

Record of Decision

Little Cottonwood Canyon

S.R. 210 | Wasatch Boulevard to Alta

in Cottonwood Heights, Sandy, the Town of Alta,
and Salt Lake County, Utah

Appendix A2: Reproductions of Comments on the Supplemental Information Reports

Utah Department of Transportation

UDOT Project No. S-R299(281)

Submitted pursuant to

42 USC 4332(2)(c) and 49 USC 303

The environmental review, consultation, and other actions required by applicable federal environmental laws for this project are being or have been carried out by UDOT pursuant to 23 USC 327 and a Memorandum of Understanding dated May 26, 2022, and executed by FHWA and UDOT.

40479	A, B	<p>We need solution like the gondola, everyone who says more buses never taken a bus in their lives. unless UDOT closed the roads during peak hours and the bus is the only way up and down.</p> <p>lets do it</p>	A32.29VV
45410	Aagard, Aubrie	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Aubrie Aagard</p>	A32.3A; A32.3F

39974	Abbott, Frances	How to solve SR 210 problems. • Build snow tunnels • Add more buses & drivers (pay drivers more like UTA did at SLC's AllStar Events) • Increase parking fees at Alta and Snowbird • Share parking fees with UTA • On powder days have a police escort for buses to the mouth of LCC (skiers would flock to buses) • Ski bus service must originate from TRAX stations • SR 210 would not need to be widened • Pay drivers more and you'll have drivers It's simply SUPPLY & DEMAND.	A32.29VV

40224	Abrams, William	<p>This has been a brutal winter, regardless of the method of transportation there would have been challenges. To build a gondola will require multiple service roads one for each support tower. Then the gondola and the towers and the roads would all require maintenance. Please just improve the existing road as it is used by more people year round. That busy 2 hours in the morning and afternoon, then restrict cars and increase public transportation. Thanks for listening</p>	A32.29VV

40246	Achelis, Steve	<p>Please don't install a gondola in the beautiful LCC. The the ski resorts, which are privately owned businesses, should provide parking in the valley and free transportation to their resorts. I don't understand why it is Utahan's responsibility to subsidize access to these businesses or to pay for, or accept, a gigantic gondola in our back yard. If I submitted comments more than once, my apologies. I feel strongly about this and want to protect the canyons, both Big and Little, for my grandchildren.</p>	A32.29VV

42257	Adams, Chris	<p>It could not be more clear: the Roadless Rule established in 2001 states that there shall be no development or construction in the roadless area. The gondola clearly will impact that area and as such should not be built. This is just one of dozens of reasons that it should not be built (ie. a \$1.4B solution for <30 days of traffic to assist two ski areas; the equity injustice of spending that kind of taxpayer money that could be put to such other great uses; it is not flexible, like buses; etc.) but is yet another example of how this process has not been well thought out and is strewn with problems. Please stop proceeding with the gondola - which is opposed by the vast majority of Utahns and all of the local governments for the SLCo municipalities - and look at common sense solutions like buses, tolling, paid parking and more.</p>	A32.3A

40877	Adams, Josh	<p>I very much support the gondola proposal. Having a gondola as an alternate to utilize while still having the roads to use makes since, alleviating the traffic if you prefer to take the gondola. I should also be built to handle avalanches to avoiding stranding people at wither end of the canyon. And yes. I want it also as a scenic venue not only for the locals but to add it to the ambiance of the tourist venue. Some more Europe to go with October Fest!!</p>	A32.29VV

40126	Adams, Lance	There has been a lack of effective planning for the gondola. The gondola will be significantly impacted by slides and other environmental uncertainties, as well as creating its own significant environmental impact. Bud systems are far more effective and cheaper, while utilizing existing infrastructure and not causing further crowding and impact points throughout the canyon. We demand a clear and concise plan that addresses blatant oversights and concerns that have been expressed time and time again.	A32.29VV
40341	Adams, Lisa	<p>The gondola is not the right solution for Little Cottonwood canyon. There are better ways. A reservation system like some of our National Parks are utilizing, for example. Of course, Snowbird and Alta will oppose that plan as it would limit the number of skiers, but the skiers who are there, would have a far better experience. The gondola is not a wise expenditure of tax payer dollars. If it is allowed, Utah taxpayers will be subsidizing two private businesses, that cater to wealthy tourists. As proposed, those who ride the gondola will pay to use it, which will likely result in locals continuing to drive up the canyon, especially families. Skiing has become so prohibitively expensive that the majority of Utahns cannot afford it. It is not right to ask those who are likely to ever use the gondola, to pay for it. It is not a necessity, like public schools or public transit or public roads.</p> <p>The cost to taxpayers aside, a gondola will forever change the canyon with its beautiful views and wilderness. Please do not approve the gondola.</p>	A32.29VV
40066	Adams, Marsha	<p>Dear UDOT,</p> <p>The enhanced bus service option, using existing roads without expansion, is only considering increasing the number of buses in mixed flow traffic, continuing to allow nonresident cars access to the canyon during peak hours. Why not allowing only resident cars access to the canyon roads during the proposed 7am-10am and 3pm-6pm enhanced bus service times? Wouldn't this essentially eliminate traffic congestion and allow the buses to flow smoothly? Zion National Park bus service can be used as a role model. Some of the buses should allow Back Country Skiers to request stops as well as board buses at designated trail heads during peak hours (it doesn't have to be all the buses). All proposed solutions will require enhanced parking facilities so why not start with this option?</p> <p>In summary,</p> <ol style="list-style-type: none"> 1) Begin with increasing parking facilities at the mouth of the canyon and along bus routes to the mouth of the canyon. 2) Increase the frequency of buses while closing nonresident car access to the canyon during morning and late afternoon peak times. <p>This is the least expensive, least invasive solution. Why not try this first? It does not take away summer bouldering recreation nor land that is not currently available to be taken in the canyon. In addition finding funding will be easier as less is required.</p> <p>Sincerely, Marsha Adams</p>	A32.29VV
43184	Adams, Nate	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Tracer Adams</p>	A32.3A; A32.3F

39370	Adler, Claire	<p>I am pleased to see UDOT reassessing Gondola B's impact in light of the Roadless Rule. The Gondola would constitute the construction of "highway" infrastructure through three roadless areas: twin peaks, lone peak, and white pine. As a native Utahn, these treasured wilderness areas are some of my favorite places on earth—I often take visitors to White Pine, and they are always appalled to hear that the government is considering needlessly disrupting this beautiful place. Your department has both a legal and ethical obligation to respect the federal designations of twin peaks, lone peak, and white pine as Roadless Areas. The "Enhanced Bus" is clearly a superior alternative, as it provides the same benefit as the Gondola without violating the law or destroying conserved wilderness, all for significantly less cost to taxpayers.</p>	A32.3G

41558	Albano, Thomas	<p>A gondola up Little Cottonwood Canyon will be the biggest boondoggle since the Great Salt Lake Pumps that were never used. I have been a season ticket holder at Snowbird since the 80's. There are maybe 10 to 15 days a year where getting up the canyon takes hours because of a fresh powder day. While this is a major inconvenience it doesn't warrant the tens of millions it would cost to build a gondola that would scar the beauty of the canyon. I will never in a million years ride a gondola and most people I have talked to feel the same way. It is already extremely expensive to ski and most people don't want the added cost of paying to ride the gondola up. If I was forced to take a gondola I would simply drive up Big Cottonwood Canyon which for me is a much longer drive and thus you are creating more pollution.</p>	A32.29VV

42089	Albi, Isabelle	<p>Please build the gondola—it helps people who have real jobs have a chance to ski</p>	A32.29VV
40910	Albrecht, Justin	<p>I have been skiing in LCC for over 20 years. The past few years the traffic has been horrible. It seems as though the ski resorts want all the traffic plus all the bus traffic they can get. The gondola will just add additional to each resort. The ski resorts are not doing anything to improve uphill capacity at their bases. The gondola is just going to make this worse. I initially was for the Gondola but having seen the crowds this season and the thought of adding more people in the canyon does not work. I can no longer support it.</p>	A32.29VV

I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Laurel Alder</p>	A32.3A; A32.3F
46402	Alder, Mark	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 40226	Aldous, Stephen	<p>It is safe to say that electric buses in general are an inevitability. I think they are particularly well suited for LCC, not only due to low local emissions, but also because of the fact that so much of the considerable energy required to push buses up the hill can be recovered on the way down. This is an advantage diesel buses do not share. This will tip the economics of the buses more in their favor vs diesel. Also, the nasty smell of disc brakes that fills the canyon air will be mitigated with electric vehicles.</p> <p>Any analysis of air quality in the LCC transit issue must assume that ELECTRIC buses will in the not too distant future be part of the equation.</p>	A32.29VV

		Regards, Kate Allan	
54515	Allard, Michelle	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Michelle Allard	A32.3A; A32.3F
54537	Allard, Timothy	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 40443	Alldridge, Dan	The gondola has no place in our canyon. It's an inefficient solution across nearly all measurable parameters. Spending over a billion dollars of tax payer dollars to benefit 2 private ski resorts is appalling on all levels.	A32.29VV
54789	Alleger, Brooke	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40079	Allen Haynes, Lindsay	The greatest source of congestion and risk to safety and business infrastructure is avalanche occurrence on highway 210 between Snowbird and Alta. Avalanche tunnels are one superior mitigation and should be considered. They can be aesthetic, impact the environment marginally over the current road area, increase safety, decrease congestion and increase the number of business days open. These tunnels are used throughout Europe and Japan where roads intersect avalanche paths. They protect both public and commercial traffic, bikers and bullet trains from major avalanche paths. Given the likelihood that disruption of wooded areas outside of roadways may not be approved, UDOT should consider avalanche tunnels as a critical component in a multi part plan to resolve traffic congestion in Little Cottonwood. Unlike the gondola, the avalanche tunnel can relieve the restricted commercial supply travel during avalanche risk. This is what makes them a popular solution world wide. The additional comment period serendipitously arrives during a time when business is halted due to road closures caused by repeated avalanche activity in the canyon. Currently, patrons have been stranded up the canyon for days and the crews on the ground have been working tirelessly against nature to clear a path for supplies and human travel. This is the worst case scenario; A complete road closure for days that has likely cost resorts and Utah hundreds of thousands of dollars in labor and lost infrastructure and put humans at risk. In addition to this, a more frequent occurrence is the routine closure of 210 between Alta and Snowbird. According to my estimate, this has occurred on half of all ski weekends this season and when it is closed, results in hours of delayed travel and canyon closures. When closed, all traffic up and down to Alta must go through the Snowbirds parking lot located on the bypass road. This not only causes congestion for Alta drivers, but the entire canyon being held by this bottle neck. An avalanche tunnel would allow the road to be open 100% of days. It would allow for traffic lights that regulate how many drivers may enter the highway at a time from the two resorts. I encourage you to review some of the beautiful and nature inspired designs of these tunnels in Japan, a country which honors and respects the beauty and power of nature, much in the same way the residents and visitors of little cottonwood canyon do. An avalanche tunnel will be a modern, popular solution. It is the right thing to do for the employees and families of UDOT, Alta and Snowbird, who have been tasked with holding back nature by hand. An avalanche tunnel(s) in combination with increased buses, parking reservations and a traffic light system for controlling how many cars enter the roadway will work. The tunnel will be an investment in our future and if done well, will be a legacy for UDOT, Alta and Snowbird. Thank you For Your Consideration, Lindsay Allen Haynes	A32.29VV

48354	Allen, Annelise	<p>To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project. Salt Lake City greatly needs to conserve and allocate both financial and ecological resources and this project will do neither, spending more money than it would bring in, bringing more people into the canyon just to ride the gondola while not resolving traffic issues, causing more emissions in the valley just to use the gondola, and costing so much money that could be used elsewhere. I urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. 41895	Allen, Margaret	<p>April 16, 2023</p> <p>Margaret A. Allen [REDACTED]</p> <p>UDOT Little Cottonwood Canyon Opinion Letter</p> <p>littlecottonwoodeis.udot.utah.gov</p> <p>Hello,</p> <p>I do not support the construction of a GONDOLA as good solution to the challenges of Little Cottonwood Canyon transportation. My opposition to a gondola has been long-term and for solid reasons. My principal objections are:</p> <p>The cost of the project is excessive, and it is not a good use of public funds. The transportation solution is not feasible for many canyon users. Examples: Picnicking public have no way to transport bulk items. There are only two destinations.</p> <p>Affordability to the Public. Once built, can families afford it use it? There has been little mention of this basic factor!</p> <p>Suitability: A narrow glacial canyon would be permanently changed. We value the area because of its pristine nature. The beauty of the Canyon would be marred.</p> <p>Pollution of the watershed! Toxic minerals will be released downstream. Irreversible and unsightly ecological damage of deep drilling, blasting, rock falls and avalanche. Danger and difficulty of transportation of tall steel beams and parts, etc., to the area. Canyon blockages and traffic hazards during construction would be unavoidable.</p> <p>Gondola B Plan would bring more people to the area than Little Cottonwood Canyon can tolerate without damage. I feel that there would be major disruption to the canyon's wildlife. The area supports a fragile flora and fauna environment.</p> <p>I appreciate the hard work the UDOT has done. We have learned something from the research and studies by the department. We have also had our eyes opened by the avalanches of 2023. Let's look to more practical solutions. Would roomy 10-12-person passenger vans, on-call from park and ride locations be workable? A nice hotel complex near the canyons would bring the visitors closer to the resorts. The parking reservation system at Alta Ski Area has worked well. Gondolas work beautifully in many places but please, do not select this solution in Little Cottonwood Canyon!</p> <p>Thank you,</p> <p>Margaret A. Allen [REDACTED]</p>	A32.29VV

40652	Allen, Mark	The proposed Gondola idea is not a fit for Little Cottonwood Canyon. The Wilderness areas and viewshed will be no longer wilderness if there are towers, and cables and noise and a Gondola floating overhead. The whole notion of wilderness will be destroyed by this mechanism and should be stopped. In the Grand Canyon to protect the wilderness experience, air traffic is routed around the Grand Canyon, the idea is the same. To protect LCC, the viewshed, the roadless areas and associated preservation of quiet should not be infringed. The viewshed protection should be weighted heavily in favor of protection. The Gondola is not a fit for LCC it should be removed from any future proposal. The ski resorts should simply figure out how to get patrons to their resort on their dime, not on the back of taxpayers.	A32.3A
41733	Allen, Mary	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Mary Allen</p>	A32.3A; A32.3F
55548	Allen, Mike	To whom it may concern, My family and I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter the landscape, threaten watershed and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," or support taxation for a project that would fail to improve canyon access for non-resort users while benefiting few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Mike Allen	A32.3A; A32.3F

40985	Allen, Susan	<p>The qualities that I love about Little Cottonwood Canyon include clean water, diverse wildlife, wildflowers and recreation opportunities. In addition to violating federal Roadless area rules, building the permanent structures involved with the gondola in one of the Wasatch Mountains' protected areas would destroy natural areas and all that I love about Little Cottonwood Canyons for future generations. Instead of building a gondola in a federally designated Roadless area, which provides a buffer to federally designated Wilderness areas, UDOT should expand its analysis to consider an enhanced electric bus option, which is something that taxpayers like myself, strongly support.</p>	A32.3A; A32.3F
48108	Allen, Susannah	<p>To whom it may concern,</p> <p>The first time I drove up Little Cottonwood, I was astonished by its beauty. I could t wait to bring my family there to share with them nature's glory. As a skier, I would rather sit in traffic and take in the amazing scenery than knowing my skiing has caused it to be destroyed.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 42232	Allison, Bryan	The gondola should absolutely be built to service both the Big and Little Cottonwood Canyons. This would significantly reduce traffic, pollution and potential loss of live from driving. The minimal footprint the tower pads would occupy are insignificant in comparison to the destructive and continual impact of the number of vehicles using the canyon roads. Those that are against this are not looking at the facts. For all those environmentalists, there is no "greener" solution than this gondola proposal. I also support building gondolas connecting Park City and the Cottonwood resorts. I and 100% for this!	A32.29VV

41782	Almquist, Melinda	<p>I am a season pass holder at Alta and have been skiing at the resort for 30 years.</p> <p>The Enhanced Bus Service with the Mobility Hub at the Gravel Pit and Toll Booths is the reasonable choice in the Big Picture. If you really want to know how the people of this state feel about their taxes being used for this decision then it should go to a state wide general vote.</p> <p>My husband has also skied Alta for 48 years. Both of us would be willing to change our habits of driving up to using the bus more and buying an Annual LCC pass.</p> <p>Thanks UDOT for listening to the people and for the care in maintaining 210.</p>	A32.29VV

56319	Alvarez, Luke	<p>To whom it may concern,</p> <p>I support the Little Cottonwood Canyon Gondola project and encourage you to consider this innovative solution for reducing traffic congestion in the canyon. The gondola will improve traffic congestion and facilitate easy transportation for visitors, while preserving the natural beauty of Twin Peaks, Lone Peak, and White Pine Roadless Areas, protecting our critical watershed, maintaining popular rock climbing areas, and minimizing disruption to running, backcountry skiing, and hiking in the area.</p> <p>I endorse a proposal that accommodates the need for efficient transportation while maintaining the integrity of "Roadless" land classifications. By investing in the gondola project, we can provide canyon access for non-resort users, benefiting a wide range of people. The gondola adheres to the "Roadless Rule" by offering a non-invasive solution for transportation that preserves the environment.</p> <p>I believe in exploring innovative solutions, such as the world's largest gondola, to address traffic congestion and improve access to recreational areas. By combining the gondola project with additional measures, such as carpool incentives (e.g., occupancy-based tolling), year-round enhanced bus service with stops at multiple locations, more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts, we can create a comprehensive approach to addressing the challenges in Little Cottonwood Canyon. The gondola project represents a bold step towards a more sustainable and accessible future for all who enjoy this beautiful area.</p> <p>Regards, Luke Alvarez</p>	A32.3A; A32.3F

40183	Alvord, Shelley	<p>It seems that you are ignoring the primary comment which is that the citizens of salt lake county do not want the gondola. The answer is not to see how many out of staters can hit the slopes, at a high cost to the residents, most of whom don't ski because of the high cost. Have a good bus system, and limit the number of skiers at the resorts. You are not listening. Members of my family couldn't ski because it took almost 3 hrs to get up the canyon. This is ridiculous. You are clearly asking the wrong questions, and not giving ear to the residents. All over the mighty dollar. That's a shame.</p>	A32.29VV

40561	Ambler, Will	<p>A gondola from the base of LCC is about the stupidest [REDACTED] I can think of as a "traffic solution." Throwing up some Disneyland European [REDACTED] is just a canyon demolishing tourist attraction. It will do little to mitigate the crowding that happens in the canyon and, most notably, at its mouth. The funnel is often the problem, and once you're in the canyon, you're moving at a fine pace. The most tiresome for me is sitting and waiting for mitigation to be done. If only we had a solution which was impervious to avalanches, certainly not the machine with a tower sitting in the spillout of tanners and with high tension cables being dodged by artillery shrapnel. Tolling and improved public transit have been proven to work (outside of the mitigation issue). It feels like common sense to start with that, and then maybe think about taking further steps. Traffic was bad this year. The bus service was slashed by more than half. More people drove their cars. It was only busy at certain times on a dozen or so days. Permanently destroying a big part of LCC for the benefit of patrons of private businesses on a few days of the year seems unethical given that the vast majority of lcc is theoretically public land. Instead of spending billions on an engineers compensation, spend millions on buses and well-paid bus drivers. Make private vehicles pay a toll and pump the money back into the public transit. Toll booth at snowbird entry 1 and beyond. New roads don't belong in wilderness, designated historic areas, well established climbing areas, or designated roadless areas. The impact to the water, climbing, viewscape, and actual traffic resolution is unacceptable. A 6 year old presented with the facts we have could make the right decision. Maybe ask your kids what you should do.</p>	A32.3A; A32.3F

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, John Andersen</p>	A32.3A; A32.3F

41050	Anderson, AJ	<p>I do not want want extra lanes, a train or a gondola. I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I value about Little Cottonwood Canyon: diverse plant life, clean water, diverse wildlife, breathtaking views, and endless recreation opportunities (rock climbing/ hiking/ cross country skiing). If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? Zion's National Park has successfully preserved their natural spaces. We could adopt a similar thing here. Yes, it might limit the ski resorts but the canyon is more than that. UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy. Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do. Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas? As a Utah resident, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola, trains and extra lanes in LCC because of the impacts to the Roadless Rule.</p>	A32.3A; A32.3F; A32.3G; A32.3I; A32.10G

Please consider all of the damage you will be doing to a naturally beautiful area, and how you will destroying beauty and recreation for countless individuals - especially those those who will have to pay for a gondola that they will never use. This gondola will not rid the road of car traffic, instead it will create an unwanted financial burden on citizens, plus extra road closure for tasks like inevitable gondola servicing (possibly due to avalanche damage like we have seen in 2023). There are better, more financially reasonable, alternatives to solving the traffic in the canyon. We will not allow the gondola to destroy our home. 40438	Anderson, Ileana	The enhanced bus option (without widening the road) appears to make the most sense. It is faster than the gondola time-wise, has less of an environmental impact on the canyon, and would cost taxpayers far less money. With the addition of future snowsheds, this is the most viable option. Ths gondola seems excessively expensive, would not save riders any transport time, and could not safely operate in conditions such as those we have had most of the winter. Would be a waste of money and resources and not	A32.29VV

40415	Anderson, Klay	<p>This winter has been OTT. Many have used this as a 'the gondola would mitigate this' affirmation and nothing is further from the truth. Locals will not pay to use the gondola; it will take too much time and they don't have the income. During most of this intense weather, the gondola would not be allowed to operate nor would the few patrons be allowed to use it. Even if they could, they would balk at having to go back up to get their vehicle and stay. The best way is to go (after talking with many service drivers and private citizens), is to go with three lanes K (2-up AM and 2-down PM) with possible snow sheds. Some pointed out the Flex lanes on 5400 south are at times hard due to drivers unfamiliarity with the operation. Well, sure. But there are way fewer intersections on SR210 and speeds are slower. This plan could be implemented as well up BCC and breed familiarity over time.</p>	A32.29VV
39388	Anderson, Klay	<p>More and more this is becoming a for-profit venture for a few with serious environmental concerns and huge cost overruns if built. If one were to ask every car in the 'conga line' up LCC 'would you take the gondola?' the resounding answer would be 'NO'. First they cannot afford it and second, it takes too much time. The other thing that the gondola would do is shift the parking nightmare to their 'boarding area' and still not relieve the traffic slowdown. The correct and long-term answer includes a three-lane road. Two up in the AM and two down in the PM. This would also alleviate the traffic merge cockups at Snowbird.</p>	A32.29VV

39650	Anderson, Phyllis	<p>I am confused that this is coming around again. Apparently this is because of the 2001 Roadless Rule, meant to preserve our precious lands. I fail to see how huge gondola towers could be allowed in a roadless area, especially when roads would likely be built for construction. I worked on the committee to obtain the first wilderness area in Utah, the Lone Peak Wilderness, so it follows that I would be appalled at the idea of building a gondola purely for the use of out of state skiers for a few months out of the year. It would do harm to the land and our water and would provide no access to all the trailheads in LCC -- those used by Utah RESIDENTS. I favor buses, preferably electric, bus lanes, and reservation systems for canyon use. Please don't allow special interest groups to prevail in this travesty. The majority of Utahns do not want to pay for a gondola that will forever destroy the beauty of LCC.</p>	A32.29VV

42123	Andrade, Shawn	First, I am grateful that UDOT recognized this initial oversight and put in the time to consider the implications of building a system like the gondola on protected land like this, and hope that the learnings will lead them to less destructive solutions like enhancing/expanding an electric bus system on the road systems we already have in both Big and Little Cottonwood Canyon. The proposed gondola would require construction on 3 different designated roadless areas. Even if the gondola system is not defined as a road, it would be built for highway purposes and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan. Furthermore, it would be a gross misinterpretation of the Roadless Rule to suggest that an 8 mile gondola system is exempt from that designation's protections simply due to the amount of environmental impact from its 10 year construction (watershed views, dispersed recreation, timber, vegetation, habitat). 41543	Andrews, Katy	<p>A gondola has no place in Little Cottonwood Canyon (LCC) and should not be exempt from the Roadless Rule. Even if the gondola system is not defined as a road, it would be built for highway purposes and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan. UDOT's poor interpretation of the Roadless Rule absurd. To suggest that the gondola system (towers, snow sheds, angle stations and timber removal) is exempt from the Roadless Rule is blatant and intentional ignorance of what the Rule is intended to protect. These areas have environmental values (e.g. watershed, views, dispersed recreation, timber, vegetation, and habitat) that are mandated to be protected under the Roadless Rule and are inherent to Little Cottonwood Canyon, which UDOT's preferred alternative would destroy.</p> <p>The proposed gondola should not be exempt from the Roadless Rule. It is a permanent highway project that would have negative impacts on our watershed, plant and animal communities, recreation opportunities, and more. We all depend on the preservation of these areas.</p>	A32.3A; A32.3G

40988	ann jenkins, mary	<p>I do not support this proposal. First, it reduces 'roadless' areas that are essential for wildlife, water quality, and world-class outdoor recreation.</p> <p>Second, while price to tax-payers is estimated at more than a billion \$\$\$</p> <p>(gondola \$592 million; bus system \$510 million), I am not convinced that the proposal is cost-effective or solves the traffic congestion problem. AND, why, why? are only fossil fueled, and not electric, buses being considered. (Really? This is 2023, not 1963!) Please, no road widening, add protected bike lanes, eliminate cars, and provide ELECTRIC bus transportation (like Zion National Park Shuttle system does), with bus depots and car parking situated WAY, WAY outside the mouth of the canyon.</p>	A32.3F; A32.10G; A32.3A
41726	Ann Wright, Mary	A gondola and the destruction it will bring is a death sentence for Little Cottobwood Canyon. It will forever alter the landscape, hurt wildlife and do nothing to curb traffic in the canyon. Please use all other alternatives. Thank you.	A32.29VV

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Julian Anzalone</p>	A32.3A; A32.3F

52886	Ard, Jennifer	<p>To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Jennifer Ard</p>	A32.3A; A32.3F

39519	Argyle, Larry	The Gondola is the only mode that will reduce the number of cars and buses without expanding the road and causing more pollution.	A32.29VV
40995	Arhart, Jane	NO to the gondola on environmental impacts!	A32.29VV
41645	Ari Hobfoll, Dr.	The construction of a gondola in Little Cottonwood Canyon (LCC) would absolutely violate the roadless rules currently in place for the Lone Peak, Twin Peaks, and White Pine areas. Although not literally a road, the gondola would require construction impact equivalent to or exceeding that of a road by removing trees and vegetation, creating permanent structures in roadless areas, creating access roads to construction areas, and negatively impacting the watershed, views, and plant and animal communities. Roadless areas are designated as such to protect sensitive areas and ecosystems, and any permanent human trafficking system blatantly violates and destroys those protections. Complying with the roadless rule is yet one more reason (in a long list of very viable reasons) that this gondola project should not be allowed to proceed. Ever.	A32.3A; A32.3H; A32.3F

39587	Arthur, Cory	<p>The gondola alternative has situated towers, angle stations, snowsheds, vegetation clearing and other highway projects, within one of the Wasatch's most protective designations, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Widening the road is also not advised due to the immense displacement of natural habitat and wildlife. No gondola.</p>	A32.3F
54798	arveseth, miles	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion, but it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I and many other Utahns cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that wouldn't even improve canyon access for non-resort users, only benefitting a handful of people. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is an intentional misinterpretation of the idea behind the rule.</p> <p>I instead support lower-cost solutions that utilize our existing infrastructure, like carpool incentives (such as occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, miles arveseth</p>	A32.3A; A32.3F

42155	Arvidson, Jackson	<p>To whom it may concern,</p> <p>I hope that this wild and wet winter has come just in time to show all interested groups that a gondola is NOT the solution canyon users seek.</p> <p>Avalanches would have most likely wiped out future gondola.</p> <p>As our climate continues to change scientists are expecting continuing seasons with departures further from "normal".</p> <p>Snow sheds seem to be the best way to mitigate these hazards.</p> <p>Snow sheds would ensure the employees at the resort can make it to work at whatever hour they need do to do so as well the food and supplies needed to fuel all employees and guest.</p> <p>In my mind this means that a few years down the road and these historic avalanches we are seeing may not seem so historic as we have potentially wetter and warmer storms hitting the central Wasatch.</p> <p>It was sad to see bus service reduced this year, and as much as people tried to use the service they were disincentivized. Additional buses with stops further from the canyon would help alleviate the neighborhood traffic issues. It just seems like a such a low impact improvement.</p> <p>Regards, Jackson Arvidson</p>	A32.29VV

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Haley Ashby</p>

56281	Asper, Garrison	<p>To whom it may concern, I oppose the use of taxpayer dollars to fund a large construction project on Public Lands that will serve the interest of two private corporations. It is unlikely that traffic will be substantially decreased, as avalanche mitigation is often the reason for road closures and delays on powder days. There are simply better ways to spend money. A gondola will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. 51811	Austin, Savannah	<p>To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. 40121	Averill, Zach	<p>-The proposed gondola would require construction on 3 different designated roadless areas. Even if the gondola system is not defined as a road, it would be built for highway purposes and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan.</p> <p>-It would be a terrible misinterpretation of the Roadless Rule to suggest that an 8 mile gondola system is exempt from that designation's protections simply due to the amount of environmental impact from its 10 year construction (watershed views, dispersed recreation, timber, vegetation, habitat).</p> <p>-We are grateful that UDOT recognized this initial oversight and put in the time to consider the implications of building a system like the gondola on protected land like this, and hope that the learnings will lead them to less destructive solutions like enhancing/expanding an electric bus system on the road systems we already have in both Big and Little Cottonwood Canyon.</p>	A32.29VV

42013	Badger, Ben	I am strongly opposed to the gondola. The negatives are legion. Tax payer expense, environmental impact, resort crowding, weather vulnerabilities, and local inconvenience are just the tip of the iceberg. Coming up with a better mass transit solution using more frequent and convenient busing would be a far more effective and less costly solution.	A32.29VV

40320	Baer, Mark	<p>The Gondola is clearly the worst option. Here's a set of more comprehensive, cheaper, and far more versatile alternative options; to wit: (1) Do what's been proven for decades in Europe; to wit, avalanche prevention sheds over the road. (2) Have (+/-) one hour to 1.5 hours in the am and again in the pm uphill only and then downhill only traffic (Serious medical situations already have helicopter service). (3) Add bus service which, obviously can be re-routed when unneeded, (4) Put the Gondola - which for a variety of stated and unstated reasons seems to be something that somehow must be built - from the airport to downtown. This will take a lot of traffic off the roads, will be much more dependable than a canyon gondola which clearly will go down periodically, be needed year round (think about the positive impression on Conference weekends!) will serve all of the downtown shops and hotels and Temple Square (etc) - not just two businesses - and will be a tremendous tourist attraction...year round! Think of the fantastic photos of the city, with snow capped mountains with the airport gondola centrally featured! Added bonus: Cheaper to build than in the canyon. Let's do this!!</p>	A32.29VV

		Regards, Brikelle Baird	
41943	Baird, Dave	Building the gondola would be a violation of the Roadless Area Conservation Rules that cover the wilderness areas surrounding the LCC. While the actual gondola would not be a road, roads would need to be created for construction and maintenance of the towers. There is little protected land remaining in the central Wasatch, and it should be important to all residents and visitors to further protect these areas.	A.32.3.A
56346	Baird, David	Gondola would clearly violate the Roadless Rule that prohibits roads (even temporary or construction roads) & timber cutting. The Forest Service limited road construction in these areas because of its negative impacts, such as habitat fragmentation and degradation, reduced water quality for wildlife and human uses, increased erosion and slope instability, and increased human disturbances in remote areas (such as an increase in human-caused fires).	A32.3H
46035	Baird, Emma	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 39900	Baker, Jackie	<p>It seems obvious that the roadless requirements speak for themselves and that the gondola is an unnecessary burden to put on our already pressured wilderness areas.</p> <p>The bigger issue I see is the very strange bus pollution equation, which seems antiquated and unrealistic. I understand that they may be trying to asses the worst possible pollution outcome, and that is fair. However, the reality that busses are becoming more efficient and less polluting each year means that the pollution study would really be pointless and only make busses look like a poor alternative. What an easy way to say busses are bad, when in fact, they are they smartest solution. Plus, I hope that any equation considers the emissions saved by not having cars on the road, idling, waiting to get into a parking garage. Please implement common sense evaluations!</p>	A32.10G A32.29VV

42399	Balakir, Katelyn	<p>My name is Katie Balakir and I moved to the Salt Lake City area about a year and a half ago. I spend a good deal of time in the Wasatch Mountains, whether it be to hike, ski, or just enjoy the breathtaking view of the Salt Lake Valley.</p> <p>I appreciate the attention UDOT has given to finding a solution to the traffic in Little Cottonwood Canyon. As someone who regularly skis in Big Cottonwood Canyon, I look forward to the day where I don't need to leave my home in Cottonwood Heights at 6 am just to have a chance at getting up the canyon. However, I don't believe the gondola is a viable solution to the issue, nor do I think we can gloss over the impacts this project will have on Twin Peaks, White Pine, and Lone Peak Roadless Areas.</p> <p>Many of the gondola's towers would need to be constructed in federally protected Inventoried Roadless Areas, areas that are critical to ecosystem health throughout Little Cottonwood Canyon and beyond. Roadless protections are in place to prevent development that would negatively impact our watershed, plant and wildlife diversity, access to primitive recreation, and more. UDOT's interpretation of the Roadless Rule is narrow and violates the spirit of the rule. Although the gondola isn't a literal road for motor vehicles, it is being built for highway purposes and its construction would result in many of the same impacts. Furthermore, it is likely that service roads would need to be built not only to construct the gondola, but to maintain it as well. Therefore, UDOT would violate the Roadless Rule by moving forward with the gondola proposal.</p> <p>Furthermore, in reference to the "Air Quality Supplemental Information Technical Report", it is unclear why UDOT continues to evaluate all other fuel types but ignores the possibility of electric buses. If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses?</p> <p>UDOT should begin with lower-impact alternatives before deciding to build a gondola. For example:</p> <ul style="list-style-type: none"> - Implementing occupancy-based tolling - Increasing bus service and transitioning to electric buses - Work with ski resorts to implement mandatory reservation systems - Enforce the traction law <p>Not only would these solutions ease the burden on taxpayers, they would also help better protect the Wasatch Mountains and those who travel along SR 210.</p>	A32.3A; A32.3H; A32.10G

40106	Balitsky, Leo	The new documents (Final EIA Alternative Summary) again stating there would be no stops at trailheads for the bus alternatives. Why is that? Buses is the most flexible meaning of transportation. You can organize multiple stops anywhere along the route and set distributed pickups and drop-offs, hence you are not locked in organizing one mega parking in one place and building additional infrastructure to fight traffic in that single station (gondola). Buses are reliable, well known and very flexible to set, adjust or dismantle, if the services are not meeting the expectations. And buses can serve anyone throughout of the canyon. Not just skiers. With gondola you are stuck. Also, it is like if Snowbird and Alta would be building and extending their parking to the Valley and all Taxpayers should face that bill for that? This is so vivid and insane how UTDOT is trying to sabotage any other alternatives and pushing gondola so hard, for the interest of certain groups. And yes, we can read investigations about who is pushing those interests.	A32.29VV

40430	Balken, Eric	The gondola would have a huge impact on roadless areas, not to mention the character of the entire canyon! The gondola is an expensive, terrible idea. Let's use tolling, expanded bussing, and transit hubs to deal with the congestion that occurs ~14 days a year. Spending over a billion dollars of public money on something that only benefits to private companies is wrong.	A32.3A; A32.3F

41635	ban, joel	<p>There certainly is not cognizable exception to the Roadless rule for a proposed gondola and although this rule will likely not stop the Forest Service or certainly UDOT from disobeying this rule it does not pass legal muster. The proponents of this project cannot point to an exception for gondolas or supporting roads and to do so would irreparably disturb these areas in perpetuity and thereby prevent the areas from ever becoming designated wilderness. These decisions in other words will irreparably change these areas and will never be able to transition to the previously natural habitat that was free from gondola supporting towers or roads in support thereof. I strongly urge that full protection of wilderness values be given in support of these roadless areas. No exceptions for gondolas in contradiction of the roadless rule.</p>	A32.3A; A32.3G

39942	Bankston, Emmett	Please build a way to get up the canyon during heavy snowstorms. Anything that will work.	A32.29VV
40556	Banner, Ben	Everything I've heard about the gondola would have a negative impact on Utah tax payers. The price of the gondola as opposed to a better transit system is completely disproportionate. And the price of a ticket to take the gondola is so expensive that no average skier would be willing to pay it. If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.	A32.29VV

		<p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. Any other solution would be better - I urge you to listen to the people of Utah and those who are speaking out against this misguided approach.</p> <p>The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot even begin to imagine the disturbance and damage building a gondola through the canyon will create.</p> <p>I cannot support a proposal that would inevitably reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few; the elite wealthy and out of towners on ski trips.</p> <p>A high priced gondola will not truly solve the traffic problem in the cottonwoods. It will create even more backups and traffic during the years of building near the canyons and beyond - with my tax money, and destroying the beautiful land I love and cherish like so many others.</p> <p>Please think about the chaos this will create in the canyons in the near term, with inadequate ROU.</p> <p>This solution will not help the people of Utah and would be an incredibly inappropriate, careless use of our tax money.</p> <p>Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), ****year-round enhanced bus service with stops at multiple locations and more frequent service at peak times****, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Here's a wild idea for you - encourage local employers to embrace flexible working days and hours so locals are encouraged to break up skiing only on the weekends.</p> <p>The traffic problem is really only a problem a handful of hours out of the week - peak days (Saturday/Sunday) during peak times (~7am and ~4pm)</p> <p>Any other solution is better. Please do something different. Tolls + increased bus service + resort reservations would solve this too - but adjusted winter work weeks would do wonders to split up traffic.</p> <p>Step up. Do the right thing. The people are watching. Don't let us down.</p> <p>Regards, Jenna Barbari</p>

		<p>Regards, Landon Barclay</p>	
45630	Barden, TJ	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project. More than anything, my concerns stem from the need to preserve wilderness area for future generations. The unique and beautiful vistas of the canyon are a particularly valuable natural resource, and their obstruction should be factored in as a significant additional cost of this proposal. This comes in addition to reports that the project will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I would first support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and other possibilities.</p> <p>Surely we can take inspiration from sites such as Yosemite, which have a massive incentive to industrialise but have successfully resisted any significant construction.</p> <p>Regards, TJ Barden</p>	A32.3A; A32.3F

44773	Bargender, Travis	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p>	A32.3A; A32.3F

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Travis Bargender</p>	
41297	Barghahn, Billy	<p>Gondola option should be considered a road as well. There will be access roads make to install and maintain the towers. I have seen this personally in gondolas in British Columbia, France, and Turkey. To state otherwise is to mislead the public.</p> <p>The voices of the community have already been heard. We do not want a gondola to service a private entity. As a user of public lands in the canyon, it is a shame that special interests are trying to take over this resource of ours. And use our money to build it.</p> <p>This matter needs to go to public's referendum. The DOT and other groups are not elected officials and should not have such great power. In fact, top elected representatives are against public funding to serve private interests including governor Cox and the mayor of Salt Lake who have spoken against MLB stadium and the gondola itself.</p> <p>Enough of this report and reviews and comments. Let the public decide with a vote which plan is best for our community!</p>	A32.3G; A32.3H

40158	Barlow, Scott	<p>Please build snow sheds and a train connecting big, little cottonwood and park city by tunnel. That way we can reduce the cars up the canyon, and connect all resorts without a gondola, which will fail in harsh weather, and hopefully shuttle more people up/down the canyons when there's avalanche danger. The train can also be used year-round.</p>	A32.29VV

I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Andriana Barna</p>	A32.3A; A32.3F
51586	Barneck, Nickole	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 41198	Barnes, Ali	<p>I am against the gondolas in the canyon. I do not see how this would solve the problem. There are other mitigations to try first, that are less expensive and have less impact on the environment. Do once, please listen to the "little guys" and not the big developers. The Wasatch Front is being ruined by developers. Please NO TO THE GONDOLA!</p>	A32.29VV

39733	Barrell, Arleen	<p>I totally disagree with the gondola up little cottonwood canyon to service downhill skiers. There are so many other options available. I ski all over and there can be many options. Buses paid for by the resorts, lodging, skiers etc. Toll for users maybe only in winter to fund buses. There is no way we should disturb what wilderness we have. The gondola would violate our wilderness areas. Skiing is not the only thing that goes on in these precious mountains. No no no to the gondola in our precious small wilderness area. Thank you</p> <p>Arleen Barrell</p>	A32.29VV
39611	Barrell, Jeff	<p>The LCC transportation project will be big & expensive. Specific concerns are listed below, but my biggest concern is taxing the people of Salt Lake & Utah (most who do not ski) to build a mega-project that serves mostly out-of-town tourists while enriching a few local owners (Alta, Snowbird). Local skiers may not be able to pay the gondola fee (which has not been released), so traffic & parking congestion might continue for locals.</p> <p>1- This proposal does not address BCC, which has similar congestion problems. The bus option can scale up to serve BCC. The gondola option does not (rumor says more gondolas into BCC and Park City).</p> <p>2- Gondola option includes upgrading bus service, snow sheds, and base mobility hubs, so the bus option is now \$355b compared with gondola option of \$561b. (no road widening). The gondola is a an expensive add-on to attract out-of-town skiers who don't care about costs. Locals are more likely to ride the bus or drive.</p> <p>3- The recent release shows neither alternative will stop at trailheads. Bus service is more flexible and can stop at trailheads, which reduces the need and cost for trailhead parking. Expanding parking lots is impactful on the watershed and is necessary for the gondola, but NOT the bus option.</p> <p>4- The book "How big things get done" by Bent Flyvbjerg, only 8.5% of big, infrastructure projects meet cost and time estimates. Only 0.5% meet cost, time, and benefits. Projects that can be broken into known segments (bus option) are more likely to succeed. New & novel projects (gondola) have more unknowns that drive up costs and time.</p> <p>5- my personal thoughts are that there is political pressure to approve the gondola option, even though the bus option is more practical and less expensive. I highly suspect the</p>	A32.29VV

		gondola expenses are lowballed and the bus is highballed. I have little confidence in all the numbers, particularly in a time of high inflation. I insist that an independent party review the assumptions and estimates to make these proposals credible.

39906	Barth, David	<p>I still support the gondola. I think anything that removes vehicles from the road is beneficial. I think that it's great that it can run even when the road is covered with avalanches. I think it is equalizing in that everyone can take the gondola in this less cost prohibitive than tolling which seems to help only those with more means. This will reduce pollution and also help with parking issues at the resorts. I also think that the gondola is a novelty that will attract summer use for the amazing views it will offer. I'm all for the gondola.</p>	A32.29VV

42128	Barth, Kurtis	I feel that this is a waste of taxpayer money for something that will not benefit the taxpayers. I am not impressed at the operating costs for a small capability of transportation during surge travel. I would much prefer buses that can be surge increased. Buses will also not be an eyesore on our canyon. I do not want to see this gondola built at the expense of taxpayers for the private corporations	A32.29VV
42867	Barth, Matilda	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Matilda Barth</p>	A32.3A; A32.3F
42216	Barth, Mia	<p>Building the gondola would breach the Roadless Rule due to the fact that a gondola would not be able to be built entirely from the air. This means that the equipment and materials would be brought in in a destructive manner that not only violates the Roadless Rule, but would also damage the delicate ecosystem that is Little Cottonwood Canyon. This means threatening all the native plants and animals that call LCC home.</p> <p>Additionally, if UDOT can consider the use of higher emission fuels such as diesel, why can't the impact of electric busses also be assessed?</p> <p>The construction of the gondola would cause unnecessary strain and destruction on our air quality, pollution, our watershed, our wild spaces, and more. Other options should be considered.</p>	A32.3A; A32.10G
53394	Bartholomew, Christo	<p>To whom it may concern,</p> <p>The gondola is dumb.</p> <p>Regards, Christo Bartholomew</p>	A32.29VV
40037	Bartholomew, Landon	Why are we spending hundred of millions and not even vetting conservation rules? Why aren't we trying 1 thing at a time rather than 10? Maybe focus on a bus, with snow sheds only first before investing nearly \$1b on a project that will violate the roadless areas.	A32.29VV
39692	Bartilson, Evan	<p>The Little Cottonwood Gondola represents very little benefit to the economy and a large/novel type of expenditure for the state of Utah. 1. Experience: UDOT has no experience with installing, operating, and maintaining a gondola, nevertheless the longest gondola in the world. Infrastructure and experience with buses already exists. 2. Flexibility: Buses can stop at other trailheads, buses can be used in other areas than LCC, buses can serve other businesses than Alta & Snowbird if needs change in the future. 3. Summertime Use: traffic problems exist only a few days of the year in the winter, the enhanced bus lane can easily become a summertime hike and bike lane, improving safety for pedestrians. Most trailheads in LCC are located far away from the 2 resorts the gondola serves. 4. Cost: Buses cost 10X less per mile for operation and half as much in capital when compared to a gondola, a ski bus fare is currently \$5, the gondola option would require a \$44 fee to break even on maintenance costs. 5. Unfair Comparisons: Including climbing boulder removal (even when climbers associations and climbing businesses like Black Diamond vehemently oppose the gondola) is a red herring. Some suggestions at better criteria: include a fare estimate, cost per mile, ability to stop at trailheads, summertime benefits, flexibility, estimated loading times (the gondola would take more than 4 hours to load the estimated number of users, each way) 6. Unfair Costs: The gondola and bus proposals are not compared with consistent criteria, all bus options include 2 transit centers (\$100M), while the gondola option b has only 1 transit center. 7. Transit time: The gondola represents a large hassle (more transfers) and nearly double the transit time (63min vs 36min for bus) this is a big factor in obtaining ridership. 8. Opportunities for improvement: buses follow automotive improvements, automation, electrification, etc. Gondola's do not provide the same ability for improvement. 9. Wind Hold: The longest gondola in the world is closed today due to winds that exceed 20m/s, while the gondola may avoid some avalanche cycles, it won't be available during the much more prevalent wind closures. 10. Gondola Evacuation: ski resorts prepare employees and train/drill on ski lift evacuations, in the event of an emergency or a breakdown, evacuation of the world's longest gondola would require many hours, special equipment & training and may be impossible if the road is covered in avalanche debris or high wind is present. Creating a significant public health risk (exposure, hypothermia) I implore you to consider only bus options and to consider stopping at phase 2 even with the bus options, it allows that flexibility :)</p>	A32.3A; A32.3F; A32.10G

I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, jaxon bartschi</p>	A32.3A; A32.3F
52018	Barwick, Ryan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 42253	Bateman, Joe	<p>Building a gondola along roadless areas violates the Roadless Rules and the Wasatch-Cache 2003 Forest Plan There will be serious disruptions to the roadless areas to place the gondola infrastructure. I would argue that the construction of these towers, angle stations, the timber removal and snow sheds would violate the Roadless Rule as well as the Wasatch-Cache Forest Plan. Although the gondola is not a road, it will be used to transport people just like a highway. These areas have environmental value especially to the animal population and the watershed and should be protected from construction of the gondola and snow sheds.</p>	A32.3A; A32.3F

41662	Bawden, Beverly	<p>Here are my concerns with the revised final draft. 1. There will be irreversible damage to the canyon due to the tower maintenance roads both during construction and subsequent use. 2. Enhanced bus, no widening is preferable because it does not destroy boulders for climbers. 3. None of the gondola plans provide service to stops for non skiers. 4. Financing remains a big issue. Tax payers should not have to finance the gondola B plan. Enhanced bus, no widening is the most affordable alternative, does the least damage to all environmental concerns, and provides as timely a transport as the gondola B plan. 5. Additionally, the gondola B plan requires an undesirable parking lot at the mouth of the canyon and increased traffic congestion to and from that lot. 6. The aesthetic beauty of the canyon will be lost forever with unsightly towers and gondola cars if a gondola plan is implemented.</p>	A32.3H; A32.3F
42184	Bawden, Beverly	<p>In response to the newly revised final draft:</p> <p>In my opinion, gondola cars should not be allowed in areas designated as roadless areas.</p> <p>Furthermore, electric buses should be evaluated rather than diesel.</p>	A32.3G; A32.10G

53971	Baylon, Scott	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Scott Baylon</p>	A32.3A; A32.3F

40230	Beardsall, Ben	Roads are not the future of public transportation. The gondola is cheapest, provides the most reliable transportation in and out of the canyon in all weather and snow conditions. It's lower emission, lower impact and safer. Reliable, timely travel up the canyon should be the future.	A32.29VV

42386	Beecher, Lyle	<p>Our firm was part of the design team that extensively studied the Gondola and the Parking Structure at the La Caile location. The parking structure would work very well with the proposed widening of Wasatch Blvd. So many of the opponents of the Gondola are the local residence of the Wasatch Blvd area and they don't want the Gondola because of the widening of Wasatch Blvd. Well the truth is that Wasatch Blvd. will be widened with or without the Gondola solution. The other strong issue at hand with the widening the canyon road for more bus traffic is the fact that the widening will be required on the north side of the road and create miles of tall gunite retaining walls. This will be an environmental disaster on many accounts that should have the environmentalist very concerned. Ensign Engineering has studied this fact and proven that there would be miles of this retaining eyesore, such as the walls in Provo Canyon that are an eyesore. There would be alot more of that type of retaining in our beautiful Little Cottonwood Canyon with the expansion of the road. This needs to be discussed more and put on the table by all parties to better understand the strength of the Gondola solution. The Gondola would be such a beautifully unique way to experince the beauty of the canyon. This has been proven all over the world with other successful Gondola projects.</p>	A32.29VV

42191	Beilfus, Peter	<p>I am opposed to the gondola. It is a misuse of tax payer money, violates the Roadless rule, and would be in direct opposition of what the majority of communities that use the canyon want. The research supporting the gondola is narrow sighted and biased, pushing an idea that does not work to benefit the people who recreate in the canyon. UDOT should consider alternative options such as electric buses rather than irreparably destroy areas in the canyon in pursuit of a goal that will not be achieved with a gondola.</p>	A32.3A; A32.3F; A32.10G

53516	Belcher, Lindsey	<p>To whom it may concern, I urge you to consider more effective and affordable alternatives to address traffic congestion in Little Cottonwood Canyon, rather than pursuing the Gondola project. The transit system in Zion, for example, is a great example of successful transit solutions. The proposed gondola project will not effectively improve traffic congestion in the canyon, but instead will have negative impacts on Twin Peaks, Lone Peak, and White Pine Roadless Areas. It poses threats to the critical watershed, popular rock climbing areas, and disrupts recreational activities such as running, backcountry skiing, and hiking. I cannot support the classification of acres of land as "Roadless" being reduced for this project, nor can I support taxation for a project that fails to improve canyon access for non-resort users and benefits only a few. The argument that the gondola is exempt from the "Roadless Rule" because it's not a road is a misinterpretation of the rule's spirit. Instead, I advocate for lower-cost solutions that make use of our existing infrastructure, such as carpool incentives through occupancy-based tolling, year-round enhanced bus service with multiple stops and increased frequency during peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. If this huge amount of money was put towards these solutions, you can effectively address traffic congestion while preserving the natural beauty and recreational opportunities of Little Cottonwood Canyon. Regards, Lindsey Belcher</p>	A32.3A; A32.3F

40087	Bell, Nate	<p>I am very grateful that UDOT recognized this initial oversight and put in the time to consider the implications of building a system like the gondola on protected land like this, and hope that the learnings will lead them to less destructive solutions like enhancing/expanding an electric bus system on the road systems we already have in both Big and Little Cottonwood Canyon.</p> <p>Even if the gondola system is not defined as a road, it would be built for highway purposes and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan.</p> <p>Do not let LCC Gondola be the Bears Ears of land classification, where the large majority of Utahns spoke for an act for land protection and we now see the larger implementation for the Bears Ears land reduction was oil and natural resources. A gondola largely benefits the two resorts in LCC, one being privately owned, and a waste of Utah tax dollars when majority of Utahns oppose. Keep what's Left of LCC Wild for my children to see and for generations to come.</p>	A32.3G

		Regards, Hunter beltowski	
39621	Beltran, Erin	This is all such garbage. NO ONE WANTS TO RIDE AN HOUR ON A GONDOLA. IT IS RIDICULOUS. Kids will piss their pants. Strangers will have political arguments, including plenty strapping guns. Women will get harassed or assaulted WITH NOWHERE TO GO. You clearly DO NOT UNDERSTAND SKI BROS. I have been harassed and assaulted on short-length gondolas and trams REPEATEDLY. They terrify me. I would never let any teen or young woman on your dangling trauma trap, and TAXPAYERS SHOULD NOT HAVE TO PAY FOR ONE DIME OF THIS. I only ride open ski chair lifts solo or stand directly next to the tram conductor at Snowbird, praying for an uneventful 7 minutes, intervention if needed, or at least a witness if not. Besides public safety, TWO HOURS round trip commuting in the canyons is preposterous. I will never ski again if so, and if I don't ski here, then I don't live in Utah. You'll lose my taxes and votes. Gondola/busses or no, avalanche snow sheds are NEEDED for road safety for all the residents and employees of LCC. You should not have to fear death in a cold ditch just trying to get to your minimum wage job! Whether this impacts wildlife or not (though there are only a few places where slides are routine), there is no excuse. BUILD the avalanche tunnels!!! Last point is that, beyond snowsheds/avalanche tunnels, ZERO more engineering is needed for LCC! We don't need extra bus lanes if we STOP ALLOWING cars (beyond residents and employees!!!) into the canyons! Period! Put up a tollbooth JUST for residents and employees (and I paying guests lodging in LCC?) AND BUSSES. BUILD PARKING DECKS instead of just lots where all the park and rides already are AND FURTHER DOWN THE ROADS so Cottonwood Heights can breathe and move. RUN BUSSES EVERY 10-15 minutes TO ALL MAJOR TRAILHEADS/resorts.	A32.29VV

39645	Bengtzen, Sabrina	<p>This report clearly presents the gondola as the premier solution stating that the gondola does not impact "nearly 99.8% of IRA's..." while other solutions do impact ".16% of IRA's...". This use of data and wording to misconstrue readers' perceptions of the solutions is misleading and frankly disappointing. It seems ironic that we are seeking to create more equitable, affordable, safe, and reliable access to the canyon by destroying any portion it. If so many people are seeking to recreate within its beauty why would we take away any portion of that beauty? And what about the potential pitfalls that come during construction or other elements of implementation? We are sliding down a slippery slope. I know there will be no perfect solution, but I am confident that through partnerships, stakeholder involvement, and respect for the community and its members, we can come up with something better than what has been proposed.</p>	A32.29VV

40228	Bennett, John	<p>I support parking reservations and a toll to use the canyon. The options presented seem to involve a taxpayer subsidy and taxpayer funded construction. Let the market determine the toll cost by having the amount vary depending on the demand. I do not want taxpayer dollars to be used to operate the transportation system. It should be self funding.</p>	A32.29VV

I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Patrick Benson</p>	A32.3A; A32.3F
53314	Benson, Philip	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 40227	Berg, Robin	<p>The Wasatch mountains are the Jewel of the salt lake valley. Building this gondola will compromise all that is protected and sacred in Little Cottonwood canyon as well as surrounding areas. We must not be blinded by the glittering pictures of happy families riding this monstrosity up into the wilderness. The land is home to animals, plants, and countless treasures that cannot be recovered. These wilderness areas are not for "sale", they do not belong to human beings much as we like to think that we "own" and control the destiny of the canyons. They are not an amusement park to toy with. The Jewel of the Salt Lake valley is our responsibility to protect for future generations.</p>	A32.29VV

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Garrett Bergeson</p>	A32.3A; A32.3F

47281	Bertagnolli, Isabella	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Increasing the bus service and tolls will create less traffic congestion and help promote carpooling to ski resorts and areas in big cotton wood. I am appalled that the gondola is being considered when it can destroy so much of the natural beauty that Utah is known for. As a local Utah resident who recreates in big cottonwood canyon it will be devastating to see the gondola built. Please reconsider for more economic, environmentally and realistic options discussed above. Regards, Isabella Bertagnolli	A32.3A; A32.3F

39253	Bestly, Ben	The traffic and congestion problems in the canyons are caused by the resorts. Let the resorts pay for the infrastructure based upon the additional revenue they will generate with more canyon users. If we really wanted to solve the congestion problem we could limit the users solely to citizens of Utah state who have purchased a permit to travel the canyons.	A32.29VV

41653	Betz, Lauren	I am not in support of the gondola project as I do not believe it is the best solution to the canyon traffic. Even if it does work it would only solve the problem in one canyon. It would be a better use of the money to invest in more buses and better pay for bus drivers. This would address the issue in both canyons, utilize existing infrastructure, and avoid the need to destroy and of the beautiful canyon. And in order to make the bus more efficient I think the best thing to do would be to ban car travel during rush hour times (8-10am and 3-5pm) to make the bus an efficient and reliable option during those times. Plus make the bus free for everyone. The key is to make the bus a more appealing or in some cases the only option in order to achieve more behavior change.	A32.29VV
40040	Beurskens, Nicholas	The gondola would directly violate the roadless rule, negatively impact inhabiting wildlife and watershed, and negatively impact wilderness areas. Vote no to the LCC gondola.	A32.3A; A32.3F

I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Peyton Bibb</p>	A32.3A; A32.3F
52131	Bickford, Bridget	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 47944	Bigsby, Joseph	<p>To whom it may concern,</p> <p>Greetings,</p> <p>My name is Joe and I grew up 10 minutes from little cottonwood canyon and spent the last 25 years of my short 30 years on this planet living, recreating and enjoying little cottonwood canyon and some of my finest memories there. I am an active snowboarder as well as hiker and have spent a lot of time at snowbird hiking line peak and enjoying everything that it has to offer.</p> <p>Over the last 10 years I have noticed that there is no question that it is getting crowded, busy and the canyon is not designed for the capacity of cars especially during ski season. However my biggest concern with this gondola is the limited access it will provide for people who back country ski, rock climb and those who do not go to snowboard and Alta. With the increased price tag it will only allow the well off, tourists to have access and my biggest fear is</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>that little cottonwood canyon will loose its identity and become a playground only for the rich and famous and we will end up in a place such as San francisco where only the rich and famous will have access. Take a look at Colorado with aspen all the local people get pushed out and cannot afford to live there or utilize the many reasons why Utahns love little cottonwood canyon.</p> <p>In conclusion I think there should be a reconsideration of this project to benefit Utahns who pay taxes and enjoy these resources to allow access for generations to come. It is part of our identity and it would be unfortunate for those who live there to not have access to one of the most beautiful places on earth. As someone who has left Utah and will soon be returning I hope you read all of our concerns and hope you reconsider as it will not be a benefit for Utahns but the new global elite that appear to be impacting this country and making it difficult for everyone else to get by and experience life to the fullest. Thank you</p> <p>Regards, Joseph Bigsby</p>	
55756	Biittner, Aaron	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 41061	Biittner, Libby	<p>The gondola continues to make no sense compared to so many lower cost and lower impact options that actually serve LCC users and taxpayers in general, not just LCC corporations. The expected impact of the gondola on Roadless Areas is unacceptable, and no reasonable person would believe that the construction and ongoing required maintenance of such a massive structure would not violate the Roadless Rule and permanently harm wilderness areas and impact watershed. UDOT has not provided sufficient support to show that the fragile environment in LCC would not be irreparably harmed by the gondola project, and trying to claim that the gondola project is exempt from the Roadless Rule based on semantics is deceitful and shows UDOT's continuing bias toward corporate interests instead of acting in the best interest of taxpayers.</p> <p>I continue to oppose the outrageously expensive and impactful gondola project. I am so frustrated that UDOT is claiming that this half billion dollar spend is a logical solution, while canyon users continue to see UDOT, Snowbird and Alta actively ignore actual common-sense solutions like aggressive enforcement of existing traction laws and properly maintaining canyon buses.</p>	A32.3A

44070	Bilal, Muhammad	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Muhammad Bilal</p>	A32.3A; A32.3F

40290	Bills, Robert	<p>My family has been traveling to Snowbird the summer since before it opened. My mother was an instructor for 45 years. I have been an instructor for 43 years and my children started skiing around 4 years old. Of course at Snowbird. We have endured many find clear day drives, mini snowy, and icy religious moment drives as well as many enter lodges; some for the night! This past month has truly demonstrated the road and a bus system have limitations. The skiers enter lodged that Snowbird and Delta could have been evacuated with a gondola emergency services, medical services could have gone both ways from the valley to the resorts with a gondola I've changed my mind. We need a gondola.</p>	A32.29VV

39842	Bischoff, Jon	The gondola will only benefit 2 businesses. Why will we spend public money for this? Traffic in the canyon will not change. People will still prefer to ride in their car vs making 1, 2, or even 3 transfers from parking/bus to bus/gondola. This will not help. It will only put more people up the canyon. The traffic, bad air will stay the same. Don't spend public money to benefit 2 business please. That public money is better spent elsewhere.	A32.29VV
48190	Biscopovich, Melissa	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40390	Bithell, Candice	<p>1. Inventoried Roadless Areas act as buffers for designated wilderness areas. Any incursion into these areas threatens the wilderness space. The narrow nature of this canyon means that the development of any infrastructure in the roadless areas will have a visual or residual impact on the wilderness experience as well as that in the inventoried roadless areas. Construction should not take place within Roadless Areas.</p> <p>2. I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>3. The construction of towers in the canyon will cause irrefutable damage to the canyon ecosystem. Helicopters will not be capable of foundation excavation as suggested by UDOT. There will be a need for access roads during construction and subsequent maintenance activity as well as in anticipation of emergency evacuation procedures. Research shows that wire rope systems are not infallible and there will come a time when evacuation will be required.</p>	A32.29VV

39582	Black, Kenneth	If people are really concerned about the beauty of the canyon, tear out the ski resorts. If they want to go to the ski resorts, put in a Gondola	A32.29VV
39261	Black, Kenneth	The gondola is a very bad idea. Not only will it be limited by travel time it is also limited by capacity. It might take a few cars off the road but will also cause an eye sore to view along with the scar created by the path of the gondola. Metering cars on the existing road is a much better idea. Limiting the number of cars per day, hour and minute is better.	A32.29VV
39576	Black, Kordell	What does this do for 6200 to big to little. Nothing. Cottonwood heights will still suffer at the mercy of resort traffic. This is not a solution. It's taxpayer funded resort expansion!	A32.29VV

48175	Black, Tony	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Tony Black</p>	A32.3A; A32.3F

40020	Blackburn, Fiona	<p>As a salt lake resident I strongly oppose the Gondola proposal. It directly violates the roadless rule and will negatively impact the wilderness area. The strong public commentary on this issue must be taken into consideration before irreversible damage is done. Tolling, increased bus routes, and other lower impact options must be thoroughly trialed before the gondola is considered a viable alternative.</p>	A32.29VV

I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Emily Blackwood</p>	A32.3A; A32.3F
45838	Blad, Maria	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 		Regards, Ashley Blair	
40146	Blair, David	I disagree with the gondola proposal. It does not make sense to me to have infrastructure like that tarnish the canyon view, only have 3 points to enter/exit and be infrastructure that remains all year to solve a problem that only exists in winter and mostly on fresh snow days and weekends. I would rather see restriction on cars when needed and supply a solution that is flexible like electric busses. That would also provide options for the many people that are not stopping at the two for-profit ski resorts the gondola will support.	A32.29VV

56340	Blanchard, Christopher	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. I am not a Utah resident but I have family in the Heber Valley and the beauty and solitude of the Wasatch is something very special to us. My son has grown up hiking and camping in the Wasatch and we have seen overdevelopment and greed devour an increasing amount of it over the last 20 years. Enough. Spending a billion dollars in taxpayer money to serve wealthy skiers ignores the daily needs of ordinary working Utahans. The gondola will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten the canyon's critical watershed, destroy popular rock climbing areas, and disrupt wildlife, running, backcountry skiing, and hiking in the area.</p> <p>I do not support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. If the precedent is set here, what else will be at risk?</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Growth without balance and care is destructive.</p> <p>Regards, Christopher Blanchard</p>	A32.3A; A32.3F

Dave Fields made a severely poor judgement call partnering with Ikon, which quadrupled canyon traffic while shrinking net revenue for Snowbird and Alta immensely. In Dave Fields eyes, securing the gondola ensures people have access to the resort even on high traffic days, and ensures he can Jam Pack the resort to its brim so people can eat and drink their way to Snowbirds profitability (since he completely destroyed their multi million season pass holder book of business by partnering with ikon). Please see the bigger picture here, we are begging you. Not to mention, a watershed that is so delicate, scarce and vital for wasatch front residents would be completely jeopardized by this gondola project. Please face the facts and stop manipulating them. Environmentally and economically this project is unconscionable. Please do not destroy our home.</p> <p>Regards, Ally Blanton</p>	A32.3A; A32.3F
39894	Blanton, Victor	<p>The gondola is a very bad idea that with benefit no one but the developers. The public has given the reasons for this view over and over. Now, ignoring the degradation to the watershed and the environmental damage and maintenance construction will cause, the spin is cleaner air. The electric grid is already overloaded, and cost of fuel to run it is over the top. KSK news continues to deceive its audience by suggesting that when the canyon road is closed the gondola will provide some answer. It will not. Our tax dollars can be far better spent.</p>	A32.29VV

49451	Blashill, Aubriela	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Aubriela Blashill</p>	A32.3A; A32.3F

39954	Blaszczak, Matylda	I oppose the gondola in the little cottonwood. I have lived in Utah my whole life and am concerned about the damage building the gondola would do to the many climbing areas as well as the ecological health of the area in general.	A32.29VV

40567	Block, Adam	Dang you really about to destroy roadless areas cherished by more people 9 months a year because the ski resorts want to make it easier for bros to get their turns in 12 Saturdays a year? And they're not even help pay, yikes, the ski corps are the queen bees of the hive now. Use electric buses and spend that extra billion on buying some common sense.	A32.3A

40497	Bobetich, Gregory	<p>I am adamantly against the proposed gondola. In my opinion this proposal is an irreversible option that was lobbied as a money grab for greedy developers and corrupt public officials. The gondola is not a nimble, or scalable solution that can fluctuate with demand for transport. Additionally Resorts and developers have committed nothing in regards to obligations for this proposal. I'm tired of hearing a flimsy argument that they have to subsidize the cost for riders but there is no language in the transportation proposal about what ski resorts and developers will commit to this plan. No commitment about the cost to ride, no commitment about the cost of parking. Actually the proposal says that parking</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>will be available for a premium price to riders. Additionally this plan does not address the transportation needs and congestion surrounding Big Cottonwood Canyon which might be even worse than Little Cottonwood. This gondola proposal is a very expensive solution that will only operate 5 months out of the year, and if it doesn't work will be a massive wast of funds and cause the destruction of a natural place that makes Utah and Salt Lake City a special place.</p> <p>It is estimated that the gondola will transport about 1000 people per hour, but there are more than 10,000 people entering the canyon during peak season. A billion dollars to service 1/3 of the total volume is nonsense and once again does not address big cottonwood canyon transportation.</p> <p>We need to leverage our current infrastructure to improve transportation. Last year when snowbird had parking reservation system it was very manageable. This year Alta is very manageable with the parking reservation system. When 20% more busses were added to canyon transportation, they immediately filled up.</p> <p>Bottom line, we need to try more reversible solutions before we hit the panic button and destroy something special.</p>

40275	Bodiford, Julia	<p>As a cottonwood heights resident, I am absolutely saddened by the proposal of the gondola as a solution to transit issues up LCC canyon. The gondola will not positively impact most SLC residents. It is really only in place to benefit the ski resorts in LCC. It is a major eyesore, does not fix the issue of overpopulation in canyon, and is a logistically preposterous "solution" requiring many man hours and countless taxpayer dollars for something that an overwhelming majority of SLC residents do not want. This "solution" is an embarrassment to the city and more simple solutions should be considered, like transitioning to electric buses (which do WORK and can go up canyon per evidence earlier last year), increase number of shuttles and lower waiting times at shuttle locations, provide incentives to use buses and carpool, put caps on the amount of cars allowed up the canyon or hours of operation where capping is in place, actually enforce traction requirement regulations for all visitors on peak days, and provide higher wages/better working conditions for our shuttle drivers. Do better.</p>	A32.3A
49640	Bodily, Malia	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. It not only will create issues in this area, but create traffic further down the mountain and ultimately not solving the problem. We don't need more people on the mountain than what it can already hold.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 39909	Boettger, David	<p>NO GONDOLA. Use money to lie chase land for a parking/ bus hub, for example from the gravel operation near BCC and Wasatch Blvd and elsewhere. Also use some of the money to widen Wasatch Blvd . This is THE only commuter route on the east side, there is no alternative and never will be. Irresponsible of UDOT not to have done this 5-10 years ago, and I don't give a f what the east benchers think. I am one too, and I suffered through that route do 20 years commuting opposite traffic and it's been a pain almost that entire time. Finally, make LCC road a toll road and/or something that would also encourage car pooling. No gondola ever. A total east of money that won't solve the transportation problem in the first place, iwould be an ugly scar in a beautiful canyon, and is in inappropriate mis allocation of taxpayer in an attempt to fix a problem that exists for a few hours a day for a minority of days a year. We have transportation needs that are present almost every day of the year. Fix those! If it takes getting up earlier to ski, that's what I will do.</p>	A32.29VV

41259	Bohne, Cleve	<p>Complete waste of us the taxpayers money. Damages the environment of the canyon, both the land and water. The gorgeous views will also be destroyed. Instead increase the bus services to start when the ski resorts open, not wait for a month later. Also for those people who actually carpool to the resorts, they should get rewarded with discounts at the ski resorts. Incentive to carpool....</p>	A32.29VV

40107	Bonar, Bob	<p>This winters record snowfall, extreme avalanche danger, highway closures, extended interlodge episodes and UDOT canyon employees risking their lives show us just how badly we need for the gondola in Little Cottonwood Canyon. UDOT and the State of Utah have a responsibility to provide safe and reliable transportation up and down LCC. The gondola is the only solution that solves all the complex problems providing an alternative to North Americas "most dangerous highway". Please, let's not miss this incredible opportunity to finally remedy this nightmarish situation.</p>	A32.29VV

41808	Bond, Christopher	<p>I'm a lifelong Utah resident who has recreated in LCC for over thirty years. I am adamantly against the massive waste and destruction to the canyon by creating a limited use gondola. In addition to the ugly towers, the MUCH longer ride time, the limited use during big storms, and the gigantic windfall to two private resorts, the Gondola simply doesn't make sense. Currently, skiers like myself have to wait in line at the mouth of the canyon and in the canyon itself. But once at the resort I can usually enjoy skiing without massive lines. Shuttling MORE people up the canyon will only move the lines to the resort itself (ala Park City, which is a disaster on weekends). Leave the road AS IS, enforce the traction law (why this has not happened before a billion dollar mega project is insane to me), and let's leave our beautiful canyon as is. PS. UDOT you do a great job with winter plowing etc. The gondola is just a poor idea.</p>	A32.29VV

39351	Borba, Nickolai	<p>Please improve the road system. You could improve traffic it right away by removing the passing lanes as they are choke points on the road. That would only cost paint and some redesign of the lines. Making a second transportation system in the canyon seems wasteful and poorly thought out. Widen the road to have 3 or 4 lanes. You could make them flex lanes if you had three. Two up in the morning and two down at night. As for the slide zones, as the road develops covered areas like the animal crossings on I-80., the ones to the west of Wendover could be constructed as tunnels or slide overs for the avalanche area. This can be done over time as the project develops. Call Rio Tinto they can move all the dirt. There are so many dirt movers around. This large commitment of the gondola feeling like a power grab from snowbird as they clearly own the land and are the only proponent in the city meetings. Feels like they want to be included in the next Olympic bid at the tax payers expense. They know it is the only way it will happen. It will not help in the summer and will be an eye sore to those like me who moved to the area for the canyons and the natural retreat they represent. The only drop off spots are at the resorts. No trail access. Light pollution from the towers over the city of Alta at night. What a limited use for the money. They want the tax payers to pick up the construction bill and pay to use it as well? I will never use it if I have a choice. I live to close and don't want to load the family up, drive 10 minutes, and get them on a gondola. No way! Improve the road. Start with small improvements and build smart. Please. A concerned local resident Nickolai Borba</p>	A32.29VV

39789	Borden, Maura	<p>Little Cottonwood has a problem with traffic during ski season, no doubt about it, but a gondola and many of the other solutions proposed in the supplemental information reports are not the right thing for our canyon. And to have it be paid for by tax payer dollars would be unacceptable, as not all tax payers recreate in the canyon. Also, bringing more people into the canyon won't make the ski resorts less crowded, and will lead to less fun skiing for everyone there. Not to mention how it will aesthetically a gondola will take away from the naural beauty of Little Cottonwood. Our canyon is a place for a lot more than skiing, it is a place to enjoy the beauty of nature, go hiking, climb, backpack, and picnic. All these recreation activities would be impacted by the gondola as well as many more undoubtably. Also the removal of any climbing boulders for infrastructure changes would be a tragedy. Those boulders are important to so many people, myself included. To destroy climbs to enable more skiing is not the best course of action because climbing is also a source of tourism and will grow to be more so in coming years as climbing increases in popularity. Of all the proposed solutions to canyon traffic enhanced bus without lane widening is the best. We should invest in that solution because it is the most cost effective and equitable for different types of recreation. As a climber, skier, hiker, and Salt Lake local, I say no to the gondola and any other proposed solution that will remove boulders and cost tax payer and excessive amount of money. Enhanced bus without lane widening will improve the situation in the simplest and most effective way.</p>	A32.29VV

40240	Borg, Jeremy	<p>Hello, I believe that the gondola is overkill to try to solve this problem. I do not believe it is needed. I believe it would ruin the vibe of the canyon and be an eyesore. I also DO NOT want my tax dollars going to this solution. I believe there are fixes that can be implemented right now to help with Canyon traffic. The main one would be to not allow single passenger cars unless the occupants live or work up the canyon. This is such an easy solution that would force people to the bus. This would remove a large number of cars from the road and would encourage carpooling. This is exactly what UDOT has been pushing for for years right? So put your money where your mouth is and go with an easy solution. Another potentially less impactful option would seem to be adding avalanche guards in locations where slides are common. This would decrease the amount of cleanup needed and get the canyon open quicker. Please DO NOT proceed with the gondola.</p>	A32.3I A32.29VV
42311	Borgenicht, Roger	<p>April 18, 2023</p> <p>To: Utah Department of Transportation (UDOT) From: Utahns for Better Transportation (UBET)</p> <p>Roger Borgenicht & Ann Floor, Co-Chairs</p> <p>Re: Supplemental Information Reports, Little Cottonwood Canyon FEIS</p> <p>Thank you for the opportunity to comment on these two additional issues regarding the LCC FEIS, which were requested to be addressed by UDOT by federal partners (the Forest Service and Federal Highway Administration) to more fully address the following:</p> <ul style="list-style-type: none"> • The gondola’s impacts on Inventoried Roadless Areas • Additional factors in its air quality analysis <p>Impacts on Inventoried Roadless Areas:</p> <p>Our understanding is that five of the 22 gondola towers would be built in parts of White Pine, Lone Peak, and Twin Peaks Wilderness Roadless Areas, encroaching on the ‘roadless’ designation within LCC. UDOT says gondola construction would not violate the Roadless Rule, which prohibits new road construction and reconstruction in inventoried roadless areas on National Forest System lands, because the gondola isn’t a road for motor vehicles. However, wouldn’t service roads need to be constructed within these roadless areas to provide access to each tower? If so, how can that be justified? Wouldn’t that set a new precedent for allowable construction in roadless areas?</p> <p>The public has been advocating for protection from construction in Roadless Areas in the LCC Gondola Project since the EIS process began in 2018. Each tower base will significantly disrupt and degrade the natural habitat for living creatures and vegetation—the flora and fauna. It also will diminish the aesthetic and recreational experience for all canyon users.</p> <p>Air Quality Analysis:</p> <p>UDOT’s original air quality analysis for enhanced bus service modeled the impacts based on the assumption that all buses would be diesel-powered and 14-years old. If UDOT can adjust its analysis to consider higher-emission fuels like diesel, it should also be able to assess the impact of using lower emission electric buses. UDOT has claimed that an electric bus option is outside the scope of the study but all other fuel types are fair game. How does that make sense? UDOT’s screening to measure polluting effects should be based on non-gas/diesel (electric or natural gas) buses since that will be our transit of the future.</p> <p>Thank you for the opportunity to comment on these supplemental issues for the LCC FEIS.</p>	A32.3H; A32.3A; A32.3F

		Regards, Nikki Bott	
39717	Bott, Steven	I am adamantly opposed to building a Gondola in Little Cottonwood Canyon. This project will use taxpayer money to exclusively benefit the ski area businesses, but will not facilitate any other canyon users, will not operate in the summer, and the rides will take too long. with inconvenient access to the gondola base area. In addition, a gondola will not facilitate emergency services, which will still require building avalanche tunnels. Please move forward with building avalanche tunnels to minimize weather impacts, and greatly expand year-round bus service. I'll use the bus if the service is expanded. Bus ridership is low now because the service is WAY too limited.	A32.29VV
39671	Bouchard, Frank	There is an issue that I think UDOT really hasn't considered, and that is the effect that the gondola project will have on the long term public perception of UDOT as an agency as well as the talent that you will be able to recruit in the future. Because of the gondola, I am now often ashamed to tell people that I work for UDOT. I often get negative reactions and criticism from friends and people that I meet. I've been on the market for a new job to distance myself from this poorly-conceived and controversial project, even though my job has nothing to do with it. And I know that I'm not the only one. As I'm sure you are aware, good UDOT employees often stick with the department for many decades. I even know people that have had children follow in their footsteps and get jobs at UDOT. Losing one of them is not trivial. The gondola project could have a negative impact on UDOT employment for the next 100 years. This is all in addition to the fact that it isn't going to work, it's an irresponsible use of tax payer money, and it will unnecessarily cause permanent damage to Little Cottonwood Canyon. Think about it.	A32.29VV

40583	Boud, Michael	<p>Dear sir or madam,</p> <p>Most Utahns oppose the gondola. Please do not destroy one of our states most scenic treasures! The damage would be irreversible.</p> <p>There are other options:</p> <ul style="list-style-type: none"> *A robust shuttle bus system. Bus services were cut this past season, one of the busiest ever, which doesn't represent a typical season. The unusual snowfall and decreased transport augmented wait times. The ski resorts should foot the bill for this, NOT the tax payers. Or a private business could develop this. This is also much cheaper than the gondola! *A competent ride-share app program. People who have 4 or more passengers could ride up the canyon. They could use an app to meet at: *Grocery store and shopping center parking lots. there are many of these and they are never as much as half full. *Empty office building parking structures, such as those at Old Mill/Knudson's Corner business center, that are not used on weekends and many holidays. *Already existing park and rides. <p>LCC has bad traffic on holidays and weekends between approx Dec 21 and end of March/beginning of April. By mid-April ski resort traffic has mostly fizzled out. So that is only 3.5 months of the year, mainly weekends, Christmas vacation time, and other holidays. What about the rest of the year? Hikers, mountain bikers, nature enthusiasts, backcountry skiers all adore Little Cottonwood. We are taxpayers and this is national forest and federal wilderness.</p> <p>It is so refershing and even healing to have this pristine corridor so close to the craziness of the city below. We need a pristine Little Cottonwood. Rich flora and fauna and our watershed also depend on LCC's protection. One of my favorite places to snowshoe is the meadow area near the LCC creek just off the White Pine trailhead. It's as close to a winter paradise as one could find. And hiking the White Pine/Red Pine system in the summer with its views and unspoiled nature is a world-class outdoor experience.</p> <p>The law already protects the canyon from developing the buffer zone between the highway and federally designated wilderness areas. The roadless rule is the law.</p> <p>The gondola will not solve the problem. It will introduce many new ones, including long waits for skiers on busy days.</p>	A32.3A; A32.3F

39919	Bounous, Suzanne	<p>This is our 3rd day stuck up LCC. At least putting in avalanche tunnels over the road would be an improvement. In addition put them up over an electric train that stops all the way up the canyon. Or Go with the gondola, anything would be an improvement. A cardiac event at the Cliff Lodge was just picked up by Life Flight. They could have been out of here 3 days ago if we just had any of the above.... Tunnels for the cars, tunnels for a train, or a gondola in the air. Let's do something! ?</p>	A32.29VV

		<p>Regards, Liam Bourke</p>	
41722	Bourke, Margaret	<p>Utah Department of Transportation Little Cottonwood Canyon EIS via email: littlecottonwoodeis@utah.gov c/o HDR 2825 E Cottonwood Parkway, Suite 200 Cottonwood Heights, UT 84121 RE: March 17, 2023 issued Supplemental Report regarding IRAs and Air Quality Technical Report Attached please find my comment related to UDOT's supplemental reports regarding IRAs and Air Quality, issued March 17, 2023. Appropriation of NFS lands As will be detailed below, I write out of concern that the FHWA will appropriate NFS lands for highway usage for this Project. Amendments to the 2003 Forest Plan, may be involved "if the proposed use is inconsistent with the Forest Plan" for lands in the national forest system. The Forest Service MUST decide to authorize UDOT to use NFS lands for the Project. Because a Supplement was required to address IRAs, NFS lands are at issue. Updating the 20 year old Forest Plan for the Project will be necessary. The Project involves phasing, snow-sheds, trailhead improvements and "Gondola B infrastructure (includes access road and parking structure)." Because of the planned phasing, there are areas of NFS lands involved in the Project. While not completely detailed in the FEIS, nor the Supplements, constructing snow-sheds, Gondola angle stations, towers and trailhead parking, all require constructing roads. Some of these may be in National Forest System lands. How much? Do we know? Have the plans been detailed? Absent detailed plans, showing the acreages involved, this is unknown. Absent this information there can be no accurate evaluation in the FEIS. Absent this information, there can be no effective evaluation in any future ROD by the Forest Service. Indeed, prior to details being released none know the "plan." Similarly, how, or on what can be the public "comment", absent those same details? The 2003 Forest Plan needs to be updated, in totality. Would amending the plan related to this project, alone, risk doing irreparable harm to the National Forest System lands outside the scope of that amendment? One can not determine, absent far more facts and details. Only if UDOT implemented busing, using not 14 year old technology, but new buses powered by electricity, not diesel fuel, might the Project be able to move forward without a revised Forest Plan. There would be no need for all the infrastructure in the canyon on NFS lands, roadless conservation areas or otherwise. If instead, UDOT continues to move on the preferred Gondola B alternative, FIRST, allow the Unita-Wasatch-Cache National Forest, to prepare and release a comprehensive update the 2003 Forest Plan. Then ALL will have updated information, with details on current conditions, including updated climate, ecological, habitat, watershed and other factors important to considering and evaluating alternatives. Inventoried Roadless Areas Roads Inventoried Roadless Area (IRA) Supplemental report (hereinafter "Supplemental") regarding of White Pine, and portions of Twin Peak and Lone Peak conservation areas. "UDOT has determined that a supplemental EIS is not required under 40 Code of Regulations (CFR) Section 1502.9(d) because substantial changes to the proposed actions have not occurred, nor are there any significant changes or information in this impacts analysis that would have a significant bearing on the findings of the previous National Environmental Policy Act documents. Any proposed activities impacting NFS lands remains subject to the USDA Forest Service's review and decision." (Id., at p. 1.) This 70 page report was necessary because the Department of Agriculture (USDA) requested an analysis of Project impacts (the SR-210 FEIS alternatives relating to LCC) for 3 areas adjacent to Wilderness areas. "provide supplemental information and analysis regarding the impacts of the S.R. 210 Project to Inventoried Roadless Areas [IRA] under the 2001 Roadless Area Conservation Rule (RACR; 66 Federal Register 3243 [January 12, 2001]) and the Forest Plan. The RACR required the USDA Forest Service to conduct an inventory of roadless areas for their potential to be designated as wilderness based on size (at least 5,000 acres) or location (contiguous to an existing Wilderness Area). If an area meets these criteria, it becomes an "Inventoried Roadless Area" (IRA) for the purpose of the RACR. In general, the RACR prohibits road construction, road reconstruction, and timber harvesting (timber cutting, sale, or removal) in IRAs unless certain exceptions or circumstances exist. The Forest Plan includes management direction for roadless areas within the Wasatch-Cache Planning Area of the Uinta-Wasatch-Cache National Forest." The Supplemental identifies those wilderness areas, the parameters of the applicable federal laws and regulations, as well as what are considered exceptions to "limit or prohibit construction, and reconstruction of roads or timber harvesting in 'roadless' conservation areas, or mitigation measures to minimize impacts from that harvesting or road construction". Exceptions to these limitations/prohibitions include definitions of what constitutes a roadway, as well as when "roads [are]deemed essential for public health and safety, road reconstruction, if needed to mitigate a hazard, or a federal-aid highway project in the public interest." (The Supplemental, @ p. 4) Similarly, there are exceptions for timber removal when "incidental to implementing an activity which itself is not otherwise prohibited," IF such "cutting and removal may be necessary to facilitate construction or improvements...." The Wasatch-Cache USFS 2003b Forest Plan, Final EIS, did not recommend any of the 3 Inventoried Roadless Areas (IRAs) be re-designated or added to "wilderness" areas. UDOT's 2023 Supplemental, quotes from the 20 year old Forest Plan, identifying what roadless characteristics and value metric are used, including: "high-quality soil, water, and air resources; sources of public drinking water; biodiversity (assessed in whole as the IRA's degree of "properly functioning condition") and habitat for threatened, endangered, proposed, candidate, and sensitive species and for those species dependent on large, undisturbed areas of land; recreation opportunities in the primitive, semi-primitive non-motorized, and semi-primitive motorized classes; reference landscapes; scenic integrity; traditional cultural properties and sacred sites (heritage resources); and other locally unique characteristics." (The Supplemental,@ p. 5). What is the effect of using analysis contained in the Forest Plan from twenty years ago? Is the situation static? Are there more current measurements? Might IRA status be reconsidered and this area be included, if the 2003 Forest Plan were updated between now and 2050? Have visitation, environmental concerns, ecosystem values, species habitat, scenic integrity and other locally unique characteristics changed, or are/might they be threatened, or changed following the publishing of the 2003 Forest Plan? What effect on these and other metrics, might be anticipated over the next 25 years? Do qualities diminish, due to the lack of visitor use management studies, and/or authority of the resource analysis? What is the effect and importance of solitude, as the population has changed over the past 20 years, and is projected to double again in the next 30? By failing to study, will the effects of an ever-growing number of visitors, inexorably change the forest? Sabino Canyon, in the Coronado National Forest has long had a limit on the number of visitors, consistent with its reservation system for trams from the valley floor. Sabino is designated neither an IRA nor a wilderness area. Nonetheless, Sabino's status and visitor usage is controlled for other value metrics. Visitor use management techniques are employed by other national forests as well: wilderness permits are used in Desolation, Sierra National Forest, Inyo National Forest, and others. Timed entry is also used in some national forests. These limiting techniques, and others, have become the norm, including some seasonal quota systems when visitations are highest. Little Cottonwood Canyon (LCC) is still lacking a visitor use management study. The Forest Plan for the Wasatch-Cache-National Forest is old, 2003; even before "the forest" included Uinta National Forest. (2003 Forest Plan) The needed update should include visitor use management analysis and studies, consistent with current science on that topic. LCC still lacks a complete WALROS analysis and designation consistent with current values and preservation of ecology, environment, water quality, species habitat, etc. LCC road is itself not an IRA nor a wilderness area. However important wilderness areas and IRA's are adjacent thereto, and accessed from LCC road. UDOT, says lands bordering the Twin Peaks Wilderness Area were valued as "medium (2 to 4) to low (1 to 2)". (Supplemental IRA, p. 6). Is UDOT's characterization of values misplaced? Considering the lands "values" rather than merely their acreage total, the "medium" classification might undervalue. There is not only a "high value", but perhaps extremely high value, if there is such a ranking, considering the importance to Salt Lake City water quality from the waters flowing from LCC. I understand LCC waters are the purest water in the Salt Lake City Public Utilities system. Similarly, is there not a high value to a functioning ecosystem and minimizing a threat to a cutthroat trout</p>	A32.3F; A32.3H; A32.10G

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>species? As noted below, the Supplemental does correctly note high value scores, but, nonetheless, the Supplement appears to diminish the importance of these higher values, in the report summaries. "A high (5) score was identified for the public drinking water value; runoff drains into Little Cottonwood Creek (and Big Cottonwood Creek), which are Salt Lake City Department of Public Utilities (SLCDPU) water sources. A medium-high (4) score was assessed by USDA Forest Service for the IRA's properly functioning ecosystem value. A medium-high (4) to high (5) score was assessed for the heritage resources value, although the Forest Plan Final EIS mentioned that data were limited. A high (5) score was reported for the fish species at risk value because of a small population of cutthroat trout that was found in Deaf Smith Canyon, which is outside the impact analysis area and in Little Cottonwood Creek (assessed in the Lone Peak IRA; see Section 3.2, Lone Peak IRA)." (Id., footnotes omitted) The Supplement also concluded Lone Peak and White Pine IRAs with "medium" classifications, on similar measurements. These areas also have higher values for drinking water, ecosystem, heritage, and fish species values. (§§ 3.2 & 3.3, pp 7-8.) White Pine IRA also had high value classification for scenic integrity, habitat (including eagles) and semi-primitive recreational experience. Again, is the "medium" classification, based on acreage, the best measure for the areas value? The Supplemental notes a "discrepancy" with Gondola Tower 10 from the FEIS. That tower would occupy more than 2,600 square feet, within the White Pine IRA (§4.5.2.1.) However the Supplement concludes, because the impact acreage is small, water quality, and soil will not be materially affected: "Impacting 0.06 acre (0.003%) of vegetation in the extreme northwest corner of the White Pine IRA would not materially affect the important soil or water roadless value in the IRA, and water quality would be maintained." (Id.) Has the value classification considered construction only? Was there any consideration for ongoing maintenance and operations? Are these operations projected to be year-round or only seasonally? What is the impact from the building of that tower, construction personnel, equipment and material? What is the impact for the continued maintenance and upkeep of that tower? What is the impact from inspecting the tower itself and the cables it supports? Would those activities occur only when water and vegetation are covered by snow? How often might inspections be needed; what type of equipment and chemicals might be carried or intrinsic to those vehicles? What is the effect of a spill from those vehicles? Referencing not only Gondola A, but likely Gondola B, the preferred alternative, this section of the Supplemental concludes with this sentence: "If a gondola alternative is selected, UDOT, during final design, will evaluate shifting the tower west to avoid the White Pine IRA." (Id. Emphasis added.) Why is now not the time to design and evaluate? What will be the criteria selected for any future evaluation? Who will establish the criteria? Who will evaluate compliance with that criteria? Will another EIS be drafted for that future process? Can an EIS, which is to consider impacts, effectively do so when the project design is not known? How can "impacts" from an "unknown" be evaluated? At a later, final design phase, are future "evaluations" to occur? Will those evaluations be at the agency level? If later, are these designs outside the scope and purview of the EIS process? Will those designs, prior to "implementation" be available for public viewing/comment? If not, how does this action comply with both the letter of the law as stated in NEPA, but also the rationale for enacting it, 50 years ago? Tree Harvesting/Removal Timber harvesting is also discussed in the Supplemental. This section lacks detail as well. It is likely referring to this same area within the White Pine IRA, where "one tower, if not relocated," would require "removal of about 0.06 acre [>2600ft2] of forested/woodland vegetation." (§4.5.3.). The Supplemental concludes, due to the total size of the Twin Peaks IRA, that removal of between 2 and 3 acres of "forest/woodland vegetation would not be a substantial amount of timber relative to the size of the Twin Peaks IRA (6,490 acres)." (Id.) Similar timber removal is envisioned in Twin Peak and Lone Pine IRAs, more that double the amount/acreage size removed in White Pine IRA. Gondola B's supplementary analysis is at section 4.6.1.1. This highlights another angle station at the Park-and-Ride lot at the mouth of LCC road, for base station employee parking. This adds two additional towers 1A and 1B. When will the decision be made whether or not Tower 10 will remain where currently planned, or moved? Provisions which apply in conservation areas are apparently eliminated here, due to the very definition of a roadless area and the Project as defined. Roadless Area Conservation Rules (RACR) only applies to roadways. The Supplemental concludes that because a gondola, is not considered a roadway nor motor travel way, construction thereof would not "prohibit[] in any "removal of timber around the base and angle station [which] would be considered incidental to an activity not prohibited (construction of the gondola). The final decision will be made by the USDA Forest Service in its ROD for the S.R. 210 Project."(Id.) In summary, the IRA Supplemental notes, "the footprint of the gondola alternatives (one tower and about 500 feet of cable) would be within the White Pine IRA. The base physical values and unique qualities of the White Pine IRA would be maintained in compliance with its assigned undeveloped area management prescription (MP [milepost] 2.6). (Id, §5.0) The "assigned undeveloped area" within the 2003 Forest Plan is the point. Would that remain the characterization sir the Forest Plan were more current? With weather extremes being experienced this year in many places, including LCC, with over 878 inches of snowfall (as I write this), is any tree removal justified? Tree roots hold the soil and prevent erosion, reduce size and severity of avalanches, and limit mudslides. Is removing 2-3 acres of trees and woodland well or ill-timed? Are the climatic changes a foretaste to future weather; extreme drought, extreme snowfall, extreme rainfall? Treating the forest and weather as static is not what climate scientists are telling people related to the canyon, the state, the country, indeed the world. Trees and flora of many types in LCC have a challenging environment to propagate and thrive. Does removal of any, but damaged, or, thinning to reduce wildfire risk, seem a prudent activities, even if not within a wilderness area? Although the ski areas plant saplings annually within their special use permitted areas, are there comprehensive accountings of the survival rate of those thousands of saplings and seedlings? Are there efforts to diversify and replant in other areas, such as the areas under consideration for this project? Should the focus in the forest be to add more planting; to diversify the forest, to reduce the age of the forest, supporting ecological health, species habitat, health and maintain water quality at the highest levels possible? Air Quality Analysis Technical Report An Air Quality Analysis (referred to as technical report, or report) was simultaneously released. This report evaluates particulate matter "hot spots," for average 24 hour and annual rate models at the Gravel Pit and mobility hub. This report concerns two particulate matter sizes (PM2.5 and PM10). Science has demonstrated concentrations of PM 2.5, a particle 100 times thinner than a human hair, has adverse health effects. By way of background, the EPA states: "Fine particles (PM2.5) pose the greatest health risk. These fine particles can get deep into lungs and some may even get into the bloodstream. Exposure to these particles can affect a person's lungs and heart. Coarse particles (PM10-2.5) are of less concern, although they can irritate a person's eyes, nose, and throat." Air quality experts at the National Institute of Health (NIH) found a direct correlation between increased life expectancy and lower levels of PM2.5, whether indoor or outdoors. Other research indicates outdoor PM2.5 causes skin damage. The Indoor Air Hygiene Institute defines PM2.5: The seven chemical components of PM2.5, including sulfate, nitrate, ammonium, elemental carbon, organic carbon, silicon, and sodium ion, were chosen based on the findings of Bell et al.,7 as they are the only components that each contributed greater than 1% of PM2.5 mass for either seasonal or yearly averages.... Most studies indicate PM2. 5 at or below 12 µg/m3 is considered healthy with little to no risk from exposure. If the level goes to or above 35 µg/m3 during a 24-hour period, the air is considered unhealthy and can cause issues for people with existing breathing issues such as asthma. *** In areas with high outdoor pollution (above 35 µg/m3 in the outdoor air), windows to the building should be closed and outdoor air brought inside using HEPA filtration. UDOT's new technical report was required due to concerns raised by the Federal Highway Administration (abbreviated in the EIS as FHWA)and UDOT's use of the "WFRC 2050" modeling. That model included buses, ranging from 0 and 30 years old and EPA's "2014 Moves" models with 82% transit buses diesel powered. FHWA requested more conservative analysis with all buses using diesel and at their useful life, 14 year old technology. Apparently, no request was made to evaluate/model air quality within LCC canyon itself, only at the parking area and transit hub. Report at p. 1: "The proposed phasing would include increased and improved bus service as described for the Enhanced Bus Service Alternative (with no canyon roadway widening), tolling or restrictions on single-occupant vehicles, and the construction of mobility hubs. UDOT would also proceed with</p>	

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>widening and other improvements to Wasatch Boulevard, constructing snow sheds, and implementing trailhead and roadside parking improvements, as funding allows. UDOT would start with a bus service adjusted to be closer to the implementation-year demand, and therefore smaller mobility hubs at the gravel pit and at 9400 South and Highland Drive would be needed, and fewer buses would be required compared to the full build-out of the Enhanced Bus Service Alternative. The bus service would likely start with 10-to-15-minute service instead of the 5-minute service evaluated to meet the demand in 2050. When the gondola system becomes operational, all parking would be located at the Gondola Alternative B base station; there would no longer be a need for enhanced bus service, and the impacts associated with operation of the enhanced bus service would cease.” While the discussion focuses on the Gondola A alternative, and the Draft Final EIS selected Gondola B as the preferred alternative, UDOT explains the “hot-spot” analysis for Gondola A included the gravel pit mobility hub, the same primary diesel emissions source as the preferred alternative, and the same methodology identified in the Final EIS was used to model this scenario.” (Id.). For each area, the technical report concludes the new numbers are not significantly different from those in the FEIS. (Technical Report, @p. 8-10, §§4.1-4.3) This might be a reasonable conclusion, on that measure alone, but as buses are primarily for transport, where is the evaluation of the air quality within the canyon, where the buses are intended to travel? At the FEIS locations, the 24-hour for PM10, found no overall change from those in the FEIS model, merely 5.110 vs 5.111µg/m3. image.png However, due to local violations already existing, the report concludes the Project “would not contribute to any new local violations of, increase frequency or severity of any existing violation of, or delay timely attainment of the 24-hour PM2.5 NAAQS [National Ambient Air Quality Standard]. Therefore, the S.R. 210 Project, including the preferred alternative is consistent with the SIP[state implementation plan] and would not cause an exceedance of the 24-hour PM2.5 NAAQS.” (Emphasis added, Report @ p. 9, §4.2) The 24-hour model for PM2.5 was similarly modeled; demonstrating only 5.5µg/m3 below the 2014 EPA labeled dangerous level: PastedGraphic-1.png Where is this information for the canyon itself? Modeling “for” LCC canyon at locations in Sandy and Cottonwood Heights, is by definition, not LCC. Air quality in the Salt Lake Valley; how does that relate to air quality in the canyon itself? What is the effect on air quality within LCC from the Project, whether the phased portion, or thereafter? What is the air quality when considering “seasonal” numbers during the winter months, rather than average daily or annual numbers? Signs posted at the mouth of LCC indicate winter, and traction laws driving conditions can be in effect from October through May 1. Are measurements during that period comparable to either the average 24-hour or the annual numbers used in the Technical report measured at the gravel pit or transit hub? The Project describes the phased bus and/or gondola are to run ONLY in the winter. It is winter when the Salt Lake Valley experiences inversions. It is then that the outdoor air quality is at times unhealthy, whether from fireplaces, vehicle exhaust or industrial air pollution. What effect, if any, is there to the air quality in the canyon from that inversion? What about the additional introduction of even a small amount of PM2.5 above, below, and/or at the “top” of that inversion? What effect is there to public health with even a small increase in PM2.5, for example between 30 and 35µg/m3? What is the effect as the inversion does not remain on the valley floor, but moves up the canyon? It is interesting to note the “background concentration” is projected in 2050 at 29.3 micrograms (µg/m3). Are there no measures to reduce that level? Terry Tempest Williams recently authored an opinion piece in the New York Times discussing pollution from precipitous lake level declines. (“I am haunted by what I have seen at Great Salt Lake, March 25, 2023). Ms. Williams discussed the peril to the Great Salt Lake from over use of the waters which feed/terminate in the lake. Also, she noted a Salt Lake Tribune article from Dr. Hanna Saltzman, a Utah pediatric physician’s concerns about the toxins uncovered by the lake retreat, “toxic dust storms could be catastrophic for children’s health. Take lead for example, one if the heavy metals found in the lake bed: Even the tiniest amount of lead poisoning can harm a child’s brain.” [quoting form the World Health Organization’s fact sheet on lead.] (Id.) Ms. Williams also discusses expert information from Robert Paine, professor of medicine and a pulmonologist at the University of Utah. Paine studies the impact of air quality on human health. Ms. Williams says: “He’s most concerned about the effect of breathing in the tiny particulate matter in the lake bed dust known as PM2.5. ‘We know that even a couple of days of higher exposure to PM2.5 particles can have immediate health effects,’ he told me. ‘We also know that increased amounts of lake bed dust will add to accumulated exposure with long-term health effects.’ What we breathe in during these dust storms can trigger cardiovascular events from strokes to heart attacks to respiratory diseases such as asthma, pneumonia and lung cancer.” Is there more information available to suggest a better course than the WFRC 2050 model? Is it true that PM2.5 can cause acid rain and impact aquatic ecosystems? Has UDOT considered acidification by wet deposition, of PM2. 5? Is it true that PM2. 5 can stay in the air for days or weeks, and can travel even many hundreds of miles. (Website) If so, where is the analysis considering this fact and its impact on both the 24 hour and annual concentrations? In merely three and a half weeks, the concentrations can exceed the NAAQS standard of 35. And, as the PM2.5 particles travel, should not the “background” be broad enough to account for such migration, a large geographic area? What is the effect on the air quality in LCC canyon, when air particles are funneled due to the natural topography of the canyon itself? In 2016, increased mortality was documented, where concentrations were below the EPA’s PM2.5 standard of 12 µg/m3 of annual exposure and 35 µg/m3 daily. NIH paper. Is measuring concentrations at the Gravel Pit and transit hub, versus the canyon itself misplaced? As a resident of LCC canyon, I want to ensure the air quality be as clean as possible. That clean air is what brings sunny, bluebird days winter and summer. Is it sufficient to merely state that the proposed 2050 Project will not exceed 2016 NAAQS standards? Is there not more to consider than merely averaged 24-hour and annual air quality from PM2.5. Is the legislature not working to increase the lake level to reduce toxic dust? If levels of toxic dust increase, even now at levels not anticipated by scientists before, what is the effect on the WFRC 2050 model used in this analysis? In conclusion, I would urge UDOT to evaluate air quality not using the WFRC 2050, not the 2016 NAAQS standards, but the more recent NIH numbers and air quality be evaluated in LCC canyon itself, not only at the mouth of Big Cottonwood Canyon at the Gravel Pit, or the transit hub in the canyon floor. Thank you for the opportunity to comment on these latest reports on the UDOT, LCC FEIS transportation preferred alternatives. Sincerely, Margaret Bourke (Please do not releases my home address nor email on any and all public disclosures of comments.)</p>	
46281	Bourland, Izabella	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as “Roadless,” let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the “Roadless Rule” because it’s not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p>	A32.3A; A32.3F

		Regards, Seth Bovee	
47440	Bowden, John	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, John Bowden	A32.3A; A32.3F
44707	Bowditch, Erica	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 39539	Bowen, Rene	<p>My preference is the Enhanced Bus with the Enhanced road widening alternative as the best. I am completely opposed to the Gondola and the Cog Railroad. The gondola is too expensive, will be unsightly and will not benefit the majority of the citizens of Utah. The ski resorts need to recognize that they are not the top priority for most of us. We prefer our canyons be left as they were intended to be for all people to enjoy recreation preferences not just the 3-4 month ski season.</p>	A32.29VV

39785	Bowers, Erin	<p>The gondola is not the answer to the traffic issue in the canyon. As this season has thoroughly proven, the canyon and resorts will continue to need closure for avalanche mitigation regardless of whether a gondola was built, meaning that the resorts would still have closure issues even while "keeping people off the road." The gondola would simply move the line of traffic downward to its base station. The gondola itself presents an unfair issue to county residents where it would be built, as well as to taxpayers who do not even use LCC as it would only serve two ski resorts. It would be unsightly and environmentally impactful to the canyon. The underlying problem that needs to be investigated and regulated is the existence of conglomerate passes such as IKON, Mountain Collective, and EPIC. The origination of these passes is the ROOT CAUSE of the tremendous increase in traffic in the canyon. These passes are sold worldwide with absolutely no limits and regulation of any kind and should be permanently eliminated or sharply regulated. People would still buy season passes and come to ski if these conglomerate passes were removed, and likely in safer numbers. The resorts also do not limit numbers of skiers and this has caused an increase in safety concerns and accidents. The gondola is yet another self serving way that these resorts desire in order to make more money. There are other things that could be implemented in the canyon with road changes and other means of transportation and monitoring that have not been fully investigated or tried. The resorts actively tried to reduce bus service this year, claiming safety issues, which is ludicrous. I am fully against building a gondola which will not solve any of the problems claimed by its proponents.</p>	A32.29VV

41771	Bowman, Kate	<p>Thank you for conducting additional analysis regarding the impacts of the final EIS alternatives on Inventoried Roadless Areas and air quality.</p> <p>As a frequent visitor to Little Cottonwood Canyon in both the summer and the winter, I do not believe that any of the gondola alternatives are realistic solutions to the traffic problems in LCC. The cost of the gondola, in terms of both taxpayer dollars and environmental impacts, is simply not worth the limited benefits it would provide. The historic avalanche cycle that took place in April 2023 is a great example of the shortcomings of the gondola as a traffic solution. The LCC road was fully or substantially closed for most of two weeks during a period of warmer weather that resulted in many avalanches. Most of the slide paths in LCC ran across the road, depositing many meters of heavy, wet snow as well as debris including large trees across the road. During periods like this, it is hard to imagine that the gondola would be able to continue running safely given the significant potential that poles or cables could be damaged by avalanches or debris. On the other hand, increased bus service combined with snow sheds is a much more flexible and adaptable solution that can meet the transportation needs of visitors today, and be adapted to meet future and changing needs.</p> <p>The gondola alternatives do not provide safety or mobility benefits significant enough to justify the impacts to the White Pine, Twin Peaks, and Lone Peak IRAs, including the vegetation and timber removal required for construction. The gondola will further violate the spirit of the Roadless Area Conservation Rule because it will result in permanent and ongoing impacts from the gondola towers and the noise of the cables running throughout the day. The visual impact will be even more significant than expansion of the road.</p> <p>Last, regarding the air quality supplemental report, the enhanced bus alternative should include evaluation of use of electric buses. Switching to electric buses would dramatically reduce the air quality impact of the enhanced bus alternatives. Many local governments are already transitioning their bus fleets to electric, and more and more models of heavy duty electric vehicles are available every year. Enhancing bus service and transitioning to an electric fleet provides all of the air quality benefits of the gondola alternatives and more carbon emissions reductions, since the gondola will still be powered by a grid that is currently mostly derived from the burning of fossil fuels.</p>	A32.3A; A32.3I; A32.10G
