		Regards, Andee Flinders	
39247	Flint, Noah	These all seem extremely wasteful just to service two resorts in the winter, but a gondola seems most intrusive and outrageously expensive. Limit the number of cars going up the canyon. Use license plate numbers, rather than tolls to limit who can travel up canyon each day. There are simpler, more equitable, and less costly ways to manage the traffic issue in the canyon.	A32.29VV
51600	Flint, Skye	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 39306	Flodin, Sandra	I am against the gondola and any damage to the canyon and surrounding areas! It's a structure that does not help the environment or transport to the ski areas. Tolling cars at high rates and having the bus be a cheaper alternative is the better solution. There are plenty of park and ride areas and there are even alternatives - like Rio Tinto stadium parking that is not used in the winter. Other options are imperative to maintaining the pristine nature in our canyons. NO GONDOLA!!!	A32.29VV
46169	Floquet, Charlene	To whom it may concern,	A32.3A; A32.3F

		<p>Please invest more money in UTA's ski bus services. This past year, riding the bus to the resorts was very difficult due to the staff shortages and schedule cuts. I appreciate this service and the improved buses, but peak times make it very undesirable. The money that could be used for the gondola could fund an improved bus service for many, many years. Please listen to the people who enjoy recreating in Little Cottonwood Canyon rather than rich businessmen who only care about getting richer.</p> <p>Regards, Rebecca Flores</p>

44007	Foley, Daniel	<p>To whom it may concern,</p> <p>I oppose the LCC Gondola. I think that this will have no noticeable effects on the traffic in the canyon. Sure 5 - 10 years from now when it's done it will be convenient for those who buy tickets but it will not be an improvement and it is not a solution to the issue. It will have a number of negative effects in the process and the added benefit of having the gondola certainly does not outweigh negative impact it will have on the canyon.</p> <p>Regards, Daniel Foley</p>	A32.29VV
39672	Foley, Kate	NO GONDOLA! The public does NOT want this! There are better, cheaper options. Do the right thing and put a stop to this.	A32.29VV

39638	FOLLAND, DAVID	<p>I don't think the gondola is the right solution for Little Cottonwood Canyon. It is too expensive for the number of people who will use it. If skiers and ski areas paid for the gondola, rather than the Utah taxpayers, it could be justified. There are just too many other urgent priorities in the state, the dying Great Salt Lake being the most immediate environmental need.</p>	A32.29VV

39447	Fonte, Jill	<p>If our government won't protect our health, our watershed and our wildlife, who will? The gondola will service two privately held organizations - Snowbird and Alta - yet taxpayers will bear the brunt of the cost and those who recreate in the canyon will bear the brunt of the disruption and the loss of our view corridor. PLEASE, NO GONDOLA! Enhance the bus service, charge for cars, but don't destroy our beautiful canyon!</p>	A32.29VV
40437	Fonte, Jill	<p>It is unfathomable that after all the public outcry, this gondola is still under consideration. How can it be worth the disruption to the wildlife and the watershed to install such an expensive transit system to service only two privately owned businesses? Something smells VERY bad about this whole concept!</p>	A32.29VV

39941	ford, emily	<p>Although it's said that the gondola construction would result in 'incidental' vegetation/timber removal, and not contradict the roadless rule re: motor vehicles, a \$1billion transportation project within an IRA inherently contrasts the intent of a Roadless Rule and the wilderness values of the area which it protects. White Pine and portions of Twin Peaks and Lone Peak IRAs need to be protected, now more than ever, with increased traffic, recreation, climate change, an expanding wildlife-urban interface and other development. The gondola is a destructive, large-scale infrastructure project that cannot be implemented due to its negative effects on the local environment.</p>	A32.3A; A32.3F
39933	Ford, Hal	<p>Little Cottonwood Canyon has spoken loud and clear this year breaking all records on Accumulated Snow, Avalanches, Road Closures, and Interlocked Skiers. The only practical solution is a Pollution Free Tram that travels far above the Snow, Avalanche and Stalled Traffic to provide unrestricted 24/7 access between Alta, Snowbird, the slopes, and the mouth of the Canyon for Residents, Skiers Emergency Personnel and Medical Assistance.</p>	A32.29VV
56087	Ford, Kristen	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Kristen Ford</p>	A32.3A; A32.3F

		<p>Regards, Kimberlie Forsberg</p>	
40109	FORSDICK, CHRIS	<p>As a practicing Recreation Therapist in mental health, I know the value of 'nature' and human mental health. I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>Creating and building the access roads for maintenance for the eight gondola towers will alter the views and value of the inherent beauty of nature. Beathaking views and wildlife have been studied and are found to be a determinate in positive emotional well-being. SCIENCE ADVANCE: 24 Jul 2019</p> <p>Vol 5, Issue 7 DOI: 10.1126/sciadv.aax0903</p> <p>The years that it will take to build the gondola system does not help fix the traffic problems in the canyon.</p> <p>Please stop the gondola and altering the canyon. Follow the current Roadless Rule that was put on the 'books' by our predicessors that value the natural environment with vegetation, wildlife and clean water.</p> <p>Thankyou, Chris Forsdick</p>	A32.3A; A32.3F; A32.3I

		<p>locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Samantha Fowler</p>	
55398	Fowler, Zachary	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Zachary Fowler</p>	A32.3A; A32.3F

39940	Fox, Jason	<p>Please do not proceed with the Gondola. Utahns are currently blessed with the beauty and grace that is Little Cottonwood Canyon, something that a massive structure like a Gondola, plopped right in the center would irrevocably denigrate. I ski, and I would love easy access to those resorts, but never would I spend other tax payers money just to recreate, especially when far more hard working Utahn's deal with traffic issues All year long! Public dollars, in my opinion should be used to serve the masses and definitely not for such a small subset of the community.</p> <p>Buses, a toll system, not changing a thing, would all be far more cost conscious, and keep the the bigger picture in frame.</p> <p>Thank You,</p> <p>Jason</p>	A32.29VV

47320	Francis, Brianna	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Brianna Francis</p>	A32.3A; A32.3F

40731	Freebairn, Chanda	The Gondola does not make sense!!!! the towers will be so ugly. Nobody will ride it, Too expensive, too inconvenient for skiers, AND. ONLY OPEN FOR A FEW MONTHS during the year, that is extra stupid!!!	A32.29VV
40736	Freebairn, Chanda	NO GONDOLA, Charge each car to drive up the canyon or ride the bus for free. The gondola is so stupid, expensive, inconvenient. All of that work and money spent will go to hell, once people discover it is a pain to ride and only open a few months a year.	A32.29VV
39938	Freebairn, Greg	The gondola would directly violate the Roadless Rule and negatively impact wilderness areas in Little Cottonwood Canyon. Please consider alternative solutions such as a toll for canyon usage, and enhanced bus service.	A32.29VV

42337	Fresques, Allison	<p>I am resident of Millcreek and user of Little Cottonwood Canyon. After reviewing the final EIS and other materials, I am firmly against the proposed gondola. First, I think UDOT did not adequately consider and analyze the roadless rule. I also think that UDOT is recklessly disregarding the negative impacts on the vegetation, animals, and overall environment that a gondola will necessarily create. This vision is expensive and short sighted, and I don't think will adequately address the traffic issues in LCC; and unfortunately, once the decision is made and gondola is constructed, we can't go back. I think UDOT needs to consider other proposals such as tolls, extended bus options, or creating a second middle lane for uphill and downhill traffic alleviation. I'm against the gondola, and I don't know a single person in the state that is in favor of it.</p>	A32.3F

41018	Fridirici, Ted	<p>Additional impacts to remote roads not intended for general use or impacts are just one more reason this entire concept of a gondola is just the dumbest thing I've ever heard of. Please stop this insanity as it makes no sense. There are much cheaper smarter more efficient and faster solutions staring you right in your face. I just worry that its a done deal with some smokey back room political dealing over-riding what is so clearly a better path forward. For example...Solar charged energy efficient buses, pay drivers enough so you can run more buses, expand parking at 6200/Wasatch/ Quarry lot, incentives to car pool or ride the bus coupled with disincentives to drive up by yourself, avalanche sheds to channel the slides OVER the road, select widening if needed....please stop this dead in its tracks as it will be 20 years as all the lawsuits wind through the courts and the costs for this white elephant continue to rise. Thanks for the chance to comment.</p>	A32.29VV
39477	Fried, Jack	<p>The EIS clearly confirms that operating buses on current roads without building a separate bus lane has the least adverse impact on the environment and the beauty of the land around it. While current plans do not call for buses stopping at trail heads, that remains an option for the future. It is not an option for the gondola, which few people will be able to afford and which will require tax payer subsidies. Even UDOT is unsure of the gondola's final cost, which is interesting since the rest of us know it will cost over a billion dollars. Providing tax payer subsidies to two businesses and former elected officials is unconscionable. A gondola may be as "sexy " as the underutilized Fronr Runner trains, but it won't get the Olympics back.</p>	A32.29VV

39580	Fried, Martha	People who can afford to use the gondola will already be staying at the resorts. Average Utahns will not be able to afford it and wil continue to drive. Hence, the gondola, which almost cost more than what we've been told, will be under utilized. Bus service can be implemented now without building an unnecessary bus lane.	A32.29VV

40381	Fuller, Gretchen	<p>I live in Midvale and ski up to 30 days and more a year. I love our canyons and do not agree with these plans to get tax payers to pay for Snowbird and Alta to make more money. This does nothing to help the canyon or our watershed. Putting a gondola in will create more wasted funds that go to help 2 businesses and will wreck the beauty of that wild area for the rest of our future. Parking reservations and ski buses should be the way to go. I don't even know why I am taking the time to comment when no one is even listening. This has been a frustrating process and it is clear that you will be taking our taxes to allow 2 resorts to sell more tickets. This doesn't benefit anyone else. I do not support this move.</p>	A32.29VV

		<p>I went up the canyon Saturday.. there were one or two people in each vehicle. Yes the traffic was crazy, but one bus could eliminate 50 vehicles.</p> <p>Parking below is an issue no matter which options is chosen.</p> <p>Extra buses, with priority road access... pick up location with parking and we're good. The mountains can only handle so many skiers.... Comfortably.</p> <p>The Gondola is nothing more than an expensive Disney ride.</p>	
39315	G. Maxfield, Steven	<p>Please no Gondola</p> <p>Enhance bus service.</p>	A32.29VV
39908	G. Maxfield, Steven	<p>No... No... No to the Gondola!</p> <p>Please don't ruin our canyons for a Gondola.</p> <p>Better parking , more busses and priority travel up/down the canyon.</p>	A32.29VV
41627	G., Scott	<p>Hello, thank you for reading and understanding that you're talking about my home: where I live and love to spend my time. I am sure if we were talking about where you live, you would like to be heard and understood just the same.</p> <p>After listening closely for a year +, I say "NO!" to the gondola. Besides the under-the-radar business dealings and clear disregard for tax payer money, I do not see the gondola as a solution. It is merely a tool to get more people up the canyon to spend money at 2 ski resorts. That is the only reason for the gondola. We all love to ski/ride, but at what cost to the tax payers? The bus system has not been enhanced, if anything I see less buses today. Where is a carpooling toll? Why don't we use practical solutions to get more people up the canyon, and when there is severe avalanche danger, then sorry you cannot go up! It was the choice of the investors who own Snowbird and Alta to invest in a canyon that might be shut-down from time to time. Instead they are looking for a tax payer solution to get them more profits.</p> <p>Instead, use profits from carpooling/buses/ski passes, other investors to build the gondola system.</p> <p>While we all know this gondola will go through because everyone is getting paid & considered besides those actually who live in the affected area.</p> <p>Just drive around the neighborhood - to see all the signs around Cottonwood Heights & Sandy, there are no pro-gondola signs anywhere. This is a tourist attraction for corporate greed.</p> <p>From,</p> <p>Someone who lives at the base of [REDACTED] and would be paying for this.</p> <p>Thanks for doing something in my interest.</p>	A32.29VV

40406	Gaertner, Katie	<p>I believe the Gondola should be entirely removed from any considerations for a solution for LCC in any capacity. You can open a door with dynamite but you certainly do not need to. The gondola is an incredibly unnecessary route to attempt to provide a solution to traffic in LCC; this solution is only in the winter months serving private resorts and now has a layer with tax payer funding? As a local resident, lover of the canyon AND the resorts - I would refuse to fund in any way such a problematic "solution" only serving a selective group with horrific impacts to the environment, landscape, and views of LCC.</p> <p>Rocky Mountain National Park and Arches National Park have timed entries and tolling that spread out crowds - if we receive a similar amount of visitors as a national park we should be implemented these best practices established</p>	A32.29VV

42200	Gaffney, Helena	<p>This project is irresponsible on many levels, but I'm going to focus on the environmental and financial impacts.</p> <p>The gondola will pass through 3 Inventoried Roadless Areas designated to PROTECT undisturbed wild areas. This project will completely disregard that, harming the little land and wildlife that hasn't yet been disrupted. The many outdoorsmen and women enjoying these primitive areas responsibly would also have limited access to these beautiful natural playgrounds. Additionally, the disruption will extend far beyond these regions given the constant noise pollution it will cause.</p> <p>The cost of this project is astronomical compared to what it would cost to increase bus travel, and tax payers are expected to foot the bill, 80% of which oppose this project or will never use the gondola. Those who do use the gondola will STILL have to pay for it, likely in addition to parking at the base, dumping even more tax payer money into a futile project. Those who can't afford it, which will likely be many, will continue to contribute to the traffic problem we're trying to solve.</p> <p>This money would be much better spent on saving the lake, as the snowfall and valley environment will suffer dramatically should it dry up entirely, making the gondola useless, as tourists will flock to safer mountain regions with better snow. So although this project will only truly benefit the resorts, they won't see a benefit for very long once we lose "the best snow on earth".</p> <p>And as if water wasn't already enough of a problem, the gondola's construction will jeopardize critical watershed supplying much of the valley's drinking water. This will further drive people away from the Salt Lake Valley.</p> <p>Lastly, we really don't even know how many people the canyon can accommodate. This lgondola may push it past it's breaking point, ending use of the canyon entirely.</p> <p>There are MANY other issues with this project, and they are not just limited to the environmental and financial toll it will take on the valley and the state of Utah.</p> <p>Given the many issues, I'd like to propose some alternatives as well:</p> <ul style="list-style-type: none"> • expand the bus service - We already have the bus fleet to implement this, and the residents of SLC are committed to utilizing it. • incentivize carpooling - enforce a high toll for cars carrying less than 4 people, for example, very doable and definitely enough incentive for all of the recreationalists I know • require parking reservations at resorts at all times - less traffic, less impact on the canyon <p>Additionally, these alternative solutions are REVERSIBLE; if they don't work, we can explore other low-cost, low-impact solutions. However, if the gondola project is completed, and it doesn't solve the canyon problems, we will be stuck with it and its disastrous impacts forever. Please think long and hard before you cause irreparable damage to our beloved Little Cottonwood Canyon.</p>	A32.3A; A32.3F
47680	Gaffney, Joseph	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock</p>	A32.3A; A32.3F

		<p>climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Joseph Gaffney</p>	
40907	Gaffney, Samantha	<p>Hello, As a lifelong Utahn I strongly oppose the proposed gondola. The environmental impact of the gondola would be devastating to the canyon. Not only would it disrupt the natural beauty of the area, it would have profound consequences to the health of wildlife and citizens of Salt Lake Valley by disrupting the LCC watershed permanently. Recreation would be affected by removing access to trailheads and bouldering areas. Further, building a gondola in this area violates the Roadless Rule. In our current society, we need to protect open space. I believe UDOT's interpretation of the Roadless rule is incorrect and challenge UDOT to consider the environmental impacts of the gondola, both for our current population and the future. Conservation is the essential, and I sincerely hope that my children will be able to grow up to enjoy the beauty of the Wasatch as well.</p>	A32.3A; A32.3F

40125	Galbraith, Erik	<p>I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	A32.10G

41320	Gangi, Douglas	<p>As an owner with a residence near LCC on Wasatch Blvd, I am against the 22 towers of the gondola project. As I understand it, a number of these towers will encroach on the "Roadless" designation within LCC. Each tower base will significantly disrupt and degrade the natural habitat for living creatures, flora and fauna but will also degrade the aesthetic and recreational experience for all canyon users. To be "roadless" is to infer that the area be kept natural, towers for the purpose of transportation should fall within the category of a "road facility".</p> <p>I also reviewed the UDOT FEIS, and I think it is unfair to see UDOT's measurements on pollution. Instead of using non-diesel (electric or natural gas) buses, which is the transit of the future, when comparing the gondola to bus service., UDOT utilized diesel-only/14 year old buses. By the time the gondola would be built, closer to 2050, with all the federal incentives for non-polluting transit, electric buses will be even more technologically advanced than they are now. I own a 2nd home in Phoenix AZ, and our local bus system transitioned to natural gas years ago to cut down on pollution. A modern bus should be used in the study.</p>	A32.3A; A32.3F; A32.10G

		<p>rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Zoe Garber</p>	
44585	Garbett, Alicia	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Alicia Garbett</p>	A32.3A; A32.3F

		<p>Regards, em gardiner</p>	
40211	Gardiner, Mark	<p>In light of the unusual snowpack in 22/23 I ask what design elements or avalanche mitigation towers will protect the gondola from avalanche damage? I have seen common design possibilities in the alps where "splitters" route snow slides around towers and avalanche fences hold back unstable snow, but I have not seen mention of this concern in the case of Little Cottonwood Cyn. Might Wyssen systems used elsewhere in LCC be needed?</p>	A32.29VV

43838	Garland, MaryKate	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I fully oppose that this gondola be built with tax payer money when it will solely benefit two privately owned ski resorts and their profits. That is misuse of tax payer money when it is not an improvement to roads, traffic, infrastructure, public health, or public recreation, but instead a detractor to all of those things.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts, canyon passes, or charging a daily use rate to drive on the canyon road (similar to millcreek canyon).</p> <p>Regards, MaryKate Garland</p>	A32.3A; A32.3F
39742	Garlo, Dolly	<p>No, No, No, No, No! (No Gondola!!)</p> <p>Notwithstanding the previous comments opposing the gondola project, and overwhelming opposition to it by Salt Lake County residents, the gondola project is projected to be built within three federally protected Roadless Areas (Twin Peaks, Lone Peak, and White Pine Roadless Areas).</p> <p>Road construction is typically prohibited in these areas and definitely SHOULD BE PROHIBITED in Little Cottonwood Canyon (LCC).</p> <p>The gondola project should not be allowed because the 8 gondola towers, snow sheds, 2 angle stations, and vegetation removal that would take place within Inventoried Roadless Areas would be a blight on what is currently pristine wilderness and protected watershed.</p> <p>The Forest Plan prohibits road projects and recreation projects in these areas.</p> <p>UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon. That is wrong and should not happen!</p> <p>While roadless areas are protected under the 2001 Roadless Rule, the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units. HOWEVER:</p> <ol style="list-style-type: none"> 1) That did not include the three federally protected Roadless Areas in LCC, and 2) The limited allowance was NOT for the purposes of building a gondola! <p>The proposed gondola detracts from the roadless characteristics of these Inventoried Roadless Areas. There is already one road (Hwy 210) in LCC. There are plenty of better</p>	A32.3A; A32.3F

42345	Garrido, Sidney	<p>It's wrong to use tax payers money for the benefit of private corporations. Please please, insentivise using public transportation and car pooling. Limit how many people can go into the canyon a day. We need to figure out the carrying capacity for our canyons before it impacts our watershed and the ecology of the area. Profit is not the most important this here. Humanity is at stake. I've said this so many times in so many ways. I doubt anyone reads these. And if someone does it's not the people making decisions. But if it was Id ask them to prioritize the environment over profit. Please.</p>	A32.29VV

49531	Gearheart, Hannah	<p>To whom it may concern,</p> <p>I am asking to please not follow through with the gondola project in Little Cottonwood Canyon. I think there are many other, more cost efficient ways to help with the traffic to and from the ski resorts and other trailheads throughout the canyon. This will cost way to much money to not have it solve really any traffic problems we may be facing now!! It's also going to take away from some of the beauty in one of the most breathtaking canyons in the nation. Let's find another solution.</p> <p>Regards, Hannah Gearheart</p>	A32.29VV

39446	Geddes, Porter	<p>This is the third comment period, and the third time I'm leaving one of these. Clearly the citizens of Utah do not want a Gondola. We don't want our canyons destroyed. We want clean public lands that are available and treated well, something that this gondola plan will do horribly. It would be an atrocity to permanently scar the Wasatch Range with something like a hideous gondola. It would be horrible to see the cottonwoods push the gondola forwards before even attempting to create a successful bussing system. There is a reason that Colorado still doesn't have gondolas like these to skip traffic lines, they have a decent respect for the outdoors, something that Utah businesses, especially the ski businesses, needs to figure out really quickly.</p>	A32.29VV

41814	Geisler, Julia	<p>Salt Lake Climbers Alliance</p> <p>[REDACTED]</p> <p>April 18, 2023</p> <p>Utah Department of Transportation (UDOT) 2825 East Cottonwood Parkway, Suite 200 Cottonwood Heights, Utah 84121</p> <p>RE: Environmental Impact Statement (FEIS) Supplemental Information Reports: Salt Lake Climbers Alliance (SLCA) Comments</p> <p>Dear UDOT LCC EIS Project Team:</p> <p>The Salt Lake Climbers Alliance (SLCA) appreciates the opportunity to comment on UDOT's FEIS Supplemental Information Reports. The SLCA maintains that there continues to be critical flaws to the FEIS in total; specifically, that the total scope of the project is too narrow and the purpose and need are not satisfied by the proposed solution. Furthermore, the proposed preferred gondola alternative cannot be exempt from the Roadless Rule.</p> <p>The SLCA has and will continue to advocate for enhanced electric bus service, with no roadway widening or large-scale infrastructure, that runs year-round and stops at trailheads, thereby serving all user groups in Little Cottonwood Canyon and satisfying mobility demands. The enhanced electric bus system will not impact any IRAs within Little Cottonwood Canyon and would still provide traffic relief during the winter months and therefore should be reconsidered as the preferred alternative.</p> <p>The SLCA makes the following comments and requests of UDOT pertaining to the Supplemental Reports on Air Quality and Roadless Areas.</p> <p>Roadless areas are protected under the 2001 Roadless Rule. The following values or features characterize inventoried roadless areas: High quality or undisturbed soil, water, and air; Sources of public drinking water; Primitive, Semi-Primitive Non-Motorized, and Semi-Primitive Motorized classes of dispersed recreation; Natural appearing landscapes with high scenic quality.</p> <p>The gondola alternative does not maintain any of the characterized values of features listed. The gondola alternative will disturb soil, will be within a source of public drinking water, is not a form of semi-primitive motorized recreation, does not blend in with natural landscapes with high scenic quality.</p> <p>More specifically:</p> <p>The FEIS and supplemental reports fail to acknowledge that the gondola alternative does not support recreation except that occurring at privately owned ski resorts.</p> <p>Inventoried roadless areas act as buffers for designated wilderness areas. The gondola will be immediately adjacent to multiple wilderness areas. The FEIS fails to take into account this proximity and the significant impact on these areas. The impacts include visual and audio impacts.</p> <p>The FEIS and supplemental reports fail to fully analyze the impacts to the ecology, drinking water quality, and dispersed recreation opportunities within the inventoried roadless areas.</p> <p>The FEIS and supplemental reports fail to fully account for recreation restrictions/limits within the inventoried roadless areas that will occur due to the proximity of gondola infrastructure to dispersed recreation.</p> <p>Though the FEIS notes a strategy to use helicopters for gondola tower construction, in all likelihood the construction of the gondola towers will require temporary roads and timber removal resulting in impacts to water and soil quality. The FEIS and supplemental reports fail to fully analyze these impacts.</p> <p>The FEIS and supplemental reports fail to account for the impacts of the gondola tower foundations which will require timber removal. Additional timber removal will be required to maintain the regulated variance for aerial ropeways.</p> <p>The FEIS and supplemental report fail to address the need for access to gondola infrastructure within the roadless area for ongoing maintenance, inspections and rescue situations.</p>	A32.3A; A32.3H; A32.3G; A32.10G

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>The FEIS and supplemental report claim that impacts to roadless areas will be 'incidental' but fail to fully account for impacts from the construction and from the gondola infrastructure to environmental values that the roadless area designation is supposed to protect: watershed, views, dispersed recreation, timber, vegetation, and habitat.</p> <p>Roadless areas are protected under the 2001 Roadless Rule. While the 2003 Revised Uinta-Wasatch-Cache Forest Plan allows for some development in selected roadless units, the units impacted by the gondola alternative are not among those units listed.</p> <p>Though the gondola cannot be classified as a roadway, it would be built for transportation purposes, thus being a de facto highway in the sky, making it inconsistent with the 2001 Roadless Rule and the 2003 Uinta Wasatch Cache National Forest Plan.</p> <p>In regards to the FHWA requested evaluation of a scenario under the existing modeling where all ski buses would be powered by diesel fuel. The following comments are in pertinent:</p> <p>The current operational model assumes that all (65) buses will be in operation in the first year. This operational model is not reflective of the actual need which will not require all buses be in operation until year 30. The operational model should reflect the predicted yearly needs.</p> <p>The current operational model assumes that buses will be in operation only during the ski season, approximately five months of the year. As such, the 14 year operational life, which assumes continuous usage is not accurate.</p> <p>The FHWA request that the bus fleet be evaluated at the maximum expected service life of 14 years rather than a variable age bus fleet is nonsensical.</p> <p>As it has been demonstrated that diesel and electric buses can both be utilized, a range of alternatives should be presented. That is an all electric fleet being the best case in terms of emissions. Whereas as an all diesel fleet being the worst case in terms of emissions.</p> <p>Additional comments regarding modeling of emissions for all scenarios.</p> <p>During the three to four peak hour uphill and down periods a steady state arrival/departure model cannot be assumed. The arrival/departure data presented in the FEIS reflects a bimodal distribution and as such should be used for all associated modeling.</p> <p>Emission modeling should include scenarios that include normal operations as well as temporary canyon closures for avalanche control work.</p> <p>Links to SLCA's Previously Submitted Comments during the LCC EIS:</p> <p>Little Cottonwood Canyon Draft Environmental Impact Statement (DEIS) Salt Lake Climbers Alliance (SLCA) Comments</p> <p>SLCA's Comments Regarding Revised Chapter 26 to Little Cottonwood Draft Environmental Impact Statement</p> <p>Little Cottonwood Canyon Final Environmental Impact Statement (FEIS) Salt Lake Climbers Alliance (SLCA) Comments</p> <p>Sincerely,</p> <p>Julia Geisler</p> <p>Executive Director </p> <p>SLCA Policy Committee Members: Corey Coulam, Allen Sanderson, Tori Edwards, John Flynn, Kim Rhodes, Caroline Canter, Serena Yau, Mason Baker, Alma Baste, Paris Wagner, Pitt Grewe</p> <p>cc: </p>	<p>See Responses in Appendix A of the ROD</p>

41533	Geist, Allie	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Allie Geist</p>	A32.3A; A32.3F
40089	Gelinias, Gillian	<p>I think the Gondola will not solve any problems. The number one problem with the road is safety. Snow sheds need to be built over the road to ensure safety of the employees and public. Even with a gondola, the avalanche risk still remains a threat to anyone on the road.</p>	A32.29VV

This is my backyard, the place I learned and played in as a child. To harm it is to harm my home, my family's home and a place that is dear to my heart. It doesn't matter how many people make it up the canyon so two resorts can make more money. It matters that we preserve this canyon and this ecosystem so it can continue to support the entire community instead of a select few. Time and time again we choose money and development over our earth, Salt Lake City should not make that mistake.</p> <p>Regards, Adeline Gesteland</p>	A32.3A; A32.3F

40172	Giambusso, C	I support the gondola option. It will have the least impact, can be removed and sold if it doesn't work out, significantly less emissions, potential year round tourist attraction and resolves road closures. Trailhead stop should be considered for hiking season if demand justifies.	A32.29VV
42319	Giannis, Mark	I am against the construction of a gondola up Little Cottonwood Canyon. The use of public funds for the benefit of private ski resorts is not something that should be done. Further, creating a permanent structure that lays dormant most of the year is short-sighted.	A32.29VV
52770	Giannoni, Giovanni	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 41014	Giaquinta, Kyle	As a resident of Salt Lake and an avid back country skier/runner/nature enthusiast I am writing to urge you to consider alternatives to the gondola. The gondola is not only a financial burden to residents of all incomes it is only for the benefit of the ski resorts. LCC is one of the most beautiful places I have experienced, and it would be a massive loss to stare at this eye sore that only stops at the resorts. Please consider increasing buses or a toll system before making this mistake. Thank you.	A32.29VV
43714	Giardina, Mark	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p>	A32.3A; A32.3F

39232	Gibby, Devon	<p>It seems to me as if UDOT and whoever is getting paid for this project is trying to find every way possible to not widen the road. Seems like the environment impact would be much worse with a gondola and many roads would have to be built to install it. Just widen the road already and allow one lane to be a bike lane in the summer. Put up some avalanche sheds and be done with it. Require snowbird to increase their parking (no road parking) and require reservations like Alta does. It is so simple. Just do it.</p>	A32.29VV

49940	Giforos, Vicki	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Vicki Giforos</p>	A32.3A; A32.3F

Regards, Sonya Gilbert	A32.3A; A32.3F
39748	GilbertNorton, Lynne	UDOTs Preferred Alternative would permanently alter and disturb habitat protected under Roadless Rule inherent to Little Cottonwood Canyon. Roadless areas have environmental values including watershed, and habitat for populations of threatened and endangered species. Roadless Rule protects large undisturbed landscapes that are important for biological diversity and long-term survival of at risk species. The gondola system requires the construction of towers, angle stations, Snowshed's, and the clearing of vegetation and should not be exempt from the Roadless Rule. Construction disturbance and permanent gondola structures contradict the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan.	A32.3A; A32.3F

40152	Giuffria, Jonathon	The use of diesel buses as the standard mode of transportation in the air quality analysis is not a valid assumption. Fully electric buses have a significantly higher economic value proposition, especially when considering the lifespan of 14 years. Capital expenditure costs are higher in year 0, but with the high and variable price of diesel + high maintenance costs of ICE vehicles, electric buses' reduced operational expenditures, especially in a fleet capacity, win by a long shot. Additionally, electric buses have the advantage of no tailpipe emissions and significantly less sound emissions. To use diesel buses as the only way in which buses can be analyzed would result in a flawed analysis. The evaluation of the use of PHEV buses should be included. I do not agree with the methodology of the EIS thus far and support further analysis.	A32.29VV
52717	Gladden, Britain	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Hannah Gladwell	A32.3A; A32.3F
43435	Glaittli, Candice	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Candice Glaittli	A32.3A; A32.3F
39897	Glander, Sarah	Please protect our beautiful canyon and honor the roadless area. Even though the gondola is not a motor vehicle it is still a means of transportation that will compromise the integrity of the land. Please let's figure out a cheaper and less invasive alternative ?	A32.29VV
45170	Glander, Sarah	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola	A32.3A; A32.3F

		<p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Raquel Goldrup</p>

39349	Gomez, Steve	<p>I moved to Cottonwood Heights 29 years ago to be closer to ski resorts, less traffic, and safer living area at an affordable price. The various EIS proposals need to be most focused on not changing the landscape of the mountains i/we've lived with all our lives. Gondola's are not the answer short of long-term. Unless you profit from this change, it's not worth it for those of us that pay taxes and are not financially benefiting from the expense associated with Gondola's. Buses, electric buses should be the only option(s) to consider to address a commuting problem that peaks during and only within a specific time frame in winter. While I understand the need for safety, and to help out-of-state visitors needs during this time, I find it ridiculous to consider Gondola's and the expensive associated with any of the Gondola options. Changing our landscape, the image of Utah Mountain range to add Gondola poles, wires, etc is a mistake that can never be undone. If the lines for commuting to skiing are to long, my suggestion is that locals, and out-of-towners look for other options in Utah, and elsewhere that may better suit thier needs.</p>	A32.29VV

40259	Gooding, Judith	As an Alta and Snowbird skier and passholder I am opposed to the gondola. I will only serve these two areas and not any of the trail heads, climbing areas or back country access points. Residents who have never gone up the canyon, who have never skied will have to pay for it in their taxes. It will just move the congestion point to the parking garage. Local politicians are a financial force that would benefit greatly from the Gondola. For it to be built wilderness land would have to be reclassified for the development. It would disrupt wildlife and it would be an eyesore.	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>Thank you for one more opportunity to address the transportation issues facing Little Cottonwood Canyon and the Salt Lake Valley. The Wasatch Mountain Club, with over 1200 members currently, has been recreating in LCC for over a century. We have a special interest in the canyons of the Wasatch and preserving their beauty and recreation opportunities for future generations.</p> <p>Throughout this project, the WMC has advocated for a more robust scope for this EIS analysis and specifically more analysis of the visual impacts of the proposed alternatives. For the reasons outlined below, we feel the gondola alternative cannot be exempt from the Roadless Area Conservation Rule.</p> <p>UDOT needs to do a much better job addressing various components of the 2001 Roadless Rule. The WMC agrees with the various parts of the Roadless Rule highlighted below.</p> <p>Adoption and implementation of this rule ensures that inventoried roadless areas will be managed in a manner that sustains their values now and for future generations. Care must be taken to preserve inventoried roadless areas and their ecological characteristics and social values which could be incrementally reduced through road construction and other development</p> <p>We cannot allow intrusions into inventoried roadless areas like those contained in UDOT FEIS because of the reasons below. And also, because these reductions could accumulate into a substantial loss of quality and quantity of roadless area values and characteristics over time.</p> <p>The Roadless Rule defines resources and features that characterize inventoried roadless areas, including “Natural appearing landscapes with high scenic quality. High quality scenery, especially scenery with natural-appearing landscapes, is a primary reason that people choose to recreate. In addition, quality scenery contributes directly to real estate values in nearby communities and residential areas.”</p> <p>Inventoried roadless areas comprise only 2% of the land base in the continental United States. They are, however, disproportionately important to the small percentage of the land base they occupy. Inventoried roadless areas provide clean drinking water and function as biological strongholds for populations of threatened and endangered species. They provide large, relatively undisturbed landscapes that are important to biological diversity and the long-term survival of many at risk species. Inventoried roadless areas provide opportunities for dispersed outdoor recreation, opportunities that diminish as open space and natural settings are developed elsewhere.</p> <p>The Roadless Rule discusses “Prohibition on road construction and road reconstruction in inventoried roadless areas” and lists exceptions to this prohibition. None of these exceptions would allow the construction of roads for the gondola or other development within the inventoried roadless areas in LCC.</p> <p>The Forest Service, not UDOT, has the authority and responsibility to make decisions regarding protection and management of inventoried roadless areas pursuant to this prohibition. Forest Service officials have the responsibility to consider the “whole picture”. Based on specifics contained in the Roadless Area Conservation Rule, they should reject a gondola exception.</p> <p>Throughout this project, and now in this Supplemental Report in particular, UDOT has totally misrepresented the level of effect of the gondolas and towers. In this Report, they state there would only be a “moderate” level of visual impact from project elements, such as the gondola tower and tower pad to the Inventoried Roadless Areas. They admit “the gondola alternative would introduce form, line, color, texture, or scale not common in the landscape and would be visually prominent in the landscape”. They go on to say that “Some visitors could, however, experience a negative visual impact due to the presence of the gondola infrastructure”.</p> <p>We have been telling UDOT that the visual impact from the gondola alternative would be much more significant than moderate! The WMC believes it is important to maintain the visual quality of the viewshed contained in Little Cottonwood Canyon. Throughout this EIS process the WMC has addressed the need for, and the deficiencies in UDOT’s attempt to do visual quality analysis. We have continuously asked UDOT to conduct GIS line-of-sight analysis on the gondola components and all of Little Cottonwood Canyon. They refuse to do so.</p> <p>Previously, in UDOT’s words, visitor’s views along the highway “would be dominated by gondola infrastructure, and the visitor experience would be degraded”. The impact to the landscape would be, by UDOT’S own definition, high. High meaning the “landscape would be severely altered, and project elements would dominate the visual setting” changing the aesthetics and character of LCC forever.</p> <p>The proposed gondola will have a tremendous negative visual impact on Inventoried Roadless Areas. UDOT ignores the deleterious impact of gondolas to visual quality and loss of solitude in these areas. It is nonsense to believe that towers, cables and gondola cars running above or adjacent to these areas would have minimal impact?</p> <p>The WMC supports using buses in both the near-term and as a long-term solution. Buses could provide transportation to Little Cottonwood Canyon users all year around. In an increasingly developed landscape, large unfragmented tracts of land with minimal disturbance become more important. Because of the impacts identified above, the gondola alternative should not be selected and an exception to the Roadless Area Rule should not be granted.</p> <p>Thank you, Dennis Goreham</p>

41585	Grace Arndt, Mary	<p>I am absolutely against the construction of this gondola and the use of taxpayer dollars to do so. Taxpayer money belongs where it benefits the masses, not ski resorts. This is exploitation of the heart of the canyon. While the traffic is a problem, using taxpayer dollars is not the solution. Disrupting the natural order of the canyon is not the solution. The inevitable spending needed to maintain the gondola through events like another historic avalanche cycle like the one we've just seen is not worth the time, energy and money that this project will require. Absolutely no gondola.</p>	A32.29VV

		<p>Yeah we all know this gondola is completely outrageous and will forever destroy the beautiful scenic views of the canyons. I lived there for a year and spent every day in lcc and there is no need for this. Go to the bus system like Zion and create huge parking garages and shuttles to and from. Don't need this intrusive infrastructure</p> <p>Regards, Noah Grage</p>

40582	Grainger, David	<p>As a Utah voter, taxpayer and outdoor enthusiast/canyons user for over 40 years, I do not want gondola towers in protected roadless areas, opposing everything the 2001 Roadless Rule seeks to achieve. The proposed gondola directly violates the Roadless Rule and diminishes the very attributes that the Little Cottonwood Canyon area provides: clean water, diverse wildlife, migration corridors, breathtaking views, and endless recreation opportunities. This is not a commercial corridor solely for the ski resort exploitation (and that also benefit directly from adjacent Roadless Areas). This area must be strategically protected and carefully buffered against the local population of 1.5 million Wasatch citizens.</p> <p>UDOT claims to alter its analysis to consider the possibility of using higher emissions fuels like diesel (an archaic choice). Therefore, use of new and emerging electric buses with exclusive bus lanes and bus transit privileges in the canyon transit corridor should also be considered. UDOT should expand its analysis to account for sustainable fuel options that exist currently, and more accurately represent our nation's and most state's shifts toward cleaner energy and sustainability.</p> <p>Inventoried roadless areas (IRAs) such as those in Little Cottonwood possess unique social and ecological values, with features increasingly scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for individual self-renewal are qualities of Roadless Areas of personal high value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations as well as required habitat for many migrational species found in the Wasatch Front. The proposed gondola system places towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three current roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas, transgressing the intent and purpose of the 2001 Roadless Rule.</p> <p>Building gondola towers and associated destruction in Roadless Areas will greatly impact over 1,200 different plants and animals. Where in the UDOT planning is the on-going permanent and pre-eminent assurance to protect the flora and fauna and diverse animal habitats? The "Purpose and Need" of UDOT's preferred alternative of the gondola does not provision shared habitat by building into Roadless Areas. This violates the spirit of everything that Little Cottonwood represents except the blatant commercial profiteering driving the gondola proposal.</p> <p>As a Utah citizen, avid user, taxpayer and voter, I cannot support a proposal that compromises "Roadless Areas". I feel violated in allowing my taxes to support a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule and the willful ruination of this valuable, unique wilderness resource without fully exploring more sustainable alternatives.</p> <p>Dave Grainger Salt Lake City, UT</p>	A32.3A; A32.3F; A32.10G

40204	Grainger, Holly	<p>I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p> <p>In addition to the above, the gondola would only serve the two ski areas. Other popular stops are not considered. Why is this the burden of all tax payers?</p> <p>The vast majority of the public do not want a gondola in Little Cottonwood. The bus solutions are far superior and need better support. A shortage of bus drivers and funding is where attention should be focused.</p>	A32.29VV

41133	Grant, Leslie	I believe that UDOT narrow interpretation of the gondola pad not violating the wilderness roadless rules violates the spirit if not the letter of the law. This interpretation opens the door to the possibility that roads or similar access system will need to built in these areas to ease maintenance of the pads and towers. UDOT needs to reassess their approach to interpretation of the roadless rules and reject the gondola project.	A32.3A; A32.3H

39504	Green, Jess	<p>I have long respected UDOT as an agency that does the best for Utah residents and communities; however the agency's continuous hard push on a gondola alternative that serves only a small portion of LCC users, prioritizing private businesses over the many residents and governments of cities in and around LCC, is shining a very negative light on UDOT's otherwise good name. I can say it no better than James Becker's recent opinion article.</p> <p>https://www.google.com/url?sa=t&source=web&rct=j&url=https://www.deseret.com/opinion/2023/3/18/23641791/opinion-gondola-would-destroy-little-cottonwood-canyon&ved=2ahUKEwi6jLzPyyX9AhXuLEQIHcrYDRQQFnoECBQQAQ&usq=AOvVaw0j018uAYxxZbBE8PkszdOv</p> <p>Please read and seriously consider it's insights, as it speaks an overwhelming number of local residents who are currently impacted by LCC traffic and anticipate being quite negatively impacted by the proposed gondola alternatives. And please do not move forward with a gondola alternative in LCC.</p>	A32.29VV

		<p>climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Natalie Green</p>	
48813	Green, Nicole	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 39361	Griffen, Pete	<p>The enforcement of no parking on 9400 S. and rerouting to Wasatch Boulevard is working very well, during road closures and afterwards.</p> <p>Local residential traffic is able to move about freely.</p> <p>Expand this enforcement and rerouting to Wasatch Boulevard between BCC and LCC.</p> <p>Snowbird and Alta must restrict parking through parking fees, and reservations.</p> <p>UTA should increase bussing during peak periods. They should receive priority and move to the front of the line.</p> <p>A gondola, nor widening the road is not the solution.</p> <p>Pete Griffen</p> <p>Sandy</p>	A32.29VV
42381	Griffeth, Lauren	<p>Good evening. I am writing to strongly oppose this proposed Gondola B development. If UDOT is truly going to proceed with this plan, it will be a clear demonstration of the profits and convenience of a few having more influence than the will of the people who live here. It is beyond disappointing to witness UDOT seriously consider spending such an absurd amount of tax-payer money- between \$391 million to more than \$1 billion- on a completely unnecessary project. We do not want to pay for this atrocity and we do not want to live with it. There are many other viable solutions that utilize existing infrastructure. It is much easier and more cost-effective to expand public transit and hire additional bus drivers at a livable wage than it is to decimate one of our most beautiful and appealing natural features. I understand that it may sound appealing to have the world's longest gondola, but the reality of that situation is an expensive, ugly, dirty, development causing environmental harm and worsening the valley's already terrible air. People in Utah are proven by quality scientific research to lose literal years of their lives, suffer more miscarriages and mental health troubles, and many, many other truly horrible consequences as a result of our air quality. How could you seriously consider developing such a wasteful project in our current situation? We live in a geographical area that regularly and reliably experiences inversions and we cannot continue to emit more pollution here. Please, people are suffering and we don't want this project. It would only serve a small number of people during only a portion of the year, but its consequences will never go away. The construction process itself would be highly polluting, but the ongoing operation of this gondola would continue to pollute and cause harm as well. Please do not move forward with this project. Thank you.</p>	A32.29VV

40938	Griffin, Gray	I just learned of another of the many downsides of installing a gondola up LCC. It would require ground based angle stations for redirecting the gondola on curves as it travels through the canyon. Apparently multiple angle stations are required and can ONLY be placed on the canyon floor (not elevated). There in lies the problem. Many of the planned angle stations are to be placed right on historic avalanche pathways. Obviously, as witnessed by the multitude of avalanches that occurred during the past winter, this would be highly problematic to this particular infrastructure. This is only one of the many downsides of a gondola installation. Other major downsides include: exorbitant cost, not stopping at trail heads, long travel times, major eye sore, and a plethora of environmental impact issues. Bad idea all away around. I believe electric busses/shuttles and access fees, especially for single passenger vehicles are much better solutions. Thank you.	A32.29VV

As much as I love going up to Alta and Snowbird (and backcountry!!!!) I cannot condone a gondola that only benefits private entities and destroys our land even further. Let's put our heads together and figure out ALL of the options before deciding. I know you'll say you've already done this but let's go back to the drawing board and actually figure it out.</p> <p>Regards, Kalen Griffin</p>

		<p>locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>It's shameful and embarrassing that this project has even gotten this far in its stages given the public outcry and opposition. It feels like government and legislative corruption are driving this project forward.</p> <p>To support such an expensive tax payer-funded project that would only serve those who want to frequent ski resorts in the winter (an already exclusive and classist sport - I say that as a skier) is ridiculous. To say that the gondola is about safety for weather conditions and avalanches on the roads is [REDACTED] given it won't be run during active avalanche mitigation. And to say it'll reduce traffic congestion is ridiculous given we don't have actual research that it WILL reduce traffic congestion — and that's only in the winter. A more permanent, sustainable solution is carpool incentives or better bus systems. UDOT reduced bus services and LCC routes this year, and I also can't help but think that was an effort to make the gondola look like a more favorable option. But increased bus services and perhaps a dedicated bus lane is SO MUCH better than the gondola operation. That's what the public wants. And if the gondola moves forward the city is just flagrantly ignoring what it's residents are asking for and going ahead with a project based on profit for the few.</p>	
39503	Grigsby, Trudy	I think the gondola is the only viable option.	A32.29VV

40201	Gross, Benjamin	<p>Rather than degrade an area of natural beauty with cable towers, require the owners of Alta and Snowbird to build sufficient parking and traffic control mechanisms to permit the orderly absorption of pass holders. The Gondola is a public lands boondoggle. Simpler solution is to expand and make more reliable public transportation and require the resorts to build additional parking.</p>	A32.29VV
55722	Gross, Elisabeth	<p>Good evening, I visit Utah to ski and yes the traffic in Little Cottonwood Canyon is not great. But putting a Gondola through roadless areas is not a viable option and sets precedent for further erosion of the roadless rules.</p> <p>A gondola only provides benefits for resort skiers and won't resolve the issue cost effectively. Charge a toll; make parking only by reservation; and/or increase bus options. Further, use electric buses and reduce emissions. You could even use the toll money to fund the electric buses.</p> <p>Yes the traffic isn't great. But as a tourist that goes resort skiing in Little Cottonwood Canyon, I'd rather reserve a spot in the parking lot, pay a toll, or ride the bus than to have it be slightly more convenient at the expense of the environment and locals that surround the resorts.</p> <p>Sincerely, Elisabeth Gross</p>	A32.3A

42315	Grover, Nathan	<p>I think a gondola is insufficient, especially for the usability and function that has been stated. UDOT needs to look at the long-term picture of getting the most people in the canyons year-round, and decrease the number of cars in the canyons, so more people can recreate, but have a minimal impact (at least as far as traffic, and cars and parking and accidents are concerned. They only scalable and systemic way of accomplishing that is with a train. And, with rail connections throughout the valley that will enable travelers to come from the valley to the tops of the canyons all by rail.</p>	A32.29VV

39791	Grudziak, Jo	I am strongly opposed to the gondola. It is an expensive and environmentally damaging project using taxpayer money to benefit 2 businesses. It does not address traffic issues reliably and harms the fragile canyons environment. It violates the Roadless Rule. Do not build.	A32.29VV
44415	Gruett, Gia	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Gia Gruett	A32.3A; A32.3F
46416	Gruett, Luree	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 39794	Guidotti, Kevin	we need to think outside of the box and beyond current options which include a gondola and enhanced bus service. Why not consider an underground tunnel solution similar to what the boring company is doing in Las Vegas. It represents the most environmentally and cost effective solution. Additionally, one could include a tunnel from park city that would eliminate the need for park city residents to drive an hour to get to alta. As a park city resident, this would be a game changer. I'm happy to discuss this option in further detail.	A32.29VV
40287	GUIDRY, DAVID	The gondola is not a real solution. It is not equitable and only drives business for the resorts. Ski Trains have been used and proven effective across the world. This is the direction we need to go.	A32.29VV
51637	Guilfoyle, Tory	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 42194	Gustavson, Ph.D., Lisa	<p>For Seniors and non-ski-ers, the trip up the Canyon IS the "destination." It's not about reaching the ski slopes for us. It's about the drive. If the road is widened -- well, for those of us for whom the beauty of the drive IS the destination -- the whole thing will be ruined. We don't drive up the Canyon to get to a resort. We drive up the Canyon because the drive is so lovely. Please don't let that be ruined.</p> <p>Just think about how Parley's Canyon was destroyed.</p> <p>I'm nearly 70 y.o. and I remember the old Parley's.</p> <p>The analogy is powerful vis a vis what a road-widening disaster might look like in Little Cottonwood.</p>	A32.29VV
55432	Gustavson, Steve	<p>I oppose the gondola for many reasons. But, mainly, it will forever change the Utah treasure, Little Cottonwood Canyon. May I suggest you read Steve Camp's op-ed in SL Tribune, Sun. April 16, 2023, page B5. I agree totally with his comments & suggestions. I am sure I am not alone in supporting him. Please take the time to read his well expressed views. Thank you for the opportunity to share our concerns.</p> <p>Chris Gustavson [REDACTED]</p> <p>Sent from my iPad</p>	A32.29VV

39936	Gutmann, Marla	<p>I am vehemently opposed to building a Gondola in Little Cottonwood Canyon. I understand that the skier traffic needs to be alleviated, but building a publicly funded gondola which only serves a tiny population of wealthy skiers is not the solution. This would forever change the landscape and natural environment of LCC. I am in favor of building much more parking at the bottom of the canyon. I believe more busses and mandatory bussing to the ski resorts is the answer, since their customers are causing most of the congestion. I would like the state to hold themselves accountable for cutting the bus system this year, as it made the congestion worse. I am an avid outdoorswoman and frequent LCC often. Please save the beauty of LCC for future generations.</p>	A32.29VV

42065	H Madsen, Julie	<p>Building the gondola is not something that once done can be undone. It will always be there. Any views of little cottonwood canyon in the future will include a gondola. It feels extreme and a bit absurd to jump from zero attempt at a solution (reduced bus service 22-23 ski season, no road toll, etc) to a permanent structure that will mar the landscape forever.</p> <p>Why can't we try a toll in conjunction with increased bus service before jumping to this massive undertaking that will only serve to increase crowding and lift sales at our two ski resorts?</p>	A32.3I

Although mountain traffic is a problem in ski season, there is also a wealth of summer activities and tourism that are dependent on appreciation of undeveloped land and connection with nature in its original form. Untouched mountain scenery is becoming so rare, it's important we leave some nature unaltered to respect the environment and its ecosystems and to leave open spaces for our generations and children and their future generations to explore.</p> <p>Regards, Molly Haar</p>	A32.3A; A32.3F

39483	Hacon, Christopher	<p>This is a truly irresponsible approach. Just introduce a reservation system and it is solved for almost no money (you can charge a fee and make a huge profit). Everyone will be happier and you won't spend an immense amount of money, destroy nature, make hikers, climbers, mountain bikers etc angry. The current approach is madness; the only interpretation is that someone is cashing in, and it isn't the average SL county resident! I hope that lawsuits will follow!</p>	A32.29VV
42240	Hadden, Connie	<p>I recommend the enhanced bus service with no widening of the road alternative. This alternative has the least impact on the land, including zero climbing boulders being removed (page 64). Less impact on the land, the animals, the vegetation and the beauty of the mountains. The air quality analysis assumes that all ski buses are powered by diesel fuel. This assumption doesn't account for probable new developments during the 30 years considered, including development of electric vehicles that could significantly improve air quality. This</p>	A32.10G

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>alternative also has an initial projected capital cost of at least \$155 million dollars less than any other alternative. The best choice in my opinion is enhanced bus service with no widening of the road: less impact, less cost and with future use of electric buses, less impact on air quality.</p>

56053	Hailstones, Rebecca	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Don't ruin the beauty that we have! Let's keep it free of machinery so the future generations can also enjoy the nature. Let there be traffic. It makes the slopes less crowded anyways.</p> <p>Regards, Rebecca Hailstones</p>	A32.3A; A32.3F

41427	Hale, Lindsey	<p>Hello all-</p> <p>My biggest concern is that these mountains can't handle the increase in human use. Putting in more ways to get there will increase usage.....and all maintenance roads put in for a gondola will just be more access points for hikers, bikers, etc. These mountains are relatively small and cannot support the increase in human use. Unless you are going to shut down the road completely (like zions), then please don't increase ways for us to infiltrate these areas.</p>	A32.29VV

		locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Olivia Hales	
39854	Haley, Andy	LCC does not need a gondola, the gondola would directly violate the Roadless Rule and negatively impact wilderness areas. The project should be prohibited to protect these areas from construction. White Pine and portions of Twin Peaks and Lone Peak are already designated as Inventoried Roadless Areas (IRA). Building a gondola in LCC would directly violate the 2001 Roadless Area Conservation Rule (RACR) and undercut its authority.	A32.3A; A32.3F

54901	Hall, Emily	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Emily Hall</p>	A32.3A; A32.3F
41387	Hall, Erica	<p>To whom it may concern,</p> <p>I am a concerned Utah resident and oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40027	Hall, Marcus	By far the best way to transport people up and down BOTH Cottonwood canyons is electric buses, which have low impact and high flexibility. The extra money saved could be used to build key snow sheds over the main slide paths. Finally, a toll should be placed on all users of the canyon in the form of a tax on ski tickets, amounting to about \$5 per ticket ... which would then help subsidize the transition to buses. and multi-story parking lots at the base of both canyons. Thank you.	A32.29VV
40304	Hall, Marcus	Please STOP the Little Cottonwood Gondola. Please use electric buses instead!	A32.29VV
41036	Hall, Megan	Don't ruin the beautiful canyon with an expensive gondola no one wants!!	A32.29VV
52007	Hall, Naomi	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 39366	Hall, PerryA	<p>The USFS Roadless Rule (both 2001, and 2003 updated) need to be upheld with regards to the gondola.</p> <p>Roadless areas protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas. These places need to be protected!</p> <p>please uphold the roadless rule and determine a different alternative over the gondola.</p>	A32.3A

40234	Halpin, Jake	<p>Hello,</p> <p>Thank you for taking the time to read my short comment. I know this is no easy task coming up with a solution to this issue. I am a CWH resident and have been experiencing the traffic first hand going to and from work. I believe something needs to be resolved, but do not agree with the gondola being that resolution. I would want my tax dollars spent on another option and based on the current other options would be substantially less than the gondola. I also still believe there would be lines and traffic going to the base of the gondola and would still have similar traffic issues. I also believe this is only an issue half of the year during the winter season. That is an expensive solution for half of the year. I would suggest a better bus system, having both lanes be only up or only down at certain times of the day, or other proposed options. I firmly believe in no gondola. Thank you for your time.</p>	A32.29VV
40238	Halpin, Sharon	<p>I am writing to express my concerns regarding the proposed gondola system in Little Cottonwood Canyon as a solution to the traffic issue in the area. While the idea of a gondola system may seem appealing, there are several reasons why this may not be a suitable solution to the problem.</p> <p>Firstly, the gondola system would only provide transportation to a limited number of people at a time. This would result in long wait times and overcrowding during peak periods, which could potentially cause safety concerns for passengers. Additionally, this would not address the issue of traffic congestion on the roads leading up to the gondola stations.</p> <p>Secondly, the gondola system would require a significant amount of construction, which would be both costly and time-consuming. This could also result in negative impacts on the environment and the natural beauty of the area.</p> <p>Thirdly, the gondola system would only be able to operate during specific weather conditions. This would make it an unreliable mode of transportation, especially during harsh winter conditions.</p> <p>Finally, the gondola system would be expensive to operate and maintain, which could potentially result in increased fees for passengers.</p> <p>Considering these factors, it is my opinion that a gondola system would not be a suitable solution to the traffic issue in Little Cottonwood Canyon. Instead, alternative solutions should be explored, such as improving public transportation systems, carpooling incentives, and road improvements.</p> <p>Thank you for considering my perspective on this matter.</p>	A32.29VV

40108	Hamblin, Brent	I do not support the construction of a gondola for Little Cottonwood. Very high cost, including ongoing maintenance, and altering how the canyon looks and affecting some climbing areas. The logistics of getting on the gondola to go skiing are convoluted and I believe this will deter a lot of people from wanting to take the gondola as opposed to driving. I prefer to see increased buses, and snow shelters for parts of the road in avalanche paths.	A32.29VV

39690	Hampshire, Steve	<p>While this year many people will point their fingers at why the Gondola is a good idea, it still is a short sided. The gondola only feed a very limited and minute grouping of people. Who when it really comes down to it are out of stater who complain about being closed out of the canyon on their week ski trip. Locals know this is part of Wasatch winters. we will wait for the next day.</p> <p>There is no service in the canyon to anything other than two corporate entities that are not contributing anything to this project. It is slightly ridiculous that we are spending tax payer dollars to support revenue for two groups who are doing just fine. People in monticello or Manilla dont want to pay for this, nor people in Wayne county.</p> <p>We are trading land that we will never get back for an amusement park ride. Leave our land alone, dont bill a thing on it.</p> <p>All of this coming from someone who grew up skiing at Alta in the 80's. The Gondola is not the right answer.</p>	A32.29VV

39328	Hanrahan, Jim	<p>I am a proponent of a phased-in approach, one that does not commit to a permanent solution (eg gondola) without first trying the bus alternative. Am concerned that families, in particular, will not appreciate all the logistics of loading, loading/unloading to bus, loading/unloading to gondola, etc with the kids and all the gear. Have we really explored what people would actually use (and at what cost and inconvenience?). Also think the trailhead stop issue might be solved with a separate "minivan" that would accommodate this traffic. I vote "go slow" and test what works before diving into an expensive, irreversible solution costing megabucks.</p>	A32.29VV

40371	Hansell, Warwick	NO GOLDOLA! Please increase bus routes or mandate carpooling just anything but a gondola. It doesnt matter how quickly or how many skiers you can get up the canyons. The resorts become more and more unsafe for users when they are packed with people. A goldola is not the environmentally conscience choice. Please do not move forward with the goldola plan.	A32.29VV
39715	Hansell, Warwick	<p>Hello and thank you for your time. 8 gondola towers, snow sheds, 2 angle stations, and vegetation removal would take place within Inventoried Roadless Areas that exist in Little Cottonwood Canyon. The Forest Plan prohibits road projects and recreation projects in these areas, and, as the EIS states, these projects are for highway purposes.</p> <p>The public comment period reads as though Wilderness Areas are expanding but, to the contrary, UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon.</p> <p>Roadless areas are protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas. These places need to be protected!</p> <p>Thank you, Warwick Hansell, Holladay Utah</p>	A32.3A; A32.3F

If traffic and cars really mattered instead of cutting bus routes. Creating better jobs for UDOT employees that will increase bussing productivity would be a better solution than a UDOT gondola. There are significant car usage and traffic issues with Big Cottonwood Canyon as well. If it was truly about UDOT making transportation more available for people and less cars where is Big Cottonwood Canyons proposed plan? This is injustice. There needs to be change in the solutions that promote low impact to the environment and are low cost solutions. This is not the time to buy into a gondola that will only service the ski areas as location stop. The hypocrisy within this entire proposal is ridiculous.</p> <p>Low-cost solutions both economically and environmentally are the only solutions that should be considered for Little Cottonwood Canyon.</p>	A32.3A; A32.3F

39342	Hansen, Barb	<p>All these solutions are meant to improve air quality and protect the wilderness areas BUT NONE OF THEM DO!! None of the solutions stop at trailheads or consider that the canyons are used for anything beyond skiing at the 2 resorts in the canyon. Until there is a solution that allows stops so people can "USE" the canyon in all sorts of ways year round this whole project has missed it mark. A plethora of canyon users use the rest of the canyon for other activities, hiking, climbing, picnicking, camping, photography, pleasant drives, spelunking, photography, etc. and NONE of those people needs have been addressed in any of these solutions! So they will continue to drive up the canyon, Not because they want to but because they have no other way to get where they are wanting to go in the canyon. These solutions have not resolved any problems they are just costing the people of Utah 100s of millions of dollars to have canyon users left driving the canyon to get where they want to go. Where will all the fare or toll money go? These solutions especially the solutions based out of La Caille are not only an attempt to line the pocket of the property owners by building this "base business structure" for LaCaille to profit from at the expense of Utah taxpayers but it DOES NOT Address the problem, AND causes irreparable damaging to wilderness area and the canyon. Instead of increasing public transportation that makes tops up the canyon to see if that helps BEFORE SPEND MILLIONS on other projects. Bus service has been reduced making the problem worse as if to "accentuate" the issue. The wilderness areas should be available to everyone not just those who can afford to buy their way in to enjoy it. UDOT should find real solutions that address use of the WHOLE canyon. Until you can SHOW that any of these solutions will actually reduce the traffic in the canyons and actually address the issues, NONE of them should be seriously considered.</p>	A32.29VV
55130	Hansen, Brady	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the</p>	A32.3A; A32.3F

39891	HANSEN, Carol	<p>The construction and maintenance of the gondola is in direct violation of the roadless rules for this wilderness area. NOBODY except the developers want this. The county council, Mauor of Alta, Mayor of SLC, etc. The resorts in Alta will all be negatively impacted. There is no consideration of the multiple users of the LCC, hikers, bikers, climbers, etc. There will be a huge amount of destruction of destruction of our precious wilderness areas to build the gondola. A vast majority of comments in the first round of comments were against the gondola. Let's stop a few rich developers from taking advantage of tax payers that will never even use it. Such a waste of money and pristine places!</p>	A32.29VV

41239	Hansen, Peter	I am firmly against a gondola built in Little Cottonwood Canyon. It seems it would only be useful only at peak times during the ski season in the morning and would only have a handful or riders the largest majority of the time. Tax payers money could be spent more wisely than fixing this very small seasonal problem.	A32.29VV

56039	Hanson, Bill	I am William Hanson. I have resided in Sandy, Utah, for over forty-five years, during which I have skied and hiked countless times in Little Cottonwood Canyon. I am well acquainted with its traffic patterns and its lovely and mostly pristine landscape. The following comments assume that the parts of Little Cottonwood Canyon that will be impacted by the construction and operation of a gondola are covered by the United Forest Service's 2001 Roadless Rule. It "establishes prohibitions on road construction, road reconstruction, and timber	A32.3A; A32.3F

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>harvesting on . . . inventoried roadless areas on National Forest System lands. The intent of the 2001 Roadless Rule is to provide lasting protection for inventoried roadless areas within the National Forest System in the context of multiple-use management."</p> <p>If, as the Snowbird Resort hopes, a gondola system will be built at Utah taxpayers' expense to carry skiers and others from Sandy (rumor has it that the Resort has already purchased land for that purpose near the La Calle Restaurant) to its Little Cottonwood Canyon ski resort, I am concerned the construction, placement, use and maintenance of those many tall gondola towers, concrete support pads, equipment and tools sheds, miles long transportation cables, and gondolas will not only mar the canyon's beauty and wilderness qualities, but will also violate the 2001 Roadless Rule. A gondola system and its many accouterments are just parts of an elevated road because, like the paved Little Cottonwood road, they will, if approved, transport people and commerce up and down the Canyon. Moreover, a gondola and its accoutrements will, in addition to being unsightly and destroying canyon vistas and vegetation, permanently and irreparably damage the Canyon because they will not, as the 2001 Forest Service Rule notes, "provide lasting protection for inventoried roadless areas within National Forest System in the context of multiple-use management." For those reasons, a gondola system should not be built in Little Cottonwood Canyon. Thanks for considering my concerns.</p>

42324	Hanson, Mark	<p>I AM NOT FOR THE GONDOLA PROJECT. This is a project that is going to line some rich peoples pockets and only benefit specific groups. This is not an equitable solution. It only benefits the ski resorts and the activities they profit from. This is so much more about businesses making money, than people being able to enjoy the outdoors where and how they want.</p>	A32.29VV
41573	Hanson, Matt	<p>Please do not permanently scar Little Cottonwood Canyon, which a gondola and road widening will do. A gondola is high cost and only benefits a couple of private businesses, and the vast majority of people being asked to pay for it will see no benefit. If Alta and Snowbird want a gondola, they should pay for it. A gondola is nothing short of theft of the people. Support for it is clearly being funded and lobbied by the businesses and people that stand to profit from it. Furthermore, a gondola will sit unused much of the year, and doesn't make any stops for users of the canyon not headed to the top. What if it needs to be closed for maintenance or can't run due to weather? A gondola only moves the congestion to the mouth of the canyon and it's adjacent neighborhoods instead of alleviating it. As a resident of Cottonwood Heights I do not want more cars blocking driveways and roads and trying to find places to park that don't exist. A gondola would be an unnatural eyesore in a beautiful natural canyon. The negative impacts a gondola would bring far outweigh any real (or imagined) positives. Balancing supply and demand with crowds in access-restricted places is not a new problem. Arches National Park recently started a reservation system. Zion National Park recently began a permit system for hiking Angel's Landing. The only viable solution is to limit an extremely large (and quickly growing) visitor demand for a destination (both top and bottom of canyon) that has a physical capacity limitation. As evidenced with proven precedent solutions, a permit system or appropriately priced toll or anything that restricts/limits cars will solve the problem, and may even generate revenue. There are also creative solutions that seem to be overlooked like allowing only bus traffic until a certain time of day, etc. In any case, please please please do not destroy the natural beauty of Little Cottonwood Canyon with permanent scars.</p>	A32.29VV
41666	Hanson, Nancy	<p>The gondola threatens 3 Inventoried Roadless Areas in LCC, significantly impacting and fragmenting it's character. It is preposterous to claim that all the infrastructure of an 8 mile gondola is not a "road", given it is for highway purposes in transporting skiers to Alta and Snowbird. A gondola is not consistent with the 2001 Roadless Rule, and would pollute the</p>	A32.3A; A32.3G; A32.3I

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>wilderness ecosystem and roadless character while offering no advantages to non-Alta/Snowbird users.</p> <p>The gondola is a horrible (and horribly expensive) plan that will result in a loss of the cherished undeveloped character of LCC that provides so much to SL county residents.</p> <p>In regard to air quality, please compare the impact of electric buses to diesel fueled buses.</p>

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Liana Hanz</p>	
55459	Hanza, Brigham	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 42204	Harrell, Janna	<p>Please protect Little Cottonwood Canyon and do not violate the Roadless Rule. I do not want gondola towers in protected areas as they will have a massive impact not only when they are constructed, but with ongoing maintenance. Roadless areas should be protected. They are scarce and their value only increases with time as there are fewer and fewer of them. We need to protect the flora and fauna and our water quality. If you build towers in the Roadless areas how will vegetation and animals be restored to the area? We do not need an incredibly expensive and impactful development in our precious canyon that benefits few people for little if any benefit. Why not promote electric buses which can be easily adjusted to run on demand? Why isn't this part of the consideration and analysis? I am a local Utah resident and I do not support a proposal that reduces acres classified as "roadless" let alone the taxes required to forever damage these precious areas. Do not build a gondola!</p>	A32.3A; A32.3F

41683	Harris, Liz	<p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p>	A32.3F
45348	Harris, Madeline	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Madeline Harris</p>	A32.3A; A32.3F
40968	Harris, Micki	<p>Dear UDOT-</p> <p>We can not be changing the laws that were set forth to protect our lands. Bending the rules so that we can certify the gondola is not an honest play and illegal. I see that you are claiming that the gondola is not a road, but you know very well that you have 22 towers that require 2 acres of cemented land and you will need a permanent access road paved to those towers. The gondola may fly high in the sky, but the base and the structures will not.</p> <p>Do not try to fit a round peg in a square hole. I felt that you already justified that with your scope on the EIS being so narrowed to fit your narrative. Now, you're not considering electric busses? I ask that if you're going to be selective and pick and choose that you do it honestly and fairly.</p> <p>Micki Harris</p> <p>Save Not Pave</p>	A32.3G; A32.3H; A32.10G

		<p>Regards, Ryan harris</p>	
40385	Harris, Sidney	<p>The proposed gondola would require construction on 3 different designated roadless areas. Even if the gondola system is not defined as a road, it would be built for highway purposes and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan. The gondola would be a terrible misinterpretation of the Roadless Rule to suggest that an 8 mile gondola system is exempt from that designation's protections simply due to the amount of environmental impact from its 10 year construction (watershed views, dispersed recreation, timber, vegetation, habitat) Our watershed is so important as the cottonwood canyons contribute 60% of the valley's water. This construction would create so much harm to the protected watershed. I am grateful that UDOT recognized this initial oversight and put in the time to consider the implications of building a system like the gondola on protected land like this, and hope that the learnings will lead them to less destructive solutions like enhancing/expanding an electric bus system on the road systems we already have in both Big and Little Cottonwood Canyon.</p>	A32.3G

39570	Hart, Allhyn	<p>The gondola will destroy Alta as we know it. It will not make the road safer and will encourage more congestion on the slopes, in parking lots, in the canyon. There has to be a limit on the # of people in the canyon. Anything wild needs protection. If all we can do is limit the # of people in the canyon at any one time, that is what should happen. To allow any traffic on 210 in winter is dangerous. Build adequate snow sheds. Don't keep up the "more is better" thinking.</p>	A32.29VV
50993	Hart, Ethan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Ethan Hart</p>	A32.3A; A32.3F
56339	Hart, Hannah	<p>To whom it may concern,</p> <p>I'm writing to express my disapproval of the Little Cottonwood Canyon Gondola project. Please consider investing that money into the bus system instead! It seems a more robust public transit system would achieve the same goals of the gondola, with much less impact.</p> <p>I'm concerned about the permanency of this project. The potential for it to affect the watershed and the plethora of outdoor activities and sports that take place there seems to outweigh getting people up the canyon to ski the resorts.</p> <p>Both people who support and oppose the gondola want to preserve our canyons and make them more accessible. Still, it's hard to see the good intention of the gondola. As an SLC resident, it appears much more like a money grab than it does a way to help the environment. The impact of the gondola will be irreversible while other solutions have yet to be invested in. Imagine if well over a billion dollars was targeted at other solutions.</p> <p>It's concerned that the project is trying to find loop holes in rules that were written to protect the environment. Much of that land is classified as "Roadless" and should remain untouched by construction.</p> <p>Thank you for your time, and please consider alternatives to the gondola.</p>	A32.3A

40913	Hatch, Stacey	I was extremely disappointed to hear about UDOT's proposal to build the "world's largest gondola" up Cottonwood Canyon. Based on what I've researched, the Gondola seeks to solve a traffic and pollution problem, without considering the true needs of the community. Tax payer dollars should go towards transportation solutions that benefit all residents. I would urge UDOT to consider other options - better public transport options, carpooling incentives, and EV alternatives before spending countless years, and \$500 million in tax pay dollars, to build infrastructure that only supports skiers. As someone not even originally from Utah, I would hate to see the beauty I've come to love disturbed for the building of a gondola. Though well intentioned, this proposal truly doesn't serve the community.	A32.29VV

49955	Hathcock, Sean	<p>To whom it may concern,</p> <p>This is a highly contested plan that will use working class tax dollars (who is the majority) to fund a project that will go to enriching the very few. I believe this project is not mechanically sound, and is based on business theory and monetary gain more than anything. This project does not bring a community together, it will further divide the rich from the poor and ultimately reduce access to an already overly commoditized canyon. Nature is for everyone, but increasingly, certain "people" think they own the rights to this access.</p> <p>I believe there are plenty more viable options such as, avy tunnels, electric busses (that only run in canyons), and more importantly as powder mountain has effectively demonstrated...reducing and limiting ticket sales accordingly. It seems the greed for money and neglect of the community are the driving forces in the perpetuation of the gondola. Why can't we vote on this?</p>	A32.29VV

		<p>As an outdoor enthusiast and frequent wilderness visitor, I can see the true reality of nature. We are just playing games with the only resources we have, and this needs to stop. As a people, we need to respect the few remaining expanses we have even if it comes at a financial loss. Money is fake, nature is real and its one of the only things that can connect us to our mortality in an ever more detached society.</p> <p>Please dont destroy our canyon, we love it more than any business ever could. Id rather reduce my visits than see the beauty of eternity commoditized into another american shopping mall.</p> <p>Regards, Sean Hathcock</p>

40971	Hauser, Susi	Once again I am submitting a comment opposed to the gondola in Little Cottonwood Canyon. Apparently, the vast majority of comments are opposed to the gondola; however, in spite of this, UDOT picked this option as the preferred option. It is frustrating and yet I keep hoping that the outcome will change; hence, one more comment.	A32.29VV

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Grayson Hawkes</p>	A32.3A; A32.3F

40902	Haws, Acacia	<p>Locals Utahans don't want a gondola. We don't want to pay that much money for improved access to a couple ski resorts. The gondola would hope to improve accessibility from the road as a by-product of its construction, which I wouldn't take as a given with Utah's rate of growth; instead, Utahans would rather the improved accessibility be the primary problem addressed by the proposed solution. The gondola, if built, will be a massive, ludicrously expensive monument to a fraction of Utah's many recreational communities while simultaneously scarring some of Utah's most popular views. Public money must go to the public, long-term good. Shuttles and buses maximize public benefit while minimizing the footprint of new construction on wild land.</p>	A32.29VV

Please do not take this light, we as a community should actively be trying to save these areas, not build to build a supposedly "better" community when destruction is inevitable. Especially when the road will go through an area that is close to many citizens, and activities. We plead with you, do not let us go unheard!</p> <p>Regards, McKaye Haws</p>
