49651	Hawver, Lindsey	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Lindsey Hawver</p>	A32.3A; A32.3F
53411	Hay, Peter	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not serve the community if there are not more stops for people to enjoy the public lands. This should not just serve skiers, but instead serve people year round that want to hike, bike, picnic, climb, etc. If we are to permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area, then it should be for the explicit purpose of increasing equitable access to the outdoors. This gondola has the potential to be a draw to our region and an important resource to families, schools, and to give access to the mountains to people that normally don't see the mountains as for them. Change the plan to create true public access and transit to the outdoors and do something no other state is doing.</p>	A32.3A; A32.3F

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. This gondola should be redesigned for less impact and greater year round service.</p> <p>I understand we need solutions. If this were to happen, I think there should be a consideration of making it the only time something like this is developed. Close the door behind you. Use this project as a way to increase access to that particular canyon and protect the rest. Figure out how to leverage this to not just be environmental destruction and outdoor recreation elitism, but a way to create equity and protect other wilderness as a retribution.</p> <p>I feel both the plan and the outrage for building access are elitist and missing the point. Consider longevity, consider sustainability, consider equity, consider community, consider conservation, and come back to with a plan that is actually functional.</p> <p>Regards, Peter Hay</p>

55813	Hayley, Page	<p>To whom it may concern,</p> <p>I am against the Little Cottonwood Canyon Gondola project as it is an ineffective use of taxpayers dollars towards an ill-advised response to a problem. The gondola will reduce natural resources, destroying access for rock climbers, disrupting activity for other sports, and impact the ecological significance of the area. While I understand the gondola is technically an exception to the "roadless" ruling, I am disappointed by your liberal interpretation of the law. We should seek to preserve access for people present and for generations to come. Please be a part of making the planet both a habitable and equitable place for years to come by limiting the expansion of a gondola which is an undue burden on the taxpayers of Utah and has incalculable impact on the people who utilize it. I encourage you to seek better, more sustainable solutions as we build the world to come.</p> <p>Regards, Page Hayley</p>	A32.3F

39695	Heck, McKenna	<p>I live in Cottonwood Heights, Utah and am writing to let you that I strongly oppose the proposed gondola in Little Cottonwood Canyon. In addition to not solving traffic congestion, threatening our critical watershed, and not serving all users of the canyons, the gondola would be built in three federally protected Roadless Areas where road and recreational construction is typically prohibited.</p> <p>The three protected areas (Twin Peaks, Lone Peak, and White Pine Roadless Areas) would have their beautiful natural qualities diminished by eight gondola towers, snow sheds, angle stations, and extensive vegetation removal. This is an unacceptable proposition, and lower impact alternatives must be considered.</p> <p>Rather than diminishing the roadless characteristics of Little Cottonwood Canyon with gondola construction, I urge you to consider lower-cost solutions that utilize existing infrastructure, like enhanced bus service, carpooling incentives, enforcement of the traction law, and required reservations to park at ski resorts.</p> <p>After all of the widespread opposition from local constituents, communities, and public officials, I'm disappointed that the gondola is still being considered. Please continue to advocate for common sense, environmentally friendly solutions that will benefit ALL canyon users year round.</p> <p>Thank you</p>	A32.3A; A32.3F

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Audrey Hedrick</p>	A32.3A; A32.3F
41977	Hedrick, Chris	<p>I'm not sure you even listen to the public since the comments were majority against the gondola but you all chose that option anyway. Also - you are lying about buses not stopping at trailheads - there is no reason a bus cant stop there whereas the gondola would require additional build to stop at trails heads. The answer to this problem is really simple though I realize the folks at UDOT arent paid to see this option: private cars should be banned from the canyons (minus employees and special access) and buses should run year around with stops at trailheads. The only way to reduce congestion is to REMOVE cars from the canyons and buses are the easiest and most efficient answer. The buses also should be integrated into the rest of the UTA routes so people can ride from their homes straight to the ski resorts. Stop making this so [redacted] difficult.</p>	A32.29VV
47286	Hee, Bryan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Bryan Hee</p>	A32.29VV

40901	Hegewald, Nicole	<p>I DO NOT support building a gondola in little cottonwood canyon. There are other options that do not destroy protected land and cost us tax payers millions for something we won't even use. Just build a train to get people up there. It'll be able to take a lot more people, be much cheaper and not be affected by high winds. This gondola is a huge mistake that we cannot make.</p>	A32.29VV
52545	Hegewald, Olivia	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 42320	Hegmann, Kurt	<p>For 20 years, I have been serving as the Center Director for the Rocky Mountain Center for Occupational and Environmental Health, which has now become Utah's only multi-university program (2SSB172, 2021 G.S.). The center is jointly run by Weber State University and the University of Utah. I also served as President of the American Board of Preventive Medicine (the certifying board for US's public health physicians). However, my comments are in no way to be interpreted as representing either university of the board; these comments are my own.</p> <p>The Environmental Impact Statement has omitted or minimized multiple EIS impacts. These include (1) particulate air pollution, (2) carbon emissions, and (3) impacts on neighborhoods.</p> <p>Impacts on neighborhoods is virtually unaddressed in these documents. The impacts on neighborhoods is another element of EIS. The impacts at the base of the canyons is worst for tram, next worst is buses (though able to improve by a dispersed model) and train is again the best option when not configured out of La Caille. The concept that the La Caille neighborhood can handle thousands of cars is fascinating, irrespective of what the neighbors think. Those impacts of cars, pollution etc. appear unaddressed.</p> <p>The Wasatch Front's main pollution problem is, by far, particulates.</p>	A32.10G

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>The EIS does not include ANY material assessments of the impacts of these proposals on particulate air pollution.</p> <p>Particularly, the greatest amount of travel is required for car travel to existing ski parking lots, followed by buses/trams at canyon mouths. By far the least car travel is required to travel to the nearest train route's existing parking lots tied in throughout the valley, and more importantly, train's abilities to obviate the requirements for rental cars at the airport. These impacts should be part of an EIS.</p> <p>The next impact is the question of carbon emissions. If this is a serious EIS discussion, then carbon emissions should be included. Again, these mirror the para above. Then moreso if the train is electric, as the comparable electric train has been in Switzerland for >100 years.</p> <p>There is only one alternative that can do 30-60s whistle stops at trailheads in summer: train. Is that addressed? No. Again, EIS impacts that are not considered in these documents are major omissions.</p> <p>The current draft states that tram is the "alternative (that) is the most reliable mode of public transit in variable weather conditions and best meets the reliability goal..."</p> <p>https://littlecottonwoodeis.udot.utah.gov/wp-content/uploads/2022/08/LCC_FEIS_Executive_Summary_FINAL_8-31-2022.pdf</p> <p>This is true only when considering bus vs. tram. When train is added in, train becomes the most reliable mode as it can operate in any weather condition whether wind or snow. Impacts in adverse situations is(are) not considered in this EIS, but should be.</p> <p>Costs over a 50-year horizon should be included, as the cumulative costs of the various options are quite different, and those include environmental impacts. This is biased in the "Alternatives Impact Summary" table, which doesn't provide those differences without calculating and estimating them.</p> <p>Lastly, why does the report say the cog train is a capacity of 1,000 per hour when the Gornergrat cog train in Zermatt is listed at 2,500 per hour. And it's electric. The capacity ranges are large differences that then have major differences in EIS impacts above. This also gets at the issue of capacity to change, all of which have major EIS impacts that are currently unaddressed.</p> <p>I trust this is of help. Please do not hesitate to contact me should you have any questions.</p> <p>Kurt Hegmann</p>	
39691	Heidelberger, Loretta	<p>Shameful the gondola plans! Please don't do this! It will destroy the canyon, create misery for those who love the canyon, ruin nature, destroy skiing, & the use & beauty of the canyon for everyone. It will only cause chaos & long waits during ski season. It's totally unnecessary & costly & benefits only a few who own the land. There are other solutions during winter months! (Car pooling, electric buses, & parking reservations).</p>	A32.29VV

40310	Heilweil, Ann	<p>It doesn't make much sense to build a gondola that is only going to serve a small percentage of the population of our valley. Spend our tax dollars in helping all of the people in Utah. Instead, have LOTS of buses. Buses that go directly up to Alta, buses directly up to Snowbird and buses that will stop at different backcountry ski areas. Make it so that people want to take a bus and don't have to wait forever for them. I used to work at Alta early in the morning but had to quit when my early morning bus was taken away. We need buses not only for the winter but for the summer also.</p>	A32.29VV

40261	Heinrich, Theresa	I am a local Utahn living at the base of LCC. I do not support a proposal that would reduce acres of land that are classified as "Roadless", and I do not want my taxes to pay for a gondola project that destroys the beauty of LCC. I say no to a gondola in LCC because of the impacts to the Roadless Rule. We need to preserve the beauty of our canyon.	A32.29VV
55193	Heise, Laura	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. 42343	Heisler, Shauna	I am saddened by the determination of UDOT and UTA to build a gondola in Little Cottonwood Canyon which will benefit no one except the ski resorts, will take longer than bus service, and will scar forest service lands and roadless areas with service roads, huge platforms and towers, overhead lines, and will not even have the possibility to serve trailheads. It will cost far more than the intelligent and readily available use of buses, and sadly, there will never be a way to undo the damage that will be done by creating this. Please listen to the will of the people who will be forced to pay for this folly, have their open lands desecrated, and every time they access Little Cottonwood will see this and remember that the people have no say over a power like UDOT.	A32.29VV

39837	Helgren, Samuel	Building a gondola in a IRA like LCC would certainly violate the RACR, not only in the letter of the law but in spirit. Construction alone would create temporary access roads that would violate it, and permanently alter and damage designated IRA in the Wasatch.	A32.3A; A32.3H; A32.3F

		<p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. In addition, for construction of the gondola foundations to occur roads would have to be constructed through these roadless acres in order for material to be delivered and construction to occur. As an engineer working in the construction industry, I know that construction of this infrastructure could not occur without roads through these areas and cannot fathom these roads being exempt from the "roadless rule".</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Jakob Hemphill</p>

40139	Henderson, Emily	<p>I understand there are many sides to every issue. However the gondola as presented will not help traffic only worsen it. The resorts will not limit parking but keep it the same. The same amount of cars will continue to use the canyons. The gondola will increase traffic to canyons. Also my biggest issue is the funds. DO NOT MAKE THIS A TAX PAYER BURDEN. This should not be shared among all tax payers. ESPECIALLY IF IT WILL BE OPERATED BY PRIVATE PARTIES. No Gondola!!! Or at least not paid for by the community.</p>	A32.29VV

53620	Henderson, Jullian	<p>To whom it may concern,</p> <p>I oppose the gondola for a few reasons. One is that it will only be something used by the wealthy, but it costs every taxpayer to create and maintain the project. I don't see how creating something that spans 8 miles is supposed to be sustainable. With the rising of climate based disasters, this leads me to believe this project will not be in service for long before major repairs or redesign require the modification of the project. This will essentially cost the taxpayers even more to prop up the inevitable failure of a bad-faith attempt.</p> <p>Regards, Jullian Henderson</p>	A32.29VV

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Walker hepner</p>	
43669	Hepworth, Alex	<p>To whom it may concern,</p> <p>I oppose the construction of the LCC gondola. I do not see a viable way to how it can relieve traffic congestion on days where interlodge and high winds are in effect. Not just that, but it doesn't reduce the parking capacity at the cottonwood resorts. Therefore instead of replacing it with the gondola, it instead allows more people to come to the resort while not addressing how many vehicles are still able to go up the canyon.</p> <p>I'm also opposed to using any tax payer funds for a project that only affects two private corporations. Two is which I don't ski at regularly. This seems as a way to increase profits for the resorts at the tax payer's expense, and due to the cost of the project, do not understand how it could be profitable in any way.</p> <p>The destruction of climbing areas and other recreations is at risk of a project that deems itself more important. This is a selfish motive and is inconsiderate of other recreators that enjoy the beauty of the canyon as it is.</p> <p>I urge you to reconsider using bus transit as the best alternative. We as a community would like to see increased time intervals, and the possibility of restricting uphill travel to bus only during peak times. Perhaps adding carpool and bus transit stations further away from the mouth of the canyon. And perhaps adding bus specific lanes outside of the canyon until the mouth to allow them to reach their destination without hassle.</p> <p>Regards, Alex Hepworth</p>	A32.3A; A32.3F

48843	Herich, Alysha	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon and one's that would actually address the ecological devastation that is going on. The gondola will not improve traffic congestion. Instead, it will permanently alter critical and iconic natural recreation areas - Twin Peaks, Lone Peak, and White Pine Roadless Areas - and threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few and only further compromising the quality of the recreation available throughout the canyon. Claiming that the gondola is exempt from the "Roadless Rule" because it's "not technically a road" is a willful and deliberate misinterpretation of the spirit of the rule and undermines the purpose and intent of the rule. Furthermore, as evidenced by this spring, the gondola would not have a significant impact on improving transit through the canyon - even if the gondola had been in place, you cannot conduct avalanche mitigation efforts while it is running. Additionally, the gondola would have more than likely suffered serious damages and thus required serious extensive and expensive repairs which</p>	A32.3G; A32.3A; A32.3F

		<p>increases the overall cost of the project in perpetuity.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Reliable, consistent, and comprehensive, bus schedules work across the world in far larger ski resorts - why can't that solution work here in our beautiful Wasatch? Additionally, outfitting buses with alternative and more ecological power sources would also help in the ecological impacts. Seattle/King county has been able to convert their public transit system to 0 carbon, so we can too.</p> <p>Please save our beautiful canyon. Please do not allow this project to continue.</p> <p>Regards, Alysha Herich</p>

40359	Hermance, Jonathan	<p>I favor a system for making parking reservations online that limit the number of private vehicles allowed in the canyon at any given time to reach specific trailheads, or a resort. When a car leaves the canyon the next vehicle wanting a parking space in that specific location can be allowed to enter the canyon and go park. If the party in a vehicle chooses to ride the bus, they can reserve a parking place at the mouth of the canyon. Improving Hwy 210 where environmentally feasible for better bus service and vehicle parking at trailheads surely is less expensive than new service roads connecting gondola towers that aren't particularly good investments for the Utah taxpayers either. Gondolas may be great for the resorts who should be paying for them. Let's let more Utahans use their canyon with improved traffic control.</p>	A32.29VV

40532	Hermansen, Ryan	<p>A gondola is a most extreme attempt at a solution to fixing traffic issues in LCC. This is not a measured strategy. It does not benefit all in the community yet it requires all of the community to pay for it. Exemptions are being made for the gondola to bypass road laws. A gondola is not what Utahns want. Do not disrupt and forever alter the natural landscape in LCC. There are other, reasonable, less naturally impactful, and affordable options.</p>	A32.29VV

40001	Hertig, Bud	<p>The gondola would be a HUGE mistake. If we're going to spend the money, at least put it towards an idea that people would actually use, like a train. A gondola will not only be an eyesore, but a big inconvenience to actually use. If you can't make it convenient, people won't use it. I know I won't, regardless of how much they charge me to park at the resorts. A train/light rail would be VERY convenient—and the potential for that option are almost limitless (e.g., stop at trailheads, direct access from almost anywhere in the valley from the main TRAX line, etc.). I know rail would cost more, but there are so many upsides the additional costs are worth it and it's practically a no-brainer. Don't blow this, UTA. Rail service up the canyon is what we need—NOT a gondola.</p>	A32.29VV

40053	Hetz, Tara	<p>As a student at the University of Utah, a resident of Salt Lake City, an active outdoor enthusiast and a dedicated female conservationist, I do want the gondola to be built in our protected roadless areas. The roadless rules were made for a reason. They took years to instate. While a gondola, according to the gondola company is not a road, the impacts of building towers, snow sheds and putting in gondola is the same as a road. The gondola would directly violate the Roadless rules. It would take away from many of the qualities that make Little Cottonwood Canyon so special.</p> <p>Protecting these roadless areas is imperative to the future of Utah and the future of this country. We need more places that are protected for wilderness. We are quickly losing spaces to development and increased human population. Let us continue to protect these spaces for future generations. I think we can work together to create a solution that doesn't destroy our protected areas. Building the gondola towers in the Roadless areas will impact over 1,200 species of animals and plants. We need to leave space for these species. Not everything has to be about us as humans.</p> <p>I cannot support a proposal that would reduce ares of land that are classified as "Roadless". I say no to the gondola in LCC because of the impacts to the Roadless Rule.</p> <p>Why can't we first look to possible solutions that wouldn't have such an impact to the canyon. I love taking the bus and took the bus up canyons 2-3 times a week during the winter of 21-22. Now that the bus services have been cut and backcountry ski users can only get off at the resorts requires me to drive my car. Can we look to increasing bus services to reduce the red snakes that everyone hates? How about investing in buses that can carry skis on the outside?</p>	A32.3G; A32.3A; A32.3F

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Brooke hewett</p>	
53172	Hewitt, Justine	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Justine Hewitt</p>	A32.3A; A32.3F

39863	Higginbottom, Mark	<p>I strongly support the gondola for little cottonwood canyon, connecting to both Alta and Snowbird. I live in the adjacent dimple dell neighborhood and ski over 100 days a year, today i drive, i would rather use the gondola. The gondola clearly solves the problem and is not a band aid approach. The problem of course is lack of access to the canyon during storms and high traffic low parking availability on busy days. please expedite the building of this great resource for utah. The mountains are for everyone and greater access to the healthy envirement should be a priority for all of us.</p>	A32.29VV

42356	Higgins, Kelsey	<p>I am not in support of the gondola as the best option to improve air quality and protect the land of LCC. I feel that we can make smaller improvements that can make large impacts such as implementing a fee system like the one used in Millcreek canyon and selecting days where personal vehicles are not allowed in the canyon aside from backcountry access, employee shuttles and canyon transport type vehicles which can be assessed via passes checked by person or by an automated gate. All other visitors to the canyon will need to utilize bussing. This will cause minimal changes to the landscape and can vastly decrease air pollution. The gondola improves access to and from the resorts in the event the road is blocked which has happened many times this year however there has been no information addressing how UDOT snow safety measures would impact operation of the gondola. There has also been no information on how the implementation of the gondola will precipitate a reduction in the reliance on private vehicles as it is not mentioned in conjunction with non emergent road closures. I feel that the entire local community will benefit from many smaller changes rather than the big step of the gondola which will alter some of the wildlife areas of the canyon.</p>	A32.29VV
39721	Higgins, Pauline	<p>Please do not put in a gondola within LCC's wilderness area with all its attendant towers using \$ (millions more \$ than estimated) from taxpayers, most of whom will not be able to afford gondola rides up LCC and will be devastated by the destruction of that pristine wilderness. Use lower cost transit solutions that may be accessed by more people and that preserve the natural beauty of LCC.</p>	A32.3A

As a matter of fact Weber State University has an electric bus that is environmentally friendly. This could be a solution and a cheaper alternative that I would support versus the gondola.</p> <p>Regards, Nate Higueros</p>	
39836	Hilbig, Bridget	<p>This is environmentally irresponsible. Public transportation already exists and is not utilized. The public has said they would rather pay for parking and have the convenience of their own vehicle. They have told you they will not use public transportation unless they are forced to do so. Utah is facing serious environmental concerns with the Great Salt Lake drying, some have called it an "environmental nuclear bomb". It is incredibly irresponsible and financially driven that the state is moving forward with infrastructure that threatens ecosystems before forcing the public to use existing public transportation. Close the canyon to passenger cars (except for those that live there) and force people to utilize the existing public transportation. This should be the first action, not building more.</p>	A32.29VV

41135	Hildebrand, Susan	<p>Even the talk of the gondola and the impact on the environment is a no brainer. And what our tax payer dollars from majority of the population who would never use it. For the select few to reach 2 ski resorts, of which only the ski resorts benefit. The destruction of the beauty of which we are known for, for which many more of the tax paying population would take advantage of (sightseeing up the canyon) would be destroyed. And where would that lead us? Never again to be enjoyed as pure beauty.,it just doesn't make sense. The billions of \$\$\$\$. And I know so many skiers that couldn't be bothered to first get/find pkg down below, then waiting for a shuttle to said gondola, then waiting in line to board it, then to slopes when let off. And to think of the times that it can't be run while doing avy mitigation. What does make sense?!! Please reconsider and take away what is so precious of nature right by our city. We are so so blessed.</p>	A32.29VV

42283	Hilding, Emily	<p>Let's address the elephant in the room. Just because we had a record year with snowfall does not mean our dying Great Salt Lake will be forever revived. How about we use tax payer money to pay for saving the lake instead of destroying Little Cottonwood Canyon with a gondola that services only a small population of the state? Or how about using the money to give our hard working teachers a raise? How about putting money towards education and offering scholarships to our local college students? To me this sounds like a better way to invest in our state than a gondola.</p> <p>As for possible transportation solutions for LCC, here's one for you. I'm an avid bike commuter. I ride my bike year round to and from my house to the University of Utah. Why don't you offer a fleet of electric bikes at the base of LCC for folks to rent to ride up and down the canyon. Think of the environmental benefits this would offer!! Sounds ridiculous? So does a gondola!!</p>	A32.29VV

50000	Hill, Hallie	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Hallie Hill</p>	A32.3A; A32.3F

39337	Hill, Jack	<p>The reanalysis is important to get the decision right. The gondola is NOT the right decision for Little Cottonwood Canyon. During the 22-23 ski season the bus schedule was reduced to every half hour AND the 953 bus route totally taken away. This was an extremely poor decision and appears very political in nature. I was an avid bus rider however the reduced schedule and lack of routes has forced me to drive when I would otherwise not. I plan to continue riding the bus if the enhanced bus option goes into effect. The enhanced bus is THE best way to reduce traffic. The gondola would not be able to run during high avalanche danger effectively providing the same schedule that an enhanced bus route would. Having frequently running busses would provide the best solution with the most minimal impact</p>	A32.29VV

49621	Hille, Matt	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Matt Hille</p>	A32.3A; A32.3F

39753	Hillock, Joe	<p>No gondola! I do not agree with your assessment that because the gondola is not a road the roadless areas gondola infrastructure will be placed on is ok and allowable. No Gondola! It will not solve the problems you say it will solve. It will impact the watershed, wildlife, recreation, and beauty of LCC. It's a money grab by developers and ski resorts. Tax payers should not foot the bill for private gain.</p>	A32.3F

One of the main reasons I love Utah's canyons and skiing in them is the opportunity to connect with nature, and this gondola will degrade that experience for everyone. Please reconsider your plans to move forward on this project!</p> <p>Regards, Ryan Hilton</p>

39946	Hinks, Matt	As a frequent skier at Alta and traveler of the LCC trail, the gondola will add a gross image to the beauty of Little Cottonwood Canyon. The gondola will affect the wildlife, the many bouldering spots, the bike trails and the views of the canyon. Furthermore I do not believe it will have a significant effect on traffic. Seeing the many storms we have gotten this year, I can't imagine how the gondola can run with the amount of wind and snow that we have seen this year. I believe a better solution to the traffic problem would be to make busses more accessible and more reliable to the public. Make people want to go on the busses, that will take cars out of the canyon. You don't need a degree to know that 50 on a bus takes up way less space than 50 cars.	A32.29VV

41915	Hobbs, Ttess	<p>To whom it may concern,</p> <p>THANK YOU for selecting Gondola. I am a homeowner and tax payer in Cottonwood Heights, UT and I support the gondola IMMENSELY. It is critical to accessing LCC and not tying our roads with traffic and emission. PLEASE, PLEASE, PLEASE build the Gondola! I want my son to grow up where he can freely breath the mountain air.</p> <p>Regards, Ttess Hobbs</p>	A32.29VV
40170	Hobfoll, Patti	<p>The construction of a gondola in Little Cottonwood Canyon (LCC) would absolutely violate the roadless rules currently in place for the Lone Peak, Twin Peaks, and White Pine areas. Although not literally a road, the gondola would require construction impact equivalent to a road by removing trees and vegetation, creating permanent structures in roadless areas, creating access roads to construction areas, and negatively impacting the watershed, views, and plant and animal communities. Roadless areas are designated as such to protect sensitive areas and ecosystems, and any permanent human trafficking system blatantly violates and destroys those protections. Complying with the roadless rule is yet one more reason (in a long list) that this gondola project should not be allowed to proceed.</p>	A32.29VV

		Regards, julianne hodes	
40077	Hodges, Justin	Hello, I have lived in Sandy for the past several years and frequently ski Snowbird, Alta, and recreate in LCC. I just want to submit my support for the Gondola B plan. I have ridden the bus and found it to be a rather unpleasant experience. A gondola is an alternative I would be significantly more likely to use. Best Regards, Justin	A32.29VV
41537	Hodgins, Pippa	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Pippa Hodgins	A32.3A; A32.3F
42333	Hodgson, Andrew	Knock it off with the gondola nonsense already and just increase buses/tolls. The gondola is shortsighted, will cause environmental destruction, and is driven by corruption. The ski resorts don't own the canyon, everyone else's recreation and enjoyment of natural (and roadless) spaces shouldn't be dictated by them.	A32.29VV
43859	Hodgson, Danielle	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 40164	Hofmann, Erin	<p>I grew up in Salt Lake City, and now I live in Park City. I rode the bus in high school, drove the canyon when home from college, and now use the bus or drive when I ski BCC/LCC, so I have a lot of experience with transportation in the canyons.</p> <p>The best solution, in my mind, is to offer regular bus service (without widening the roads). We need a serious transportation hub at the base for parking, with bathrooms, coffee bar, etc. How do you encourage people to use the bus and make it easy? Enhanced electric buses with wi-fi would be both user and canyon-friendly. The ski resorts should subsidize this service and make it free. Cars should be charged a toll (make 3+ people free if you like). Add snow sheds for road protection.</p> <p>A gondola is an expensive proposition that doesn't solve many problems, and it's only one canyon. The team is evaluating a 30-year lifespan, but environmental analysis shows we may not have snow in 30 yrs. Preserving the canyons for non-skiing activities will preserve the tourist revenue as ski resorts transition to summer bases, spas, etc.</p> <p>For the budget proposed, the simplest solution is enhanced buses on current roads, tolls, snow sheds, and a transit center at the gravel pit, where we have already allowed removal of significant mountain area.</p>	A32.29VV
39873	Hogan, Bradley	<p>I do not believe a gondola is an effective solution to solve the traffic problem in LCC. Please remove this from any current and future proposals and try alternative options such as an increased bus service and dedicated bus lane. Thanks.</p>	A32.29VV

I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards,	A32.3A; A32.3F
46713	Hoge, Beau	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 39962	Hollenbeck, Trevor	Building a gondola would ruin the beauty of staring across the canyon. Putting in footings for towers to hold this gondola up would kill so many trees and ruin so much the the hiking terrain we have. We don't need more access roads throughout the beautiful mountains.	A32.29VV

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, and enforcement of the traction law. I believe that the locals should have some benefits such as cheaper passes or parking for locals only at the ski resorts. This is given that almost half of all vehicles are out of state and tend to congest the canyons, therefore we could raise the price of tickets or parking for out of state visitors.</p> <p>Regards, Jacob Holmberg</p>	
41160	Holmberg, Jennifer	I vote no to the gondola. It makes no sense financially, environmentally and service wise. Stop the gondola!	A32.29VV

40914	Holmberg, Nannette	I have lived in Salt Lake all my life. I am 75. I dont want tobsee anymore distraction of our beautiful Canyons. We do not need the world's longest gondola. Leave our Canyons alone. Leave the trees alone and listen to the taxpayers that would have to pay for it. We don't want it. It would destroy the Canyons that I love. I can't imagine ever picnicking there again if you do it. Add a few bases and call it good. I think there is somebody behind this that is making alot of money! Its worse than what you have done yo our downtown and roads.	A32.29VV

41102	Holmes, Pat	<p>I am totally against the 22 towers of the gondola project, five of which encroach on the "Roadless" designation within LCC. Each tower base will significantly disrupt and degrade the natural habitat for living creatures, flora and fauna but will also degrade the aesthetic and recreational experience for all canyon users. And, won't achieve the goal of reducing traffic into LCC, nor reduce pollution. When evaluating the gondola against bus service, UDOT needs to compare to natural gas and/or electric buses which is what will be the future by the time the gondola would be built.</p>	A32.3A; A32.10G

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Sam Hoole</p>	
46576	Hooley-Underwood, Mary	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 		Regards, Foster Hopp	
40123	Hoppe, Chris	<p>I'm glad to see UDOT continues to consider all the impacts of each option for improving access to LCC. As our city grows, one of the major attractions is the beauty and access we have to the Wasatch. Moving forward with the Gondola will not be taking proper steps in protecting and sharing that beauty. It is not a scalable solution that grows with our community and only provides access to a small portion of the range. Additionally, construction of the structures would be in violation of the Roadless Area Conservation Rules that are currently in place to protect the ecosystem of our canyons.</p> <p>Moving forward with the proposed gondola would be both a physical scar on the landscape as well as a scar on act of protecting the wildlife and ecosystems we visit the mountains to enjoy.</p>	A32.3F

40151	Horner, Glenn	<p>All of this for ski areas to make more money. This will not lessen vehicle traffic it will add to the over crowding of the ski areas. All the ideas have been around for decades and none ever acted upon. Are the ski areas going to be allow to grow to service the increase skier traffic? One thing for sure needs to happen and that is the government needs to get off its [REDACTED] and do one or all of these ideas and stop studying and wasting tax dollars in yourself. The ski areas are allowed to way over sell season passes and tickets so much that you have to race up the canyons just to get a parking space. There should be ski areas from I-80 to Sundance with access up every canyon on both sides. The SLC valley is the worlds largest ski town with a bunch of little [REDACTED] ski areas the could combine to make the worlds greatest skiing but won't. Now the government is trying to put together little [REDACTED] ideas to make it look like it is doing something and accomplishing nothing.</p>	A32.29VV
39239	Horner, Glenn	<p>First how long is this going on? Leave it to government to turn problem solving into a money sucking long term career. First the ski areas involved in this are not growing lift or trail systems to provide for the increase in skier visits. Why would adding a gondola be necessary. Look I'm in the belief that the Wasatch from I-80 to Sundance should be a huge ski area with many bases and canyons giving access. Until the ski areas expand why expand the the access?</p>	A32.29VV

39377	Houtz, Janet	<p>UDOT,</p> <p>Before making final decisions...please consider that you will be creating an expensive, antiquated gondola system (gondolas are out of style...antiquated). The problem is...once you have installed this system...it will be expensive to maintain and if will be unsightly metal destroying a beautiful canyon/forest...for years and years. Lastly, I noticed tolling is in the works too...for me...it sounds like you are closing off the canyon to those who cannot afford tolls and/or gondolas. Will there be bus service in the mix? Please reconsider this enormous, expensive, encroaching project. A mistake like this may have negative impacts to our county residents.</p> <p>Thank you.</p> <p>Janet</p>	A32.29VV
39726	Houtz, Linda	I am against challenging the integrity of the Roadless Conservation areas. If this was a matter of protecting against fires or other natural disasters, then I think going against the Roadless protections would be worth a consideration. To add human constructions and all the damage to the area that would be involved is not an acceptable reason to challenge the Roadless rule. To challenge the rules for these gondolas that many of us will never ride, some won't be able to afford to ride, for the sake of manmade recreation areas, seems at odds with the values of our state and why people move here. Yes, the revenue created from tourists using the canyon is important do our state, but the gondolas are not the answer. What is next to be compromised?	A32.29VV

39499	Huckin, Teri	<p>Since moving to Utah 34 years ago, my wife, two sons, and I have enjoyed many many days rock climbing on Little Cottonwood Canyon's glorious cliffs and skiing at its two areas. I am aware that the canyon is hosting more and more visitors and that something needs to be done to accommodate them. But a gondola for the well-heeled is NOT the answer. Among other things, its 22 enormous towers and service pads would greatly -- and negatively -- impact the visual beauty of the canyon. And as a local taxpayer I should not have to help</p>	A32.29VV

42256	Hudson, Jane	<p>The proposed gondola should not be exempt from the Roadless Rule and I fully disagree with UDOT's poor interpretation of the rule. It is a permanent highway project that would have negative impacts on our watershed, plant and animal communities, canyon views, recreation opportunities, etc. The proposed gondola system would situate towers, angle stations, snow sheds, and the clearing of vegetation within one of the Wasatch's most protected areas, impacting three roadless areas in Little Cottonwood Canyon. The Forest Service limited road construction in areas protected by RACR because of its negative impacts, such as habitat fragmentation and degradation, reduced water quality for wildlife and human uses, increased erosion and slope instability, and increased human disturbances in remote areas. Although the gondola is not a road, it would have the permanent damaging effects to LCC which has already been deemed worth of protection under RACR.</p>	A32.3A; A32.3F
44293	Hudson, Kyler	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Hall humphrey</p>	
55885	Humphrey, Mia	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Mia Humphrey</p>	A32.3A; A32.3F

41022	Hunsaker, Jim	I favor the enhanced bus service plan and DEFINITELY not the gondola. To spend all this money to make the canyon ugly for the benefit of the two ski resorts is wrong. This should have been voted on by the people of Salt Lake county. I'm a Sandy resident and I think we have not been heard, even though most people are against the gondola. Please no gondola.	A32.29VV

42331	Hunt, Alex	<p>A large number of avalanche snow sheds and tunnels should be built to protect the road (Euro style). This winter has clearly shown that it would drastically reduce the amount of time it would take to do avalanche control. Additionally, multi story parking garages could be constructed at the current parking locations to house a much larger quantity of vehicles and serve as transport hubs for buses. It's well known at this point that the La Caille idea is a political insiders under the table deal that aims to spend taxpayer money to benefit a buddy/buddy relationship.</p> <p>The gondola idea has a kitschy sight seeing uniqueness to it, but ultimately isn't a strong solution. I am not convinced UDOT can efficiently handle a new form of transportation (gondola) that is much more complicated than a bus. Would you want to be stuck in a gondola car waiting to be evacuated from a cabin when it eventually has a mechanical issue?</p>	A32.29VV

		<p>The approach that makes the most sense is banning car traffic during the ski season and requiring skiers to take a bus to the resorts on a reservation basis, much like the bus system in use at Zion National Park. The Zion shuttle probably carries as many, if not more, people per day as a Little Cottonwood Canyon shuttle would.</p>

That would actually help everyone. I'm from South Dakota originally, and somehow they figured out a way to pay for it, plow safely over it, and maintain it. Our plowing service in Sandy also is sub par. Lots of bigger problems.</p> <p>Regards, Sam Hurly</p>	A32.3A; A32.3F

56212	Hutchinson, Brian	<p>To whom it may concern,</p> <p>What would be the "world's longest gondola" is nothing more than an environmental disaster, invoiced to Utah's taxpayers, that keeps on taking. The initial price tag reads \$1.5 billion, but the environmental damage to the canyon and the long-term environmental impacts on the valley represent a far greater cost.</p> <p>The agencies involved have either not done their homework, or not shared the ugly truth of the severe environmental impacts associated with building over twenty 200-foot towers in Little Cottonwood Canyon and large loading stations, parking lots, and other structures.</p> <p>Sold as a way to magically remove 30% of the traffic from the canyon, it is more likely to add at least 30 % to the already-crowded ski runs. Interestingly, the resort developers and managers, the US Forest Service, UDOT and other proponents are not sharing what a 30 % increase in vehicle traffic would do to Salt Lake Valley's air quality. They also have not addressed how such traffic would alter the quality of life for residents along the canyon gateway communities.</p> <p>To support/enforce use of the proposed tram, this group has proposed a warped alteration of a simple canyon-base tolling system, originally designed to promote use of the UTA bus. Rather than a flat fee for a year-round tolling system, this group is slipping in a dynamic-pricing model, for winter-only service to two private ski resorts. Nothing about year-round, managed, public access for all SL Valley citizens.</p> <p>Regards, Brian Hutchinson</p>	A32.29VV

		<p>creating a eyesore for the people who pay more. You may think that this adds to the value of the local outdoor industry (an industry that generates as much gdp as the oil and gas business) but really this hurts it. Think about all the missed sales of climbing gear, and guides. All the backcountry skis. All of this locally bought inventory will be taken away from the local economy. This effects people in the city their livelihood may be built in part to this canyon. I know that my zip code makes this email less "important" but if I can write this passionately about a small area in the world then you might want to think about all the silent people who will always love it more then me and how much it might mean to them.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40343	Ingraham, E	<p>I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored,</p>	A32.3A; A32.3F; A32.10G

40192	Ingram, Emily	<p>Inventoried roadless areas are designated roadless for a reason. Little Cottonwood Canyon is home to countless species of wildlife, invertebrates, plants, fungi, and more that are so vital to the health of our ecosystem. As the Salt Lake Valley and adjacent areas develop so rapidly, we are losing natural sanctuaries at an equally rapid rate. As we destroy these natural areas for human-related development, we lose the ecosystem functions provided by a natural area. More impermeable surfaces mean more run off and less water sinking and slowing into the ground, not replenishing Utah's shrinking water levels as it so badly needs. That is but one of many environmental impacts of breaching an inventoried roadless area. Let's put the money allocated to this project to expanding the bus system, ride-share systems, and other lower-cost, lower-impact alternatives.</p>	A32.3A; A32.3F

42281	J BOUD, MICHAEL	<p>Air quality: Using data from 14-yr old diesel busses is the worse case scenario and disingenuous. How many natural-gas or even electric busses could be purchased with \$1 million or \$2 or \$3 million? These busses would not be permanent eye sores like the gondola towers. Shuttle busses are flexible. Gondola towers are not. Also bus drivers should be paid more than UTA has been paying. That's also a fraction of the cost of a gondola which is costly to operate and maintain post-construction. How is that fair to tax payers? The solution is simple: shuttle busses and ride-share apps/incentivized carpooling. We have to try cheaper and more sensible alternatives. We can do this!</p>	A32.10G
42394	J BOUD, MICHAEL	<p>On both sides of Little Cottonwood Canyon is a buffer zone followed by federally designated wilderness areas. The spirit of the Roadless Rule includes no motorized or mechanized vehicles, including gondolas and its massive towers. Going around the law or misinterpreting it for the benefit of two private ski resorts will lose the trust of Utah residents and be an ongoing tax-burden even after completion of construction of a gondola that may not solve the problem.</p>	A32.3A
42247	J BOUD, MICHAEL	<p>Instead of misinterpreting the roadless rule, I support much lower-cost alternatives such as a robust private shuttle bus system possibly with natural gas vehicles AND carpooling incentives.</p>	A32.3A
42413	J BOUD, MICHAEL	<p>LCC is loved by everyone, no just in-resort skiers and snowboarders. It is wrong to make taxpayers pay for a gondola in a zone protected by the Roadless Rule for 3.5 months of the year when traffic is heavy on weekends and holidays. The 8.5 months of the rest of the year as well as winter days as enjoyed by many others who don't necessarily care to pay high prices at the resorts. We are responsible citizens. we love LCC</p>	A32.29VV
42251	J BOUD, MICHAEL	<p>22 huge towers averaging 200 feet high will destroy the amazing scenic and nature experience of LCC for hikers, bikers, climbers backcountry skiers, leaf peepers, flower enthusiasts, campers, etc. This includes those having entered a federally designated wilderness area. 201 is a Utah Scenic Byway for good reason. Let's keep it that way, not just the 8.5 months outside of ski season but the entire 12 months.</p>	A32.29VV
42268	J BOUD, MICHAEL	<p>Instead of a \$1.4 billion burden for taxpayers that may not work and would forever alter the appearance and experience of LCC lets try RIDE SHARE APPs. This and "slugging" have been highly successful in many metro areas such as DC to reduce traffic. Skiers could meet at a grocery store or shopping ctr parking lot with the help of an app. Women could select carpools with women only. Riders/drivers could have a profile and scoring system to incentivize punctuality, politeness, etc. This and private shuttle busses would be a fraction of the cost of a gondola--and not be PERMANENT eye sores. We can do this!</p>	A32.29VV
42403	J BOUD, MICHAEL	<p>The gondola violates the protected Roadless Rule. LCC is special because of it's diverse plant and wildlife, stunning views, and clean water that our thirsty valley depends on and federally designated wilderness areas that need buffer zones. Elk frequent LCC and are highly sensitive to development. Construction and a subsequent gondola would overstress elk and other wildlife, that depend on the lower elevations of the buffer zone between Hwy 210 and federal wilderness for part of the year.</p>	A32.3A; A32.3F; A32.3I
42396	J BOUD, MICHAEL	<p>Cleaner air and less traffic is possible by limiting the number of skiers at Alta and Snowbird. Skiers would be notified online when a quota is reached. This is only necessary for weekends and holidays. It's already done at Deer Valley and Powder Mtn. Why not Alta and Snowbird? It will also decrease lift lines and enhance the safety and overall skier experience. This in addition to a van/shuttle bus system owned by private companies or UTA and using natural gas and carpooling incentives is a no-brainer.</p>	A32.10G
42410	J BOUD, MICHAEL	<p>Construction in the roadless area will damage a diverse flora and fauna, including 1,200 different plants and animals. Roads will have to be built to construct the towers and maintain them thereafter. The \$1.4 billion cost to taxpayers won't end there due to costly upkeep and the actual operation of the gondola estimated at \$17 to \$200 per individual ride. This money could be used instead for pay raises for teachers, programs for the homeless and hungry, etc. We have much better alternatives for LCC that haven't been tried out in sensible, intelligent ways or at all (private shuttles run by natural gas or electricity and ride-share apps/carpooling incentives, etc. and limiting skiers per day).</p>	A32.3A; A32.10G
44920	J, Cyan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p>	A32.3A; A32.3F

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Cyan J</p>	
40927	J, Megan	<p>The gondola is not a solution to the traffic problem in little Cottonwood canyon. It will cause more problems for the canyon, environment and locals. The gondola only serves the billionaires who own the resorts, not the land or people of Utah.</p>	A32.29VV
40875	J. Santholzer, Robert	<p>As a retired Engineering Geologist do wholeheartedly support the gondola - been a part of the team on the 10 miles long Gotthard tunnel in the Alps.</p> <p>Picking up my skis today at Snowbird, saw the seven avalanches - kudos to the UDOT road crew! Of course, the gondola won't be affected by that.</p> <p>Another great addition to the integrated LCC traffic solution would be an extension of Trax to the P&R of the gondola. Have in mind just one track in both directions similar to the S-train in Sugarhouse. That should ease the bus/car congestion along Canyon Road nicely.</p> <p>Thank you for your consideration.</p> <p>R. J. Santholzer</p>	A32.29VV
53048	Jablonski, Michal	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Michal Jablonski</p>	A32.3A; A32.3F

41246	Jackson, Evan	<p>I and my family strongly oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion as the cost to ride is too high and the time to ride is too long. This discourages usage and will only result in a +\$500 million boondoggle.</p> <p>Furthermore, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas (IRAs), threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing, and hiking in the area.</p> <p>We cannot support a proposal that will reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few.</p> <p>Why are taxpayers expected to foot the bill for a project that will directly benefit privately owned ski resorts? Why does UDOT support a plan the public does not support. Anywhere from 60-90% of the public opposes the gondola? Is special consideration or more weight given to those who like myself and my family that live at the base of the canyon who are directly affected by the project? All the above wrecks of corruption especially when considering who owns the land where the La Caille transit hub will be located. I will lobby the justice department as well as federal and state representatives to investigate UDOT and all those involved for corruption if the plan is approved. I will also lobby to pull all public funding of the</p>	A32.3A; A32.3F

		<p>project if it is selected.</p> <p>Claiming the gondola is exempt from the “Roadless Rule” because it’s not technically a road is a willful misinterpretation of the spirit of the rule. Additionally, there is no denying the gondola directly violates the prohibition of timber harvesting in IRAs. To simply blow this off as “limited” harvesting simply isn’t true. Deforestation and removal of timber will extend beyond the tower areas as crew and equipment will need axis during construction. How does UDOT plan to gain axis to the area without building a “temporary road” and removing trees beyond the area required to build the gondola tower?</p> <p>In addition to the absence of roads, IRAs also contain important resources worth protecting including per UDOT’s own words, “reference landscapes, and natural appearing landscapes with high scenic integrity”. The gondola destroys the scenic value of the entire canyon. It is the equivalent of installing high voltage power lines running the length of the canyon. Would you UDOT or anyone for that matter support such a heinous destruction of our beautiful canyon?</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations (I.E. do more than just rebuild white pine and other popular trailheads. Add bus stops to these areas as well) and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.”</p> <p>Please, listen to the people... “ no gondola”.</p>

42097	Jackson, Tyrone	<p>I support the gondola. Everyone I know supports the gondola. You probably won't get many comments from people like me. Most will come from the rich and powerful living at the base of the canyon. Their sentiment is the classic "not in my backyard" we're all accustomed to hearing. The reality is this gondola will provide increased access to the canyons for people like me...but perhaps that exactly what the rich locals don't want. This project is a slam dunk...increased accessibility, reduced traffic, and good for the environment.</p>	A32.29VV

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Hannah Jacobs</p>	
47584	Jacobs, Madison	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 42321	Jacoby, Rebecca	<p>Using Utah State Funding or any public money to expand access up Little Cottonwood Canyon is not appropriate. The two Ski Resorts Alta and Snowbird are both privately owned and each resorts enjoys its profits. Usage of this very environmentally vulnerable roadway should be limited to reservation only if the growth of recreational use exceeds an uncompromising tilt of use. The bus enhancement with no lane expansion is most palatable. Do Not build all the high walls along Wasatch Blvd. Then you take away all the views of foothills and valley. Read your hearts on these matters. Really evaluate your intent. See what you will accomplish or misdirection for futures ahead!</p>	A32.29VV

39551	James, Bill	<p>Utah DOT is violating the Utah Constitution by not allowing a free market so JPods can privately fund building a transport network in Cottonwood Canyon.</p> <p>Article XII, Section 20 [Free market system as state policy -- Restraint of trade and monopolies prohibited.] It is the policy of the state of Utah that a free market system shall govern trade and commerce in this state to promote the dispersion of economic and political power and the general welfare of all the people.</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>The Boston Tea Party was a demonstration against a government transportation monopoly that triggered a war. To prevent rebuilding that path to war the Federal government limited Federal taxing for "highways and canals" to no more than "post Roads" to deliver letters in defense of free speech. The Utah Constitution is equally clear.</p> <p>Government transportation monopolies are the root cause of Climate Change, oil-dollar funded terrorist attacks on America, and oil-wars cause by importing foreign oil since 1991.</p> <p>Utah DOT blocking JPods building solar-powered transportation networks violates constitutions and is disrespectful of the soldier killed in Iraq and Afghanistan. DOT policies contribute to the requirement of the US to import 6 million barrels of oil a day.</p>

39727	Jamison, Will	<p>I am against the gondola. It is too expensive, skiers would still rather drive, traffic to the parking lot could be horrible, the gondola wouldn't be usable in the wind storms we get, the drive cables would need to be replaced as regular maintenance, and I think it would detract from the beauty of LCC I feel another bus lane with snow sheds in the common slid paths would be better. The buses could pick up riders at many locations, cutting down traffic and pollution throughout the valley. It would be much less expensive to start with and over time another lane could be added if it is needed. The snow sheds could be built in one summer. It doesn't seem right to ask the whole state to pay 600 to 1200 million for skiers to get up one canyon. Last year I rode the ski bus with my snowbird pass. It was convenient, fast, and I used 1/3 as much gas getting there. This year you are running 1/4 as many buses and</p>	A32.29VV

		the traffic has really been worse. The ski areas run out of parking and I'm sure they have lost big revenue and also have upset a lot of local and out of state skiers. I know all this snow has made it tough for travelling. I don't think the gondola is a good idea.

39471	Jansen, David	Why should we the citizens of Utah have to pay for either widening the road to ski resorts that we have no possibility of being able to ski on because the tickets are OUT OF THIS WORLD un-affordable. Only the rick from out of state can ski in Utah! Also It is a horrible destruction of the pristine mountain terrain to put a Gondola up the side of a mountain, and why should disabled persons have to pay to build something that they have no possible ability to use. Government over-reach, And a tax on the disabled with no ability to use or absolutely no representation with regard to equal right to usage. We can't use it but we have to pay for some rich SOB's ride up the canyon. I wouldn't vote for anyone who supports taxing me for something I because of disability can not use!	A32.29VV

41567	Janzen, Robert	Of the presented options, I support widening of the lanes to allow more bus service. I think widening of the lanes to allow more buses and cars is the best alternative, however. A gondola or cog rail would be incredibly inefficient and expensive per actual passenger mile.	A32.29VV

40092	Jaworski, Brian	How convenient the Environmental Impact Review and Statements conveniently forgot to include the building of roads to the sites of the proposed towers for the Gondola. Surely this should have been included. My drinking water is at risk. The building of more roadways and other items puts our water at risk. Is the recreation of a few more important than the needs of the many? Is the sideslip of not taking into considerations the protections of our drinking water just a sideslip or should we expect more items of like to be revealed as time goes on for projects such as this? 39494	Jean Jones, Mary	<p>I am generally pro-gondola and see some things that could be addressed. (1) Could improving the air quality with constructing a gondola be an exception to the RACR prohibitions in IRAs? (2) Could the air quality analysis be run with utilizing electric buses? UTA has already begun to purchase them. (3) Can travel in the canyons be restricted to electric vehicles only (except for road maintenance and emergency response vehicles, which SHOULD also be electric) (4) If the gondola is built to cut down on private car usage, shouldn't the air quality analysis should also consider car travel in the canyons, not just bus transit? Only a small percentage of cars will be electric. (5) Apologies for not researching this decision myself, but does the EIS address salt on the roads and how it affects water quality? Would road maintenance be different if there were a gondola? (6) Again apologies for not researching the answer to this question on my own, but what does emergency transportation look like with a gondola? (7) Wouldn't the gondola contribute to being able to close the road for avalanche mitigation but still allow for traffic to get up and down the canyon? And could less salt be used to keep the roads clear?</p>	A32.29VV

40383	Jenkins, Connor	<p>Above ground projects will not work with the amount of snow we get. Build a tunnel through the mountains to the other of Park City with outlets to different parts in the mountains. Yes, it will be expensive, but it will be a better engineering marvel than the biggest Gondola in the world. The channel tunnel is a monumental engineering feat. Let's do something incredible in Utah that will protect its watershed and it's nature.</p>	A32.29VV

40124	Jenkins, Jared	<p>To UDOT,</p> <p>Again, I thank you that you have taken public comment into consideration during this time period. As I look over all the materials here is the option I prefer.</p> <p>I prefer the expanded bus service. I believe this is the best option for the canyons. It makes sense financially, aesthetically, pollution wise, it protects climbing boulders which are a natural resource that many come to the canyon for, and it can be flexible for future needs, concerns, and users of the canyons.</p> <p>Here are other ideas and concerns I think you should think about:</p> <ol style="list-style-type: none"> 1) Please come up with a solution that also addresses the other users of the canyon year round. The gondola, which I don't support, only helps out downhill skiers at two resorts. An expanded bus system could be used in the summer to support mountain biking, hiking, scenic lookers, and climbing traffic in addition to backcountry skiers in the winter. In fact, I would support a fee station for the canyons and mandatory busing in the summer weekends for the canyons. The busing solution is great because it can flex for different usage periods and users, a gondola cannot. 2) Please prioritize protecting climbing boulders. These are an un-renewable resource that once destroyed never come back. This is why many people come to UT to climb (including myself) on these historic boulders and to enjoy the canyon. 3) A gondola only helps one type of user, during one season, in one canyon. A Bus system can relieve traffic in both canyons if done well. 4) Please make a bus system that stops at multiple trailheads in both canyons for summer weekend and winter backcountry skiing traffic. Take a lesson from Europe, make public transportation work for all types of recreation and seasons for the common man. 5) Please be progressive with the buses, do something cool like all electric buses or CNG buses to even say something cool about how environmentally conscious you are. 6) The gondola will be a permanent eyesore, buses retain the beauty of the canyons. <p>nally, please listen to the people of Salt Lake City. The small cities around the canyons do not support the Gondola, the majority of people in the city do not support the gondola, many in the outdoor industry do not support the gondola. Please listen and do the right thing and don't do the gondola.</p> <p>I would be happy to talk with you personally on these things, please call me to discuss.</p> <p>Thanks, Jared Jenkins, [REDACTED]</p>	A32.29VV

39250	Jensen, Katrina	<p>i skiied a rare weekday yesterday in little cottonwood canyon. i live 14 miles away on the east bench and left my house at 10am. when i arrived at the mouth of the canyon at 10:15 the sign read "Snowbird lots full". my friend and i parked at our friends private condo on the bypass road and if we hadn't had this option could not have skiied snowbird. it took almost an hour to arrive at our destination to travel those few miles bumper to bumper traffic toward the top of the canyon before snowbird. this is unacceptable. if we had a gondola cars would be removed from the road, parking would not be an issue and the skiing experience would improve greatly.</p>	A32.29VV

42199	Jensen, Margie	<p>the cost alone is way negative-for a gondola more buses and better planning---the road parking --yes! control is needed -MOST IMPORTANT a veryserious and COMPREHENSIVE enviromental study on water and wildlife and not changing the roadless rulings</p>	A32.3A
41677	Jensen, Mark	<p>If mountain biking is prohibited on IRA, how does one explain a gondola being allowed?</p>	A32.29VV
42384	Jensen, Matthew	<p>I'm greatly concerned that the the current plan for the gondola requires building the towers in three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. The proposal violates the roadless area conservation rules which prohibit road construction, road reconstruction and timber harvesting.</p> <p>The excavation and foundation work for these towers will require roads for vehicles to build them, going against everything the 2001 Roadless Rule is intended to do. The purpose of a road is to move people. The gondolas purpose is also to move people and therefore also violates the intention of the rule, which is to keep these areas free from human construction and transportation methods.</p> <p>If this gondola is built, it will permanently alter the canyon. It is so important to me that we preserve the beauty of this canyon for future generations to come. If this is built they will look back on us and know that we have failed them.</p> <p>It shows that this plan has not been well considered and studied and should be abandoned in favor of transportation methods that preserve our wild areas, protect our drinking water and preserve the gorgeous views in the canyon.</p> <p>Little cottonwood canyon absolutely needs transportation solutions. But why is the current plan one that only serves two private companies and serves a very small portion of the population. There are many people that use the canyon for many other forms of recreation and to enjoy nature year round, just not during the winter. What's worse is the proposal has planned multiple tower locations in avalanche areas. The gondola will not be able to safely operate at times when there is avalanche risk. This simply is not a transportation method that meets the requirements. Why are we not pursuing transportation methods that use our existing infrastructure like buses. I believe the canyon should be like Zion canyon and only buses are allowed (except for canyon residents and employees of the ski areas). All other visitors can use the buses, and get off at any area of the canyon they are choosing to visit, year round. Not just the ski areas.</p> <p>Please do the right thing and choose a solution like enhanced bus service that does not permanently damage the canyon, doesn't violate the Roadless area rules and fully meets the capacity requirements of the number of visitors.</p>	A32.3A; A32.3F

55780	Jenson, Maresa	<p>To whom it may concern,</p> <p>Merely putting infrastructure in the air rather than on the ground will subvert the intent of the Roadless Rule and not solve the issues at hand. What makes Little Cottonwood Canyon so special is the ability to get into the mountains so quickly, so close to the city. It's a place of refuge from the heat and oppression of the smog below. Looking across the canyon at a humming gondola would completely ruin those experiences. As soon as you are up in the alpine everything goes quiet except for the wind and chirps of the Pikas. This would be lost. I'm sure the hum of the towers and the movement of the gondolas would not only have impact on human aesthetics, but the animals as well. I lived in Alta for three years and visited extensively for another three. What makes this part of the mountains special will be ruined by putting such an eyesore in the middle of a narrow canyon. I would be not motivated to return if this project moves forward as it would be heartbreaking to travel up the canyon that way.</p> <p>There are other rideshare and improvement projects that can help alleviate these issues that do not involve completely changing the landscape. Drilling platforms and other maintenance will also inherently effect the very delicate watershed that supplies the greater Salt Lake Area.</p> <p>Regards, Maresa Jenson</p>	A32.3I

39307	Johnson, Abigail	I would love to see LCC specific buses that run in the winter in their own bus lane. These buses should model Park City and should be completely electric. If there was an option to take the bus and know that I wouldn't be waiting in traffic but could go straight up in the bus lane I would do that every day. We don't want the gondola!!! Give us electric buses and a bus lane!!! Save our canyons!	A32.29VV

47400	Johnson, Brynn	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Brynn Johnson</p>	A32.3A; A32.3F

40501	Johnson, Calum	<p>Utah is prized for its natural beauty and it is for this reason that so many people visit and are moving to the Salt Lake Valley. Skiing is part of our culture here, and there's no denying that it is growing and that something needs to be done in order to curb the effects of traffic congestion and air pollution. The gondola, payed for by everyone will only serve a select few, and will not be an effective solution to the problems the canyons face.</p> <p>Infrastructure that is already in place has not been utilized to its fullest potential. The bus system could be greatly improved for a marginal fraction of the cost that the gondola is anticipated to cost and is a solution that can be tested without going all in.</p> <p>I completely agree that something needs to be done, but the gondola is too large a risk to take and could very well be solved by much less intrusive methods.</p>	A32.29VV

39620	Johnson, Cherise	<p>The mere cost of the gondola is absolutely astonishing. The infrastructure required to build it is very space intensive. The idea of stations along the canyons is visually unappealing and if it has any level of effect on recreation areas it is not reasonable to state that skiing is higher priority than the other recreational activities. I would be incredibly disappointed to see a gondola in the canyon. It's too big of a cost, for too little impact.</p>	A32.29VV

39813	Johnson, Eric	<p>Problem #1 with all these estimates is that it doesn't show any cost covered by the ski resorts. Why is this all tax payer funded?</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>Second, the overall bottleneck issue is never discussed, which is parking. The ski resorts can build parking structures FIRST, and THEN we can look at traffic models. You get parked cars out of the roads/equation, then more buses should be more than enough.</p>

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Erik Johnson</p>	A32.3A; A32.3F

55738	Johnson, Janet	<p>To whom it may concern,</p> <p>My uncle Lester would be horrified to see the nasty plans for not only his beautiful LaCallie, but the brutally nasty proposal for the gondola. It's bad enough his children died over the battle to keep the estate without the insult of turning stolen land into the base of the gondola for the rich. Do not keep this farce of a proposal designed for Utah taxpayers to fund rich tourist invasive sport. Let them ride the bus!!!</p> <p>Regards, Janet Johnson</p>	A32.29VV
41293	Johnson, Janet	<p>I wanted to put my 2 cents worth in on the idea of a Gondola up Little Cottonwood Canyon. My great great grandparents were some of the first settlers of SLC. Over 5 generations of Johnson/Burgoynes have considered LCC part of our roots, our identity and our life. The thought of taxpayers footing the bill for such a horrific concept of the gondola is an assault to our heritage and our sensibility. All over the country when an over loved area such as LCC needs to be protected cars were limited and bus service expanded. There is no reason the same would not work here. That is my requested solution.</p> <p>My parents met and fell in love at Alta, my husband and I met and fell in love at Alta, my daughter has met her sweetheart at Alta, we have spent many beautiful days year around enjoying the beauty and nature of LCC. PLEASE do not let greedy outsiders destroy it for a small group of wealthy tourists.</p> <p>Other reasons why the gondola is a terrible idea include:</p> <p>?The gondola is intended to solve traffic congestion; instead, it could make it worse for all but the select resort users who can afford a ticket.</p> <p>?It will put more people in the canyon without improving transit and without studying how many daily visitors the canyon can handle.</p> <p>?It won't stop at non-resort backcountry trailheads, leaving non-resort users to deal with traffic.</p> <p>?It won't operate during active avalanche mitigation.</p> <p>?It will permanently disrupt trailheads, recreation areas and bouldering areas, marring prized views and causing constant noise.</p> <p>?Construction will cause delays and highway closures for at least 5-10 years.</p> <p>Please speak out for the greater good of those you represent. Thank you!</p> <p>Sincerely, Janet Johnson</p>	A32.29VV

40368	JOHNSON, JANET	<p>The television news is indicating the UDOT expressed the potential of the even though the roads are closed that the gondola could deliver skiers to resorts that are open.</p> <p>That statement is preposterous as well as dangerous. The roads are closed for safety issues. Does this mean that UDOT is willing to risk the life of the people in the gondola cars? UDOT has no idea what tower would or could be hit by an avalanche.</p> <p>This is an attempt to appeal to the people who would not take the time to think through such a ludicrous statement.</p> <p>Initial expense, Upkeep, not to mention the no drive road areas UDOT would be impacting. UDOT will have to drive vehicles on the areas of no impact to build and maintain the towers. That will be breaking the law.</p> <p>NO to the gondola.....</p>	A32.29VV

40285	Johnson, MaryEllen	As a native of Utah (and still a resident of Utah) , I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.	A32.3A
39428	Johnson, MaryEllen	Please uphold the Roadless Rule that has been in place since 2001 in Little Cottonwood Canyon. The people of Utah do NOT want the gondola. Please start listening to us.	A32.3A

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Stephanie johnson</p>	
40723	Johnson, Sydnee	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 41067	Jones, Frederick	<p>Thank you for the opportunity to submit my comment. For context, I began my career working for the Director of the National Forests Program at The Wilderness Society in Washington, D.C., focusing specifically on below-cost timber sales on National Forest lands. I have also been an annual visitor to Alta for over twenty years to hike, ski and fish. Having read through the EIS and Supplemental Information Report, I was surprised and dismayed that none of the three IRAs evaluated were deemed to warrant wilderness designation and the protection they would deserve as such. My comment and sincere wish, based in no small part on my belief in the importance preserving wilderness areas and the solitude they bring, is to take no action at all (No-Action Alternative). I do not have a second "favorite" option because I think all other options are likely to substantially alter one of the</p>	A32.3A; A32.3F; A32.3I

		<p>elements of Alta (and Snowbird) that make them great — their limited accessibility, which is why they have remained in such a relatively undisturbed state all of these years. For what it is worth, my second choice would be the Enhanced Bus option. I do believe that the worst option by far is the Gondola. I noted with interest the comment in the Supplemental Report Section 4.5.2.1 which stated “Views toward the gondola infrastructure, which would be mostly outside the White Pine IRA, would be partially screened by vegetation and topography. Gondola Alternative A would not change the high (5) score for the landscape character and integrity roadless value of the overall White Pine IRA.” Given the time and rigor used in developing this report and the attempts to quantify impacts, I found this observation to be almost entirely without merit or basis in fact; section 6.5 (“Visual Resources”) notwithstanding. Moreover, this comment — and the inherent nature of the grading system used to evaluate the natural value of the three IRAs — reveals potential biases from those involved in preparing the report toward the Gondola solution. The Impact Summary also states, “As described for each alternative in Section 4.0, Environmental Consequences, less than 1% of each of the three IRAs would be affected by any of the action alternatives. Resource impacts within local areas of IRAs would not substantially affect roadless values of the IRAs overall.” This may be technically “true”, but it misses the bigger problem: bringing more and more people into a place that nature designed to hold fewer people. Thank you for all of the work put into this process. My hope and prayer is that cool heads will prevail and see that, contrary to the opinion of some, access to the beautiful places is in fact not broken, and does not need to be fixed.</p>	
45830	Jones, Garrett	<p>To whom it may concern,</p> <p>Keep Utah as native as we possibly can. When we are in nature, we want to be fully engulfed in its beauty. Don't disrupt that aspect of the canyon.</p> <p>Regards, Garrett Jones</p>	A32.29VV

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Isabella Jones</p>	A32.3A; A32.3F
41678	Jones, Jamison	<p>As someone with a degree in geography and having studied Urban Planning, I see the challenges that UDOT faces in providing canyon transit to a rapidly growing urban population. While the gondola plan meets many logistic checkpoints, it deepens the negative environmental impacts on the canyon and sets the stage for further urbanization of a protected roadless area.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snow sheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Have we not considered the future? Little cottonwood canyon is a beautiful natural area that I believe has the potential to reach national monument or national park status in the future. Limiting the development in this area to a road would shape the public mentality and remind people that public transport is the way forward in our rapidly growing valley.</p>	A32.3A; A32.3F
48798	Jones, Jedidiah	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p>	A32.3A; A32.3F

39296	Jones, Julie	<p>After looking at the information in the Supplemental Impact Report and after thinking about the impact a gondola would have in the canyon I strongly support the cog rail train option. It is more long term and has a much less distracting visual impact. Gondolas tend to be nice for about 10 years then they get old and break down and the cable integrity weakens. A train can carry more people and has a much longer life span.</p>	A32.29VV A32.29VV

39682	Jones, Taylor	<p>We need to preserve the environment which we live in. With the current amount of snowfall the removal of trees and other plant life will create issues such as flooding due to lack of natural barriers. As well animal life will be subjected to looking for new places to burrow and when they are exposed they are more likely to die due to harsh weather conditions of animals that are predatory. Please reconsider your decision.</p>	A32.29VV

41694	Jordan Jordan, Dave	<p>If this winter has proven one thing, it's that the current means of access in the LCC is far from ideal. Avalanche control will always need to be done when in the winter. In my mind, it would be next to impossible to build a gondola through over 50 potential slide paths as a solution. I feel very strongly that the proper course of action should be to improve the access road and protect it in vulnerable areas. specifically, this would mean widening the road and covering it with snow sheds and snow dams:</p> <p>https://www.google.com/url?sa=i&url=https%3A%2F%2Fwww.bergmeister.eu%2Fen%2Fproject%2Favalanche-protection-gallery-jaufen-pass-passo-giovo-road_220&psig=AOvVaw0Sr3VugCt1YwJ6u431mlkr&ust=1681912940461000&source=images&cd=vfe&ved=0CA0QjRxqFwoTCMiFsaPMs_4CFQAAAAAdAAAAABAI</p> <p>One rogue slide and the gondola is gone, possibly for the season. supplement the sheds and snow dams with an expanded electric buss system and parking structures in the current locations (for LCC and BCC) and you have a system that will work. It has for decades in European resorts and it will here.</p> <p>Thanks</p>	A32.29VV

41029	Jordan, Robert	<p>Enhanced bus service is the most reasonable and affordable, scalable solution to Cottonwood Canyons mass transit. Snow sheds over roads are another positive that improves access. I'm concerned that UTA has ignored comments critical of the gondola. I am opposed to a gondola as a huge waste of funds to benefit a very, very select group of people. Not only should the resorts pay for the transportation of their customers, they should also not imperil the wilderness nature of the area, and any public transportation system must be designed with access for the entire public (meaning stops other than at the two resorts). To reiterate, a scalable bus option is the best for the central Wasatch.</p>	A32.29VV

40196	Joss, Richard	<p>I am opposed to the Little Cottonwood Canyon gondola.</p> <p>The gondola would be built within three federally protected Roadless Areas (Twin Peaks, Lone Peak, and White Pine roadless areas). Road construction is typically prohibited in these areas to protect air, water, wildlife, and recreation opportunities. The gondola should not qualify as an exception.</p> <p>We should not spend \$500 million to \$1 billion dollars of Utah taxpayer money on a gondola that will only benefit 2 private companies. Considering that less than 10% of the Utah population actually ski, it is wrong to burden the other 90+% of Utah taxpayers with this subsidy.</p>	A32.3G; A32.3F

		<p>The gondola will not significantly reduce traffic in the canyon. The parking lots of the two resorts in the canyon will still be full the same amount of time they are full now. What the gondola will do is potentially double the number of skiers at each resort (via canyon traffic and gondola ridership); which will, again, only benefit 2 private companies.</p> <p>Whatever solution is chosen, there must be stops at trailheads, for use in summer and winter. This would most easily be accomplished with bus service, not a gondola.</p>

39514	Juarez, Olivia	<p>Thank you for the extended information on impacts to the footprint of inventoried roadless areas. The Final EIS Supplemental Information Reports have made it clear that the Enhanced Bus Service Alternative is the best option for efficiently transporting people through the canyon while conserving our precious forested areas. I support the Enhanced Bus Service and oppose other listed alternatives. In the U.S. a football field-sized area of nature is lost every 30 seconds due to conversion for other uses. To address the contemporaneous climate and biodiversity crises threatening the planet and all Utahns, it is imperative that we prioritize development that has the smallest impact on our IRAs. IRA lands and the surrounding ecosystem health are resources that we will not get back once they are diminished. It's important to concede that some IRA disturbance is necessary to reduce traffic and associated vehicle emissions; the reports have shown that the Enhanced Bus Service is the alternative with the smallest impact on woodland habitat and watersheds while transporting a substantial amount people to and fro the canyon.</p> <p>An enhanced bus service would directly reduce the volume of private vehicles on the canyon road leading to reduced GHG emissions from private vehicles. Our community is responsible for also making decisions that will reduce climate pollution, such as vehicle emissions, to protect our ability to live and thrive in Utah for many generations to come. As such, the Enhanced Bus Service has the greatest immediate and long term benefit. The no-action alternative and the additional peak-bus, cog rail, and gondola alternatives will block our infrastructure from allowing more people to benefit from spending time in Little Cottonwood Canyon and addressing the climate and biodiversity crises.</p>	A32.3A; A32.3F

40198	Judd, Christi	PLEASE consider using electric buses in your analysis. Using diesel is not a fair representation of the bus vs gondola impact. The gondola will ruin many acres of pristine roadless lands and have environmental impacts for years to come. The gondola is NOT the choice that is best for the residents of Utah.	A32.29VV
40248	Judd, Jonathan	Completely against the gondola. It should only be a last resort after all other reasonable changes are given time to work first. There is also a huge conflict of interest for this project	A32.29VV
40220	Judd, Kennedi	I believe the gondola project shouldn't happen. It would only create larger more serious problems and harm the environment.	A32.29VV
39849	Judd, Michelle	After reading quite a few of the impact comments, I really believe this is not the solution. I think environmentally friendly buses are the solution. How are they supposed to maintain the gondola without adding more roads to maintain it? The cost is ridiculous to the taxpayers of Utah. As mentioned in a few comments, a shuttle service like Zions is a great idea. I think the impact on the natural habitat in the area doesn't need to be impacted by yet another mode of transportation.	A32.10G

39234	Justice, Kim	<p>I drive up and down the canyons in an electric car. There is limited environmental impact in the canyons when I am driving an electric car. UDOT should acquire and maintain electric buses for the Cottonwood Canyons in any scenario but I propose a scenario where we invest in a fleet of electric busses - like many other cities - and use them with numerous stops and routes up and down the canyons - some to and from the ski resort and some stopping at other locations that people visit. We need non-stop busses up and down the canyons and need to limit individual car traffic. We need to increase compensation paid to the bus drivers, mechanics, etc. so that there is a well managed fleet of buses - the situation this year with insufficient buses was unbelievable in light of the amount of money being considered for a gondola or road expansion. I watched people in long lines waiting for the bus at Brighton or Alta standing out in cold storms and there was no bus for quite awhile. Let's get our act together and make what we have work and do it using electricity which is much cleaner than oil and gas. In order to support the approach for buses, we need to expand parking and build parking structures at the base of the canyons. We also need to restrict the use of the canyons by individual drivers. Charge a toll, require carpooling, have a permanent booth in the winter for tire checking (use the sticker) and make traction control permanent all winter.</p>	A32.29VV

41659	Kalandiak, Alexa	<p>To whom it may concern,</p> <p>I believe that during this EIS process, UDOT failed to asses how constructing a gondola violates the Roadless Rule. The Forest Service designated Roadless Areas where road construction and timber harvesting are prohibited to protect these areas from construction. UDOT claims that building a gondola does not violate the Roadless Rule, because it is not for motor vehicles, and vegetation and timber removal will be "incidental". However, a gondola requires implementing towers, angle stations, snowsheds, and clearing protected vegetation. This will incur over a billion dollars in cost, and claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. It will negatively impact wilderness areas, the wildlife that inhabits LCC, and the watershed.</p> <p>The impacts that a gondola would have on several roadless qualities are underrepresented in this report. It will permanently alter the Twin Peaks, Lone Peak, and White Pine Roadless Areas.</p> <p>When it comes to wildlife, the report only takes into account the small amount of land area the gondola towers will occupy. This fails to account for the impact that gondola cars moving through the air will have on nesting birds, including peregrine falcons. It also fails to account for the overall stress that the presence and noise of the gondola cars (which will take years of construction) will have on animals that live and travel through the canyon. This would be an additional stressor to the already existing SR-210, which will not go away in</p>	A32.3A; A32.3F

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>this plan.</p> <p>Similarly, the report only accounts for the small number of acres the gondola will physically occupy when assessing the impact on Landscape Character and Integrity. In reality, the gondola will negatively impact thousands of acres of naturally appearing area, and will leave a permanent scar on LCC.</p> <p>I do not support a proposal that would reduce acres of land that are classified as "Roadless," and do not support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. I oppose the gondola, and urge those in charge to first consider lower cost and potentially more effective alternatives to reduce the congestion in LCC, that have a lower impact on the roadless environment.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as snowsheds, carpool incentives, year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, better enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Sincerely, Alexa Kalandiak</p>

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Saeey Kamtekar</p>	
39263	kanaley, j	<p>We do NOT want a gondola which will be expensive and an eye sore to our beautiful canyon and only help for 3 busiest ski months of the year. For the other 9 mos it would be an ugly sight that destroys our wilderness scenery.</p>	A32.29VV
39607	kanaley, jim	<p>It seems that DOT has decided a Gondola is best option despite everyone locally not wanting it except for the resorts who are motivated by profit. That leads me to believe that some individuals involved in the decision might be profiting personally from a Gondola. Also does the Gondola option include ski lockers for all pass holders so we dont have to haul all our gear to and from the gondola and shuttles?</p>	A32.29VV
46330	Kancans, Kristaps	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 42263	KAPLAN, GLEN	<p>I am strongly opposed to the Gondola and ANY other such developments within Little Cottonwood Canyon. I believe that historical landmarks and natural resources will be completely destroyed and ruined for ALL future users IF such a project is approved. It makes ZERO sense and it fully seems like a corporate strongarm that blatantly disrespects and countermands the public opinion. There is NO WAY that a Gondola is good for our natural resources nor our outdoor oriented communities. It appears to be completely one-sided in favor of the money hungry corporations and capitalist greed.</p>	A32.29VV

39618	Karlik, LAURIE	<p>Why is Dopylmyer, who makes the cabs, the source for what type of bus can make it up and down the canyon? I think they will direct the results to favor them selling us gondola cabs. Your politics are so blatant.</p> <p>The gondolas in Tahoe are \$60 for a round trip. Even with the price of gas, people will drive or bus rather than pay that price. UDot will need to charge that much just to cover the insurance, and by UDot, I mean me, the tax payer!</p> <p>Take a gondola up, then bus down to a trail?! Does anyone see the lunacy in that?! You spent 36 minutes in the cab plus let's say 5 minutes per side to load and unload for a total of 46 minutes. This time will be repeated for the trip back down so now we are at 1 hr and 32 minutes. Now get into the free shuttle (bus) to ride to a trailhead, let's say 10 minutes of waiting and a 5 minute drive which will occur both directions for a total of 30 minutes. Total now 2 hours and 2 minutes added to your day for your hike. Or you can drive your car to a trailhead from the gondola base, 6-8 minutes. Struggle to park, and walk to trailhead, 15 minutes. Total 46 minutes round trip for the same hike. Hum. Not a hard decision for me as to which use. Sure a vacationer will like it, but not a local! I live on Danish Road. It takes 14 minutes from our garage to the Snowbird parking lot so I base my data on facts. Maybe the real goal is to STOP hikers. Again, blatant, obvious, and most of all WRONG. NO gondola. All of 30 cars waited Saturday at 10:45 am to get up the closed canyon. 30. Not that many.</p>	A32.29VV

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, jason karlsson</p>	
39560	Karlsven, George	<p>I strongly prefer the enhanced bus service with the expanded bus lanes. This service takes half the time to get to Alta than any of the other alternatives and the capital cost is basically the same as all other alternatives except the bus service without expanded lanes.</p>	A32.29VV
45343	Karna, Prekcha	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Prekcha Karna</p>	A32.3A; A32.3F
39371	Karner, Kristin	<p>We live in [REDACTED] and our family recreates in the Cottonwood canyons regularly. We feel strongly, as do the majority of citizens in our neighborhood, that the gondola is not going to adequately solve the congestion problems, but is primarily a tourist attraction for the benefit of Snowbird resort. Perhaps more importantly, the gondola will clearly reduce roadless areas and violate the Roadless Rule. This is unacceptable and illegal.</p> <p>8 gondola towers, snow sheds, 2 angle stations, and vegetation removal would take place within Inventoried Roadless Areas that exist in Little Cottonwood Canyon. The Forest Plan prohibits, road projects and recreation projects, and as the EIS states these projects are for highway purposes.</p> <p>While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas. These places need to be protected!</p> <p>Please realize the folly in this plan. The price tag is unacceptable, both in monetary and environmental costs.</p> <p>Sincerely, your neighbor, Kristin Karner [REDACTED]</p>	A32.3A

39294	Kartman, Michael	<p>A simple solution would be to eliminate all collective passes/Ikon etc... This challenge did not exist until Snowbird & Alta decided to be part of these collectives. Have IKON and Mountain Collective pay for this folly since they have raised the stakes for two mountains that are not resorts!</p> <p>However, another simple solution is to pay for parking and toll the road. But Snowbird wants to develop the L'Caille property and have a stake in the Olympics. This move should cause Snowbird to figure out how to adjust our Valley to suit their purpose(s), not the public!</p> <p>Shame on Snowbird, Shame on UDot and shame on this commission!</p>	A32.29VV

42226	Keith, Jason	<p>April 18, 2023 Utah Department of Transportation (UDOT) 2825 East Cottonwood Parkway, Suite 200 Cottonwood Heights, Utah 84121</p> <p>RE: Access Fund Comments to Utah Department of Transportation's Little Cottonwood Canyon Final Environmental Impact Statement, Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives and the Air Quality Supplemental Information Technical Report</p> <p>UDOT LCC EIS Project Team:</p> <p>The Access Fund welcomes this opportunity to provide comments to the Utah Department of Transportation (UDOT) Final Environmental Impact Statement (FEIS) Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives and the Air Quality Supplemental Information Technical Report (Supplemental Information Reports). Access Fund agrees with the position of the Salt Lake Climber's Alliance that there continues to be critical flaws to the FEIS because the scope of the project is too narrow, and the purpose and need are not satisfied by UDOT's proposed solution. The preferred gondola alternative also conflicts with the 2001 Roadless Rule and Little Cottonwood Canyon contains the White Pine and portions of the Twin Peaks and Lone Peak Inventoried Roadless Areas (IRAs). Access Fund continues to support lesser impactful transportation solutions that include enhanced electric bus service with no roadway widening or large-scale infrastructure, and that runs year-round and stops at trailheads. Such an alternative would serve all user groups in Little Cottonwood Canyon, mitigate traffic problems during the most congested winter months, and not impact Inventoried Roadless Areas.</p>	A32.3A; A32.3F; A32.3H; A32.3I

		<p>The Access Fund The Access Fund is a national advocacy organization whose mission keeps climbing areas open and conserves the climbing environment. A 501(c)(3) nonprofit and accredited land trust representing millions of climbers nationwide in all forms of climbing—rock climbing, ice climbing, mountaineering, and bouldering—the Access Fund is a US climbing advocacy organization with over 25,000 members and 140 local affiliates. Access Fund provides climbing management expertise, stewardship, project-specific funding, and educational outreach. Utah is one of Access Fund’s largest member states and many of our members climb regularly in Little Cottonwood Canyon. For more information about Access Fund, visit www.accessfund.org.</p> <p>Comments Roadless areas are protected under the 2001 Roadless Rule. The 2003 Revised Uinta-Wasatch-Cache Forest Plan allows for some development in selected roadless units; however, the units impacted by UDOT’s gondola alternative are not among those units authorized under the Forest Plan for development. Despite UDOT’s claims in the FEIS and Supplemental Reports, impacts to the IRAs in Little Cottonwood Canyon will not be “incidental” because of necessary extensive construction of gondola infrastructure (and ongoing necessary maintenance) that will impair environmental values that the roadless area designation is supposed to protect. The 2001 Roadless Rule protects specific values or features in inventoried roadless areas: 1) high quality or undisturbed soil, water, and air; 2) sources of public drinking water; 3) Primitive, Semi-Primitive Non-Motorized, and Semi-Primitive Motorized classes of dispersed recreation; and 4) natural appearing landscapes with high scenic quality. UDOT’s gondola alternative impairs all of the values or features that the Roadless Rule requires for protection as it will disturb soils and damage a source of public drinking water, does not qualify as semi-primitive motorized recreation, and clearly impairs the scenic qualities of Little Cottonwood Canyon’s natural landscape.</p> <p>UDOT’s FEIS and Supplemental Reports conflict with the Roadless Rule in the following ways:</p> <ul style="list-style-type: none"> • Do not acknowledge that the gondola would not support recreation except as transportation to privately-owned ski resorts. • Fail to consider the proposed gondola’s immediate negative visual and audio impacts to adjacent designated wilderness areas. • Do not adequately analyze the impacts to the ecology, drinking water quality, and dispersed recreation opportunities within the IRAs. • Fail to account for impacts to visitor use patterns resulting in the IRAs from the gondola’s infrastructure. • Fail to consider impacts to the IRAs from the use of helicopters, temporary roads, and timber cuts during gondola infrastructure construction and subsequent gondola tower access and maintenance needs. <p>For more information on the Access Fund’s position, please also see our past comments opposing UDOT’s gondola proposal dated September 3, 2021; December 17, 2021; January 10, 2022; and October 17, 2022.</p> <p>Access Fund supports the position of the Salt Lake Climbers Alliance and urges UDOT to reconsider its preferred alternative and reexamine a less impactful and cheaper transportation solution centered on expanded bus service combined with other traffic mitigation strategies such as tolling, while also preserving the parking needs of dispersed recreational users throughout the canyon. Such an approach would address the needs of the dispersed recreation community and many others that oppose permanently scarring the historic and highly valued climbing resources and extraordinary natural environment in Little Cottonwood Canyon. Importantly, the lesser impactful transportation options would also not conflict with the 2001 Roadless Rule.</p> <p>Sincerely,</p> <p>Jason Keith Senior Policy Advisor Access Fund</p> <p>Cc: Salt Lake Climbers Alliance</p>

42265	Keller, Brian	<p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p>	A32.3A; A32.3F

39947	Keller, Jemina	<p>I am firmly against the gondola, but I am in favor of an excellent, well routed and scheduled, van system. Provide guaranteed rides in a Van-Share. Work with local parking lots (commercial ie Knutson's Corner Buildings with unused weekend parking) to guarantee pickup times and locations. This can all be handled with an app - times for van pickup and locations. Obvs, do return trips Down the canyon. Let a rider check IN REAL TIME, if there are any standby rides on the app. Come on guys - this would definitely make the car situation better, with using existing infrastructure; some build out with vans/drivers/use authorizations, and a great solution!</p>	A32.29VV

Consider the fallout if your actions as future generations will loathe the choices you make now if this goes forward. Imagine explaining yourself to the ruthless condemnation of your grandchildren and millions of other grandchildren. Do not liken yourselves to those who previously tarnished our natural world and their reputations in order to save a couple bucks.</p> <p>Regards, Camryn Kelley</p>	A32.3A; A32.3F

39531	Kelly, Ryan	<p>It seems as though many of these were known factors, or should have been known factors, considered in the first place, not after public comments drew heightened attention to them. There seems to be a bias toward a tram system, that overlooks environmental issues, cost issues, and the public's dislike of this project, while somehow continually returning to a tram as the "preferred" option. This preference seems to have been pre-determined by UDOT.</p>	A32.29VV

39365	Kemp, Shane	<p>Making changes to the Wilderness Areas/Roadless areas to allow 8 gondola towers, snow sheds, 2 angle stations, and vegetation removal is not mentioned in the "cons" of the Gondola option. The Forest Plan prohibits, road projects and recreation projects, and as the EIS states these projects are for highway purposes.</p> <p>Roadless areas are protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas. These places need to be protected!</p> <p>Finally, the green check marks for many of the Gondola "features" are faulty. Enhanced bus service would do better in all cases except maybe the ability to operate during the highest avalanche danger and if the road is closed. Also, moving the traffic issue from the resorts to LaCaille is not a solution. The true solution is to limit cars in the canyon - less people = less traffic.</p>	A32.3A; A32.3G

52759	Kempf, Elijah	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Elijah Kempf</p>	A32.3A; A32.3F

40338	Kenley, Megan	<p>Not only will this not help the environment but it will also over crowd the ski resorts, making more accidents up on the mountain itself. Lots of other resorts limit the number of people that can go to the resorts with parking permits. Do this for snowbird since Alta already has it and it will naturally force more car pooling and limit the number of cars that can go up. A gondala is not the answer.</p>	A32.29VV

55663	Kenney, jeff	<p>To whom it may concern,</p> <p>I am adamantly against the Little Cottonwood Canyon Gondola project! Please consider lower cost and more effective alternatives to reducing traffic congestion in the canyon.</p> <p>The gondola should not be exempt from the Roadless Rule because roads will need to be constructed to build the towers, plus the towers will permanently alter the landscape, much like a permanent road. It will destroy climbing, hiking, running and backcountry skiing areas.</p> <p>The gondola will not improve traffic congestion, but could make it worse for all but select resort users who can afford the expensive ticket.</p> <p>This year we saw extensive closures of Little Cottonwood. The gondola would not operate during avalanche mitigation so this would not have assisted with delays.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Thank you, Jeff</p> <p>Regards, jeff Kenney</p>	A32.3H; A32.3G A32.3A; A32.3F

39381	Kenney, Sara	<p>The supplemental report is not enough on the gondola plan. With 8 gondola towers, snow sheds, 2 angle stations, and vegetation removal that would take place within Inventoried Roadless Areas that exist in Little Cottonwood Canyon, this plan is detrimental to our wilderness. The Forest Plan prohibits, road projects and recreation projects, and as the EIS states these projects are for highway purposes. UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon.</p> <p>Roadless areas are protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a) it was not in these units and b) not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas. Little Cottonwood Canyon doesn't need anymore roads! This is prime wilderness and needs to be protected. As we've seen this winter, many wildlife come down to the canyons for forage and need every square inch of space.</p> <p>Thanks!</p>	A32.3G; A32.3A; A32.3F
39627	Kennington, Jan	#1 Our city has many more needs than to spend money on a Gondola so that just a few people who ski don't have to sit in traffic. We have too much poverty and hunger in city. We need sustainable affordable housing and transportation . We have HORRIBLE AIR that is either making people sick or killing them. We have the Great Salt Lake that is dying. Do you	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		realize that allowing this to die will reduce our snow which in turn will reduce our water and the ski resorts will be a thing of the past? Climate change is here and we need to do everything we can to mitigate this as without it we will have no snow for the resorts. Giving money to the ski resorts is not the greatest good for the greatest people. Manage the traffic by buses, tolling, and ride sharing. NO GONDOLA!!!	
41117	Kennington, John	<p>Five of the gondola towers will be located in the LCC Roadless Areas designated not to have improvements related to roads, and the gondola project is ONLY justified and designed to alleviate traffic on the existing road accessing the canyon. So, it is ILLEGAL for UDOT to plan and install any gondola infrastructure in these Roadless Areas. And for those towers not installed in the Roadless areas the access and foundation infrastructure could possibly be in the same ILLEGAL situation.</p> <p>UDOT must also use current bus technology for the 2050 timeframe for comparison analysis to the gondola impacts. That is electric and natural gas powered buses should be included in the comparison analyses. An electric bus has already been proven to be capable of successfully operating on the entire route required to service the resort infrastructure in Little Cottonwood Canyon.</p> <p>The City of Cottonwood Heights is firmly against installation of a gondola in LCC, as it will destroy the wilderness characteristics of the Canyon, which is what that area of the Wasatch Front is famous for.</p> <p>Use the \$1.4bn saved by not installing the gondola to improve the traffic situation on Hwy 210 with other, less invasive methods along the Hwy 210 right of way that would be as, or more successful than a gondola, including avoiding a new traffic mess in the area of a proposed bottom terminal for the gondola.</p> <p>Thank you for accepting these most important comments!</p>	A32.3A; A32.3F; A32.10G
39657	Kennington, John	<p>-Installation of a gondola system, with attendant infrastructure, would be inconsistent with the intent of preserving the wilderness qualities of the three involved 'Inventoried Roadless Areas' that it will traverse. As such, installation of such gondola system is in violation of these IRA requirements and is, therefore, illegal.</p> <p>-Outside of the IRA violations, such installation would forever ruin the wilderness qualities of LCC forever. A properly designed Enhanced Bus system would be much cheaper, less invasive to the environment and serve many more canyon locations and users.</p> <p>-No to the Gondola!</p>	A32.3A; A32.3F
39722	Kennington, John	<p>A gondola installation would be in violation of the 3 roadless area's rules that the gondola route would traverse. That is, it would reduce the roadless characteristics of each area, as it would be installed for highway enhancement, which is in specific violation of the roadless rules.</p> <p>For that, and many other reasons, like it would ruin the wilderness characteristics and viewshed of this narrow canyon and it would not move people quickly in and out of the canyon as intended.</p> <p>The existing road right of way, with a properly designed and financed bus system would be much less invasive to the landscape, would be less expensive and would serve many more canyon users.</p> <p>No gondola please!</p>	A32.3A; A32.3G
40410	Kennington, John	<p>UDOT can't ignore, mis-interpret or deny the intent or letter of the Roadless Area rules that prohibit any new infrastructure within their three areas with regard to any additional gondola infrastructure. The Rules prohibit any new road related infrastructure and the gondola is undeniably about changing or influencing the existing road conditions in the Canyon. The tower infrastructure, especially the foundations and access roads clearly will violate the highway related intent of the Rules, and also the general intent of preserving the wilderness, wildlife and clean water character of the canyon. These three Roadless Areas abut much of the right of way intended for the gondola.</p> <p>UDOT must also include in their analysis the use of all-electric buses on the existing highway right of way in their noise and air quality impacts analysis for the area. This is a logical inclusion as such buses have already been proven to handle the energy demands of travelling the Canyon and most vehicles will be electrified by the 2045-2050 timeframe.</p> <p>Having no bottom terminal with a 2500 car parking garage will save urbanizing of that now rural area and the traffic problems that will create for that area...just what we're trying to avoid. No bottom terminal will also reduce the pressure and cost of converting Wasatch Bl. into a high speed super highway, and allow for it to be slowed down and made more safe for alternate transportation means like pedestrians and cyclists.</p> <p>Please save us expensive legal costs of defending a proposal that will likely be lost and just scrape the useless, expensive and invasive gondola proposal thereby saving the taxpayers lots of expense and trouble. Use that \$1.4bn for other essential things like creating mobility hubs at the Gravel Pit and other places around the city, and for properly redesigning and converting Wasatch Bl to an artery that better unites Cottonwood Heights rather than divides it.</p>	A32.3A; A32.3F; A32.10G
39615	Kennington, John	<p>I am strongly opposed to installation of the Enhanced Gondola 2 alternative in Little Cottonwood Canyon for many reasons:</p> <p>-The Mar 24, '23 Interlodge episode does not change the situation. It still would have taken hours after the Interlodge was lifted to get skiers out of the canyon such that a gondola is not worth the cost. It would have created a traffic snarl at the bottom of the Canyon, 1500 ft of snowsheds and one additional, reversible center lane on the road, along with the other less expensive measures to be tried earlier, will take care of this small seasonal problem.</p>	A32.29VV

		<p>-Road and bus improvements are far better as the road right of way is already in existence and routes and schedules can be changed to suit more canyon users. Moderate highway improvements are much less invasive to the local ecosystem than the additional infrastructure needed to build and maintain the needed tower system for the gondola.</p> <p>- A gondola would kill the tourism industry in LCC by ruining the viewshed, and congesting traffic around the bottom terminal.</p> <p>-By the time in the 2040's of anticipated gondola construction, the ski industry will be in decline due to climate change and very high cost ski area passes. This idea is already 50 years too late and we would be stuck with an invasive artifact from the past.</p> <p>-Most Utah taxpayers would not benefit from this expenditure, which would likely greatly exceed the \$1.4bn present estimated cost by its build date and only benefit principally two businesses. There are so many other more important issues to spend taxpayer \$\$ on like: sustainable transport and energy development, affordable housing, saving the GSL and climate change.</p> <p>- In some corners this will be viewed as a start to an ski interconnect system extending further to Solitude/Brighton and then to Park City. As such, the proponents will be back asking the State for \$\$bn more, all of which is unwarranted and will only benefit a few businesses.</p> <p>-The perfect tourest attraction already exists in LCC with the Snowbird Tram. It's not too long or expensive to ride, has great views and top and bottom facilities and, most importantly, is not too invasive as it is located off to the side of LCC.</p> <p>-Please kill this fantasy dream now, and let's move on to addressing our real world problems!</p>	
54171	Kenny, Rowen	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Rowen Kenny</p>	A32.3A; A32.3F

40015	Keough, Austin	<p>I don't understand how this EIS really tried to solve the problem from a users perspective. I'm anti- gondola. I think adding a gondola, on top of making a significant, negative effect on the views, will just inject a new form of chaos into the mix. It's mentioned that the gondola may be able to run during avalanche clean up efforts. Same chaos for the gondola, plus people waiting on the road. This will just put more people up at the resorts, which I'm sure is the real goal. As a lifelong skier who grew up here, I've watched skiing continue to get progressively worse here, and it's profit-driven decision making at the helm.</p>	A32.29VV
