		<p>water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>

42341	Keyser, Donald	<p>The gondola plan is inefficient and wasteful of taxpayer funds. The proper solution is simple: put in avalanche slide sheds over the road where the slide paths are. These increase the safety factor and are environmentally positive. Meanwhile, bus environmental technology will see increasing improvements over time (hydrogen or electric power) and likely to do so before a gondola was installed and operational. As a final comment, the gondola project reflects the corrupt culture that permeates Utah's State House - using their Offices and subsequent connections to enrich themselves at the expense of their constituents. Disgraceful and Shameless.</p>	A32.29VV

		<p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation’s increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch’s most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won’t be pushed out of their habitat? Does the “Purpose and Need” of UDOT’s preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as “Roadless”, let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	
46004	Khosti, Madd	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as “Roadless,” let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Madd Khosti</p>	A32.3A; A32.3F

55772	Kidd, Matthew	<p>To whom it may concern,</p> <p>I've skied the Cottonwood Canyons for 30 years. Nonetheless I think the Little Cottonwood Canyon Gondola project is a very bad idea. The gondola will be an everlasting eyesore in the canyon, a great destruction to the natural beauty of the canyon, not just for skiers but also for hikers, climbers, cyclists, and all others who enjoy the canyon.</p> <p>Though buses are the "boring" solution, I think they remain the best solution to canyon congestion. I have taken the ski bus many times and found the experience</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>to be reasonable. If buses ran every 15 minutes, as they did during the pandemic, instead of every half hour, and bus service from downtown SLC to LCC were restored, we would be well on the way to addressing the problem. This may require increasing the fare a dollar or two or bumping the cost of the Ikon pass a few dollars but the ski community can easily bear this cost.</p> <p>Aesthetic reasons aside, I am concerned about the cost of the proposed tram. It is expensive as proposed and history has shown that cost overruns are common on "one-off" projects of this type. As a Utah taxpayer, I do not want to be stuck with an expense that should be borne by the skiing community.</p> <p>Regards, Matthew Kidd</p>

47653	Kim, Hannah	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Hannah Kim</p>	A32.3A; A32.3F

43281	Kimball, Eli	<p>To whom it may concern,</p> <p>As a resident of Holladay City and a frequent visitor of our beautiful canyons I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>Even IF the gondola reduces road traffic in the canyon (which let's be honest it won't) it will be too high a price to pay to shave 10-20 minutes off the commute. And with the proposed price per ticket to ride the gondola, chances are, only a select few will use it, rendering a 1.4 billion installation not only an eyesore but also useless to 90% of canyon goers. I, and many taxpayers around me condemn such use of our tax dollars. We all know that this gondola is not meant to improve the lives of local residents, but rather to attract more tourists to the state. (As if there aren't enough already)</p> <p>Regards, Eli Kimball</p>	A32.3A; A32.3F

43906	King, Margaret	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area along with a plethora of other uses in the canyon.</p> <p>The gondola is solely for the use of making money for Snowbird and Alta ski areas during their ski seasons and therefore is not in the best interest of the majority of salt lake residents. Skiing is notoriously terrible for the environment and an industry that cuts a huge amount of people out if it's inclusion, purely through the high cost.</p> <p>The gondola is therefore directly or indirectly contributing to gentrification, racism, anti-about everyone except middle to upper class, white, abled, cis gendered, straight, and in general, male population which does not reflect the greater population of Salt Lake City.</p> <p>Maybe the resources being put towards a gondola would be better put towards the environmental catastrophe that is the air quality and great salt lake? You want to make a difference udot? Please put your efforts towards actual clean public transportation for the greater salt lake population.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Margaret King</p>	A32.3A; A32.3F

41565	Kinosian, Sylvia	<p>I am very concerned about the additional reports about the proposed gondola in Little Cottonwood Canyon.</p> <p>The first report addresses the fact that the gondola would be built within three federally protected Roadless Areas (Twin Peaks, Lone Peak, and White Pine roadless areas). Road construction is typically prohibited in these areas to protect air, water, wildlife, and recreation opportunities. The gondola should not qualify as an exception. Part of what makes Salt Lake City such a great place to live, visit, and recreate are these wilderness areas. This incredible terrain should not be compromised by a large project such as the gondola. It would severely alter the ecosystem and visitor experience in Little Cottonwood Canyon, and ultimately the rest of the Wasatch. We would see tourism year-round suffer because of this, as well as the quality of recreation provided to residents.</p> <p>I also am concerned that in the second new report, in which all buses in the canyon are assumed to be diesel powered. If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't UDOT also assess the impact of electric buses? We need to consider greener options for public transport. I think an improved bus system could be great for the Cottonwoods, but we need to look to the future to see what our best options really are for the long term.</p>	A32.3A; A32.3F; A32.10G; A32.3I
39702	Kinsey, Genevieve	<p>Having followed the reports, public meetings, and updates regarding the proposed gondola in LCC I remain OPPOSED. Who the gondola benefits is limited mainly to skiers and private ski resorts. The use for the gondola is limited mainly to winter needs related to avalanche control and winter road closures in the canyon. The impact to protected roadless wilderness areas would not merit the limited benefit. Hikers and those seeking recreation opportunities in lower parts of the canyon will still need to use the road. As a frequent skier in</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		LCC I have observed that other means of traffic control in winter (expanded bus service, ride sharing, enforcement of track toon laws, and parking reservations on weekends) have already improved travel in the canyon.

41686	Kleinschmit, Kristi	<p>Please do not ruin Little Cottonwood Canyon by installing a gondola. There are always complications for such big projects, and I don't believe that the construction to build these towers will have low impact to wildlife and watershed.</p> <p>Additionally, the fact that this gondola is just serving a ski resort, yet will forever ruin the views and landscape in that Canyon is unacceptable. Finally, I am frustrated that UDOT really does not seem to be taking comments seriously, as they have been majority against this gondola in our wilderness area and yet UDOT proceeds to plan a gondola. UDOT does not own that canyon. The wilderness is not theirs to destroy.</p>	A32.29VV

42355	klepper, scott	<p>I stand with the City of Cottonwood Heights in being strongly against the gondola project and its 22 towers, five of which encroach on the "Roadless" designation within LCC. Each tower base will significantly disrupt and degrade the natural habitat for living creatures, flora and fauna but will also degrade the aesthetic and recreational experience for all canyon users. To be "roadless" is to infer that the area be kept natural. Towers for the purpose of transportation should fall within the category of a "road facility". I'd like to see UDOT's screening which measures polluting effect be based on non-diesel (electric or natural gas) buses, which is the transit of the future, when comparing the gondola to bus service. Right now UDOT FEIS is based on metrics utilizing diesel-only/14-year-old buses. By the time the gondola would be built, closer to 2050, with all the federal incentives for non-polluting transit, electric buses will be even more technologically advanced than they are now. Proterra bus manufacturer has proved electric bus worthiness for steep canyon highways in recent years. Further, UDOT's entire plan was based on an extremely light 1.89 passengers per vehicle, thereby skewing any conclusions it's drawn. If neither Alta nor Snowbird allows single skiers/boarders to take an entire chair built for 4 passengers, then why should UDOT allow single passenger vehicles up LCC on busy winter ski weekends? If it's good for the resort to maximize "chair occupancy" then it should be good for UDOT to do the same with "LCC per vehicle occupancy". Less than 2 people per vehicle is an embarrassment to a state that prides itself on tourism and the outdoors. Improving vehicle occupancy to 3.8 passengers per vehicle would halve the traffic in LCC. How can UDOT be so myopic to basic simple solutions? And offer up taxpayer dollars for what's clearly corporate welfare to 2 private for-profit corporations to the tune of \$500 million (which by now is at least a 4-5 year old quote, meaning the real cost of the Gondola project is in excess of \$1.25 billion). How about the state give me the savings between \$1.25 billion and what any reasonable person could do with a few extra buses during the winter and vehicle occupancy at or above 4 passengers per vehicle. Of all the ridiculous things that Utah leadership pushes on its citizenry the gondola project is one of the most absurd and craziest "solutions" imaginable.</p>	A32.3A; A32.3F; A32.3G

		<p>Whoever is reading this is probably not of our society's "youth" population. You will not have to face the effects of these new railroads and roadways and gondolas and such. Sure, you'll pay the taxes to fund it, but the longer-term effects in 10, 20, 30 years are not going to be your problem. They'll be ours. Mine.</p> <p>I'm sure you've already thought twice, but I ask you think once again about allowing this gondola to be built. Did you try all other practical solutions? If this is the only solution, is it really worth it? Or (excuse the language) can people just suck it up and deal with some traffic?</p> <p>Please reconsider.</p> <p>Now, without further ado, the generic email:</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 53292	Knaub, Nicole	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Nicole Knaub</p>	A32.3A; A32.3F
42412	Kneller, Pauline	<p>The construction of the Little Cottonwood Canyon gondola poses many environmental and transportation hazards, as well as not being a good solution to tackle the traffic problem in BOTH Cottonwood Canyons. The gondola towers built will affect roadless areas and the construction of the gondola would violate the Roadless Rule. Please switch your focus to buses and electric buses to more affordably move people up and down the canyon, as well as from the valley to the mouth of the canyon. Public buses will address the huge need for a transportation solution in the Cottonwoods while serving the Utah taxpayers by providing them with a service that they desperately need, while also not causing significant ecological damage. Please consider this request and the thousands of others to preserve the cottonwood canyons while still helping improve access to one of the most beautiful and magical places in our state. Thank you.</p>	A32.3A; A32.3F

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Knick Knickerbocker</p>	
40337	Knight, Chip	<p>LCC is one of the most beautiful places in the world. It needs to be protected for posterity and the benefit of future generations. The Ikon pass traffic of recent years must be curtailed, first and foremost, for the public interest. Adopting a transportation solution, at a public cost, for the benefit of the resorts at the top of the canyon would be woefully misguided public policy. Second, a bussing solution should be enacted that avoids visually damaging the natural beauty of the canyon.</p>	A32.29VV

39783	Koch, Nicholas	<p>Dear UDOT,</p> <p>Please fully consider the impact of the gondola construction to the Lone peak, White pine, Twin peaks Roadless areas. Failing to interpret the massive scale of construction that the gondola would impose on these areas is a narrow and pedantic interpretation of the Roadless Rule that administers these IRAs.</p> <p>Given that the consequences of building the gondola could affect thousands who depend on the watershed, a thoughtful and conservative approach is warranted in examining the impact of the current plan.</p> <p>Best, Nicholas Koch</p>	A32.3A; A32.3F

41655	Kody Dippo Fox Chair and Executive Director of FOA, Cassie	<p>To: Utah Department of Transportation Team Reviewing Little Cottonwood Canyon EIS</p> <p>From Cassie Dippo, Chair of Friends of Alta, KoRe:dy Fox, Executive Director of Friends of Alta.</p> <p>Re: UDOT has requested for a third time additional comments on the Little Cottonwood Canyon EIS (EIS). Specifically, UDOT is requesting specific comments as to the Roadless Area Conservation Rule (RACR) and at the direction of the Federal Highway Administration (FHA), a more complete analysis of air pollution and quality under the proposed EIS project.</p> <p>Date: April 17, 2023</p> <p>Not wanting to overburden the UDOT review process this letter from Friends of Alta (FOA) will focus only on the request from the FHA. For the record a similar organization to FOA, namely Save Our Canyons (SOC), will be filing a very complete analysis of the significant deficiencies by UDOT's EIS In regards to the RACR. FOA supports and concurs with the observations regarding the deficiencies of the UDOT,s EIS. Put another way, unless the deficiencies outlined by SOC are corrected before the Record Of Decision (ROD) is made there is a significant and actionable deficiency in the UDOT's EIS that will result in costly, timely and unnecessary litigation to correct the deficiencies of UDOT's EIS.</p> <p>UDOT'sEIS</p> <p>In regard to the FHA's request for more complete analysis of air pollution, FOA makes the following comments and observations:</p> <ol style="list-style-type: none"> 1. Salt Lake County and its land mass area is already under an EPA dictate to reduce its significant air pollution. Recognizing that this air pollution problem is created by several factors, for instance the Great Salt Lake is at its lowest elevation since records have been kept. This has created the potential for significant dust and toxic mineral air pollution. Deadly particles enhanced by the prevailing northwest winds, blowing into a relatively enclosed valley poses significant health risks to its 1.5 million residents. Salt Lake County has one of the highest incidents of airborne pollution illnesses in the country. Whether it is asthma or other breathing complications from the air pollution, it is not an acceptable policy decision to create additional air pollution, either with increased out of state visitation, or pollution from the coal fired electrical generators located and polluting throughout the State of Utah, the same generators which would be necessary to operate the proposed Gondola. 2. The most significant deficiency of UDOT's EIS is the use of only hydrocarbon fuels in evaluating the pollution generated by hydrocarbon fueled buses. Up until March 2022, UDOT categorically stated that electric buses could not ascend Utah Highway 210 up Little Cottonwood Canyon in a reliable manner. It was only after FOA and the Students for the Wasatch arranged for a ProTerra electrical bus to make the journey from the State Capitol via Utah Highway 210 to the end of the road, with passengers fully loaded in the electrical bus, that UDOT and the Utah Transportation Agency (UTA) acknowledged that an electrical bus could reliably ascend Highway 210. Yet, despite this, in their answer to the FHA inquiry, UDOT did not include an analysis of the pollution, or the absence thereof, by the use of electrical buses. This relevant and important comparison of electrical buses to buses fueled by hydrocarbon gives an inadequate and incomplete analysis. It is imperative that UDOT return to answering FHA's inquiry by providing a more complete and in depth analysis. 3. The Little Cottonwood Canyon drainage supplies more than 17% of the potable water for Salt Lake City and surrounding municipalities. FOA was created in 1981 with a not-for-profit mission to protect the history and environs of Alta and Little Cottonwood Canyon In the ensuing 43 years FOA has been involved in six different litigation matters, where developers or proponents of development were attempting to make Alta and its environs more developed and akin to Park City. FOA through considerable expense and time FOA, and its supporters, has been successful in five of the litigation matters. The one remaining one is, hopefully, in the process of settling with the environs of Alta and the Little Cottonwood Canyon drainage would not be irreparably impaired or harmed. Friends of Alta and its supporters are concerned that Alta and the Little Cottonwood's drainage could be irreparably harmed or impaired, not only by the construction of the Gondola, but by the huge increase in visitors that would result. Both the quality and quantity of potable water to Salt Lake Valley could be compromised in this backdoor attempt by gondola supporters to make Alta and its environs more developed and akin to another Park City. Should the proponents of the \$1.4 billion gondola succeed, the additional visitation rate of more than possibly 6000 visitors in a single day via the gondola would significantly impair both the quality and quantity of potable water to Salt Lake Valley. For a state agency, such as UDOT, working under delegated authority from the FHA, it is irresponsible and potentially illegal for UDOT to proceed on the EIS, without significant revisions and start overs in certain critical areas of needed EIS analysis. In too many ways, UDOT's process and attitude are similar to the problems with the Legacy Highway, which because of litigation UDOT to restart their original EIS process. One would hope that UDOT would learn from its past mistakes and restart the EIS process for Little Cottonwood Canyon. 4. Any project using federal taxpayer dollars must comply with both statutory and regulatory requirements. One such legal requirement is to do a thorough, in depth and complete analysis of any species, flora or fauna, that are protected. Under the Bald Eagle and Golden Eagle Protection Act. One such species, the Golden Eagle has been ignored. UDOT is purportedly relying on a letter from the U.S. Forest Service, stating categorically that there are no statutorily protected species in Little Cottonwood Canyon. In fact, a number of Golden Eagle nests have been located in the area purported to be or have been analyzed by the EIS, these nests significantly are located on the North side of Little Cottonwood Canyon, exactly parallel to the proposed 8 1/2 mile gondola. It is imperative that UDOT does further analysis of the potential impact on these particular birds and the significant protected flora 	A32.10G

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>located in and around the EIS area. Further, the needed additional analysis must be reviewed by a qualified biologist or expert independent of UDOT. Seeing Golden Eagles soaring in the airways above Little Cottonwood Canyon refutes UDOT's reliance on the Forest Service letter. UDOT must undertake a more complete analysis of the gondola project, as proposed, impact on federally unprotected flora and fauna species in and around the area subject to review under the UDOT Little Cottonwood Canyon EIS.</p> <p>FOA has been involved for 43 years in protecting Alta, its environs, it's watershed and the importance of Little Cottonwood Canyon. We respectfully ask that you take our concerns seriously and make revisions to the Little Cottonwood Canyon EIS.</p>

40379	Koester, Christopher	<p>I have been going up Little Cottonwood Canyon for the past 50 years, since my family moved into a home by the mouth of LCC. I have been recreating in the canyon for most of my life. I hike in the canyons at least once a week, every week, all year round. Installing the Gondola will do nothing to provide transportation for anyone recreating in the canyon, except skiers You are going to destroy all that is LCC simply because the owners of Snowbird and Alta believe it will benefit their corporations. I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities. The construction of towers in the canyon will cause irrefutable damage to the canyon ecosystem. There will be a need for access roads during construction and subsequent maintenance activity as well as in anticipation of emergency evacuation procedures. Please do not permanently scar Little Cottonwood Canyon. Once you do, there is no going back.</p>	A32.3A; A32.3F; A32.3I
55711	Koffman, Hannah	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40444	Kokeny, Gregory	<p>The few days that the gondola MAY be advantageous is not worth the hideous machinery that we will be forced to look at the other 350 other days during the year., Not to mention the base facilities and parking lot structures that will be part of our Wasatch front neighborhoods. In a recent ksl article it talked about a man who had a heart attack during interlodge who had to be brought down by helicopter. A gondola ride of 45 minutes is not going to save this man's life what another ridiculous argument! What are they going to find staffing to come in open up the gondola at 1:00 in the morning if someone's having a medical emergency? The lies just don't stop. Most the time winners road hazards the ski resorts aren't 100% open anyhow one or two chair lifts are not enough to spread skewers out. What kind of experience would that be? Why not just have tourists go to Park City on canyon closure days? They'll</p>	A32.29VV

39454	Komeyli, Barbara	The Roadless Rule boundaries MUST be upheld. Do not ignore this!	A32.29VV
41697	Komlos, Lori	As a Snowbird skier, I support the least impact to the road environment. Using Electric buses would be the least polluting to the air quality and get skiers to the resorts efficiently. Tolling should be implemented and eliminate single person drivers and encourage carpooling as an alternative. Offer Express busses to the resorts and other buses to stop at other stops for hikers, climbers and sightseers. These methods are implemented at other resorts so it works!! Building a gondola would violate the Roadless Act and damage the natural environment. I will take my turn to recreate to preserve this beautiful canyon. Thank you for your consideration!	A32.3A
42234	Komlos, Tim	Please do not build the proposed gondola system. It would impact the RACR to a far greater extent than the proposed improvements for snow shed and dedicated bus lanes.	A32.3A; A32.3F

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Annie Kopell</p>	A32.3A; A32.3F
41378	Kopke, Jodi	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 42334	Kovach, Daniel	I stand in firm opposition to the Gondola alternative. I have written comments before, but will now focus on the technology to be employed in the 2 current alternatives. Although the busing alternative needs to be improved (many more electric buses up both canyons, to drive more people into public transportation and out of cars), at least electric buses have shown through demonstrations to be a more technology-ready option for LCC. The gondola, if built, would be at least 2x the length of the current world record holding gondola. Where in the EIS plan is the technology development plan to ensure that a gondola of such length could even be built on schedule and budget? There is far too much financial/schedule/technology risk in the gondola option, and our beautiful canyon should NOT be a guinea pig for such a risky idea.	A32.10G
40976	Kovach, Leslie	As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.	A32.29VV
47326	Kovacsovics, Ines	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Ines Kovacsovics	A32.3A; A32.3F

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Kyle Kowalski</p>	A32.3A; A32.3F
39784	Kozisek, Chelsea	No gondola in LCC!	A32.29VV
40365	Kraan, Eric	<ol style="list-style-type: none"> 1. Inventoried Roadless Areas act as buffers for designated wilderness areas. Any incursion into these areas threatens the wilderness space. The narrow nature of this canyon means that the development of any infrastructure in the roadless areas will have a visual or residual impact on the wilderness experience as well as that in the inventoried roadless areas. Construction should not take place within Roadless Areas. 2. The community values the qualities of clean water, diverse wildlife, breathtaking views, and endless recreation opportunities that Little Cottonwood Canyon offers. The gondola would directly violate the Roadless Rule and negatively impact these very qualities that the community cherishes. 3. UDOT must expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy. 4. Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do. 5. Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored when we are building into Roadless Areas? 6. As a member of our community, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. 7. The construction of towers in the canyon will cause irrefutable damage to the canyon ecosystem. Helicopters will not be capable of foundation excavation as suggested by UDOT. There will be a need for access roads during construction and subsequent maintenance activity as well as in anticipation of emergency evacuation procedures. Research shows that wire rope systems are not infallible and there will come a time when evacuation will be required. 	A32.3A; A32.10G; A32.3H
42189	Kraan, Kimberly	UDOT, what can we say that has not already been said in your failure to ignore public opposition, and your agencies obligation to serve the greater public good, with your proposed EIS gondola solution?! Public is through with your antics and wasting substantial amounts of public funds on this matter. Your inaction to respond responsibly to public in this matter speaks volumes of your willingness to abuse public funding for private interest and developer pet projects.	A32.10G

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>Let's get right back to the basics of what, or whom, set your EIS into motion: To reiterate, and set facts straight, nothing in your EIS proposal/solution will reduce traffic in the LLC canyon road (SR210), per your own presented disclosures under Federal title 23, you cannot: limit traffic, nor close the canyon road, except in event of avalanche control, incident, or inclement weather. Your EIS statement, per your written presentation serves to "increase capacity" in the LLC canyon. So, your entire EIS proposal, and more specifically the gondola solution, is merely a smokescreen to appease the whims of private interest and developers pushing to construct a gondola in LLC, and more to the point, using public funding to do so for their private profit. Let's review the players, and who really benefits from the construction of a gondola: Wayne Neiderhauser(former state senator who helped set in pace the legislative process and framework for the EIS project), his sidekick Chris Mccandless(former Sandy city council member, Neiderhauser's development partner). Both developers stand to directly benefit and profit from a gondola station located at their proposed commercial development on the former LaCalli property, and the ski resorts, Snowbird & Alta resorts (both will benefit by the increased patronage, but something needed to be set in place fore the gondola was a sure bet). Recalling, the wife of Snowbird's current CEO, Melissa Fields taking one for the team, in conveniently taking a seat on Cottonwood Heights Parks & Recs committee, then pushing aggressively to get 11 acres necessary to run the gondola over the SR210 road rezoned from it's residential zoning status, otherwise this project would have been dead in the water. Snowbird also now owns the property where the gondola will be based, under a fictitious LLC. The resorts would not have purchased the land from developers had it not been a sure things. Fields solicited public for donations under the veil of 'saving this 11 acre parcel as preserved open space', and got the city of Cottonwood Heights indebted for the larger remainder of the balance necessary to purchase the land. (*this parcel was a key part of the planned commercial development, and got on the radar when developers recognized a gondola was not going to be permitted under R zoning parcel to run over top of residential property across the state road). UDOT, in less than a week from the land purchase by city of Cottonwood Heights, rolled out a cog rail station design on this very parcel, then when called out on it, you back paddled demanding you had no clue of the properties status now designated as open space, despite the fact that UDOT has had this area under its microscope for years into this EIS process. Other fringe private party interests in the gondola will undoubtedly realize fiscal benefit. And, of course back to you, UDOT. UDOT's agency will see huge monetary benefit, based on the bloated EIS costs projections – this project is nothing more than a secured big ole paycheck to UDOT - your role and actions here are unconscionable. Those are the ONLY benefactors of UDOT's entire EIS proposals. The public will not benefit, the public will have to pay to ride the gondola. The public will have to pay for its maintenance and upkeep into perpetuity. Again, the gondola serves no other purpose than to exploit use of public funds for private interest. The gondola is nothing more than a Disney caliber novelty ride, which upon riding once folks will quickly learn it's easier just drive their cars up the canyon road, and forgo the cumbersome, time consuming logistical nightmare necessary just to get aboard it, let alone add to this the compounded logistics of those traveling with young children, families, luggage, and/or ski gear in tow.</p> <p>Let's review safety concerns brought to UDOT by public, still unanswered: The gondola will NOT run during avalanche control, inclement or severe weather, high winds, ice storms, power outages, and it certainly not operate when inter-lodge is in effect at the resorts, something UDOT has down-played in this process. UDOT has failed in its years of shoving this proposal into publics face to address any of these realistic safety concerns herein; no data, no studies, other than their own self-governing, scripted narrative that somehow reaches acclaimed factual status without any independent review whatsoever. That is the inherent problem in a state that provides too much authority to any singular agency, the result is no accountability. Moving on, and adding to those natural, or other unexpected induced conditions that would pre-empt a gondolas operations, UDOT has failed to address public safety issues that present from more of a human nature, example: those who hot-box a cab with cannabis with others/children aboard in the same cab, or drunks who inadvertently crash thru a cab window and fall to the ground(yes, that has happened), or the couple who chose to publically sex it up, or those traveling with covid, or other illness, knowingly or not, spreading it to others, or other verbal/physical altercations that may occur within that +37 minute ride? UDOT, what's your policy on riding the gondola with a gun or weapon, or drugs, or alcohol? Crickets. UDOT, have you even noticed under riding currents in our society, public is pretty unhinged lately, skiers and tourists are no exception. Udot, how are you addressing these realistic human-triggered public safety concerns? You haven't because your agency builds roads, and this level of public safety concern, and public security risks, are well outside your spectrum of duties as Department of Transportation; it's well outside your agencies ability, or capacity, to even consider these public safety concerns, so therefore it has not been included within your EIS. So, who is responsible for public safety and security risks assessments? I have yet to see Utah's Department of Public Safety come to the table to discuss any of these human-triggered, or security risks issues, either. It's all out of sight out of mind, as UDOT, your agency and the gondola proponents' advocate aggressively for a cheery & safe "disney' experience. But, the reality can be otherwise, and you've failed to acknowledge that aspect of public's safety when boarding for a ride. If the intention with constructing a gondola is for Snowbird to contend as an Olympic venue, then how will you create policy that mitigates risks factors to public when some deranged fanatic decides to hijack a cab for political purpose during such a high profile event? Airlines face these, and a slew of other public safety issues, and have created strict polices accordingly when boarding their planes. Train rail, Ferries, and Busses have similar rider policies. UDOT, you, on the other hand, have not once addressed, or presented any inkling of consideration to such public safety policies or security risk management, in all your years of efforts to shove this gondola project forward; Rather you have demonstrated total disregard to public safety on this aspect, because money in pocket over public good IS your policy.</p> <p>To recap, as to whom will benefit from construction of a gondola, the greater public WILL NOT BENEFIT from a gondola constructed within LCC. As others have become WOKE to your EIS BS, UDOT, I too will demand your agency by meticulously audited for what appears corruptive cronyism relationships, and for your actions in steering this entire EIS process to meet developers private interest objectives. You have more to answer to than not, UDOT.</p> <p>My city, Cottonwood Heights, has hereby taken a stance in opposition to construction of a gondola, and I stand with them, echoing their sediment as follows,</p> <p>"City of Cottonwood Heights stands firmly against the 22 towers of the gondola project, five of which encroach on the "Roadless" designation within LCC. Each tower base will significantly disrupt and degrade the natural habitat for living creatures, flora and fauna but will also degrade the aesthetic and recreational experience for all canyon users. To be "roadless" is to infer that the area be kept natural, towers for the purpose of transportation should fall within the category of a "road facility".</p> <p>As a community resident, who will be effected by this project, we wish to see UDOT's screening which measures polluting affect be based on non-diesel (electric or natural gas) buses, which is the transit of the future, when comparing the gondola to bus service. Right now UDOT FEIS is based on metrics utilizing diesel-only/14 year old buses. By the time the gondola would be built, closer to 2050, with all the federal incentives for non-polluting transit, electric buses will be even more technologically advanced than they are now. Proterra bus manufacturer has proved electric bus worthiness for steep canyon highways in recent years."</p>

		<p>UDOT, we've all grown tired of your self-assessments in this EIS process. You're obvious willingness to provide independent developers an avenue to exploit public funds is shameful at best, but more suspect as criminal, and abuse of public tax dollars for private profit gains.</p> <p>You are legally bound to creating NO ROADS in the environmentally sensitive areas accessing the tower locations your inept engineers selected, and that failure is on your agency, you obviously failed to recognize this requirement before blindly adopting private developers gondola construction whims as you EIS mainstay. Now, I suspect, your musings will have you attempting to circumvent, or write-in exemptions from these very requirements.</p> <p>Let's continue,</p> <p>Above all, let get back to facts, fact you present to public. Your agency insistently touts the gondola will reduce emissions, yet your agency has failed to provide logical, statistical data, nor have you produced any other realistic studies supporting such claims. Fact, adding 5 more lanes to current 2 lanes of Wasatch/SR210, and construction of a mega-2500-vehicle parking structure will induce demand of vehicles in the area, thereby INCREASING auto emissions, and resulting pollution. You're creating more traffic problems than your gondola will ever solve. To make matters worse, you have intentionally diluted the data with false claim stating a gondola will "reduced emissions" within LCC. You do so by measuring emissions against the increased canyon capacity, using total persons traveling into/out of LCC combing the numbers of gondola riders + vehicles to present a lowered ratio. Your logic is deliberately flawed to sell the gondola as a sustainable solution. Isolated, and presented as an alternative replacement transportation module for other emissions producing transportation systems, a gondola can be considered sustainable, I won't argue that. But, in the context of the EIS, and your claims, as you present, it is an additional transportation system, not a replacement system. Therefore the rate of vehicles in the LCC canyon will not change. The LCC canyon will have the same flow rate capacity as prior, and will produce the same amount of % emissions pollutants as prior. In using your illogic, the per capita % of emissions will present as a lowered % based upon being measured against the increased total number of persons in the canyon; therein you are merely twisting data and facts, and artificially reducing that % of emissions based on calculating the % of emissions against total number of persons in the canyon (regardless of how they are transported, whether by car/gondola). The fact remains that you have not actually decreased % emissions pollutant levels at all from vehicle emissions within the canyon. Regardless of total number of persons entering/existing the canyon the number of vehicles in the canyon does not change in the equation, and per your own admission in the EIS study, you are not reducing total # of vehicles driving in/out the LCC canyon, therefore again % pollutants from emissions simply does not change. To abuse statistical data in this manner, as you have, and present the gondola as serving some sustainable form of public good in reducing emissions in LCC is not only an unrealistic false claim, it is unethical. To put this simply, to those reading, including yourselves, who are not comprehending how you, UDOT, are abusing statically data to sell public on the gondola, here is a simplistic antidote: If it rains 1" per hour, that does not change whether 100 people are standing outside or 1000 persons are standing outside, it is still raining 1" per hour. So, please cease with the BS to public on the environmental claims of a gondola reducing % emissions in LCC. The amount of BS in your EIS study is astounding. Your EIS expressly states the gondola will not decrease, nor limit traffic in the LLC canyon, and further, you expressly state that the entire EIS study is designed to "increase" capacity in the canyon. That is done for benefit of DEVELOPERS, AND PRIVATE SKI RESORTS TO MAXIMIZE THEIR PROFITS, BY INCREASING CAPACITY IN THE CANYON, YOU INCREASE PATRONAGE FOR THESE PRIVATE ENTITY COMMERCIAL ENTERPRISES, and UDOT reminder, that you're abusing use of public tax dollars in this process to assist in private businesses to increase their profit margins. Increasing profits for private commercial businesses, developers, and ski resorts is NOT A MATTER of PUBLIC SAFETY. The private interest have been steering UDOT to use public funding to realize their own profits, and you are hook, line, and sinker caught in their scam. SHAME ON YOU, UDOT, for acting on behalf of private interest over the welfare of public safety and public good, the one responsibility your public agency is taxed with. Your agency has lost much credibility in public eye as you entwined yourself with private interest and developers to meet those private agendas, not PUBLIC needs.</p> <p>The only course(s) of action you, UDOT, should be taking in respect to PUBLIC SAFETY on your state road SR210 into LLC, and the Wasatch Blvd section through Cottonwood Heights is:</p> <ol style="list-style-type: none"> 1. DO Increase Traction Law Mandates to demand on vehicles entering SR210/LLC to be equipped with a min. snow tire designation of type "3-peak mountain/snowflake", remove the M+S tire as an acceptable snow tire in the canyons where winter conditions are extreme, 2. DO Provide check-point management at the LLC canyon mouth, and stop allowing cars into the canyon that are ill-equipped for conditions that present. Your agency has been removing(temporarily lifting) traction law restrictions every winter, at its whim, and allowing ill-equipped vehicles into the canyon during short moments of clear weather, KNOWING that later in the day there are severe weather events scheduled – to send ill-equipped, unsuspecting drivers into LCC under this premise is a blatantly NEGLIGENT act on behalf of your agency, 3. DO Construct long overdue SNOWSHEDS at key locations along the SR210 LLC canyon road, to create safer roads for public to travel. This was your first course of action over 50 years ago, 4. DO Work with UTA to increase a network/system of smaller flexible public transit busses, that are powered by electric or hybrid cleaner fuels. Create networks that have fast-track busses with access points from all over the valley, 5. DO Maintain the valley corridor section of SR210 as a scenic byway, from mouth of LCC through Cottonwood Heights city to SR190, as 2 lanes. There is no logical reason to widen this section of road, and invite/increase traffic, vehicle emissions, and degrade safety along this heavily cycled corridor, 6. DO Provide ski traffic management along SR210 when both LLC and BCC are closed due to avalanche control, and get those vehicles waiting for canyon road openings to park along the shoulder, and not in the drive lanes.

		<p>7. DO NOT use public funds to construct a large parking garage in a residential area, thereby inducing more vehicles to descend upon an already impacted residential area; in doing so it creates more traffic congestion, diminishes road safety, and causes pollution from increased emissions.</p> <p>It's time, UDOT, to take accountability and responsibility for your actions in respect to the EIS, and your far-fetched gondola solution. Time to go back to the drawing board, and let public rather than private interest steer decision making, that is relevant to public good, public interest, and above all public safety.</p> <p>?????▲??</p>	
48567	Krage, Garrett	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 		Roadless areas are protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas. These places need to be protected!

39641	Kroll, Tyler	<p>I remain entirely opposed to the gondola or any of its alternatives. While the report took into account environmental factors, it failed to consider the impact to local climbing areas, noise that would disturb both hikers and homeowners, and the gondola as a visual scar on an otherwise beautiful canyon. The massive investment required to build such a gondola is not at all justified but the modest gains (~10%?) in congestion mitigation at resorts that are already packed with skiers and riders to begin with. Of all the alternatives, I am in favor of the Enhanced Bus Service alternative. This makes the most intuitive sense and causes the least harm to the canyon. Overall, UDOT and the legislature must realize that LCC is a limited resource, and that trying to squeeze more people into it will only lead to its demise as a recreation area. It's unlikely I would stay in SLC should the gondola be built.</p>	A32.3F
39774	Krong, Andrea	<p>I do not want a gondola in Utah's roadless areas</p>	A32.29VV
39989	Kronschnabl, Anne	<p>The Gondola construction would require construction in Utah's IRA. This goes directly against why IRAs exist.</p> <p>It should not be allowed to go against designated IRA's such as whitepine or lonepeak to construct the gondola which would have far reaching impact on nature in LCC</p>	A32.29VV

41308	Krueger, Katelyn	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Katelyn Krueger</p>	A32.3A; A32.3F

39562	Krusko, Cheryl	<p>I would like to submit my comment regarding the LCC gondola. Many comments have been sent in from the community in regards to NOT supporting the LCC gondola. Not only would it hurt our environment in the canyon but would only be used for 2 ski areas. What happens on a windy day like yesterday the 24th of March. High winds shut down the ski areas and the tram. What happens to all those folks in the canyon. There has to be a better way to utilize buses. I take the bus up BCC at least 2-3 times a week. It is not perfect but could be a way to transport folks up and down the canyon. Please review and reconsider your proposal for the LCC gondola. Thanks for your time and for allowing the community so submit their comments.</p>	A32.29VV

40288	Kumar, Naresh	Installing a gondola does not serve the most canyon users most effectively. It is destructive and obstructive. We can be more creative. We can do better. Zero carbon ground transportation is a very affordable option. It would generate employment and reduce traffic. Please take these points into consideration for today and generations to come.	A32.29VV

55957	Kumar, Shilpi	<p>Please find my comments against the gondola:</p> <ol style="list-style-type: none"> 1. If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy. 2. Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do. 3. Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas? <p>Best, Shilpi</p> <p>-- Shilpi S. Kumar</p>	A32.3A; A32.3F

39584	Kunz, Katherine	<p>As a long-time resident of the Granite/Little Cottonwood area, I am fully against this option. Many less costly and intrusive measures should be explored before committing \$1B+ to a structure that will create a permanent eyesore on the canyon. Moreover, the gondola will not alleviate traffic because many will still elect to drive themselves. And, traffic getting to the parking structure will certainly not diminish. I feel other options should be explored before going to this "nuclear" option that only benefits 2 private ski resorts.</p>	A32.29VV

46608	Kuszajewski, Brandon	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Brandon Kuszajewski</p>	A32.3A; A32.3F

		<p>resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Utilizing funding to add additional parking at the base of the canyon, invest in staffing for vehicle moderation, and increase the bus fleet is what I would prefer to see as a local Utahn. This proposition is environmentally irresponsible and would cause irreparable harm to our natural land and I implore you to stop this project from moving forward.</p> <p>Regards, Holly Kuyt</p>

42202	La Motte, Isabelle	<p>How many times do we have to tell you that the citizens of Salt Lake don't want this? The gondola "solution" is a poor allocation of resources and will permanently scar the natural beauty of Little Cottonwood Canyon forever. A "solution" that primarily benefits private entities is no solution at all. Please improve the resources that are already at play, but not nearly maximized, aka: the bus system, before making such drastic changes to infrastructure.</p>	A32.29VV

40265	Lake, Rachel	<p>I strongly encourage UDOT to conduct studies or do their own research on the impacts of construction on the flora of the Little Cottonwood Canyon. While there are only three IRA areas, the vegetation is the same throughout. For example, keystone species (such as milkweed, lupine, members of asteraceae, and penstemon) of plants for the endangered</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>Monarch and our suffering native Bumble bees can be found in one of the IRAs as well as non-protected areas. Gondola construction, I imagine will follow along the pre existing road which follows the stream. In plant biology, it is known that riparian areas (plant community association with the waterway- in this case the stream that flows down the canyon) are the most important in terms of animal food production and biodiversity. A study MUST BE DONE to determine if the construction of Gondola towers will destroy primarily riparian areas, and how much of it. Monarchs need every single milkweed plant they can get, as it is their host plant and Monarch larva quite literally can not survive without it. A gondola would be beyond destructive to these ever so important plant communities. Why should UDOT care about pollinators? Because pollinators are responsible for pollinating our crops and maintaining the health of the ecosystem by ensuring plants are pollinated. If society, including a transportation departments, don't take the threat of pollinator extinction seriously, we may not only lose them, but all of the crops that rely on them, and flowers we enjoy in the spring.</p>	
39393	Lake, Rachel	<p>I am disappointed that the Gondola issue has gotten this far without any environmental survey or discussion around the topic. Most arguments made for and against the Gondola proposal has been finance based or based on other solutions, however the argument not being made enough is that we haven't don't enough research to even know what the right answer is. We need to be conducting environmental impact assessments and potential water quality impacts and wildlife monitoring to see which species are in the area. For example there may be rare plant species or insect species that have protection under the Environmental Protection Act, but no recent survey has been don't to determine which species exist in the canyon. Also, The canyon is rich in ecological diversity, and areas of high species richness deserve protection. I would be more open to the idea of a Gondola if it was proved through science and research that it is the least impact on water quality, and wildlife and biodiversity. But so far I am extremely skeptical that the world largest Gondola will be better for the canyon and its species than simply expanding bus service or banning personal vehicles, like in Zion National Park. UDOT used to be respected, not anymore. UDOT can earn our respect again by putting in the hard work to determine the true environmentally friendly path by conducting environmental quality assessments and checks, and gathering the data necessary to peer review findings on wether or not construction up the canyon will impact wildlife.</p>	A32.29VV

39967	LaLonde, Randall	<p>I still believe that UDOT, in its final analysis of potential impacts in the Supplemental Information Report, failed to look at anything more than the transportation problems in Little Cottonwood Canyon and not at the larger environmental and financial impacts of its proposals. Just like the National Parks, when too many individuals are trying to access a cherished space, Utah should be putting limits on access through permits, fees, and numbers of people allowed into the canyon on a daily basis. Your solutions will do nothing to eliminate overuse of the canyon by your support of one privileged group--wealthy Alpine skiers and the owners of Alta and Snowbird--and ignoring the needs of everybody else.</p>	A32.29VV

40878	Lambert, Aley	<p>My name is Aley Lambert and I've lived in Sandy for four years. It didn't take long for my husband and I to quickly fall in love with Little Cottonwood Canyon given its beauty and all it offers recreationally. We've shared many, many special moments together in that canyon. My love for LCC has only grown with the addition of our one-year-old daughter, who I take hiking with me often. It's been a place of great healing and a source of joy for me as a new mom. Given my own adoration for LCC, I'm not naive to the fact that many others share my love for spending time in that sacred place. I understand UDOT needs to implement a better traffic and safety solution in this canyon. However, I was upset, and even more so deeply saddened, when I heard UDOT's decision to move forward with the gondola "solution." First and foremost, it seems like an irresponsible use of taxpayer dollars (that's a lot of money!!), especially considering it largely benefits just a couple of for-profit businesses. From my understanding, UDOT would charge families to use the gondola. If that's the case, I quite frankly don't think we will be using the gondola since budget is top of mind for our young family. More than anything I'm disappointed this expensive gondola including the steel skyscraper towers will ruin the breathtaking views of our LCC. God's magnificent creations like our favored canyon cannot be rebuilt or fixed in years to come. It is our responsibility to take care of our beautiful earth, especially in our own backyard. Our canyons are world renowned for a reason. Let's keep it that way.</p>	A32.29VV

40062	Lambert, R	<p>I believe to maximize the wilderness, environmental and estetic qualities of Little Cottonwood canyon, the best alternative is to implement enhanced bus service with no tolls. The Gondola and road widening proposals are wasteful and an eyesore, as well as a huge financial burden to the taxpayer. Overall, this project has already adversely impacted the canyon, with the building of the Little Cottonwood canyon parking lots at the mouth. I am adematly against the gondola proposals, as they do not address the traffic issues resulting from other non-skiing canyon uses. The gondolas only benefit the resorts, which is a misuse of public funds and a conflict of interest for taxpayers, as well as a blight and eyesore and an adverse impact of the canyon. I believe that USOT has overstepped their authority by ignoring all other canyon activities in the proposals. Enhanced bus service is the only proposal that addresses multiple use, as long as it includes trailhead stops, but this proposal should exclude toll booths, which is an unfair financial burden to the poor and low income folks that recreate on public lands. Toll booths also increase congestion and emmissions, and are an eyesore in the canyon.</p>	A32.29VV
39958	Lambiase, Serena	<p>Please do not build a gondola because it will violate the roadless rule and negatively impact wilderness areas.</p>	A32.3A
39956	Lambiase, Serena	<p>Please do not build the gondola, because it will harm wild animals, their food, the landscape, the beauty and the whole ecosystem of the mountains.</p>	A32.29VV

		Regards, Alyson Lantz	
42336	Lantz, Jessica	This gondola is a terrible idea...for so many reasons. I know you have all heard them a thousand times. You know why it's wrong. You know that this is a financially motivated idea, and will devastate our local watersheds, disrupt tourism to anywhere in the canyon that's not Snowbird or Alta, and will line the pockets of the wealthy benefactors who have stake in the game. I urge you all to look inside of yourselves morally, and do what your conscience knows to be right.	A32.29VV
43207	Lanvers, Finn	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 42354	Lapp, Katherine	<p>The roadless area assessment highlights the enhanced bus service as the least environmentally impactful traffic solution in LCC. This solution is also the most fiscally responsible. The streamlined access of enhanced buses eliminates traffic congestion further down SR-210, into the communities at the base of LCC. Construction of park and ride stations eliminates disruption in the fragile ecosystems of LCC. Enhanced buses are also scalable, meeting the fluctuating traffic demands of LCC throughout the season.</p> <p>What I found most surprising about this assessment were the restoration claims in riparian zones impacted by the other alternatives. I've worked on trail crews in Boulder, CO for 7 seasons – working in watersheds and riparian zones is very familiar to me. Riparian zones are one of the most biodiverse, sensitive and difficult ecosystems to mitigate impact on - destruction of these areas can be somewhat restored with experienced restoration crews, and take decades to recover. Replanting of trees, native seeding, etc. will not restore them; plants that only grow in these areas rely on symbiotic relationships with fungi networks within the soil, other plants, and insects that have specifically evolved with them. It is a false claim that a large construction project through and alongside these areas will not permanently damage or destroy them. The focus of the Gondola A, B, and cograil impact on our unique ecosystems inflates mitigation procedures in an effort to conceal the irreparable damage done.</p> <p>While rerouting impacted trails is a reasonable assessment, LCC houses climbing routes impacted by the Gondola A, B, and cograil that cannot be restored or replaced. From a recreation perspective, these alternatives function as a profitable initiative for Alta and Snowbird, and not their purpose as a traffic solution. Snowbird purchased land (La Caille area) at the base of LCC in 2021 under an LLC; this 5 acre plot aligns with the Gondola A, B construction areas.</p> <p>Thank you for your time reading my comment – as much as I've gathered about these traffic solutions, I have one lingering question. Who is driving the Gondola alternative into effect, and how much do they pay each person that is in its way?</p>	A32.3A; A32.3F

56320	Larsen, Ian	<p>To whom it may concern,</p> <p>As a daily traveler of little cottonwood canyon a gondola is not the solution. The fact that a gondola is being considered blows my mind. What a waste of money, time, and resources. I am tired of writing comments defending the canyon that I love so much. It is clear what the public wants. The public wants alternative solutions, I don't want to write all of the different ways that are better than a gondola so just check Patagonias ideas. The only people supporting the gondola are those benefiting financially off of it or people who don't understand it other than it's "cool". Thank you I hope this will be taken into consideration and is the last comment I have to make. May LCC live for awhile longer until mankind packs their wealth into it.</p> <p>Regards, Ian Larsen</p>	A32.29VV

40286	Larson, Ashley	<p>I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	A32.29VV

50304	Larson, Paisley	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Paisley Larson</p>	A32.3A; A32.3F
52747	Larson, Parker	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 42306	Laurenzo, Adam	<p>I find the notion that the Gondola is not a motor vehicle travelway and is therefore exempt from the roadless rule to be laughable. I see nothing in the report, other than your semantic interpretation, that would suggest this is actually the case.</p> <p>I applaud the revelation that increasing bus service and adding snowsheds has a lesser impact on IRAs than the Gondola. The choice here is obvious.</p> <p>Moreover, I can't believe we are using diesel-powered buses to model air quality in 2050. We can do better. A fully electric bus was demonstrated to travel easily up SR210 in 2022. Are you really saying we'll be driving full on diesel buses in 28 years?</p>	A32.3I; A32.10G

40987	Lazarev, Ivan	<p>The supplemental study has confirmed that the impact to the canyon for enhanced road infrastructure will use a negligible amount of environmental land. In my opinion it clearly confirms that most of the effort should be on building the necessary snow sheds and/or tunnels to ensure that the canyon can stay open even when avalanche mitigation is in process. This past 60 days have clearly shown that the canyon is not equipped or ready to deal with back to back snow storms.</p> <p>Improving the road infrastructure is the only focus that should be considered today. The last thing we need is to build a gondola with tax payer money that will do absolutely nothing to fixing the real issue which is ensuring that traffic can go up and down the canyon at all times. It is time to stop talking about the gondola and it is time to finally solve the road infrastructure. Build an effective mountain access road!!!</p>	A32.29VV
41616	Lazarev, Tamara	The gondola is NOT the solution. NO to the GONDOLA!!	A32.29VV
41605	Lazarev, Tamara	After the winter we just experienced I think the obvious solution is snow sheds and tunnels to insure the canyon can stay open in most cases. The gondola would not have been a big help this past winter because it cannot run during avalanche control. Widening the road 20 feet on the North side with an express electric bus lane would also help but not unless there are snow sheds and tunnels in place for the flow of traffic. This whole gondola proposition is now even more of a joke than it was before. Once again, in most cases, it would NOT have helped this past winter.	A32.29VV

41013	Le, Katrina	<p>With an estimated cost of 1 BILLION dollars of taxpayer money, the gondola would only benefit the resorts of Alta and Snowbird while causing irreparable damage to LCC. The gondola is marketed as an end-all solution when really, it is a spectacle paid by local taxpayer money to bring in tourists into an already overwhelmed canyon and more money to the big resorts. The overcrowding of the canyon is a problem and environmental concerns need to be addresses. However, the gondola is not the solution as it causes irreparable harm to the watershed. Car usage should be decreased. However, bussing solutions and car tolling solutions must be investigated first.</p>	A32.29VV

40187	LeCourt, Danielle	I am a lifetime Utahn and current resident of Cottonwood Heights. I am strongly against the gondola project for its environmental impact and suspected lack of efficacy. I think there's a better way to do this that won't create irreparable damage. I have commented on this project before, and I will again. Please prioritize the long-term health of our canyons over private profit. That's your job. Thank you.	A32.29VV

45302	Ledbetter, Peyton	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Peyton Ledbetter</p>	A32.3A; A32.3F

41591	Lee, Cody	<p>As an avid snowboarder, hiker, and climber - PLEASE reconsider using taxpayer dollars to fund a project that benefits two private companies and would only make a meaningful difference on their peak powder days.</p> <p>The gondola is a terrible solution that has far more negative impacts than it does positive. While UDOT can do a better job at increasing their bus service to/from LCC, the primary stakeholders should also be held liable for much of the demand for the canyon on peak days. I believe that Snowbird and Alta need to be controlling the situation through a more robust parking reservation system, offsetting UDOT's costs for enhanced bus services, and setting an example for the same issues that BCC is experiencing.</p> <p>The public DOES NOT want the gondola, and we urge you to reconsider the entire proposal.</p>	A32.29VV

42105	Lee, Fordham	This is a terrible idea and a complete waste of taxpayer money.	A32.29VV
40464	Lee, Gloria	<p>As a tax-paying resident of Utah, I cannot support the Utah Department of Transportation's Final EIS in Little Cottonwood Canyon that would reduce acres of land classified as "Roadless." I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and soul restoring recreation opportunities.</p> <p>The definition of road is "a wide way leading from one place to another, especially one with a specially prepared surface which vehicles can use." It is clear that what UDOT is proposing to support the gondola, is clearly a road.</p> <p>Building gondola towers in Roadless Areas will greatly impact Little Cottonwood Canyon ecosystem - including over 1,200 plant and animal species. Can UDOT ensure that there would be no impact to any of these species? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>Inventoried roadless areas possess invaluable social and ecological benefits and characteristics that are becoming scarce with the state's fast-growing population and the nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of the Roadless Areas that mean a lot to me. Additionally, Little Cottonwood Canyon is a very important watershed, providing 15% of the culinary water to the Salt Lake Valley. Preserving this watershed becomes even more important with the reality of climate change and multi-year drought. Conserving inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would build towers, angle stations, snowsheds, and disturb delicate and important ecosystems within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas.</p> <p>The proposed gondola goes against everything the 2001 Roadless Rule is intended to do. We cannot accept that taxes being collected each month to go to a project that would permanently alter Twin Peaks, Lone Peak and White Pine Roadless Areas. I will always say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	A32.3A; A32.3F; A32.3G

40465	Leetham, Sam	Keep little cottonwood gondola free! Get more busses, widen the roads. Anything but a gondola	A32.29VV
41747	Lefave, Sarah	<p>I am opposed to the Little Cottonwood Canyon Gondola. Specifically related to the 2001 roadless area conservation rule (RACR) the proposed Gondola project will permanently change the wilderness areas in Little Cottonwood and the adjacent areas including Lone Peak, Twin Peaks, and the White Pine areas. Furthermore, it will destroy wilderness recreation areas for rock climbing (a large incentive for outdoor tourism in Salt Lake City), trail running, and backcountry skiing. These mentioned area are ROADLESS and I cannot support a proposal that reduces these areas and irreversibly damages them. Claiming that the Gondola is exempt from this rule because it is not technically a "road" is misinterpretation for the benefit of a few.</p> <p>PLEASE consider other alternative before imparting permanent damage for over a billion dollars.</p>	A32.3A; A32.3F

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>I support other alternatives such as incentivizing carpooling, tolling, year-round and enhanced bus services, mandatory parking reservations, and required traction laws.</p> <p>Please attempt these significantly lower cost and less damaging to our wilderness or "roadless" areas prior to permanent damage.</p>

52756	Lehnardt, Heather	<p>To whom it may concern,</p> <p>Hello! I know you have likely received countless messages and I want to thank you for taking the time to listen. I'm writing to plead with you to listen to and respect Utah taxpayers over individual business interests. I strongly oppose the Little Cottonwood Canyon Gondola project and believe we can and must come together to create a better solution.</p> <p>Heavily improving and investing in the canyon bus system or requiring prior reservations for canyon access via personal vehicle (as Alta ski resort has done with their parking lot) are both potential solutions to canyon traffic congestion that are vastly less expensive and apply to a greater number of people than the proposed gondola. It seems that the gondola will do very little to improve traffic congestion and instead will serve as a luxury architectural feat for Snowbird and Alta to boast of. The extensive damage this project could do to the natural beauty and structure of the canyon, as well as the risk to our nearby watershed, is too great a risk.</p> <p>Finally, in abiding with existing law, claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. This outright disregard for the laws in place to protect our great natural lands is frankly disturbing and breeds great mistrust in UDOT.</p> <p>I plead with you to please consider what I and many of my fellow Utahns have to say and do not allow the gondola project to go forward.</p> <p>Regards, Heather Lehnardt</p>	A32.3A; A32.3F

39619	Lenhart, Christian	<p>I am supportive of UDOT's efforts to relieve congestion in the Cottonwood Canyons. My hope is that an incremental approach is taken. I prefer the option of expanded bus service, paid for by tolls on private vehicles. The quarry site at the mouth of Big Cottonwood Canyon is an ideal place for a park-and-ride facility to transfer from private vehicles to public buses. I think a TRAX connection to the quarry park-and-ride facility is also a basic requirement to give the enhanced bus option the best chance of success. Lastly, it would be fantastic if the buses could run year-round, and provide access to the trailheads during the summer and fall. That way our public investment could be return the maximum value to the taxpayers. If all these steps are taken and still don't provide enough congestion relief, I would support the gondola proposal - but not before. Thank you for your consideration!</p>	A32.29VV
42378	Lenkowski, Adam	<p>Roadless areas will be disturbed in the dozens of tower construction areas, and permanently altered. This is not acceptable.</p> <p>In regards to the additional air quality study, electric buses should also be factored in as an alternative if you are going to also calculate a diesel only fleet option.</p> <p>As a resident of Sandy Utah, and frequent recreator in little cottonwood, I will never support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	A32.3F; A32.10G; A32.3A

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Brelynn leonard</p>	A32.3A; A32.3F
47390	Leonard, Brenda	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 42233	Leonard, Jeremiah	<p>I would like to provide comment on the proposal of the gondola. Reviewing the studies conducted on the resources required the transit time resulting from and the potential impact to Little cottonwood Canyon my preference and common is that the gondola not be pursued in favor of either enhanced buses or the cog rail. I think those two options in conjunction with an enforced toll on Little cottonwood Canyon would greatly reduce not only the traffic but the emission impact in the canyon. Given the quantity of people who would be using the gondola it does not seem feasible to transport the same amount of people via gondola as through any of the other options or to replace the current car traffic going into the canyon at peak hours. Wait times would be incredibly long for those folks forced to use the gondola and many would still resort to driving or taking the bus. It can only effectively minimize a small amount of privilege traffic and will not have any significant impacts on the emissions in the canyon. In addition to this there are a lot of questionable relationships between those who will receive profit from the gondola and their ties to those in the legislature pushing it, there is a massive backlash from public for this project. And it's kind of disgusting to look at how this project continues to be pushed despite no public support from any entities who do not benefit directly beat from the profits the gondola would break in.</p>	A32.29VV

		Regards, Rhianna Leslie	
39374	Lester, Julia	<p>As a tax-paying Utah citizens who appreciate the natural wonders of the Wasatch & especially Little Cottonwood Canyon, we object to impingement of proposed gondola setup into not one but three LCC protected roadless areas.</p> <p>We've asked UDOT repeatedly over the past almost thirty years to expand bus service—more buses running more frequently (for example, every ten minutes during peak winter traffic times) to get year-round snow riders, hikers, climbers & resort visitors up & down the steep, deep LCC efficiently.</p> <p>Who wants the gondola? The resorts of snowbird & Alta plus developers tied to Utah politicians.</p> <p>Who doesn't want the gondola, especially with proposed infringement upon protected roadless areas in LCC? Most everyone else, especially the taxpayers who'd foot the massive bill for the suggested gondola which would only enrich politically-connected developers like Wayne Niederhauser & the snow resorts.</p> <p>Shelve the gondola plan & work on enhanced bus service, as requested by most Utah citizens.</p>	A32.3A
40335	Leta, David	The "gondola option" for LCC does not consider all of the resulting adverse environmental impacts and will be more detrimental from both an environmental and practical perspective than the enhanced road + bus option. The adverse impacts include, among others: permanent impairment of the "view shed" all along the canyon in all seasons; inability to operate the gondola in high wind conditions; increased traffic congestion and delays at the loading base of the gondola; inadequate parking at the base of the gondola and the inability to use multiple, disbursed parking locations to minimize traffic congestion. On the other hand, the enhanced road + bus option uses existing infrastructure, can be easily modified to address changing demands, can employ disbursed parking locations at the base of the canyon, or at greater distances from the base, to park vehicles and load passengers onto buses, can use multi-purpose electric busses, that can be used for other purposes at other locations during non-winter months or during non-peak times; and can be combined with other traffic-easing incentives to improve traffic flow, such as snow sheds along avalanche pathways to permit traffic flow even during avalanche threats and the imposition of tolls and fines on individual car traffic. The gondola option is not in the public best interest nor is it a wise use of public resources. I adamantly oppose the gondola option.	A32.29VV

39776	Lewis, Brian	<p>No gondola please. The citizens of Utah have overwhelmingly rejected this boondoggle to provide welfare to two immensely profitable corporations. The maintenance estimates could not possibly keep this running. The gondola utterly fails to solve the congestion issue and creates an blight on the canyon. A railway line from the current (N/S) light rail line up LCC to Brighton, then Park City. Now that would solve problems. Just bring in Seattle's big Bertha</p>	A32.29VV

41850	Lewis, Lorin	<p>The Gondola is too costly, and it is a solution that destroys the beauty of the canyon. It would affect all Utah taxpayers including all those who never use the canyon. A more simple solution of expanded bus lanes and service, and even avalanche tunnels or barriers would allow better access during dangerous avalanche conditions. The gondola would destroy peoples homes and neighborhoods. It is a solution that would go unused most of the year. Too costly, too environmentally damaging, and THE MAJORITY OF UTAHNS DON'T WANT IT!!! LISTEN TO US!!!</p>	A32.29VV

47905	Liechty, Joe	<p>To whom it may concern,</p> <p>I do not support the Little Cottonwood Canyon Gondola project. I urge UDOT to follow a lower cost, less impactful plan to reduce traffic congestion in the canyon. I have read UDOT's proposal and done some math on my own time and come to the conclusion that the gondola will not improve access to the beautiful canyon that is so precious to us in the Salt Lake and Utah Valley areas. Much of the space in Little Cottonwood Canyon is already designated as wilderness areas or roadless areas. Preserving the natural beauty of this incredible area should be a top priority. I am confident that building a gondola will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>As someone who frequently enjoys skiing in the canyon, I have noticed over this past year that the issues I have faced with traveling up the canyon have almost always been related to canyon closures due to avalanche danger (grateful to all the UDOT workers still putting in long hours to clean up the canyon as I write this). During these times, most of the good skiing is not open at resorts anyway and skiing in the backcountry is not very smart for the same reasons that the road is closed. I cite the bridal veil tram in Provo Canyon when I say that I am not confident that a gondola would be immune to the effects of avalanches in the canyon, especially during a very dangerous spring avalanche cycle like the one that we are having now.</p> <p>The other times that I have faced delays traveling up the canyon have been when there are accidents on the road due to poor road conditions. Usually, the traction law is in effect during these times, but I have never been stopped to be inspected by anyone to make sure that I have the appropriate vehicle/tires/chains for the conditions. This season at Snowbird I was interlodged and when leaving the resort at 8 pm, I found myself behind a Town & Country minivan with a California plate and no snow tires. The minivan was struggling to make it up a small hill, slowing down the traffic and swerving from side to side as it tried to make ground. Despite it not moving forward, the driver would not pull over. Instead, they continued to give it the gas, blocking the road and making travel more dangerous for everyone else.</p> <p>I had a very different experience driving over Donner Pass a few weeks prior to that. We were stopped by a road worker who inspected our tires and then let us continue on the snowy road after he was satisfied that we had a vehicle capable of safely driving in those conditions. I have always been disappointed in UDOT's lack of enforcement of the traction law, mostly because people who violate it pose a danger to me, my friends, and my family when we are traveling in the canyons.</p> <p>I have worked as a river guide in some of the most pristine pieces of wilderness we have left in the US, such as the Frank Church River of No Return Wilderness in Idaho. I have seen firsthand the effects that being in such a space has on people and I will be forever changed by the effect that it has had on me. Our backcountry skiing community polices each other very strictly to make sure that we follow leave no trace principles. I regularly pick up any litter I find while</p>	A32.3G; A32.3I

		<p>out in the canyon (either at a resort or in the backcountry). We do this because we love the feeling of remoteness, solitude, and beauty that is found there. We want to preserve that for ourselves and for others.</p> <p>In the past few years there has been a boom in participation in outdoor recreation, which has come with some growing pains. A lot of that boom was driven by the COVID 19 pandemic. Already we are starting to see a leveling off of that boom. A gondola seems like a very invasive, expensive overreaction.</p> <p>I will not support a proposal that would reduce acres of land that are classified as "Roadless". I am sure that there is a lot of lobbying and pressure from the Alta and Snowbird to build the gondola, but, as a taxpayer, I have no interest in paying for the project. I do not want my money to go towards something that will mar the natural beauty of LCC. I am not confident that a gondola will improve canyon access for anyone (resort or non-resort users).</p> <p>Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. The purpose of wilderness areas is that they are untouched, left in their pristine beauty. In some ways it is almost a shame that there is a road up the canyon and that ski resorts are allowed to operate there. A gondola will be there forever, whether or not it ends up being a viable mode of transportation up the canyon. No one in any of my circles of friends and acquaintances has voiced support for this idea when I have spoken with them about the idea.</p> <p>I think that a gondola would only be effective if the road was closed during the times that the gondola was running, but that would mean that people wanting to access parts of the canyon not inside the ski resort boundaries would be unable to do so. Because I am not confident that a gondola would provide better access to the canyon, I support other lower-cost solutions that utilize our existing infrastructure.</p> <p>Ways to improve access that I support include the following: Improved bus service (including more buses during peak hours, more stops, and increased bus driver pay/benefits), toll booths at the bottom of the canyon for occupancy-based tolling on peak days (to incentivize carpooling), enforcement of the traction law (to reduce accidents and protect drivers), park and rides located further away from the congestion points (so that they are accessible without having to wait in canyon traffic), and mandatory parking reservations at ski resorts.</p> <p>Regards, Joe Liechty</p>

50302	Liljenquist, Megan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Megan Liljenquist</p>	A32.3A; A32.3F
41252	Liljestrand, Dane	<p>I don't see how the Gondola solution would help with capacity concerns in the Canyon and have not read or heard a satisfying answer. As long as there are available parking spaces at Alta and Snowbird, I believe drivers will park there. A parking fee or toll seems inconsequential when you already pay hundreds for a lift ticket or thousands for a pass, and \$20 for lunch. If you have the finances to pay resort prices, you likely can afford to pay for parking.</p> <p>Parking is the current limiting factor in the number of people in the canyon. If you have the same number of spots, paid or free - they will fill up, and you have the same number of cars in the canyon. So a 3k per hour gondola would only add customers on top of that baseline.</p> <p>The main benefit, then, from a gondola is that it allows travel up the canyon during avalanche cycles, which is great for us powder chasers. However, is it really a good idea to send 10,000+ people up a canyon with avalanche danger to potentially be stranded, with the only safe exit being a gondola? Or is this more just additional revenue for Snowbird and Alta?</p> <p>In the current Spring 2023 avalanche season we're having where the canyon road has been closed for the majority 2+ weeks, do we really want a system that could send thousands of people into the mountains, including backcountry users who otherwise would have no access to the high-risk terrain?</p> <p>I am an avid backcountry and resort skier and frequent Little Cottonwood Canyon year-round, and am a civil engineer by trade. Though I struggle to see the benefits of this solution and wonder what the real purpose of a gondola would be.</p> <p>Thank you for considering my comment.</p>	A32.29VV

42120	Lincoln, Laura	<p>The gondola proposal would impact not one, not two, but three roadless areas in and around Little Cottonwood Canyon. The 2001 legislation meant to protect these areas cannot be disregarded. I'm very concerned about the impacts to plant and wildlife that will result from the gondola construction and operation. Please reconsider this proposal in light of the roadless areas impact!</p>	A32.3A; A32.3F; A32.3H

42409	Lindsey, Karen	<p>I 1000% do NOT support the wrongful manipulation of the of the Roadless Rule to attempt to exempt the proposed gondola project from it. Gondola absolutely should NOT be exempt it is permanent, intrusive and will have a negative impact on watershed plant and animal communities and will be in direct conflict with the preservation of these areas that are indeed precious a vital which is the reason the roadless rule is also in place. let's not be looking for reasons to violate what it mandates to create a horrific structure that will service only a small few at a price even far greater than the ridiculous amount it will cost (paid for by unwilling masses) this is WRONG.</p>	A32.3A; A32.3F
41953	Lindsey, Kelley	<p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon that meets more of the citizens of Utah's goals. This project will not improve traffic, and it will permanently negatively alter our wilderness areas that are used daily by so many Utahns. It is not acceptable.</p> <p>I do not support a proposal that would reduce so much land that is used daily by non-resort users, which would come at a great cost to all Utahns and it only benefits those who can afford to go to Snowbird and Alta. This proposal in is complete violation of the "roadless rule", claiming that the gondola is exempt from the "roadless rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I would support lower cost solutions that also uses existing infrastructure, such as increased bus service, occupancy based tolling, and mandatory parking reservations at resorts.</p>	A32.3A; A32.3G
52093	Lindsey, Kierra	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 41150	Linton, James	<p>I'm concerned about the supposedly "objective, data driven" approach to deciding whether or not the final eis warrants the building of a massive project or simply enhancing buses, or none of the above. It seems to me that it is subjective, rather than objective, to decide which data points to pay attention to and which to ignore, and the decision process should reflect that and not present itself as some objective, impersonal affair. It also is concerning because any "data-driven" approach ignores things that are not very well represented in data but still important to UDOT and users of the cottonwood canyons, such as the visual appeal or the wilderness feel of the canyon. It would be simple to choose data points to support the building of a gondola (especially using "projected" data points) that in reality ignore much of the cost and exaggerate benefits, all while presenting themselves as "objective" and thereby taking the decision out of the hands of locals who largely want no gondola or train, or even road widening. If nothing else, please consider that data in your "data-driven" report.</p>	A32.29VV

41485	Lipzinski, Corliss	I am against building the gondola system because I think the state should have a progressive approach to the traffic congestion in the canyon. Spending the millions/billions of dollars it would take to build and maintain the gondola is prohibitive and without consideration of a more ecological and less damaging system to transport people up and down the canyon. Common sense plans like the use of EV buses and scheduling standards to accommodate the finite number of skiers going up and down the canyon seems to be a much better plan than damaging the wilderness with a multitude of towers and structures that only benefit the private companies at the top of the mountain. Also, restrict the number of vehicles and skiers. The resorts know their capacity. When they are full the venue is sold out. This year has been an exceptional year, but it has been only one out of the last 20 or more years. Please plan a common sense approach that will benefit a broader range of the states' residents and not just a select few.	A32.29VV

40010	Lloyd, Jacob	<p>I am pleased to add an additional comment on the infringement of the gondola on IRAs. Enhanced bus service with no change to the road is an option that allows for preservation of all IRAs and should be the preferred option. Presenting the small percentage of area affected by the gondola is truth, but the acreage involved is a better measure of the affected land. The citizens of Salt Lake County have walked these vast spaces. We know the IRAs are huge. That is their value. Please don't pander to the people by emphasizing the percentage area spared by the gondola's destruction. Don't mourn that it may take extra minutes to arrive at precious recreation. Rather, let's preserve the places where we can recreate. I implore UDOT to leave IRAs unaffected and choose the enhanced bus option on the rare days when the canyon needs it. I am opposed to UDOT's current course of action, but I would like to agree with this sentence in your official documentation: "It's important to note that the National Environmental Policy Act (NEPA) process UDOT follows doesn't tally comments as a "yes" or "no" vote like a referendum." It is clear to all of us submitting comments that allowing the will of the people to play a role in the decision would have led to dramatically different results. It is with a voice of resigned futility that I state: Supplemental information quantifies the gondola's measurable interference in IRAs. The gondola plan should be rejected.</p>	A32.3A; A32.3F
39883	lloyd, jim	<p>I think the only viable option is the gondola. I drive SR210 2-3 times a week during the ski season and would gladly use the gondola, I will not ride the bus. In the summer months I would ride the gondola 1-2 times a week.</p>	A32.29VV
42230	Lloyd, Randee	<p>Strongly opposed to a gondola! Please do not ruin our beautiful canyon with a giant machine that will only benefit a few and only on limited days. More busses! Zion Na. Park made it happen and I'm sure we can, too. No gondola.</p>	A32.29VV

39880	Logan, James	<p>We need to complete studies with resort parking lot attendants. I've done so myself this year as I run the Wasatch carpooling group. I'm very consistently hearing that on any given day, 40 to 60% of vehicles have two or less people. I think this is very important information to know because tolling alone could very well have a much greater impact than originally anticipated as people are more willing to take buses and carpool. If we are going to toll, which I fully support, I feel strongly that there should be an affordable option for full-time Utah residents.</p>	A32.29VV
39882	Logan, James	<p>Regardless of what enhanced bus service looks like, we absolutely need to move to more buses with sitting only allowed. The fact that the general sentiment is that you will be standing all the way home from the resort to the parking ride at the end of a long ski day is exactly what keeps so many people from wanting to ride the bus. If you have not ridden the bus down after a busy day, I absolutely recommend that anybody involved in these decisions do so. It is actually pretty miserable. If everybody who would potentially ride the bus KNEW they were guaranteed a seat within a 30 minute wait even during busy times, far more people would be willing to ride the bus. This would also make it much more family-friendly, which right now it absolutely is not. I have no kids but can tell you right now, it looks like it would be a nightmare trying to bring a few young kids with me on the current ski bus which I do ride regularly.</p>	A32.29VV
45793	Logan, Jeremy	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Jeremy Logan</p>	A32.3A; A32.3F

41561	Longe, Dash	<p>Very concerned about cost, timeline and overall usage of the Gondola. There has to be a better solution.</p>	A32.29VV
41563	Longe, Jamie	<p>I am very concerned about the roads required for construction and maintenance of the gondola towers. The disturbance to the watershed will be significant and these roads will require year round road upkeep to allow for continued maintenance and possible evacuation of passengers in the case of an emergency or malfunction. The fact that this is supposed to occur in a roadless area is even more concerning and sets a precedent for further violations. The air quality issue will be a significant problem for the residents at the mouth of the canyon with idling cars waiting to enter a parking facility. This will cause a bottleneck worsened by weather conditions and interlodge as we have seen this year.</p>	A32.3H
40102	Longe, Nicholas	<p>The supplemental EIS gives a rose lense view of the gondola options and already shows evidence of scope creep. The fact that it will have such a large impact on the 3 IRAs in addition to the overall canyon use, watershed, and wildlife and only benefit the 2 resorts and only be in use during the winter is an unacceptable use of public resources. The fact that, according to this supplemental information, the original final EIS incorrectly described the impact on different areas is the first evidence of scope creep that will only increase throughout the project. In the description, they state that all materials will be craned in or helicoptered in for remote tower sites which is an idiotic use of resources and will impact the area beyond the estimates just from personnel and equipment travel to and from the site. The snow sheds, bus expansion, and bus lane, all benefit a larger portion of the community</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		and will have a smaller long term detriment on the canyon. The bus lane even has the benefit of being used as a bike lane in the summer which is a massive boon due to the extremely tiny shoulders currently on the canyon road. The supplemental EIS already points to the creeping expansion of the gondola scope, and from its description, it is already an unacceptable impact on the canyon for the short season of use it will experience, the small section of canyon users it will benefit, the fact that it is only tailored to 2 business but still will cost >\$500 million at conservative estimates to say nothing of what it will cost the public to use the system they have already paid for with taxes. Overall, the gondola does not make sense regarding economics, environmental impact, recreation, or public benefit and would be irresponsible to implement.

		<p>backcountry skiing and hiking in the area—all things the public is completely entitled to enjoy on our lands.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as “Roadless,” let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few individuals patronizing the for-profit resorts at taxpayers' cost. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. It also ignores the infrastructure that will support the towers, such as service roads and the inevitable destruction that will take place as the towers are installed.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>We already have busses. All we need to do is improve the system—higher frequency, low (or free) cost, long hours of availability. Make the busses irresistible--make them less expensive and less of a hassle than driving. THEN the traffic problem will be alleviated once and for all.</p> <p>But even if it weren't—even if we had no human-made solution to solve the congestion—I'd argue it STILL would not be worth destroying the very natural landscapes people go to the mountains to enjoy for the sake of accommodating more cars. We go to appreciate and recreate in the mountains. Tearing those forests apart isn't a reasonable cost to prime the pipeline of more humans traveling through.</p> <p>Thank you for considering the public's strong majority opinion in this matter. We won't let it rest till the majority is heard and the mountains themselves are prioritized above resort profit.</p> <p>Regards, Bethany Lopez</p>

		locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Heidi Lorscheider	
40300	Lortsher, Emery	To whom it may concern: I am a native Utahn and have been recreating in the cottonwood canyon's for most of my life. I am strongly opposed to the addition of a gondola in our beautiful canyon for a number of reasons. We do NOT need a gondola! We need increased bussing and shuttle service. This alteration will significantly degrade the natural environment permanently. Sincerely Emery L Lorthser	A32.29VV
53062	Losavio, Jennifer	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 		Regards, Taylor Love	
42057	Lovegrove, Andrew	Do NOT approve a Gondola! Bad idea! The problem solved for keeping cars out of the canyon will now move the massive congestion and pollution to the parking lots at the gondola base which will further destroy the Cottonwood Heights and Sandy neighborhoods. Widen the canyon road to 3 lanes and allow two lanes up in winter am and two lanes down in the pm, or allocate extra lane to only buses. What happens on gondola if it stops or shutdown for an extended time with a family having little kids who have to use the bathroom..good luck with that?!?!	A32.29VV

54932	Lowe, Lydia	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Lydia Lowe</p>	A32.3A; A32.3F

42076	Ludema, Michelle	<p>As someone that grew up hiking, snowboarding, and visiting the wildflowers in Little Cottonwood Canyon, I urge UDOT to prioritize infrastructure that has minimal impact on the environment when aiming to reduce winter traffic congestion in LCC.</p> <p>The current phased approach seems sound, employing every low impact avenue to reduce traffic congestion, including disincentives for driving (tolling and carpool only winter parking at the resorts) and incentives and increased funding for public transit via busses. However, a gondola should still be taken off the table. Trying to fit as many people as possible into our canyons for the economic benefit of two ski resorts, paid for by Utahns across the state, is not sustainable and will not solve the congestion issues we have throughout the Wasatch during the winter time.</p> <p>I appreciate the time and effort UDOT has put into listening and gathering input and hope you will heavily consider not just traffic needs, but a solution that will best protect this beautiful public land we all share. After all, LCC is more than just ski resorts.</p>	A32.29VV

41669	Lunceford, Laura	<p>I submitted comments earlier on UDOT's 'preferred' option of building a gondola through the canyon, but I felt the need to again write that I believe this is not only an environmental scar on our canyons, but it's nothing more than a taxpayer funded boondoggle that benefits ski resorts and the wealthy who can (still) afford the sport. People have provided many excellent alternatives that would cost a tiny proportion of the amount 'estimated' to build and maintain a gondola - to say nothing of the parking nightmare at the base. We live in Sandy just off Wasatch Boulevard, and the notion that you can put 2,500 cars in this area without massive parking, traffic and pollution issues is just inane. Furthermore, we all know that this is going to end up costing at least double the \$500M estimate. This massive eyesore is more likely to cost closer to \$1B (exactly like the new prison) because this is going to be an engineering nightmare and no one knows exactly how difficult and costly this is likely to become. Frankly, we should all be outraged at yet another use of massive amounts of taxpayer dollars for more 'corporate welfare'. Why anyone even asks for our opinion is a curiosity to me, because we all know the decision has already been made because there are many people who will benefit financially from this idiocy. I'd like everyone to imagine what we could actually do with \$1B other than this. We know that we could purchase new electric buses, implement a reservation system, and charge a fee for parking as well. Finally, why don't we simply limit the number of skiers/snowboarders that are allowed at the ski resorts at any given time.</p>	A32.29VV

		Just a side note here, has anyone considered the fact that by the time this monstrosity is actually built, it's unlikely to be needed since we won't have enough snow to ski on?

39833	Lyng, Hunter	I do not a gondola in LCC	A32.29VV
42307	Lynn Bennion, Gay	<p>While I appreciate UDOT making the effort to review the impact of the Gondola B and other options for transportation changes in Little Cottonwood Canyon, I do not agree with the conclusion that Roadless Areas would not be impacted by Gondola B, which is the current option favored by UDOT.</p> <p>Gondola B would require towers in protected roadless areas and would permanently impact the wilderness areas negatively in regard to clean water, wildlife, recreation and scenic enjoyment. This is a rugged, wild canyon that would be scarred by the gondola and necessary maintenance access.</p> <p>As we continue to expand roads throughout our state due to growth, wild natural areas like the areas that would be impacted by Gondola B need to be protected. The height of the gondola towers would require night-time lighting. Impacts to Tanner Campground and Roadless Areas would be permanent and extremely negative, reducing the pristine wilderness we currently experience in these areas of Little Cottonwood Canyon.</p> <p>I strongly disagree with UDOT's conclusion that Gondola B would not have significant impact on Roadless Areas.</p> <p>As representative for Little Cottonwood Canyon, Alta, and most of Cottonwood Heights, I talk with hundreds of residents on their doorsteps and at town halls, and I receive emails from many others. The vast majority of local residents want the year round, trailhead stops that are envisioned by the Big Cottonwood Canyon MAP.</p> <p>I appreciate the effort and study that has been given on this topic, but I am concerned that Gondola B will not help with congestion on Wasatch Blvd and will have negative impacts for the beautiful canyon we all treasure.</p>	A.32.3F

42288	M Andrenyak, David	<p>April 18,2023</p> <p>Utah Department of Transportation:</p> <p>Hello :</p> <p>I am David Andrenyak. I have been a resident of Salt Lake City Utah for over 35 years I value the beauty of the Central Wasatch including Little Cottonwood Canyon (LCC). I, also recognize the importance of LCC as a source of drinking water for the Salt Lake Valley. I am submitting some comments on the Supplemental Information Report - Assessment of the Roadless Conservation Rule for the Final EIS Alternatives (LCC). The Supplemental Report recognizes that Roadless Areas in National Forrests are preserved to protect high quality scenery, especially scenery with natural appearing landscapes (Section 4.1). The natural beauty of LCC that includes White Pine, Twin Peaks, and Lone Peak IRAs needs to be preserved. The proposed gondola system will ruin the beauty of LCC. I feel strongly that there will be significant negative visual impacts from towers, cables, and gondola cars.</p>	A32.3A; A32.3F

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>Mitigation measures such as non reflective cables, non reflective paint, and tower designs that may blend better with the natural surroundings will not hide the gondola. Visitors will still see the gondola structures. Please note that many LCC visitors value natural and primitive experiences. The Supplemental Report also states that the gondola structures have relatively small footprints. I am concerned that the construction and maintenance of the gondola system will also impact an area greater than the gondola structures. The report states that a gondola system is not a road or motor vehicle travel way (example section 4.6.1.1). I feel that the gondola will have negative impacts that will exceed impacts from roads and road construction.</p> <p>I still support year round increased bus transit without road widening. Thank you for considering these comments. Thank you for your service to the State of Utah.</p> <p>Dave Andrenyak Salt Lake City</p>

40008	M, Sean	<p>Building a gondola in an IRA flies in the face of the intent of the Roadless Area designed. The gondola should not and CANNOT be constructed through a designated roadless area. It does not matter that the gondola isn't for automobiles, it is still extremely disruptive to the wilderness area and will ruin the canyon. The idea that it's even necessary is preposterous. Build avalanche snow sheds over the road first and see what that does to traffic. Those alone will probably solve half the problem. The gondola will be a total failure. NOBODY wants to ride a 55 minute gondola. To build it through an inventoried roadless area is to destroy what was intended to be protected, just for the benefit of Alta and Snowbird. The only people who want the gondola are the people who will make money off it! Cancel the gondola!</p>	A32.29VV

40477	Maas, Eliza	<p>The gondola is not the answer!! It is a publicly funded solution that the majority of people will never have the money to access or benefit from. Additionally it will not fix the problem in the canyon! There are other solutions that are more affordable and will actually fix the problem (toll the road with carpooling incentive pricing, add more bases etc). Finally the environmental impact will be massive! We don't need more infrastructure in a canyon whose natural beauty is what attracts so many people to it. NO GONODOLA</p>	A32.29VV

41130	Macfarlane, Robert	<p>The roads and infrastructure for the gondola will cause significant negative impacts on USFS Inventoried Roadless Areas. Construction of the proposed gondola should not take place within the Roadless Areas.</p> <p>I feel the gondola would directly violate the Roadless Rule and take away from many of the qualities that are protected by RACR: clean water, diverse wildlife, breathtaking views. The visual, noise, and watershed impacts would impact a significantly larger percentage of the three roadless areas. The construction of towers in the canyon will cause irreparable damage to the canyon ecosystem. Helicopters will not be capable of foundation excavation as suggested by UDOT. There will be a need for access roads during construction and subsequent maintenance activity. Access to gondola towers in USFS Inventoried Roadless Areas will be required in anticipation of emergency evacuations. Research shows that wire rope systems are not infallible and there will come a time when evacuation and emergency repair will require road access to the towers.</p> <p>UDOT is presenting data on a "worst case, all diesel bus scenario" with mandatory road widening and this is designed to make the bus options look bad. UDOT NEPA process is in error in failing to generate a "best case scenario" using currently available, proven electric buses and no road widening.</p> <p>The proposed gondola towers will be visible and audible from virtually the entire Roadless Areas and from much of the two National Wilderness Areas that closely parallel it – a violation of the intent of RACR.</p> <p>The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of timber within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>A gondola angle station will lie inside a USFS Inventoried Roadless area ¼ mile from the Tanner Flat Campground, a public recreation area. The road to the angle station and paved area would require timber removal and impact visually on campers as shown by UDOT's renderings, and noise pollution will double according to UDOT's FEIS.</p> <p>The gondola angle station would not only pave over a portion of the roadless area, it requires excavation of an EPA superfund site that UDOT's FEIS says is likely contaminated with lead and arsenic. UDOT fails to assess the environmental impact of such a construction in an Inventoried Roadless Area.</p> <p>Even if the gondola system isn't defined as a 'road', it would be built for highway purposes and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan.</p> <ul style="list-style-type: none"> • The Little Cottonwood Canyon watershed is essential to Salt Lake City. The City assessed the proposed gondola's impacts on the watershed to be highly detrimental to the development and continued well-being of the metro area. Also the Gondola will be slow and local will not choose to ride it because of the difficulty of efficiently accessing the base station. • Taxpayers will pay nearly \$1,000 each on average (assuming \$1B total cost and ~1M Utah taxpayers) to support a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, both directly from new roads and a major new transit system in the roadless areas. 42242	Machlis, Mark	<p>Gondola will shift all the problems we have today to a single parking garage on Wasatch. This is a waste of money that does not help Big Cottonwood.</p> <p>Now that the gravel pit has been shown to be riddled with faults, that site can handle helping both canyons.</p>	A32.29VV
42286	Machlis, Mira	<p>I think the solution to the congestion in the canyon is to limit the number of cars and, now that they have found the fault line situation at the gravel pit at the bottom of Big Cottonwood Canyon, that should become the hub for parking for the canyons. If you have to do a gondola, do it from there.</p>	A32.29VV
40205	machol, kennard	<p>As a 55 year lover of LLC I am appalled at the concept of an unsightly gondola paid for by the taxpayers of Utah solely for the benefit of the ski resorts and completely not of any use to the climbers and back country users of which there are a lot, it v ery much seems like the gondola is spending tax dollars exclusively for the well heeled who can aford the resorts with no thought to access for those who are not resort skiers. It also stinks that snowbird quitly purchased the acres that would serve as a base for the gondola. The embarresing old boy network in Utah never stops.....</p>	A32.29VV

There's so much more to Little Cottonwood Canyon than access to Snowbird and Alta, and funneling taxpayer money into a project that solely benefits the resorts and a small subset of customers is not an appropriate answer here. It's possible to implement changes that will also improve access for backcountry users and won't damage existing hiking or climbing areas. Please listen to the many citizens who are begging you to reconsider.</p> <p>Regards, Emily Maclary</p>	A32.3A; A32.3F

45824	MacNaughton, Heidi	<p>To whom it may concern,</p> <p>As a citizen of Salt Lake County who loves our canyons, I wish I had more time and resources to create my own thoughtful and thorough response. I move to Utah to ski in 2009, and now consider it my home forever. I teach outdoor education at a local k-8 independent school. I am heartbroken that the gondola is so seriously being considered as the best solution to this issue. I am 100% in agreement with the response on this form. Please consider rolling and improving the bus system before pursuing the gondola which will only serve resorts during the winter. There are other users year round, not to mention the impact this construction will have on the animals, water, plants, and forever change the landscape of the earth. Please try.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 39440	MacPherson, Scot	<p>1st I am a die hard skier.</p> <p>It is ridiculous to assume tax payer should pay for something like this.</p> <p>They know where the avalanche areas are. Install tunnels in these locations like Colorado and other areas do. The people that businesses and live it the canyons should pay for this upgrade to their real estate. As it will increase the value of their property. Yes, these ski resorts will probably raise their prices for their more premium properties.</p> <p>I have to pay higher property tax for my local improvements.</p> <p>The state isn't paying for a gondola to bring people up the backside of snow basin. Just think how the real estate would increase in Ogden if there was a gondola there to carry up the west side of the mountain to snow basin.</p> <p>I don't ski in either of these sites.</p> <p>The thought spending that much money to improve that area is silly. Need to get more creative. Those people up there can't afford it.</p> <p>If you did it the way your current plan. Everybody up in the canyons will quadruple their investments on the Utah workers.</p> <p>Scot</p>	A32.29VV

40923	Madsen, Melissa	<p>A gondola up the canyon is a irresponsible action. There are many solutions to traffic up the canyon that are affordable and do not damage any of our mountain and canyon and can be taken on by the resorts. For instance they could offer multiple passes that have different start times and end times, thus mitigating the traffic at the resort. A morning pass and an afternoon pass. A gondola is completely unnecessary. Please do not harm our canyons.</p>	A32.29VV
42195	Madsen, Mike	<p>Reasons I oppose the LCC gondola plan:</p> <p>I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected</p>	A32.3A; A32.3F; A32.10G

		<p>areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>

56287	Madsen, Sabrina	<p>To whom it may concern,</p> <p>I am a born and raised Utah resident who has been visiting the canyons all my life. My family is lower income, and rather than ski we simply drive up and find a spot to sit, eat, and enjoy each other's company. I know that the traffic is becoming a problem during the winter, especially these last few years. However, I do not believe that trying to pack even more people up the canyon via gondola is the correct solution. Perhaps we have reached our canyon capacity. Maybe instead of trying to find a way to bring more people up, we need to learn to share and conserve our resources. The resorts make enough money. Do they really need more at the expense of the canyons they already profit off of? I for one don't want the money I pay in taxes to be wrapped up in this project. I'd rather pay for someone to enforce a carpooling rule if people want to ski so badly. We can't have everything we want all the time, and it seems shameful to ruin a canyon forever for all the people who enjoy it just for the sake of two stupid ski resorts. They can go somewhere else.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 		<p>Justifying this decision with the "roadless area" loophole goes against the spirit of the roadless area designation and will ultimately harm this sensitive area.</p> <p>This is a complex issue- it doesn't make sense to choose the most expensive option without at least trying a couple of the cheaper options first: toll the road, create carpool incentives, hire more bus drivers instead of reducing the number of busses by 50%. PLEASE try some of the simpler solutions before going ahead with the unpopular, nonsensical, expensive option that is the gondola.</p>

40190	magiske, kerry	<p>I am against the gondola being built in little Cottonwood Canyon. A more environmentally, friendly and sustainable option would be to use electric buses or low emission buses. I am also concerned about the environmental impact to the canyons, as the gondola is being built, and to the current environment in Little Cottonwood Canyon once the gondola structure goes up. I asked that we not support the building of the gondola due to environmental concerns.</p>	A32.3F; A32.10G
43110	magleby, tegan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40650	Mahler, Anna	<p>I have been following along with this project ever since talking about it in my class in the Wildlands and Wildlife Conservation Program at BYU. I think that the Gondola is the best option for wildlife and the safety of the people. I wish that there could be a way for the ski resorts to subsidize the cost of the ticket. for instance, if i am skiing at Alta and have a pass, I would hope that I can be able to ride up for free and have the resort pay for my ticket on the gondola. I think that this decision needs be more than people not wanting to ruin the view of the canyon and more about what is good for the canyon and the people</p>	A32.29VV

40311	Mahler, Annette	I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.	A32.29VV

39526	Mahre, Suzanne	<p>Little Cottonwood Creek is a source of clean drinking water which is at a premium in Utah. I've for one protest my tax dollars going for this project to benefit Resort owners. I would much rather leave the pristine creek and Canyon. Having lived at the bottom of this canyon all of my life there seem to be so many more closer days with so much less snow. One can only guess it is because you DOT is pushing for the gondola. As a taxpayer let us vote on it.</p>	A32.29VV
39256	Mahre, Suzanne	<p>The traffic and cars will be the same regardless of whether they drive up the canyon or park at the bottom. The gondola would have impact on the environment being that our water comes from little Cottonwood Creek. Also, the gondola is going to require fuel to run it and a financial cost to maintain it. Electric buses would have a lower environmental impact and also a lower maintenance cost to taxpayers. The gondola would only benefit Resort owners at the cost of our taxpayer money. Wouldn't our money be better used for electric buses and preserving any water that we have?</p>	A32.29VV

40046	Malen, Pete	<p>As I understand it, UDOT's view is that the gondola would not violate the USFS Roadless Rule because, according to UDOT, the gondola is not for motor vehicles and any vegetation and timber removal would be incidental. In my view, this is an overly simplistic and disingenuous reading of the rule and the rule, when properly construed, clearly suggests that a project such as the gondola is contrary to the spirit, if not the letter, of the rule. The rule can be found here: https://www.federalregister.gov/documents/2001/01/12/01-726/special-areas-roadless-area-conservation.</p> <p>Notably, the rule states in part that "This final rule prohibits road construction, reconstruction, and timber harvest in inventoried roadless areas because they have the greatest likelihood of altering and fragmenting landscapes, resulting in immediate, long-term loss of roadless area values and characteristics." It seems clear that installation of a gondola, towers, etc. would significantly alter the landscape. There is a wide range of other considerations set forth in the rule, and regardless of the final decision, I would urge UDOT to read and consider the rule, in its entirety, and not simply focus on provisions seemingly favorable, or not unfavorable, to the gondola project.</p>	A32.3A; A32.3I

40459	Malone, Molly	The gondola is a bad call and should absolutely not be exempt from the roadless rule. There are other options for mitigating the traffic, including me favorite, do nothing. The small two lane road is mitigation enough for reducing the number of people that can go up canyon. I think more busy could be nice, reducing the cars. But thinking the gondola is a silver bullet good for the canyon, recreationalists, and SLC is short sited and delusional.	32.3F

40972	Manahan, Aidan	I formally oppose the gondola in little cottonwood canyon. There are many other transportation options that reduce traffic without greatly impacting the aesthetic of the canyon. In addition, I do not believe that a gondola could be installed without a significant negative impact on the watershed in LCC. The traffic problems likely to be caused by installation are also not worth it. Finally, as backcountry access improves, and interest grows, the gondola will not serve a large portion of people recreating in LCC.	A32.29VV

		<p>benefit anyone except the skiers at a mere 2 destinations I believe that this project should not move forward. Not only would very few people benefit from this, but the view project will just cause the problem we are working to fix for multiple years. I agree we should work toward a solution on traffic and air pollution, but I know our money as Utah residents would be better spent in a different solution. As others have mentioned, paying bus drivers more or creating an incentive to carpool would be a better use of our money.</p> <p>So, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 47305	Manuma, Mosiah	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Mosiah Manuma</p>	A32.3A; A32.3F

41646	Marciano, Averi	<p>Still a hard no on the gondola! Making another way to get more people up the canyon is not only greedy but will ruin locals and guests experiences. More crowds rather than simply limiting the number of ticket sales in not the solution. Alta and snowbird are crowded enough, we know there is no way to expand parking up canyon, so why allow more people.</p>	A32.29VV

40253	Margolies, Jesse	<p>I believe the best plan of action for Little Cottonwood Canyon is to increase bussing without widening the road.</p> <p>I was recently at Zion National Park and their bus service through Zion Canyon was exactly what Little Cottonwood Canyon needs. The road was car free, busses came frequently, busses were free, and stopped at all the major trailheads.</p> <p>A gondola is not a good option because it will be costly to build, will not incentivize people to drive, and not do anything to prevent traffic even if it does get ridership. If the gondola were to be "significantly less" than the toll fee of "\$35", the gondola is a per person price not a per car so if you have two people going up the canyon they would still drive because it would be cheaper and faster than finding parking at the mouth of the canyon, waiting in line to buy a gondola ticket, waiting in line to get on the gondola, and then riding up the gondola. Dr. Jim Steenburgh has also pointed out that the gondola towers will be directly in the path of avalanche slides, meaning that the gondola would not be able to operate during or after storms when the road would closed.</p> <p>The gondola is not even close to the best option. Increase bussing and make it free to be equitable and incentivized.</p>	A32.29VV

		<p>Roadless Area Conservation Rule: Overview</p> <p>The Department of Agriculture (USDA) Forest Service requested that UDOT provide supplemental information and analysis regarding impacts of the proposed gondola to Inventoried Roadless Areas under the 2001 RACR. In 2001, the US Forest Service took inventory of roadless areas for their potential to be designated as an "Inventoried Roadless Area" (IRA). This designation prohibits road construction (temporary and permanent), road reconstruction, and timber harvesting in these areas.</p> <p>During the EIS process, UDOT failed to fully examine the impacts of the Roadless Rule. The proposed gondola system would situate towers, angle stations, snowsheds, and clear vegetation within one of the Wasatch's most protected areas. This impacts not just one, but three roadless areas in LCC: Twin Peaks, Lone Peak, and White Pine Roadless Areas. The State of Utah has petitioned the USFS, under the 2005 RACR, to modify the 2001 RACR to remove a number of IRAs from the 2001 Rule and to allow for modifications to other specified areas. Utah's petition is pending; however, it is important to note that Utah has not challenged nor requested modifications to the 2001 RACR for any of the three IRAs in Little Cottonwood Canyon. The full restrictions and intent of the 2001 Roadless Areas rule is in effect for LCC.</p> <p>In general, the RACR seeks to protect the natural and scenic qualities of roadless areas by limiting human activity and development in these areas. The goal is to preserve these areas for future generations to enjoy and to maintain the ecological integrity of the forest ecosystem.</p> <p>There are some exceptions to the RACR:</p> <ol style="list-style-type: none"> 1. Roads needed for public health and safety 2. Roads for resource extraction 3. Roads for authorized use (administrative access to manage forest, access to private land/right of way or for other activities that are deemed to be in the public interest consistent with purposes of the RACR) 4. Roads required for infrastructure maintenance built prior to 2001 <p>It's important to note that any proposed exception to the RACR's prohibition on road construction in roadless areas must be subject to a rigorous review and approval process, including environmental analysis and public input, to ensure that the proposed road construction will not harm the ecological, recreational, and scenic values of roadless areas. These exceptions and modifications to the RACR are relatively rare and are typically subject to strict environmental and regulatory review to ensure that they do not cause undue harm to the natural and scenic resources of the roadless area.</p> <p>The Roadless Rule, in contrast with the Wilderness Act, allows for some types of disturbances. However, we believe it is a flawed interpretation that's open to challenge to suggest the gondola system (towers, snow sheds, angle stations and timber removal) is exempt from the Roadless Rule. These areas have environmental values (e.g. watershed, scenic views, dispersed recreation, timber, vegetation and habitat) that are mandated to be protected under the Roadless Rule and are inherent to LCC, which UDOT's preferred alternative would destroy.</p> <p>We advocate the protection of these inventoried roadless areas which act as a buffer for the designated wilderness areas in the canyon. The proposed gondola should not be exempt from the Roadless Rule. It is a permanent highway project, which we will explain later, that would have negative impacts on our watershed, plant and animal communities, recreation opportunities and more.</p> <p>We assert that UDOT has made recommendations and drawn conclusions within the Supplemental Information Report and the Air Quality Supplemental Information Technical Report based on errors, omissions and inaccurate assessments.</p> <p>Multiple Errors in Roadless Area Characteristics Values Assessment</p> <p>The Final EIS for the Wasatch-Cache National Forest, Forest Plan Revision (USDA Forest Service 2003b) assessed each IRA's roadless area characteristics or values. These values were soil/water/air resources; drinking water sources; biodiversity plant and animal communities; special status species habitat; recreation opportunities (primitive); landscape character/scenic integrity; cultural sites; and unique characteristics. UDOT assessed projected impact of each transportation alternative on the above values within each IRA and compared their assessments against the baseline value ("no action" alternative).</p> <p>For the gondola and all the other transportation options assessed, UDOT recorded, in essence, no negative impact on any of the roadless values over the baseline. None. They rationalize that the gondola would not degrade the roadless values by arguing the gondola's relatively small physical footprint would impact <1% of the total land volume of each IRA.</p>	

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>The logic used in assessing the roadless values by comparing just the physical tower footprint to the total size of each IRA is flawed. It is equivalent to assessing the impact an airport has on its surrounding environment solely based on the size of the runway relative to the size of the state in which resides. This is wrong on so many levels. The specific footprint of the towers are a small part of their total environmental impact. This approach ignores how the gondola's impact reaches far beyond the limits of the measured tower footprint. UDOT's FEIS and Supplemental Report mistakes, incorrectly assesses, or omits to consider the following impacts (several of which will be treated in greater detail):</p> <ol style="list-style-type: none"> 1. There will be roads built and maintained to all towers, contrary to UDOT's assertion, because tower foundations cannot be excavated and filled with concrete by helicopter or crane and after construction every tower will need road access for maintenance, repair, inspections, and emergency operations. 2. Many of the towers will require protective diversionary berms that by necessity will have a much larger footprint than the tower they protect and require extensive scaring beyond the area of tower base. The berms will alter the topography of the watershed — completely omitted by UDOT. 3. The second angle station requires excavation, operation, road access, and paved parking inside an IRA on a former smelter site that is 'likely contaminated' with lead and arsenic and will likely require EPA assessment and remediation; UDOT acknowledges this threat but fails to assess its environmental impact on public health, watershed, and wildlife. 4. While any one tower may be responsible for timber harvesting and road construction on a small percentage of the total IRA land that lies underneath and around the tower and berms, UDOT is proposing 22 towers, 8 in the IRAs, along with 2 angle stations. They will be visible and provide noise pollution thru out the entirety of all three IRAs. All the towers and angle stations taken in total add up to a highly significant impact on all three IRAs. UDOT fails to assess or acknowledge this combined impact. 5. The size of the tower footprint as a percentage of the total IRA is irrelevant in terms of assessing the environmental impact. These giant towers with their elevated noise and visual motion will impact wildlife and recreational experiences far beyond the specific footprint. 6. The snow sheds will require extensive berms to channel snow from a wide area onto the shed. Constructing these berms will create a large scar in the IRAs, much larger than the specific footprint of the berms. They cannot be constructed with just a helicopter or crane. They will require heavy equipment on new roads (temporary or permanent). Once built, the berms will alter surface and ground water flow damaging the watershed over a large area. The berms and sheds will divert wildlife and force it to concentrate at road crossings at the end of the long expanse of snow sheds, thereby raising the danger to both wildlife and motorists. 7. Assessing the gondola's impact on the visual and landscape character value based on just the size of tower base footprints ignores that the gondola is an 8-mile long structure made up of almost 3 towers per mile (22 towers and 2 angle stations) and that along its 8 miles of cable there will be 40 cabins hanging 50 to 210' off the ground. This is much more than a footprint. UDOT significantly underestimates the impact on these IRAs. More on this later. <p>Construction Impact Minimized</p> <p>UDOT fails to mention the full range of road construction necessary to bring heavy equipment and concrete to build the large footings for these big towers within the IRAs. Construction will require timber harvesting, road construction and significant excavation for tower footings, even if the tower sections themselves are airlifted in after roads are constructed to create the foundations. After construction, during the lifetime of gondola operation, UDOT will need to maintain each new tower road to provide access for maintenance, inspection, repair and emergency operations.</p> <p>The portion of the IRAs where gondola towers and angle station construction takes place will have an impact on the environment well beyond just the specific footprint under the road. Visual impacts, noise (UDOT FEIS says it will double the current noise level), watershed, and wildlife impacts will extend far beyond the footprint of the new roads — visual and noise impacts will be felt through a large percentage of the IRAs and into a significant portion of the National Wilderness Areas. While the exact footprint of the snow shed berms themselves may be small, their construction will require removal of timber and vegetation and movement of soil over a much wider area. Channeling snow slides across several chutes onto a narrower snow shed path will also alter and channel the watershed over a much wider area. Because the snow sheds will prevent the passage of wildlife, animals will be channeled around the berms and sheds and concentrated at the ends for road crossings. This new pattern of wildlife movement poses additional risks to both motorists and wildlife. The berms will alter the environment over a far wider area than the small footprint immediately underneath the berms. The Forest Service needs to conduct its own EIS and issue its own ROD to properly assess these non-minimal impacts.</p> <p>The Gondola is a "Road"</p> <p>UDOT claims the construction of a gondola is exempt from the Roadless Rule because it isn't a road for motor vehicles, and that any associated timber cutting and removal would be incidental. It says the snowshed may be exempt because it would promote safety against avalanche hazards. The Forest Service will make the final decision in its Record of Decision for the SR210 (road going up LCC) project.</p>	

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>The process that UDOT is undertaking is a National Environmental Policy Act (NEPA) process and involves transportation analysis for the SR210 highway. In UDOT's opinion the gondola isn't defined as a road, but it would be built for highway purposes and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan. Further, Title 23 U.S. Code § 101 Definitions and declarations of policy: Section (a) (11) Highway, part (B) defines a "highway" as "a right-of-way". U.S. Title 49 Subtitle B/Chapter III/Subchapter B/Part 390/Subpart A/ § 390.5T Definitions: "Highway means any road, street, or way, whether on public or private property, open to public travel". The proposed gondola is clearly a "right-of-way" and a "way" and therefore is a highway under Title 23 and under Title 49. A "highway" is synonymous with a 'public road' per the Federal Motor Carrier Safety Administrations directive: FMCSA-RG-390.5T-Q026, issued 4 April 1997.</p> <p>The gondola is a major transportation system in and of itself. Forty 30-passenger gondola cabins traveling on its defined "byway" follows the same route as SR210 and serves the same purpose of transporting people and material from one location to another. The gondola system is mechanical with a motorized drive system, it has operators, requires periodic maintenance and is subject to breakdowns and downtime. It is projected to transport over 1,000 people per hour traveling over the same route and, as such, constitutes a "road" per the intent of the RACR. One of the stated objectives to be achieved by UDOT's choice of a gondola is to bring an additional 2300 visitors to LCC, just like a "road." And if UDOT had viewed it as a "road," a specific capacity study of the area impacted to support this objective would have been required as part of the EIS</p> <p>Both a road and a gondola are structural forms of transportation and have a physical impact on the environment, requiring the clearing of land and altering natural landscapes. The gondola will impose miles of visual, noise, and wildlife disturbance through most of the IRAs. A gondola, like a road, also requires ongoing maintenance and infrastructure to support its operation. At the low points of the gondola cables, trees will have to be routinely harvested or cut back to provide clear passage for gondola cabins, like a road has to have periodic maintenance. The visual and noise impacts will extend far beyond the line of the gondola cables and cabins, impacting wildlife and recreation in almost all the IRAs as well as the adjoining National Wilderness Areas. The gondola will impose the same impacts as a physical roadway on the IRAs as well as a much larger footprint of impact in terms of noise and visual pollution due to its length and height. It is still a form of transportation that imposes a physical presence on the landscape, and therefore should be subject to the same considerations as a road when it comes to environmental impacts and land-use planning.</p> <p>Full Visual Landscape Integrity Impact Ignored</p> <p>While Scenic Landscape Character and Integrity is just one of the roadless values the RACR is intended to protect it is one of the most prominent from the public's immediate perspective. UDOT drastically downplays the visual impact of 22 towers and 2 angle stations distributed along an eight mile narrow corridor over shadowed by inventoried roadless areas and designated wilderness areas. That is almost 3 towers every mile. Five of these towers specifically will have flashing lights on top per FCC & FAA requirements. UDOT's EIS suggests that all 22 towers may have to be lighted due occasional helicopter traffic in the canyon. This eight miles of LCC is a designated Utah State Scenic Byway that is marketed and visited for of its unique beauty. Scenic integrity is an important aspect of the RACR, which aims to protect the natural beauty and scenic values of inventoried roadless areas on National Forest System lands.</p> <p>The RACR defines scenic integrity as "the degree to which the scenic character of a landscape is undiminished by human disturbance." To protect scenic integrity, the RACR requires that road construction, road reconstruction, and timber harvesting activities in inventoried roadless areas must be consistent with maintaining the natural and undeveloped character of the area. This includes considerations such as avoiding or minimizing visual impacts to the landscape, preserving natural features such as streams and meadows, and minimizing the amount of visible infrastructure such as roads and buildings. Twenty-two 200' towers blend into nothing.</p> <p>Snowbird and UDOT appear to recognize the negative visual impact of 200' tall steel matrixed towers with 40' x 40' concrete bases. They are planning to use single column towers in the vicinity of their hotel structures in place of the massive matrixed structures. They obviously recognize the negative impact the matrixed towers would have on the view shed and that experience on guest experience. Further, UDOT specifically acknowledges in the Supplement Report that "the gondola would introduce elements and/or patterns that would be visibly dominant and would create strong contrast compared with other features in the landscape. A high level of impact was assessed for the impacts of the gondola."</p> <p>The RACR requires that land management agencies conduct visual resource inventories to identify and evaluate the scenic values of roadless areas. These inventories help to identify areas that have high scenic values and should be prioritized for protection under the RACR. Overall, the inclusion of scenic integrity as part of the RACR recognizes the importance of preserving the natural beauty and scenic values of roadless areas, and the role that these areas play in providing aesthetic and recreational benefits to the public. But UDOT attributes no measurable impact on the scenic integrity of the roadless areas from 22 towers and 2 surface angle station building structures. Given the unique nature of this narrow canyon, the towers will be visible from within the IRAs and from the designated National Wilderness Areas that reside within it. 200' towers, regardless of color, blend into nothing. Even with their admission of visual impact, UDOT does not assess a change in its base line scenic roadless value. They err in their assessment that the view shed and landscape character is not significantly impacted.</p> <p>Air Quality Supplemental Focuses on the Wrong Issue</p> <p>The Federal Highway Administration (FHWA) is requiring UDOT to submit additional information to make their project proposal consistent with the regional conformity determination and require that potential local emission impacts are appropriately analyzed and addressed. They are asking UDOT to provide data on using a 14-year old 100% diesel fleet (as opposed to a mix of fuels in the original EIS). We believe this will provide a worst-case comparison to the proposed gondola even though it will use coal-based southern Utah-</p>	

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>generated electricity whose emissions are excluded from the study. UDOT erred when they omitted the electric bus option. UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy. Electric buses are a proven technology, came to Utah five years ago and traveled to the all the major ski resorts in Utah. This demonstration of an electric bus driving to Utah ski areas was documented in a video available to the general public on YouTube.com. Last year a 3rd generation electric bus returned to Utah and demonstrated its capability to travel LCC at posted speed limits with power to spare. The technology is proven and available. UDOT erred in their initial EIS and should be required to generate a "best case scenario" using currently available proven electric bus technology.</p> <p>UDOT "Agency Coordination" Missing Critical Information</p> <p>A third area on which UDOT seeks public comment is entitled "Agency Coordination." To summarize the issue: UDOT must obtain approval from the US Department of Transportation before UDOT can appropriate federal land administered by the US Forest Service (USFS) for several gondola towers and an angle station. The Dept. of Transportation must ask the USFS if it has any objections before allowing UDOT to appropriate the land. The USFS can agree with UDOT's Supplemental EIS report or alternatively the USFS can conduct its own Environmental Impact Study (EIS) and make its own Record of Decision (ROD).</p> <p>UDOT's assessment in their supplemental report states incorrectly that there is minimal to no impact to the LCC Inventoried Roadless Areas despite significant timber removal and road construction for towers and angle station. UDOT ignores the significant potential for impacting the forest and its environs from excavating and operating an angle station within the IRA that sits on a former smelter site and is according to UDOT "likely to be contaminated" with lead and arsenic. This is a crucial flaw in UDOT's assessment. It is imperative that the Forest Service conduct its own environmental assessment, its own EIS, and issue its own ROD.</p> <p>UDOT proposes to construct road access and pave a large area within one of the USFS IRAs to construct and operate a gondola angle station. Besides the normal impacts of timber harvesting and constructing a new road and concrete pad in an IRA, the angle station site resides on top of a former ore smelting operation that, according to UDOT, it is "likely contaminated" with lead and arsenic at a minimum. EPA is aware of the site but has not formally listed it as a super fund site nor planned or conducted any remediation. The EPA's explanation is that they have assumed the site would never be developed for any purpose, lying as it does in an IRA. Because UDOT's FEIS failed to test and assess remediation needs for this site, it is imperative that the USFS request that the EPA conduct an environmental assessment and recommend a plan for remediation. The USFS needs to do its own EIS and ROD subsequent to any EPA required remediation. An accurate environmental assessment cannot be made until the EPA assesses the danger to public health from excavations and operations of the angle station and until after any required remediation occurs. And, under NEPA, part of the environmental impact study needs to include the cumulative impact on land use and resource sustainability along with the social and economic impacts of the proposed transportation project. Since one of UDOT's stated objectives of this project is to increase the daily population by 2300 people it is necessary to understand the cumulative effect of that addition to the environment and surrounding community. Since the UDOT study omitted such an analysis the USFS will need to include a capacity study in their own EIS.</p> <p>Specific Comments on the UDOT Supplemental Reports</p> <ol style="list-style-type: none"> 1. IRAs act as a buffer for designated wilderness areas. Any incursion into these areas threatens the wilderness space. The narrow nature of this canyon means that the development of any infrastructure in the roadless areas will have a visual or residual impact on the wilderness experience as well as that in the inventoried roadless areas. 2. Gondola towers in protected roadless areas are not compatible with the intent of the RACR. The gondola would directly violate the Roadless Rule and take away from many of the qualities users of the National Forest cherish in LCC: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities. 3. Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that Utahns highly value. Conserving IRAs leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in LCC: Twin Peaks, Lone Peak, and White Pine Roadless Areas. This goes against everything the 2001 Roadless Rule is intended to do. 4. With an angle station ¼ from the Tanner Flat Camp Ground noise from the transfer station (drive motors, decoupling & reconnecting procedures) will be new noise pollution introduced into the camping environment additional to that which might be currently experienced. Camping and picnicking will not be the same. 5. Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. Our community needs an accurate EIS to be conducted by the USFS to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored when we are building into Roadless Areas? 6. FoLCC cannot support the accuracy and validity of an EIS that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. We urge UDOT, USFS, FHWA, and the Secretary of Transportation to say no to a gondola in LCC because of the impacts to the Roadless Rule. 7. The LCC watershed is essential to tens of thousands of people in Salt Lake County. Salt Lake City assessed the proposed gondola's impacts on the watershed from new roads, timber harvesting, constructed berms altering the movement of both ground and subsurface water.

		8. A gondola angle station will lie inside a USFS Inventoried Roadless area ¼ mile from the Tanner Flat Campground, a public recreation area. The road to the angle station and paved area would require timber removal and impact visually on campers as shown by UDOT's renderings, and noise pollution will double according to UDOT's FEIS. Just the act of building angle station structures in a Roadless Area would have significant impact on the visual integrity of the area and should be disallowed.	
39407	Markewitz, Eric	No gondola. Either improved bussing solution is better and isn't a massive eyesore. While the current state of parking and traffic can be frustrating I believe we need to start thinking of them as natural limits on how many people can safely and comfortably enjoy the resorts at any one time. The gondola would bring many more people up to the resorts that already have long lift and food lines on busy days. At the end of the day these two resorts cannot serve an unlimited amount of people and are already near their maximum. Adding another several thousand a day won't improve the situation. Don't ruin the canyon - no gondola.	A32.29VV
42225	Markey, Kersti	Public funds should not go to special interest projects like this. Not to mention the damage to the canyon for the rest of us non skiers. While on the surface it seems like a plausible solution, the more I find out about this project, the more it stinks.	A32.29VV
55826	Markey, Susan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Susan Markey</p>	A32.3A; A32.3F

46852	Martell, Tara	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it makes the canyon more elite and used by only a select few. This is not who we want to be in Utah.</p> <p>So many Utahns oppose this and yet you are still proceeding. Have we not looked at a bus lane with up and down reversal during peak times, what about a light rail on the road that can move more people. The idea that the gondola costs so much per ride and moves so few people every hour is not viable and seems there are better options. Never mind the environmental impact, it just seems if we</p>	A32.29VV

		<p>look at the problem statement, the gondola doesn't actually solve it.</p> <p>The bus solution today is abominable, like you aren't even trying. 'Driver shortage' so each bus comes infrequently and already full-of course that isn't working.</p> <p>A simple, low stakes solution- add a third lane. In the morning, the lane for busses only goes up the canyon, blowing past the traffic. They can come down in then regular lane. In the afternoon the bus lane comes downhill. Some are specific to Alta and some are specific to snowbird so there is no stop. Make it a better experience to ride the bus than drive and then people will.</p> <p>I just can't understand why you are proceeding when so many Utahns oppose. Feels like this has become a 'pet project' and is about 'winning' rather than finding the BEST solution to solve the issue at hand. You are making the canyon elitist and only available to the wealthy, which will in turn be only used by those out of state. We can do better udot. I know you have smart and innovative people. Please demonstrate good leadership that finds common ground and creative solutioning.</p> <p>Regards, Tara Martell</p>

		<p>resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, John Martin</p>	
39498	Martin, Justin	<p>I'm writing to express my opposition to the proposed gondola construction in Little Cottonwood Canyon. I feel like it'll be a huge expense to the taxpayers and mostly benefit the upper class who visit the ski resorts. The ski resorts should be required to contribute more to the cost of these improvements instead of relying solely on public funds.</p> <p>Moreover, I'm skeptical of the cost estimates for the improved buses. I believe that it's possible to substantially improve the bus system with a budget of \$100 million or less. Buses are a better option than a gondola because they can be used for other purposes during low demand periods, such as in the summer months. They can then be redirected back to the ski resorts in the canyon when there is a greater demand.</p> <p>In addition, energy-efficient buses can be used to reduce or eliminate emissions in the canyon. This would be a more cost-effective and environmentally friendly solution than building a gondola. I strongly urge the project team to consider these factors and prioritize the needs of the community and the environment in their decision-making process.</p> <p>I'm in favor of a lower budget bus option than what is currently being proposed.</p> <p>Thanks for your attention.</p>	A32.29VV

44250	Martindale, Sydney	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Sydney Martindale</p>	A32.3A; A32.3F

39450	Martineau, Michelle	<p>I am a Cottonwood Heights resident and my family is directly impacted by the traffic and decisions being made to change (or not change) the transit in Little Cottonwood Canyon. My home is at the top of Daneborg Dr and next to Wasatch Blvd. I see the amount of traffic driving along the road to the canyons not only in the winter, but in the summer too. My son works at Snowbird and would often try to catch the bus (before UTA decreased service to our bus stop because of "driver shortage") and would often get passed by several because the busses were at capacity. People are USING the bus service and actively want to. After reviewing the options, enhanced bus service is the most logical and least expensive solution to our problem. If you have a leak in your plumbing, you don't start out with bulldozing the house. Building a gondola ought to be the last thing we try when all other options have failed.</p> <p>The reason my family moved to Cottonwood Heights five years ago was to be closer to our beloved canyons and for the sense of community in the area. We are raising our children to love the outdoors as much as we do and to be good stewards of the land. But we cannot allow a proposal that taxpayers are footing the bill for and that will only benefits two private corporations, to ignore important conservation rules that have been put in place to protect these wilderness areas. We have an opportunity to be good stewards ourselves and put the interest of the environment we have a duty to protect ahead of that of private companies who only want to profit off of our landscape.</p> <p>As a lover of this amazing ecosystem and as a resident directly impacted by these vital decisions being made, I am begging you to make the most logical choice here and go with enhanced bussing. We don't need to bulldoze the house.</p>	A32.29VV

40489	Maskrey, Brian	As a recent transplant to Utah, I am against the proposal for a Little Cottonwood Gondola. It does not solve the problems of parking, just moves it. It also takes away from the exclusivity that is LCC: of the snow is good, you may not be able to get there. This is assuming that the gondola would run during road closures that happen outside of avalanche control activities. It would absolutely disrupt the nature of the canyon, which is appreciated by all outdoor enthusiasts, who use the road, but enjoy the lack of mechanical noise and nuisance in the canyon	A32.29VV
39544	Maso, S	Please listen to the majority of the citizens of the state who don't want the gondola. If Snowbird resort want the gondola let them pay for it out of their own profit. Expand bus service and incentivize car pools in the winter season.	A32.29VV

40609	Mason, John	<p>I am strongly opposed to the plan to build a gondola in Little Cottonwood Canyon. The visual impact on the canyon would be huge. The gondola towers and cables would be visible from many of the heavily visited areas in the canyon, and would greatly detract from the scenery that people visit the canyon to enjoy. Additionally, it makes no sense to spend such a large amount of public money on a gondola meant to serve two private businesses.</p> <p>I strongly recommend an approach combining road improvements, including snowsheds, enhanced bus service, and peak period tolling. The road already exists and will always be needed to service the canyons. It has the potential to service all canyon users for the entire year with only slight improvements, such as snow sheds, and better mass transit, all at much less expense than the gondola. Such improvements would be limited to modifications to the existing roadway rather than creating new areas of impact. The visual and environmental impacts of an expanded road corridor would be much less than those of the gondola. A full-length canyon gondola will greatly diminish the view shed and is too long and expensive a ride to continually attract non-skiing tourists.</p>	A32.29VV

		Regards, Aaron Mast	
42338	Mastaloudis, Angela	<p>I oppose gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and potentially ruin Little Cottonwood Canyon: contaminating water, threatening wildlife, and endless recreation opportunities.</p> <p>I do not understand how UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, but not the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy. Finally, protecting air and water quality, biodiversity and a sense of isolation are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	A32.3A; A32.3F

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, MAAndy Masters</p>	A32.3A; A32.3F
39291	Masters, Tamara	Thank you for the information. I am opposed to the Gondola and like the less impact and lower cost idea of buses.	A32.29VV
49551	Masterson, Megan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 55864	Mather, Alex	<p>Can't make it any more obvious, WE DONT WANT A GONDOLA. What happens in 5 years to Big Cottonwood? Are we going to build a \$700 million gondola with my tax paying dollars so a few major corporations can make even more money???? And not even service the public lands throughout the canyon, just the greedy scumbags at the top of it!!!! I love it, the fact this idea has gone past the whiteboard is a joke. I'm a 23 year old college student and a few hours of research made it pretty obvious this is not even a considerable solution. Unless you're part of the party making money from it. I can't emphasize it enough, I don't want a gondola, not a single person that I know in fact wants the gondola. So if it isn't money driving this thing why am I having to comment on yet another period for public opinion. YOU ALREADY KNOW WHAT THE PUBLIC WANTS AND ITS NOT A GONDOLA</p> <p>Sent from my iPhone</p>	A32.29VV

55579	Matheson, Heather	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. I'd be thrilled to use more frequent bus options. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I'm an avid backcountry skier, resort skier and trail runner and grew up here in Salt Lake City and hope to continue to enjoy this amazing canyon without marring it permanently.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>Little Cottonwood Canyon is also part of our watershed and we rely on its drinking water. Any construction in this area will impact the watershed and local ecosystem.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. I'm an Alta pass holder and the parking reservation system is great! More parking infrastructure near the base would also help expand bus service and carpooling.</p> <p>We need changes but I urge you to consider the impacts for all canyon users year round, the watershed and forest and wildlife.</p> <p>Regards, Heather Matheson</p>	A32.3A; A32.3F
41910	Matheson, Jack	Public monies should not be used to fund a gondola that serves a minority of residents. Funding should come from fees on users of canyons and resorts.	A32.29VV
