krista	<p>I am a Salt Lake resident and I am opposed to the gondola in little cottonwood canyon. You will be infringing in designated roadless areas. It is not feasible to be building gondola towers in these areas without having to build a road. It is unlikely that you will be able to build or maintain towers without road access. Additionally, gondola towers should fall under the definition of a road because it will involve destruction of the area for motorized transportation. I am also opposed to the gondola because it will be highly destructive in general to little cottonwood canyon. It will significantly impact ecosystems, wildlife, beautiful views, climbing routes, and trailheads. It will also be a very expensive cost to the tax payer despite an overwhelming majority of the tax payers not wanting this because it will only benefit 2 private resorts. The gondola will not serve as a solution on days that little cottonwood is closed because the gondola cannot run during avalanche mitigation efforts. Wind will be frankly terrifying as well as unsafe. It will not be faster when accounting for true wait times and ability to move people. It will cause an increase in parking frustration. There are many more less expensive and less destructive options to address the traffic in little cottonwood canyon. Improved bus systems, snow sheds, limiting travel to only public transit up the canyons, tolling, and paid parking will all improve the current problems without destroying ecosystems and nature. The gondola additionally will not in any way improve the traffic in big cottonwood canyon, which is continuously worse, whereas the other options listed would help both canyons. Please do not move forward with the gondola.</p>	A32.3A; A32.3F; A32.3H

40140	Scott, Austin	<p>I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p>	A32.3F
40432	Scott, Eric	<p>Please, DO NOT BUILD THE GONDOLA! I'm not sure how many times I have to voice this opinion but here we go again....</p> <ol style="list-style-type: none"> 1. The cost of the gondola will be an immense burden on the taxpayers of Utah for years to come. 2. The environmental impact caused by building the gondola is something that LCC will never recover from. 3. The current traffic problem (in both BCC and LCC) can be fixed by implementing parking reservation systems at all resorts and increasing bus service (and adding parking, where necessary). 4. Building a gondola will forever change the character of LCC. It will be a huge eyesore. 5. Building the gondola negatively impacts and destroys many of our world class climbing boulders. People travel from all over to visit the impeccable granite stone found in LCC. <p>PLEASE. We DON'T need more lanes! We DON'T need a gondola! We DO need increased bus service. We DO need additional parking in some cases. We DO do need snow sheds under major avalanche paths (Maybird, Tanners, White Pine. Little Pine). I have been a regular in BCC and LCC for over 25 years. Getting more people up the canyon is not the answer and will only result in a degraded user experience and longer lift lines (yay, more \$\$\$\$ for the ski resorts... why are we subsidizing them and lining their pockets???!).)</p>	A32.29VV

42278	Scott, Rob	<p>I'm strongly opposed to building a gondola as access to Little Cottonwood Canyon. It's a large, noticeable bit of construction right next to, if not in, a wilderness area. It would also not mitigate traffic in the valley. The lineup would just be to get in the gondola parking lot. And the gondola is slow and would not be useable for hiking or backcountry skiing. It seems like a handout of public money to 2 ski resorts (while I like to ski both resorts, that just seems like a bad use of public money). Can't you just have regular, reliable bus service? I would take it, and I think lots of others would too. Eventually switching to electric buses would seemingly be the most environmentally sensitive approach.</p> <p>-Rob</p>	A32.29VV

41706	Scrimgeour, Max	<p>The enhanced bus service is the lowest barrier to entry and the easiest to facilitate the start of a solution in the near future. The bus service is also the least environmentally impactful based on the results of the published study. In addition to this fact the reality of there being no parking at the gondola base and having to take a bus to get to the gondola would suggest that just staying on the bus would be a lot easier to begin with. You could have an awful lot of successful bus routes for \$600m for a lot of years.</p>	A32.29VV

49008	SCUNCIO, GIANNI	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, GIANNI SCUNCIO</p>	A32.3A; A32.3F
39734	Seabury, Jen	<p>Thank you for all your listening and hard work.</p> <p>I don't think a gondola should be built in roadless areas: the habitat and flora destruction, the unsightly towers, and noise are un-needed. Please try public transportation first. It can work if thought out. Thanks, Jen</p>	A32.3F

44409	Segalas-shaw, Samantha	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Samantha Segalas-shaw</p>	A32.3A; A32.3F

		<p>resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Bayley Serr</p>	
40434	Serrano Bellido, Luis	<p>I think there are always different options to solve this kind of problems with the traffic in the canyon. First, skiing in the areas like Alta or Snowbird is always seasonal. Less than half of the year skiers can ski there, but climbers, runners, hikers, bird watchers and other nature lovers can use these resources not only in winter time. One of the options can be limiting the number of passes per year, or the number of cars going up the canyon. Please, let's keep Little Cottonwood Canyon gondola free.</p> <p>Thanks, Luis Serrano</p>	A32.29VV

40915	Serrato, Alexandra	<p>We live at the mouth of little cottonwood canyon and are very aware of the traffic problems udot faces.</p> <p>Traffic up the canyon is limited to a few weekends in the winter and does not warrant a massive environmentally destructive and overpriced gondola solution. This proposal is being pushed as the only solution in order to earn money for a few and not for the welfare of the canyon. If the ultimate goal of this project were to protect the canyon we would calculate how many people the canyon would support and cap it and provide buses...not build bigger garages to swarm and create Disneyland and create a disaster for all. This is just not the solution...please do the right thing and not the greedy thing.</p>	A32.29VV

40197	Shaffer, Brett	<p>Hello, I am a long time outdoor enthusiast who frequently visits Little Cottonwood Canyon (3-5 times per week) in the winter and the summer. I STRONGLY oppose the concept of a permanent gondola in the canyon. Once you reduce the IRA and wilderness size to construct gondola the entire canyon becomes a resort and loses it wilderness status, and wild and natural feel.</p> <p>Imagine enjoying time in the wilderness area to find an overlook to enjoy the natural beauty, but all you see is a man-made gondola with cars moving up an down this otherwise natural space. Even though the gondola will not technically be in the wilderness area, it minimizes the original intent and concept of making the area a roadless and wilderness area in the first place.</p>	A32.29VV

39459	Shannon, Mike	<p>Hello. This comment is in regards to the US Forest Service Inventoried Roadless Areas identified in 2001 and the impact to those areas by the proposed Little Cottonwood gondola. Under the UDOT plan, the building of eight gondola towers, snow sheds, two angle stations, as well as vegetation and tree removal would take place within these Inventoried Roadless Areas. The Forest Plan prohibits road projects and recreation projects and the Environmental Impact Statement clearly says this is a highway project. The 2003 Revised Forest Plan allowed for some development to take place in certain roadless units, but it was NOT these units and NOT for the purposes of building the world's longest gondola with Utah taxpayer money to serve the desires of two ski resorts.</p> <p>UDOT's failure to recognize this problem from the outset of its gondola plan further demonstrates the shortsighted nature of this rushed gondola project. The areas that were inventoried as roadless were identified for a reason. That reason was for potential future conservation of areas that had not yet been impacted by humans. Roadless areas were not identified for future massive gondola construction. The ONLY reason to identify roadless areas is for their potential future conservation. Massive gondola towers strung up the entire canyon impacting these roadless areas both physically and visually is entirely contrary to the idea of identifying roadless areas to begin with. These areas should be left alone and not turned into a mountain Disneyland eyesore for the sole benefit of two ski resorts.</p>	A32.3A; A32.3G

42201	Shaskey, Cedric	<p>I do not support the gondola as a transportation plan. It is excessively expensive and will not address the problem in the long term as it has a fixed capacity and requires creating extensive parking at the base. The gondola is a permanent fixture which addresses traffic issues that only during select winter days - a small minority of the year. In my opinion, it is a marketing stunt to promote Snowbird and Alta at the expensive of the Utah taxpayers. Instead, a proven transportation option, such as closing the canyon to cars before high traffic days and implementing an improved bus effort (which has been shown to be successful in Zion NP) would be scalable, cost-effective and less environmentally damaging. Improved bus routing would allow parking demands to be more dispersed, and cost/implementation to scale with demand.</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>Finally, the gondola would not decrease present-day car traffic levels so direct pollution to the canyon from vehicles wouldn't likely be decreased by adding a gondola either.</p> <p>I have in this comment attempted to be concise and plain spoken. The seemingly predicted course of UDOT to have the Record of Decision (ROD) choose alternative B is rife with corruption, good old boy networking and an incredible waste of Utah and American's taxpayer dollars. To spend anywhere from \$550 million (2019 estimates) to \$1.4 billion (current 2023 estimates taking into account inflation, labor and material shortage) in 2023 and beyond, I believe why so many citizens don't trust governmental institutions, like UDOT.</p> <p>UDOT has a chance of redemption in the public's mind by stopping the present EIS process, starting over and doing the EIS process completely and correctly.</p> <p>Patrick A. Shea Patrick A. Shea [REDACTED]</p> <p>&</p> <p>Private Attorney [REDACTED]</p>	
45992	Shear, Alissa	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 39350	Shelley, Royce	Having reviewed the Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives and the Air Quality Supplemental Information Technical Report, and finding the statement "The _____ score for this roadless value would not change" in the summary for each roadless value, I fully support with moving ahead on the preferred alternative of "Gondala B."	A32.3I
56216	Shelley, Teri	Gondola. No. Just no. This is not helpful. It will cause more delays in the years constructing it than it will help in the years after. Don't destroy our canyon.	A32.29VV
40917	Shelley, Teri	Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.	A32.3A; A32.3I

41063	Sherwin, Tyler	<p>I strongly oppose the gondola being installed. It will destroy renowned and exceptional recreation in the canyon, and only serve the patrons of two ski resorts. Any transportation solution in Little Cottonwood needs to respect the climbing, hiking, mountain biking, and other activities the canyon supports. The rock climbing especially is world-renowned, and folks travel great distances just to climb in the canyon.</p> <p>Please do not irreversibly damage the iconic and beloved canyon we have. There must be a better solution.</p>	A32.29VV

40500	Shilton, Ryan	<p>The gondola is not financially viable. To cover the initial investment in 20 years, a round trip would cost \$80 or more. It's a terrible fiscal decision.</p> <p>Also, the gondola doesn't solve the any problems. It can't transport enough people up the canyon each day to meaningfully improve the traffic situation. None of the numbers add up.</p>	A32.29VV

42371	Showalter, Gary	<p>First, let's discuss the potential impact on the natural beauty of Little Cottonwood Canyon. The canyon is a cherished and iconic destination for its stunning natural scenery, including majestic mountains, serene forests, and rushing streams. The construction of a large gondola structure would change the character of the canyon, introducing a man-made element that could detract from the pristine beauty that draws visitors to the area.</p> <p>Furthermore, constructing a gondola would require significant earth-moving and tree-clearing activities that would undoubtedly cause environmental damage. These activities could disrupt the habitat of the many species of wildlife that call the canyon home, and potentially harm the sensitive ecological balance of the area. As such, those who cherish Little Cottonwood Canyon's natural beauty, such as myself, would argue that the potential benefits of a gondola are outweighed by the negative impact it could have on the environment.</p> <p>Then we have traffic and congestion. Little Cottonwood Canyon is already a popular destination for skiing and other outdoor activities, which can cause traffic jams and parking issues. If a gondola were to be installed, it would likely increase the number of visitors to the area, which could exacerbate these problems. Increased traffic would also contribute to more air</p>	A32.3F

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>pollution and noise pollution, which could have a negative impact on the quality of life for residents in the area.</p> <p>Finally, it's worth noting that a gondola may not necessarily solve the traffic and parking issues that exist in the canyon. While it could provide visitors with an easy way to access the ski resorts, it will also create new congestion points and may not alleviate parking problems. As such, it's not an effective solution to the challenges faced by Little Cottonwood Canyon.</p>	
46767	shreeve, Alex	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40994	Shubin, Scott	<p>I am opposed to the tolling on any road or easement granting public access to our mountains. These mountains are the property of the people who pay plenty in taxes to have access to Utah's beauty and wild land areas. This action is the first step in privatizing our natural resources for access by only those with the financial means to afford it. Take a look at the new private resort built on Mount Ogden. Those lands were national forest and now only a few get to enjoy them.</p>	A32.29VV

		<p>locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Emily Shultz</p>	
40553	Shultz, Nathaniel	<p>As a long term Cottonwood Heights resident we are told that the gondola is intended to solve traffic congestion; instead, I believe it could make it WORSE.</p> <ul style="list-style-type: none"> - It will put more people in the canyon without improving transit and without studying how many daily visitors the canyon can handle. - It won't stop at non-resort backcountry trailheads, leaving non-resort users to deal with traffic. - It won't operate during active avalanche mitigation. - It will permanently disrupt trailheads, recreation and bouldering areas, marring views and causing constant noise. - Construction will cause delays and highway closures for at least 5-10 years. - Construction debris will jeopardize a critical watershed supplying most of the Salt Lake Valley's drinking water. <p>I urge you to please realize that construction of the gondola is NOT the appropriate solution for LCC. Please listen to the residents and daily users and not those merely financially motivated for increased tourism.</p>	A32.29VV

42397	Sierzega, Dominik	<p>No gondola. It's ridiculous. It definitely won't solve car congestion in the canyons - all it'll do is pack the actual resorts with more folks - aka longer ski resort lines. Only winner would be for profit organizations.</p> <p>How about try a simple solution: a better bus system. Incentivize people to take the bus. Less buses during odd/off hours (mon-thurs between 1030 and 2). More buses on weekends at more convenient times.</p> <p>Also - since this is (or should be for the public) - maybe actually listen to what they are saying? Majority is against the gondola.</p>	A32.29VV

42310	Silva, Holly	<p>I would like to see both a gondola system and toll booths implemented for Little Cottonwood Canyon transit as a means of reducing all the pollution and traffic that is becoming worse with each passing year. I feel that the gondola would have much less of an environmental impact & carbon footprint than any proposed ski bus or rail system. Toll booths would cut down on needless traffic while also funding future environmentally friendly projects across the Wasatch Back & Front. The gondola and toll booths can be implemented year-round & I feel that neither would be detrimental to any ski resort based revenue. Gondolas are the most environmentally responsible solution for both vehicular traffic control and conservation of the Wasatch ecosystem. Both the gondola and toll booth projects would have very little impact to the Wasatch water shed, the air quality of the Wasatch & Salt Lake Valley, as well as being more beneficial for the flora and fauna throughout the entire Wasatch range than any proposed bus or rail system. I feel that most of the arguments being made against implementing a gondola system are being made from real-estate and commercial developers perspective and do not reflect a genuine nor fully educated concern for the environment along the Wasatch Range & Salt Lake Valley. As a native life-long Utah resident, I have witnessed over air quality becoming worse as our Utahn population continues to grow. I would rather see an environmentally responsible transportation system implemented over any commercial or real-estate interests, for my health's sake as well as that of future generations.</p>	A32.29VV

39749	silvers, scott	<p>No Gondola.</p> <p>Thank you.</p>	A32.29VV
40339	Silverstein, Trevor	<p>We should select a travel improvement option that does not degrade the Roadless Areas in LCC. It is our duty to preserve these roadless areas for future generations. By focusing our energy on enhanced bus service, we can both meet the travel needs of current inhabitants while preserving the natural state of these amazing areas.</p> <p>I do not want to see gondola development in the roadless areas of LCC.</p>	A32.3A
56364	Silverstone, Rachel	<p>The gondola proposed for LCC is too expensive, too invasive (on watershed and against the roadless rule), and not what the majority of Utah wants. Please, I beg that you reconsider the alternatives of public transit lanes, carpool incentives, and reserved parking.</p> <p>Sincerely, A concerned and lifelong Utahn - Rachel</p>	A32.29VV

		<p>Regards, tierra simons</p>	
55983	Simons-Kraan, Kimberly	<p>In event my comment does not get thru the online survey site:</p> <p>UDOT, what can we say that has not already been said in your failure to ignore public opposition, and your agencies obligation to serve the greater public good, with your proposed EIS gondola solution?! Public is through with your antics and wasting substantial amounts of public funds on this matter. Your inaction to respond responsibly to public in this matter speaks volumes of your willingness to abuse public funding for private interest and developer pet projects.</p> <p>Let's get right back to the basics of what, or whom, set your EIS into motion: To reiterate, and set facts straight, nothing in your EIS proposal/solution will reduce traffic in the LLC canyon road (SR210), per your own presented disclosures under Federal title 23, you cannot: limit traffic, nor close the canyon road, except in event of avalanche control, incident, or inclement weather. Your EIS statement, per your written presentation serves to "increase capacity" in the LLC canyon. So, your entire EIS proposal, and more specifically the gondola solution, is merely a smokescreen to appease the whims of private interest and developers pushing to construct a gondola in LLC, and more to the point, using public funding to do so for their private profit. Let's review the players, and who really benefits from the construction of a gondola: Wayne Neiderhauser(former state senator who helped set in pace the legislative process and framework for the EIS project), his sidekick Chris Mccandless(former Sandy city council member, Neiderhauser's development partner). Both developers stand to directly benefit and profit from a gondola station located at their proposed commercial development on the former LaCalli property, and the ski resorts, Snowbird & Alta resorts (both will benefit by the increased patronage, but something needed to be set in place fore the gondola was a sure bet). Recalling, the wife of Snowbird's current CEO, Melissa Fields taking one for the team, in conveniently taking a seat on Cottonwood Heights Parks & Recs committee, then pushing aggressively to get 11 acres necessary to run the gondola over the SR210 road rezoned from it's residential zoning status, otherwise this project would have been dead in the water. Snowbird also now owns the property where the gondola will be based, under a fictitious LLC. The resorts would not have purchased the land from developers had it not been a sure things. Fields solicited public for donations under the veil of 'saving this 11 acre parcel as preserved open space', and got the city of Cottonwood Heights indebted for the larger remainder of the balance necessary to purchase the land. (*this parcel was a key part of the planned commercial development, and got on the radar when developers recognized a gondola was not going to be permitted under R zoning parcel to run over top of residential property across the state road). UDOT, in less than a week from the land purchase by city of Cottonwood Heights, rolled out a cog rail station design on this very parcel, then when called out on it, you back paddled demanding you had no clue of the properties status now designated as open space, despite the fact that UDOT has had this area under its microscope for years into this EIS process. Other fringe private party interests in the gondola will undoubtedly realize fiscal benefit. And, of course back to you, UDOT. UDOT's agency will see huge monetary benefit, based on the bloated EIS costs projections – this project is nothing more than a secured big ole paycheck to UDOT - your role and actions here are unconscionable. Those are the ONLY benefactors of UDOT's entire EIS proposals. The public will not benefit, the public will have to pay to ride the gondola. The public will have to pay for its maintenance and upkeep into perpetuity. Again, the gondola serves no other purpose than to exploit use of public funds for private interest. The gondola is nothing more than a Disney caliber novelty ride, which upon riding once folks will quickly learn it's easier just drive their cars up the canyon road, and forgo the cumbersome, time consuming logistical nightmare necessary just to get aboard it, let alone add to this the compounded logistics of those traveling with young children, families, luggage, and/or ski gear in tow.</p> <p>Let's review safety concerns brought to UDOT by public, still unanswered: The gondola will NOT run during avalanche control, inclement or severe weather, high</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>winds, ice storms, power outages, and it certainly not operate when inter-lodge is in effect at the resorts, something UDOT has down-played in this process. UDOT has failed in its years of shoving this proposal into publics face to address any of these realistic safety concerns herein; no data, no studies, other than their own self-governing, scripted narrative that somehow reaches acclaimed factual status without any independent review whatsoever. That is the inherent problem in a state that provides too much authority to any singular agency, the result is no accountability. Moving on, and adding to those natural, or other unexpected induced conditions that would pre-empt a gondolas operations, UDOT has failed to address public safety issues that present from more of a human nature, example: those who hot-box a cab with cannabis with others/children aboard in the same cab, or drunks who inadvertently crash thru a cab window and fall to the ground(yes, that has happened), or the couple who chose to publically sex it up, or those traveling with covid, or other illness, knowingly or not, spreading it to others, or other verbal/physical altercations that may occur within that +37 minute ride? UDOT, what's your policy on riding the gondola with a gun or weapon, or drugs, or alcohol? Crickets. UDOT, have you even noticed under riding currents in our society, public is pretty unhinged lately, skiers and tourists are no exception. Udot, how are you addressing these realistic human-triggered public safety concerns? You haven't because your agency builds roads, and this level of public safety concern, and public security risks, are well outside your spectrum of duties as Department of Transportation; it's well outside your agencies ability, or capacity, to even consider these public safety concerns, so therefore it has not been included within your EIS. So, who is responsible for public safety and security risks assessments? I have yet to see Utah's Department of Public Safety come to the table to discuss any of these human-triggered, or security risks issues, either. It's all out of sight out of mind, as UDOT, your agency and the gondola proponents' advocate aggressively for a cheery & safe "disney' experience. But, the reality can be otherwise, and you've failed to acknowledge that aspect of public's safety when boarding for a ride. If the intention with constructing a gondola is for Snowbird to contend as an Olympic venue, then how will you create policy that mitigates risks factors to public when some deranged fanatic decides to hijack a cab for political purpose during such a high profile event? Airlines face these, and a slew of other public safety issues, and have created strict polices accordingly when boarding their planes. Train rail, Ferries, and Busses have similar rider policies. UDOT, you, on the other hand, have not once addressed, or presented any inkling of consideration to such public safety policies or security risk management, in all your years of efforts to shove this gondola project forward; Rather you have demonstrated total disregard to public safety on this aspect, because money in pocket over public good IS your policy.</p> <p>To recap, as to whom will benefit from construction of a gondola, the greater public WILL NOT BENEFIT from a gondola constructed within LCC. As others have become WOKE to your EIS BS, UDOT, I too will demand your agency by meticulously audited for what appears corruptive cronyism relationships, and for your actions in steering this entire EIS process to meet developers private interest objectives. You have more to answer to than not, UDOT.</p> <p>My city, [REDACTED], has hereby taken a stance in opposition to construction of a gondola, and I stand with them, echoing their sentiment as follows,</p> <p>"City of Cottonwood Heights stands firmly against the 22 towers of the gondola project, five of which encroach on the "Roadless" designation within LCC. Each tower base will significantly disrupt and degrade the natural habitat for living creatures, flora and fauna but will also degrade the aesthetic and recreational experience for all canyon users. To be "roadless" is to infer that the area be kept natural, towers for the purpose of transportation should fall within the category of a "road facility".</p> <p>As a community resident, who will be effected by this project, we wish to see UDOT's screening which measures polluting affect be based on non-diesel (electric or natural gas) buses, which is the transit of the future, when comparing the gondola to bus service. Right now UDOT FEIS is based on metrics</p>	

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>utilizing diesel-only/14 year old buses. By the time the gondola would be built, closer to 2050, with all the federal incentives for non-polluting transit, electric buses will be even more technologically advanced than they are now. Proterra bus manufacturer has proved electric bus worthiness for steep canyon highways in recent years.”</p> <p>UDOT, we’ve all grown tired of your self-assessments in this EIS process. You’re obvious willingness to provide independent developers an avenue to exploit public funds is shameful at best, but more suspect as criminal, and abuse of public tax dollars for private profit gains.</p> <p>You are legally bound to creating NO ROADS in the environmentally sensitive areas accessing the tower locations your inept engineers selected, and that failure is on your agency, you obviously failed to recognize this requirement before blindly adopting private developers gondola construction whims as you EIS mainstay. Now, I suspect, your musings will have you attempting to circumvent, or write-in exemptions from these very requirements.</p> <p>Let’s continue,</p> <p>Above all, let get back to facts, fact you present to public. Your agency insistently touts the gondola will reduce emissions, yet your agency has failed to provide logical, statistical data, nor have you produced any other realistic studies supporting such claims. Fact, adding 5 more lanes to current 2 lanes of Wasatch/SR210, and construction of a mega-2500-vehicle parking structure will induce demand of vehicles in the area, thereby INCREASING auto emissions, and resulting pollution. You’re creating more traffic problems than your gondola will ever solve. To make matters worse, you have intentionally diluted the data with false claim stating a gondola will “reduced emissions” within LCC. You do so by measuring emissions against the increased canyon capacity, using total persons traveling into/out of LCC combing the numbers of gondola riders + vehicles to present a lowered ratio. Your logic is deliberately flawed to sell the gondola as a sustainable solution. Isolated, and presented as an alternative replacement transportation module for other emissions producing transportation systems, a gondola can be considered sustainable, I won’t argue that. But, in the context of the EIS, and your claims, as you present, it is an additional transportation system, not a replacement system. Therefore the rate of vehicles in the LCC canyon will not change. The LCC canyon will have the same flow rate capacity as prior, and will produce the same amount of % emissions pollutants as prior. In using your illogic, the per capita % of emissions will present as a lowered % based upon being measured against the increased total number of persons in the canyon; therein you are merely twisting data and facts, and artificially reducing that % of emissions based on calculating the % of emissions against total number of persons in the canyon (regardless of how they are transported, whether by car/gondola). The fact remains that you have not actually decreased % emissions pollutant levels at all from vehicle emissions within the canyon. Regardless of total number of persons entering/existing the canyon the number of vehicles in the canyon does not change in the equation, and per your own admission in the EIS study, you are not reducing total # of vehicles driving in/out the LCC canyon, therefore again % pollutants from emissions simply does not change. To abuse statistical data in this manner, as you have, and present the gondola as serving some sustainable form of public good in reducing emissions in LCC is not only an unrealistic false claim, it is unethical. To put this simply, to those reading, including yourselves, who are not comprehending how you, UDOT, are abusing statically data to sell public on the gondola, here is a simplistic antidote: If it rains 1” per hour, that does not change whether 100 people are standing outside or 1000 persons are standing outside, it is still raining 1” per hour. So, please cease with the BS to public on the environmental claims of a gondola reducing % emissions in LCC. The amount of BS in your EIS study is astounding. Your EIS expressly states the gondola will not decrease, nor limit traffic in the LLC canyon, and further, you expressly state that the entire EIS study is designed to “increase” capacity in the canyon. That is done for benefit of DEVELOPERS, AND PRIVATE SKI RESORTS TO MAXIMIZE THEIR PROFITS, BY INCREASING CAPACITY IN THE CANYON, YOU INCREASE PATRONAGE FOR THESE PRIVATE ENTITY COMMERCIAL ENTERPRISES, and UDOT reminder, that you’re abusing use of public tax dollars in this process to assist in</p>	

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>private businesses to increase their profit margins. Increasing profits for private commercial businesses, developers, and ski resorts is NOT A MATTER of PUBLIC SAFETY. The private interest have been steering UDOT to use public funding to realize their own profits, and you are hook, line, and sinker caught in their scam. SHAME ON YOU, UDOT, for acting on behalf of private interest over the welfare of public safety and public good, the one responsibility your public agency is taxed with. Your agency has lost much credibility in public eye as you entwined yourself with private interest and developers to meet those private agendas, not PULBIC needs.</p> <p>The only course(s) of action you, UDOT, should be taking in respect to PUBLIC SAFETY on your state road SR210 into LLC, and the Wasatch Blvd section through Cottonwood Heights is:</p> <ol style="list-style-type: none"> 1. DO Increase Traction Law Mandates to demand on vehicles entering SR210/LLC to be equipped with a min. snow tire designation of type "3-peak mountain/snowflake", remove the M+S tire as an acceptable snow tire in the canyons where winter conditions are extreme, 2. DO Provide check-point management at the LLC canyon mouth, and stop allowing cars into the canyon that are ill-equipped for conditions that present. Your agency has been removing(temporarily lifting) traction law restrictions every winter, at its whim, and allowing ill-equipped vehicles into the canyon during short moments of clear weather, KNOWING that later in the day there are severe weather events scheduled – to send ill-equipped, unsuspecting drivers into LCC under this premise is a blatantly NEGLIGENT act on behalf of your agency, 3. DO Construct long overdue SNOWSHEDS at key locations along the SR210 LLC canyon road, to create safer roads for public to travel. This was your first course of action over 50 years ago, 4. DO Work with UTA to increase a network/system of smaller flexible public transit busses, that are powered by electric or hybrid cleaner fuels. Create networks that have fast-track busses with access points from all over the valley, 5. DO Maintain the valley corridor section of SR210 as a scenic byway, from mouth of LCC through Cottonwood Heights city to SR190, as 2 lanes. There is no logical reason to widen this section of road, and invite/increase traffic, vehicle emissions, and degrade safety along this heavily cycled corridor, 6. DO Provide ski traffic management along SR210 when both LLC and BCC are closed due to avalanche control, and get those vehicles waiting for canyon road openings to park along the shoulder, and not in the drive lanes. 7. DO NOT use public funds to construct a large parking garage in a residential area, thereby inducing more vehicles to descend upon an already impacted residential area; in doing so it creates more traffic congestion, diminishes road safety, and causes pollution from increased emissions. <p>It's time, UDOT, to take accountability and responsibility for your actions in respect to the EIS, and your far-fetched gondola solution. Time to go back to the drawing board, and let public rather than private interest steer decision making, that is relevant to public good, pubic interest, and above all public safety.</p> <p>?????▲??</p> <p>Regards, Kimberly Kraan</p>

		<p>-- shesk8@att.net</p> <hr/> <p>On Monday, April 17, 2023 at 08:03:51 AM MDT, Little Cottonwood EIS Project Team <littlecottonwoodeis@utah.gov> wrote:</p> <p>Can't read or see images? View this email in a browser</p> <p>Public Comment Period For Supplemental Information Reports</p> <p>Closes April 18 at 11:59pm MST Comments on the reports will be published and addressed in the Record of Decision Thank you for your continued interest in the Little Cottonwood Canyon Environmental Impact Statement (EIS).</p> <p>As many of you are aware, the Utah Department of Transportation (UDOT) released the Final Environmental Impact Statement (EIS) for Little Cottonwood Canyon in August of 2022 and held a public comment period, with the project team receiving over 13,000 comments.</p> <p>As a result of the comments received, the project team determined additional analysis was warranted regarding the impacts of the Final EIS alternatives to Inventoried Roadless Areas under the 2001 Roadless Area Conservation Rule (RACR) and the Forest Plan. The RACR required the USDA Forest Service to conduct an inventory of roadless areas for their potential to be designated as wilderness based on size (at least 5,000 acres) or location (contiguous to an existing Wilderness Area). If an area meets these criteria, it becomes an "Inventoried Roadless Area" (IRA) and, in general, the RACR prohibits road construction, road reconstruction, and timber harvesting (cutting, sale, or removal) in IRAs unless certain exceptions or circumstances exist. Little Cottonwood Canyon contains the White Pine IRA and portions of the Twin Peaks and Lone Peak IRAs.</p> <p>Also following publication of the Final EIS, the Federal Highway Administration (FHWA) requested that UDOT complete additional air quality analysis. In particular, FHWA requested evaluation of a scenario under the existing modeling where all ski buses would be powered by diesel fuel rather than the model default which consisted of diesel, compressed natural gas, and gasoline powered buses; and that all transit buses be evaluated at the maximum expected service life of 14 years rather than a variable age bus fleet.</p> <p>As a result of public and agency input, UDOT has issued two supplemental information reports to evaluate applicability of the RACR and the potential impacts to IRAs and for additional air quality analysis.</p> <p>The public review and comment period for the supplemental information reports is open until April 18, 2023 at 11:59pm MST and the project team is accepting comments on the analysis contained in these reports. Formal comments can be mailed or submitted through the project website, email, voicemail, and text messages. This information is listed on the Contact section of the website.</p> <p>Please note that as the public had the opportunity to comment on the entire Final EIS, comments received in this comment period that are unrelated to the supplemental information reports will not be addressed in the Record of Decision (ROD). View Reports Submit Comment</p> <p>Agency Coordination Some of the elements in the alternatives evaluated in the Final EIS are located on National Forest System lands managed by the Uinta-Wasatch-Cache</p>	

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>National Forest under the 2003 Revised Wasatch-Cache Forest Plan. A Forest Service decision may be required pending the FHWA's determination of what, if any, National Forest System lands needed for the selected alternative may be appropriated under their authorities (23 USC 317). Appropriation of National Forest System lands by the FHWA would be a non-exclusive easement for highway use, with the Forest Service retaining jurisdiction over all other uses.</p> <p>The Forest Service decision would be to authorize UDOT's use of National Forest System lands for the selected alternative, as analyzed in the Final EIS, and may also include a Forest Plan amendment if the proposed use is inconsistent with the Forest Plan. A Forest Service ROD, if necessary, would be based on the Final EIS and supplemental information reports, and would be issued after UDOT's ROD is published. The Forest Service ROD would be subject to the Forest Service project-level objection process (36 CFR 218).</p> <p>Final EIS Information Due to the amount of public interest in the Little Cottonwood EIS, many sources are sharing project information and data with varying degrees of accuracy. Please see the tables below for the most current and accurate information directly summarized from the Final EIS regarding the alternatives being considered. View All Final EIS Materials</p> <p>EIS Process & Schedule It's important to note that the National Environmental Policy Act (NEPA) process UDOT follows doesn't tally comments as a "yes" or "no" vote like a referendum. The NEPA public comment process is not a vote, but rather an opportunity for UDOT to field concerns, suggestions or criticism for a project's purpose and need, alternatives, and to evaluate whether additional engineering or environmental analysis is needed, as well as the mitigation measures proposed to minimize environmental impacts.</p> <p>The public comment periods and input received throughout the EIS process provide opportunities for UDOT to improve the study documentation and make sure it's thorough, accurate, and complete. UDOT's final decision will consider how the alternative best meets the project purpose as well as an alternative's environmental impacts. View Final EIS Comments</p> <p>Informational Videos Watch Part 1 of the Final EIS overview provided by UDOT Project Manager Josh Van Jura to learn more about the preferred alternative and proposed phased implementation.</p> <p>Watch Part 2 of the Final EIS overview provided by UDOT Project Manager Josh Van Jura to learn more about the preferred sub-alternatives.</p> <p>View the video below for more information on the environmental study process the Little Cottonwood Canyon EIS is following.</p> <p>Connect with us.</p> <p>Website Email Facebook Twitter Instagram The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being or have been carried-out by UDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated May 26, 2022, and executed by FHWA and UDOT.</p> <p>This email was sent by littlecottonwoodeis@utah.gov to shesk8@att.net</p>

40411	Sloan, Eden	<p>I am against building a gondola in Little Cottonwood Canyon. It will destroy the untouched beauty of the canyon. How undeveloped Little Cottonwood is what makes it unique and is a big reason why we all love it. The gondola will also do little to fix the current traffic issues. We need a different solution like more buses on the roads we already have. Not a hideous gondola ruining our beautiful canyon. The Cottonwood canyons are for so much more than resort skiing and we shouldn't destroy the canyon for the sake of this one sport.</p>	A32.29VV

39713	Small, Miranda	<p>The proposed plan is in direct violation of 3 major designated Roadless Areas. This cannot be allowed. Policies and protections are put in place to prevent anything that may detract from the landscape, and that includes gondola towers and the accompanying structures. These designations cannot be bent to suit the wills of those who will profit from it - the purpose is to protect the LAND from all potential harm. Can we say that these towers will not harm the landscape in a similiar way to a road? Which are prohibited in the same areas the towers would be built? Following logic, these towers are not only prohibited, they go against the desires of the people.</p> <p>Please review the following from Save Our Canyons: 8 gondola towers, snow sheds, 2 angle stations, and vegetation removal would take place within Inventoried Roadless Areas that exist in Little Cottonwood Canyon. The Forest Plan prohibits road projects and recreation projects in these areas, and, as the EIS states, these projects are for highway purposes.</p> <p>The public comment period reads as though Wilderness Areas are expanding but, to the contrary, UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon.</p> <p>Roadless areas are protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas. These places need to be protected!</p> <p>This does not even begin to address the crowding issue at the ski resorts as is. I had the pleasure of a quiet day at Brighton this past Sunday, and it was the most fun day all season, even though it was a rare day without fresh powder. Please protect the expereince of the skiers, rather than pouring more people in to the slopes. We will have more safety incidents if crowding continues to increase.</p>	A32.29VV

39462	Small, Miranda	We as a community who love the Wasatch are BEGGING you to preserve it. Not capitalize on it. We who love skiing in the winter are begging you not to send boards of more people onto our already crowded, beloved mountain, sacrificing the experience and the safety of it all, simply to make more money. We who love the boulders along the road are begging you not to destroy their beauty that challenges us to be better and worthy of climbing them. We who love hiking the trails that cover the summits and valleys are begging that you HELP us maintain the wild spaces that we strive to leave no trace in. The Gondola option goes against the heart and soul of all who love these mountains, and speaks only to those who wish to profit from them. This is an irreversible, monumental decision to be made, and the country is watching to see if Utah is going to back our wild spaces or further line the pocket books of millionaires. I am hopeful yet, that those making decisions will choose to listen to the populace who vehemently oppose the gondola, rather than the select few who are pushing the gondola. Thank you for considering the future of the Wasatch and her wild beauty.	A32.29VV

41691	Smith, Brett	<p>I am against the gondola. It is atrociously expensive and I am against paying for it as a tax payer when only two Utah resorts benefit. It won't solve the congestion problems caused by avalanche mitigation as the gondola won't run during mitigation, which is widely known. It also isn't known how popular the gondola will be amongst resort skiers, driving is much more convenient versus having to deal with the hassle of finding parking then paying for a gondola ride. Finally, this only serves resort skiers. This has no benefit to the backcountry communities, climbers, hikers, or skiers. As a lifelong Utah resident and avid skier, I am against the wasteful building of this Gondola. This does nothing to help the issue, will be exceptionally expensive, and will change the beauty of LCC.</p>	A32.29VV
46098	smith, Bri	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Bri smith</p>	A32.3A; A32.3F

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p>	A32.3A; A32.3F

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, George Smith</p>	
39588	Smith, Gerald	<p>When you consider all of the alternatives for transportation in the Little Cottonwood Canyon there is one clear winner. The gondola will provide fast, safe, and environmentally friendly transport in the Little Cottonwood Canyon. I mention this recently having spent a 4 hour trip down the canyon Rt SR-210 after the road was closed for avalanche mitigation. A gondola could alleviate the avalanche risks of this uniquely steep and precipitation blessed canyon on the Wasatch front. The concern of air pollution and disruption of the environment would certainly be worsened by more bus traffic. This is a national forest area. It is meant for the use of the entire country, not just the Cottonwood Heights community. This communities' dissent for the gondola seems to stem from inflated real estate values which they believe that a gondola base station will somehow devalue. We need to take a lesson from our European brethren in productive mass transit. Europe has multiple mountain towns that are only accessible by train, tram or gondola.</p>	A32.29VV
43572	Smith, Gibson	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 46675	smith, jesse	<p>To whom it may concern,</p> <p>Super nice of Patagonia to auto fill a response for me. However, this is from the heart. Work took me away from Park City after being born there in 1996 and living there until 2020. I have gone skiing and have climbed little countless times and it would be devastating to see a hideous gondola destroying a high amount of the beauty in little.</p> <p>This gondola very obviously only supports a very small population of Utah and those wealthy enough to use it. There are far too many low income climbers and skiers who wouldn't be able to even ride the gondola.</p>	A32.29VV

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Wynter Smith</p>	A32.3A; A32.3F
39699	Smith, Yda	<p>I am 100% against the whole idea of this gondola which will provide nothing helpful to the canyon or its visitors in the long run. I am seeing now that the plan includes use of roadless areas that should continue to be protected from development. Please halt this whole idea and work toward protection of our natural environments, not destroying their beauty. As a resident of this fine city, I urge you to protect what it is we love about this area, not fall prey to developers who are just out to make money and excessive development that only diminishes the value of our environment.</p>	A32.3F; A32.3G
46733	Smith, Zachary	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 		Regards, Zack Smith	
39819	Smith-Clementi, Julie	As this weeks snow reminds us, roads are easily closed. A gondola would allow for more options. Being stuck in the mountain isn't a great option.	A32.29VV

40206	Smoger, Lowell	I am wholeheartedly against a gondola in any of our canyons. We can do better than this. We can spend our money better. We can protect our natural places better. We can create solutions that are equitable and not just for the elite who have access to this gondola. Increase bus service to the canyons from all across the valley. We need better bus system and tolling before we even consider a gondola.	A32.29VV

39322	Snyder, Ashley	<p>I have two comments. First, thank you so much for providing the detailed supplement reports! They go into great detail and are informative on the environmental concerns. My second comment goes back to my primary concern about why the gondola is a bad idea: This is NOT an environmental issue--IT IS A HUMAN ISSUE. If you can tell me FOR CERTAIN that the majority of people who would travel in Little Cottonwood during ski season would actually use the gondola, then I might be less opposed. However, even then, I would still be skeptical because no way are there going to be a lot of families who want to take their children and their skis up on a gondola that will take 55 minutes to travel one way. No way will you get people who in general carry a bunch of personal supplies with them and who are wanting to take all that up on a gondola and carry it for the whole day or have to figure out where to find enough locker space for it at the ski resorts. And what about tourists? Will they even know about the gondola when they come? Many people will travel by car if they come, and I highly doubt that they will choose to leave a car behind so they can sit for 55 minutes on a gondola. My concern is that a gondola would be a HUGE WASTE of money with little to NO environmental benefit because most people will still drive their cars. Expanding buses or any other public transportation changes will likely suffer from the same issue, but at least the buses are cheaper to expand and do not create further environmental upset in the immediate surroundings in Little Cottonwood. ABSOLUTE NO to the gondolas no matter what environmental impact reports show. I am not against the scientific reporting of your supplement writers. I am saying that the primary issue is how humans are and will continue to choose to deal with commuting to the ski resorts in Little Cottonwood.</p> <p>Thank you for reading my comments.</p>	A32.29VV

49696	Snyder, Cameron	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Cameron Snyder</p>	A32.3A; A32.3F

		<p>Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>3. The construction of towers in the canyon will cause irrefutable damage to the canyon ecosystem. Helicopters will not be capable of foundation excavation as suggested by UDOT. There will be a need for access roads during construction and subsequent maintenance activity as well as in anticipation of emergency evacuation procedures. Research shows that wire rope systems are not infallible and there will come a time when evacuation will be required.</p>

40417	Sohm, Mike	<p>The proposed option to construct a gondola up little cottonwood canyon is financially irresponsible, poorly planned, not sustainable and completely disregards access and recreation uses of all demographics other than private resort winter skiers. This UNWANTED option poses to directly benefit private business using public dollars against the public's will. It will serve only those wealthy enough to enjoy an already cost prohibitive sport by making it even more cost prohibitive. A gondola will not relieve the traffic or parking problems that already exist, it will simply shift the bottle neck to the neighborhoods of the east benches of Sandy. A gondola will not provide access to the canyons during avalanche conditions, because the ski resorts regularly impose inter lodge restrictions for the safety of the public. A gondola will further pollute the aesthetic of the canyon, destroy other means of recreating by bulldozing granite boulders in order to build concrete towers and will massively restrict access to the backcountry during construction and beyond. All the while to serve an elite, affluent customer who uses private resorts for 4 months out of the year. There will be no use for a gondola during the summer months. UDOT needs to actually fund the busing system that is in place instead of defunding during peak times of need. Utah wants a better option rather than the UNPREFERRED gondola!</p>	A32.29VV

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Winta Solomon</p>	A32.3A; A32.3F
44974	Solorio, Cheyanne	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 42029	Solstad, Ryan	<p>If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.</p> <p>On a practical side, as a skier, this gondola will be painful to use. Park your car, wait for a bus, bus to a base station, wait for a gondola. This is much worse than just parking and riding a bus up. You're foolish to think people will want to ride this, even if it's free and the canyon has a toll.</p>	A32.10G

40993	Sorensen, Carolyn	<p>Once again, I will submit my comment to Stop the LCC Gondola! You have heard from the citizens, you have heard from the representatives of the local cities and overwhelming they do not want the gondola. It is abhorrently expensive and benefits only a tiny minority and the ski resorts, but puts huge costs on the population.</p> <p>There are solutions to the traffic problems that would be more quickly implemented and more economical - build appropriate parking structures near the canyons with increased reliable bus service. The ski resorts need to set up reservations services - just look at the complete 180 that Park City accomplished this year with their reserved parking and bussing system! 60+ percent of the cars had 4+ people! In conclusion, please look for reasonable alternatives and stop throwing our taxpayer money away on this gondola scheme!</p>	A32.29VV

40586	Sorenson, Eric	<p>I have several concerns with UDOT's proposals regarding their impact on the three designated IRAs. I'll preface those concerns by reiterating that all of UDOT's development proposals grossly contradict the rationale for establishing IRAs, which is to combat "development and urbanization" within IRAs and "to preserve their undeveloped qualities" (Introduction, 2001 Roadless Rule, Federal Register). To shoehorn the UDOT proposals into the 2001 IRA rule takes, at best, an exceptionally narrow interpretation of the rule. The UDOT proposals in fact turn a blind eye to the intent of the 2001 IRA rule and grossly distort exception allowances within the rule.</p>	A32.3A; A32.3F; A32.3I; A32.3G

		<p>Maintaining natural-appearing landscapes with high scenic quality.</p> <p>The three IRAs impacted by UDOTs proposals are the very core of what makes Little Cottonwood Canyon one of the most beautiful canyons on the planet. A characteristic of an IRA described in the 2001 rule includes: "Natural appearing landscapes with high scenic quality" (emphasis added). UDOT's discussion of potential impact in the LCC EIS Roadless Area Assessment is pathetically understated. Absolutely no one who knows and uses the canyon regularly would suggest there's any truth whatsoever to UDOT statements such as, for example, "Gondola Alternative A would not change the high (5) score for the landscape character and integrity roadless value of the overall White Pine IRA." That statement is a flat-out mischaracterization of the proposed development. For UDOT to claim as a statement of record that the IRA-defining characteristic of "natural-appearing landscape with high scenic quality" will "not change" by constructing huge steel towers linked by thick cables transporting large conveyances is completely disingenuous.</p> <p>It's equally deceptive to suggest that only a small percentage of the IRA, whether land or air, is impacted by the proposed developments. The "natural-appearing landscape with high scenic quality" for these three IRAs is not only appreciated within those few acres. It's while hiking, climbing, and skiing within these areas that the high scenic quality is appreciated. And the development will be obtrusively visible from a huge percentage of the total IRA, not just the few acres that are actually developed. Furthermore, a sizable fraction of visitors to the canyon only ever appreciate the beauty of the IRAs from the road. Development of the UDOT proposals, particularly the gondola alternatives, would unarguably mar the high scenic quality from those viewpoints. It's like putting a McDonalds between a Grand Canyon viewing area and the canyon itself and saying that technically, the McDonalds isn't being built within the Grand Canyon.</p> <p>A secondary purpose of the Roadless Area Conservation Rule is to preserve opportunities for "primitive diverse recreation" and "providing solitude and quiet dispersed recreation opportunities." Snowshoeing in a pristine wilderness area while the world's longest gondola rumbles overhead every 3 minutes does fit a reasonable definition of conserving "primitive" or "solitude" opportunities.</p> <p>Road Construction</p> <p>Whether widening the road for an enhanced bus lane or access for an angle station, the proposed road construction is clearly prohibited by the IRA rule. There is no allowance within the rule about what fraction of the IRAs can be encroached by proposed construction, so all references to percentages of the IRA impacted in the UDOT proposal ("0.22% of the Twin Peaks IRA") are deceptive. In fact, the frequent references to small fractions of the IRAs impacted are ironically highlighted in very sharp contrast by a few lines in the announcement of the 2001 rule from the chief of the US Forest Service:</p> <p>"Is it worth one-quarter of 1 percent of our nation's [natural resources] to protect 58.5 million acres of wild and unfragmented land in perpetuity? Seventy-five years ago, another Forest Service employee, Aldo Leopold, answered that question. "Such a policy would not subtract even a fraction of one per cent from our economic wealth, but would preserve a fraction of what has, since first the flight of years began, been wealth to the human spirit."</p> <p>Approved road construction or reconstruction is clearly and explicitly defined in terms of conservation of these areas, and those exceptions are (quotes from the RACR, emphasis added):</p> <p>A road is needed to protect health and safety in cases of imminent danger, such as threat of flood, fire, or other catastrophic event that, without intervention, would cause the loss of life or property; A road is needed to conduct a response action to mitigate environmental hazards under the Comprehensive Environmental Response, Compensation, and Liability (CERCLA) or a restoration action under CERCLA, the Clean Water Act or the Oil Pollution Act A statute or treaty provides for a road or one is needed in accordance with outstanding or reserved rights The Secretary of Agriculture determines that a federal aid highway project is in the public interest or is consistent with the purposes for which the land was reserved or acquired, and there is no alternative route or site For the continuation, extension, or renewal of a mineral lease originally issued prior to 2001, provided such a road minimizes resource impacts and is removed at the termination of the lease or when no longer needed for the purposes of the lease None of these provisions comes anywhere close to applying to the UDOT proposal, regardless of what acreage fraction of the IRA would be encroached. And there is certainly no provision within the rule that allows for road development within IRAs to allow visitors to a private resort (albeit myself a very frequent and sometimes frustrated one) to shave time off our commute.</p> <p>Timber Harvesting</p> <p>UDOT's LCC EIS Roadless Area Assessment seems to suggest that the only restriction from the IRA Rules is really road building, and that timber harvesting is permitted if "incidental to implementing an activity not otherwise prohibited". However, the 2001 IRA rule clearly defines these incidental activities as "incidental to management activities not otherwise prohibited." It seems deceptive on the part of UDOT to cut out this critical wording, as "management activities" throughout the 2001 IRA rule clearly refer to these activities as conservation efforts to maintain and protect the quality of the IRA. See the following direct quotes from the 2001 IRA rule (emphasis added):</p> <p>Some aspects of IRA management (for example, timber harvesting) are based on maintaining or enhancing roadless area characteristics. Management actions that do not require the construction of new roads will still be allowed, including activities such as timber harvesting for clearly defined, limited purposes; development of valid claims of locatable minerals; grazing of livestock; and off-highway vehicle use where specifically permitted. Limited tree cutting could occur incidental to other management activities, such as trail construction or maintenance, hazard tree removal adjacent to classified roads for public health and safety reasons, fire line construction for wildland fire suppression or control of prescribed fire, or survey and maintenance of property boundaries.</p>	

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>The final rule provides for the cutting, sale or removal of timber in substantially altered portions of inventoried roadless areas for any purpose as long as the activities do not require additional road construction or reconstruction.</p> <p>The final rule allows timber harvesting of generally small diameter timber for limited purposes when it maintains or improves one or more roadless area characteristics and: (1) Improves threatened, endangered, proposed, and sensitive species habitat or (2) maintains or restores the characteristics of ecosystem composition and structure, such as to reduce the risks of uncharacteristic wildfire effects.</p> <p>Again, the management activities allowing for limited timber harvesting are for conservation of the IRA, not for building the world's longest gondola to two private entities that requires traversing IRAs.</p> <p>In summary, UDOT either does not understand the purpose of the Roadless Area Conservation Rule, or they choose to flatly ignore that purpose. Regarding that RACR purpose, UDOT should reflect on the following statement from the USFS RACR fact sheet:</p> <p>"Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our Nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are highly valued qualities of roadless areas. Conserving inventoried roadless areas leaves a legacy of natural areas for future generations. The Roadless Area Conservation Rule limits or prohibits activities that would most negatively affect these values."</p> <p>Quoting again from the chief of the US Forest Service: The RACR serves to "protect the most pristine and rare of wildlands." ... "This is a conscious choice made with an eye toward the future. As we witness the march of urbanization and the development of wild places, we can take comfort in the knowledge that we have given at least some of our remaining undeveloped land ... lasting protection. Through that choice, we pay tribute to those who have come before and preserve their legacy for those who will follow" (emphasis added).</p> <p>UDOT's proposals are clearly prohibited by both the letter and the spirit of the 2001 Roadless Area Conservation Rule. Reading UDOT's LCC EIS Roadless Area Assessment side by side with the 2001 Rule is roughly the same as me proposing a 300mph rocket-powered car to do laps around I-215, all while suggesting that it's not technically a "motorized vehicle" and that I'll only be using 0.2% of the highways within the state. Not only would it still be against the letter of the law, it blatantly ignores the underlying intent of those laws (highway safety) just as the UDOT proposals blatantly ignore the intent of the Roadless Area Conservation Rule – "preserving the undeveloped qualities" of IRAs. Like it or not, the law is the law, and in this case it's there to protect, preserve, and conserve those areas, with no exceptions to trade those for convenience. The only thing UDOTs proposals are truly in line with are precisely what the Roadless Area Conservation Rule was explicitly established to prevent: the "march of urbanization and the development of wild places." UDOT should not proceed with the development proposals, and the US Forest Service should not grant an RACR exception to proposals that grossly contradict the rule and its underlying intent.</p> <p>Eric Sorenson Sandy, UT</p>	
48186	Sorenson, Heather	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40955	Spataro, Joe	<p>While no solution is perfect, I continue to support the idea of a gondola or a rail system, although I realize this is not in the table. The gondola should be designed/placed in a manner that allows it to run during inter lodge. We need the gondola to solve *most* of the problems we currently experience, and it must be quick and relatively convenient. If these goals are too lofty, perhaps the gondola is a bad investment.</p>	A32.29VV

39679	Spencer, Craig	<p>Will the leaders of Utah put down the shovels one time in favor of conservation of some of the most beautiful land in our state and country? A gondola is not only not necessary, it's complete overkill. A developer's profit project. Reduced traffic into the canyon is preferred over a man-made eyesore that would forever destroy this beautiful canyon. People who have lived here and recreated in the canyon their whole lives view this project as another example of Utah leaders' build at all costs mentality. This attitude, which became feverish at the time of the 2002 Olympics and continued until now, is destroying the very things that make this state special to begin with. The gondola is not necessary. Don't build it.</p>	A32.3I
39959	Spencer, Edward	<p>I have already voiced my concerns. This is a really bad idea because of aesthetics, parking, tax payer burden.</p> <p>Why not simply put up more buses and have people use those or place a fee for use.</p>	A32.29VV

40467	Spencer, Glen	<p>NO TO GONDOLA - PLEASE</p> <p>Roads and infrastructure for the gondola will cause significant negative impacts on USFS Inventoried Roadless Areas. Construction of the proposed gondola should not take place within the Roadless Areas.</p> <p>The gondola would directly violate the Roadless Rule and take away from many of the qualities that are protected by RACR: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>While UDOT claims required new roads would cover a small percent of the total area of the three Inventoried Roadless Areas, the visual, noise, and watershed impacts would impact a significantly larger percentage of the three roadless areas.</p> <p>The construction of towers in the canyon will cause irreputable damage to the canyon ecosystem. Helicopters will not be capable of foundation excavation as suggested by UDOT. There will be a need for access roads during construction and subsequent maintenance activity.</p> <p>Access to gondola towers in USFS Inventoried Roadless Areas will be required in anticipation of emergency evacuations. Research shows that wire rope systems are not infallible and there will come a time when evacuation and emergency repair will require road access to the towers.</p> <p>UDOT is presenting data on a "worst case, all diesel bus scenario" designed to make the bus options look bad. UDOT NEPA process is in error in failing to generate a "best case scenario" using currently available, proven electric buses?</p> <p>The proposed gondola towers will be visible and audible from virtually the entire Roadless Areas and from much of the two National Wilderness Areas that closely parallel it – a</p>	A32.3A; A32.3F; A32.3I; A32.3H; A32.10G; A32.3G

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>violation of the intent of RACR.</p> <p>The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of timber within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>A gondola angle station will lie inside a USFS Inventoried Roadless area ¼ mile from the Tanner Flat Campground, a public recreation area. The road to the angle station and paved area would require timber removal and impact visually on campers as shown by UDOT's renderings, and noise pollution will double according to UDOT's FEIS.</p> <p>The gondola angle station would not only pave over a portion of the roadless area, it requires excavation of an EPA superfund site that UDOT's FEIS says is likely contaminated with lead and arsenic. UDOT fails to assess the environmental impact of such a construction in an Inventoried Roadless Area.</p> <p>Even if the gondola system isn't defined as a 'road', it would be built for highway purposes and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan.</p> <p>The gondola is itself a major new transportation system built on top of Inventoried Roadless Areas. The world's largest gondola would impose even greater impacts than a paved road on the miles of Forest Service scenic and recreational values of the three Roadless Areas it crosses.</p> <p>Building gondola towers and an angle station in Roadless Areas will greatly impact over 1,200 different plants and animals.</p> <p>The Little Cottonwood Canyon watershed is essential to Salt Lake City. The City assessed the proposed gondola's impacts on the watershed to be highly detrimental to the development and continued well-being of the metro area.</p> <p>Taxpayers will pay each month to support a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, both directly from new roads and a major new transit system in the roadless areas.</p>	
51422	Spencer, Jennifer	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Jennifer Spencer</p>	A32.3A; A32.3F

41651	staes, catherine	<p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon.</p> <p>We have enjoyed many years of skiing at Alta, but the gondola does not make sense for several reasons, most particularly the permanent impact on other areas of the canyon.</p> <p>The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. It is clearly functioning as an infrastructure to move conveyances from one location to another requiring permanent infrastructure that will need to be accessed by short roads to build and maintain.</p> <p>I strongly support lower-cost solutions that use existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. These alternatives will not permanently change the canyon for a small % of the population to access private resort for a few weekends a year.</p>	A32.3A; A32.3F
41657	staes, edward	<p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon.</p> <p>The gondola will not improve traffic congestion. it will be expensive and is not practical. It will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, and threaten our critical watershed in the canyon.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. If anything, more areas of the canyon should be classified as Roadless or wilderness to preserve the canyon and its ecosystem for eternity.</p> <p>Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. here is a definition of a road: "a wide way leading from one place to another, especially one with a specially prepared surface which vehicles can use." the infrastructure for the gondola meets this definition.</p> <p>I support using the existing road and incentivizing carpools and bus service that can stop at multiple locations throughout the canyon. and can be scaled up or down depending on demand.</p>	A32.3A; A32.3F
41654	Staes, Rosie	<p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. It also does not solve much of the traffic problems that the Cottonwoods face as it does not address Big Cottonwood Canyon traffic or the traffic that accumulates along Wasatch Boulevard and the Sandy City routes to Little Cottonwood Canyon.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p>	A32.3A; A32.3F

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Additionally, this year showed that the gondola towers would be impacted by the frequent avalanches in Little Cottonwood Canyon including Tanners, Maybird and White Pine. Those avalanches could render the gondola useless after an avalanche and the tax payers would once again be on the line to pay for even more gondola work.</p> <p>As someone who has lived my entire life in Utah, I am deeply concerned about the long term impact the gondola will have on the canyon, its Roadless Laws, our drinking water and unfair burden it places on Utah's taxpayers to serve two private ski resorts.</p>

54507	Staker, Abigail	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling) and year-round enhanced bus service with stops at multiple locations and more frequent service at peak times.</p> <p>Regards, Abigail Staker</p>	A32.3A; A32.3F

40414	Stam, Cindy	<p>Please do not build this. Leave our canyons alone. I remember when this state was uncrowded, the air was better and we had plenty of untouched land. Now we are turning into CA and we don't need this running thru more untouched land as well as homes to wildlife that lives there. We have intruded in their land long enough. Please do not build this gondola.</p>	A32.29VV

		Regards, Madeline Starr	
41975	Stasny, Jerome	Ladies and Gentlemen, INTEGRITY is the optimal consideration at this juncture. As well as planners you are also stewards, and must keep foremost in consideration the entirety of the population and conformity to existing environmental rules that govern the entire population. And please, as a reminder, you number among us as part of the "entire population." Integrity, doing whats right for all, not the few. Please follow and adhere to the established rules and guidelines. Thank you.	A32.29VV

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Samantha Steele</p>

39877	Steenburgh, Erik	<p>I am writing to express my deep concerns about the proposed Little Cottonwood Canyon gondola project and its potential impact on the forest service roadless designation. The roadless designation was established to protect our nation's last remaining wild forests and ensure their preservation for future generations. By constructing a gondola in the Little Cottonwood Canyon, you would be violating the roadless designation, which prohibits any new roads or permanent structures in these designated areas.</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>The proposed gondola would require the construction of a new road and multiple support towers, which would damage the natural landscape and disrupt the fragile ecosystem that has been preserved for years. The roadless designation is a critical tool in preserving the unique and fragile natural resources of our forests, and we must work together to uphold it.</p> <p>Furthermore, any construction activity or disturbance in the area could potentially lead to soil erosion, which in turn could impact the quality of the water that flows downstream. As Little Cottonwood Canyon is a part of the Salt Lake City watershed, which provides drinking water for over 300,000 residents, it's critical to preserve the natural conditions of the area. Any development in the region must be carefully planned and executed to avoid adverse effects on the watershed.</p> <p>It's important to note that the Little Cottonwood Canyon gondola project has faced strong community opposition. A recent study by the Salt Lake Tribune found that 89% of people in the Salt Lake Valley are against the project. This overwhelming opposition highlights the need to listen to the concerns of the community and carefully consider the potential impacts of the project.</p> <p>Therefore, I strongly urge UDOT to reconsider the Little Cottonwood Canyon gondola project and to engage with the community to find alternative solutions that are more in line with the community's wishes and the protection of the environment.</p>	
40100	Steenburgh, Jim	<p>In the gondola design section (2.3.2) of the LCC FEIS, it is stated that the towers were "optimized to avoid being affected by avalanche paths to the extent feasible."</p> <p>No maps were provided showing tower positions relative to paths, but it appears that at least one (e.g., Tower 9) and possibly more towers could be impacted by larger avalanches such as those occurring in April 2023.</p> <p>Will passive avalanche protection structures be used to protect these towers? If so, how large will they be and have their visual impacts been assessed? Will they be contained within the footprints presented?</p>	A32.29VV

42332	Steffan, Ed	<p>Vote no on Gondola for the second time. The people have spoken against this before. Bus system and traffic were fine last year, but the city has halved the bus schedule on "staffing issues" pay a fare wage and hire. I applied and received no call back. Run busses at fluctuating intervals for morning and afternoon traffic. Logistics isn't hard. It worked before y'all broke it.</p>	A32.29VV

40165	Stegman, Audrey	The proposed gondola plan for LCC will cause irreversible damage to the environment while costing the tax payers \$600 million that could be put towards other community problems to name just a few child hunger, homelessness, the opioid epidemic, and mental health. The gondola will serve only those going to two privately owned ski resorts, not all those who go up LCC are going to these resorts. It is especially concerning that the bus infrastructure has increased wait times between pick ups and there is nothing being done to decrease the amount of time buses are waiting in traffic. dedicated bus lanes leading up to the canyon entrance can help to decrease the bus wait times for those making the decision to ride the bus. The infrastructure needed to build the gondola will harm the beautiful canyon scenery and affect climbing areas that are positioned next to the road. The gondola will mainly	A32.29VV

		<p>support winter sports but there are many other seasons in a year with activities such as hiking and climbing that do not revolve around the two privately owned resorts. Overall canyon traffic is an issue but the biggest slow down is the bottle neck prior to entering the canyon. By having the gondola that will just change the bottle neck to a different location. With additional bus support with decreased pick up times and a dedicated bus lane to get to the mouth of the canyon, people will be more inclined to take the free bus than to drive their personal vehicles. The gondola is not accessible as an entry fee may be required and only caters to privately owned resorts.</p>

		<p>resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Elizabeth Steiner</p>	
40473	Steinke, Susan	<p>Save Our Canyons Save Our Canyons</p> <p>NO GONDOLA LITTLE COTTONWOOD CANYON No Gondola Little Cottonwood Canyon</p> <p>inIssues</p> <p>NO GONDOLA IN LITTLE COTTONWOOD CANYON. We must take action before UDOT finalizes their decision to move forward with the gondola.</p> <p>The Utah Department of Transportation (UDOT) started an Environmental Impact Statement (EIS) in 2018 to find transportation solutions for Little Cottonwood Canyon (LCC). In August 2022, UDOT announced the gondola as its preferred solution. UDOT will issue its Record of Decision (ROD), or final decision, this summer based on comments from the Final EIS. UDOT will then need to find funding.</p> <p>The proposed gondola is approx. 8-miles long. It would begin at the base of LCC and include two stops: Snowbird Ski Resort and Alta Ski Area. The gondola would consist of 20 towers and 2 angle stations, ranging from 130 to 262 feet tall.</p> <p>Save Our Canyons strongly opposes the gondola because it won't solve traffic congestion, but instead threatens our critical watershed and limits canyon access for non-resort users.</p> <p>We support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. While we're disappointed UDOT is still considering the gondola after widespread opposition from local communities and public officials, we still have time to act.</p> <p>UDOT Public Comment Period Closing April 18th UDOT claims building a gondola would be exempt from the Roadless Rule</p> <p>Suggested comment to send to UDOT</p> <p>We have a list of suggested comments and encourage everyone to edit the sample below and use their own voice. Ideas of what to say in the comment form going to UDOT:</p> <p>I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	A32.3A; A32.3F

41592	Steinman, Paul	No gondola! Building the massive gondola towers will effectively destroy the base of Little Cottonwood Canyon. Preservation was the goal of roadless area designation. Destroying these areas with gondola towers and lines is still destroying this treasured landscape. The Salt Lake valley is blessed to have the Little Cottonwood wilderness so accessible; we should be doing everything possible to preserve it. Focus on clean, public transportation options (e.g. clean fuel bus/shuttle service). I would rather have my tax dollars fund this type of transportation. Putting my tax money towards destroying LCC to benefit two ski resorts is a horrifying prospect.	A32.3F
45577	Stellin, Liesl	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Liesl Stellin</p>	A32.3A; A32.3F

39354	Stepan, Don	<p>I still think the only viable and best solution for the Little Cottonwood Canyon traffic problem is the GONDOLA. The "bus test/solution" attempted this past winter was a total disaster. All the buses get caught in the traffic jamb just like all the cars do. And there is never enough parking for all the cars at the ski resorts. Please build the Gondola for Little Cottonwood Canyon!!! Don Stepan.</p>	A32.29VV
39944	Stepan, Donald	<p>Little Cottonwood Canyon is closed frequently this 2023 season for avalanche mitigation. NO BUSES, no traffic. The Gondola solution can keep the canyon road open, even during avalanche mitigation. The Gondola solution is the only workable & viable solution to traffic congestion in Little Cottonwood Canyon.</p>	A32.29VV

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Craig Steury</p>	
49426	Stevens, Carter	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 41578	Stevens, George	As a taxpayer in the state of UT, I do not support the gondola construction. It is a clear violation of the Roadless Area Conservation Rule, and would permanently alter a landscape that is meant to be undeveloped. This entire gondola plan is supported by those who stand to gain financially, and does not consider the environmental or economic well being of the average Utah citizen.	A32.3A; A32.3F

40237	Stewart, Josh	<p>As a visitor to Little Cottonwood for 40+ years in the summers and winters, I have seen the many service vehicles and road work done on the roads that lead to the ski lifts and tram at Snowbird and Alta. Data should be gathered during the summer months showing how frequently service roads are accessed to provide a baseline for how often a gondola tower and road would be accessed. These roads are very impactful to the nearby fragile forest areas and take away from the wilderness beauty of the area. In addition, mountain cyclists and hikers start using these service roads and that cause more impacts that require a long term maintenance budget and strategy. I would encourage more frequent bus service and limited Single Occupancy Vehicle auto access on busy days as an alternative to a gondola.</p> <p>Sincerely,</p> <p>Josh Stewart </p>	A32.29VV

42221	STEWART, MATT	There are many other sensible alternatives listed in the public comments. The opposition to building a gondola is strong, find another way to make improvements	A32.29VV
39425	Stewart, Michael	The gondola project is a direct profit benefit to the associated ski resorts. This should be in no way funded by the tax payers. This is a concern of the Resorts and should be under their purview to obtain additional accesses to their venues at their own cost. Again, this should not be placed on the tax payers of Utah as it is a very specific request by for-profit companies. Let the Resorts tackle the concerns of their patrons, not the residents of the State. Let the Resorts build 'upward' on their land to accommodate more customers and profit, don't tread on the taxpayers who in general do not support the project.	A32.29VV

56354	Stirling, David	<p>To whom it may concern,</p> <p>It's shocking to me that any person in public office is even considering this proposal. It eliminates none of the current problems and only further disrupts the already delicate ecosystem of the canyon. Please just make the canyon bus only, especially in the winter. It's cost effective and it would reduce traffic. The cost of the gondola is projected to be near 1.4 billion, nearly as much as the Burj Khalifa. That is an insane amount of money and we know from experience it will end up over budget. It only benefits the resorts and doesn't actually alleviate the main concerns.</p> <p>I urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. The fact that this plan is even being considered calls into question the motives of our lawmakers and legislators. There is no one that would support this plan based only off the projected plusses and minuses.</p> <p>I support lower, almost no cost, solutions that utilize our existing infrastructure, carpool incentives such as occupancy-based tolling, year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, or even just light enforcement of the traction law. I also support making the canyon bus only, but I doubt you all will agree with that. These solutions utilise the existing infrastructure and don't jeopardise access to the beautiful canyon by putting a paywall on it.</p> <p>I hope the Utah legislators come to their senses on this issue. Please listen to the people, not the lobbyists and corporations.</p> <p>Regards, David Stirling</p>	A32.3A; A32.3F

40469	Stobbe, Leslie	<p>I have been born and raised at the bottom of little cottonwood canyon. My love for it is so strong and I want to see its beauty protected in every way. If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy. Electric buses are a proven technology, came to Utah 5 years ago and traveled to all the major ski resorts in Utah. Last year the 3rd generation technology bus demonstrated its ability to navigate all the major resorts in the Wasatch Front. UDOT is presenting data on a "worst case scenario" (which will make the bus option look bad). Why won't UDOT generate a "best case scenario" using currently available proven electric bus technology?</p> <p>This gondola will still not stop the funneling that happens at the mouth of that canyon. It will only congest it further as they try to push more people to the two resorts that reap the rewards. Please, please consider doing further studies on the impacts of electric busses and other cost efficient alternatives before doing something that cannot be undone.</p>	A32.10G

39433	Storrs, Kathryn	<p>The public has made it clear that we do not want the gondola. 89% don't want the gondola. When is there ever a majority like that? The gondola only serves 2 ski resorts. But everybody will be taxed to pay for it. That is not democratic. That is not equal representation. The gondola is a terrible idea. It isn't any more efficient than busses but is vastly more expensive and detrimental to our environment.</p> <p>In order to build this gondola, 8 towers, snow sheds, and 2 angle stations need to be placed. In order to do this, vegetation must be cleared and service roads out in. Little Cottonwood Canyon has three designated and protected roadless areas that would be violated.</p> <p>The White Pine, Lone Peak, and roadless areas are set aside because they are pristine and intact ecosystems. Anybody who claims bringing in heavy and large construction equipment wouldn't harm these areas is lying to themselves and everyone else.</p> <p>The Forest Plan prohibits, road projects and recreation projects, and as the EIS states these projects are for highway purposes. Roadless areas protected under the 2001 Roadless</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas.</p> <p>These areas are protected for a reason, because we want them that way. Nobody wants the gondola. It will not solve the problem because people won't use it. These areas need to stay protected.</p>

42215	Stoy, Tina	<p>I am against the gondola being built in LCC. You've heard it all at this point, but it feels necessary to express the importance of the resorts capping their skier numbers in a given day. Implementing a reservation system for the resorts will be one of the best ways to cap the number of people traveling up the canyon on a given day. The gondola only serves the resort, so the traffic for backcountry skiers won't be impacted by adding a gondola. There are a number of environmental reasons building a gondola is a poor decision for the health of the canyon. Adding buses is a lower cost way to mitigate traffic. If there were satellite bus stations that serviced the canyons more traffic could be filtered out earlier than the mouth of the canyon and serve backcountry trailheads. Please listen to all the voices opposed to this project. Democracy only works when the voices of the people of whom you serve are listened to. Thank you</p>	A32.29VV

40483	Strickland, Sam	PLEASE LISTEN. We do not want the Gondola. It benefits one group of people. It won't change anything. This is not the move. I strongly, strongly oppose the Gondola.	A32.29VV
54170	Strickler, Shelby	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Shelby Strickler</p>	A32.3A; A32.3F

41009	Strohacker, Eric	<p>Don't destroy nature with a gondola. Tax payers should not be footing the incredibly expensive cost let alone be paying to destroy habitats and ruin the beauty that is Little Cottonwood Canyon. More cleanly-powered buses, more tolls, and encouraging of carpooling. A gondola is a drastic step to make the problem worse.</p>	A32.29VV

42326	Strong, Ellie	<p>While the gondola is intended to create an environmentally friendly option for travel up little cottonwood, the current plan is not friendly towards the canyon. Construction of the gondola would entail 5-10 years of constant construction in tight canyon. Construction of the posts would create significant damage to the canyon, and create enormous amounts of noise in a canyon protected by RACR. I do not want a gondola in roadless areas. The interpretation that UDOT is using of the RACR to justify the construction of the gondola is weak at best, and shows a clear disregard for the intention behind the law. Little cottonwood's watershed, views, and timber are all protected under the Roadless Rule, and the gondola plan would destroy those. The gondola is a permanent highway that effects our watershed and recreation areas forever.</p>	A32.3I
