42802	Strong, Tommy	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p>	A32.3A; A32.3F

40494	Strossner, Dagney	<p>Please do not put a gondola through LCC. It would create an unnecessary environmental hazard and distress for all the wildlife, flora, and recreational folks. It would destroy the pure essence of the canyon just through the building of it. And the avalanches that have happened this year is direct feedback to the Amount of maintenance in upkeep plus potentially life threatening to people. This is the worst and most expensive idea that has been proposed. No gondola!</p>	A32.29VV
41049	Stroud-Lewis, Tiare	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 		<p>The gondola is not a good solution for little cottonwood and I do not support it! I would like to see enhanced bus service and more electric buses</p> <p>Regards, Rose Struble</p>	
44479	Struhs, Daniel	<p>To whom it may concern,</p> <p>Little Cottonwood Canyon has become a safe haven for me a place in which I have grown to love over the past few years. Living on the east coast I am what some Utah natives would consider to be a tourist. As a tourist who visits this canyon a person in which you propose this idea to I voice my complete and utter distaste at the idea of a government official even proposing this mindless project. The gondola would solve nothing but access to the resorts in unsafe driving conditions there will still be traffic there will still be road closures these are things that are expected and apart of the journey of making it to these beautiful untouched mountains. I strongly ask that you go back to the drawing board to formulate a solution that is more practical and protects a sacred part of the great state of Utah.</p> <p>Regards, Daniel Struhs</p>	A32.29VV

40128	Studer, Annie	<p>I cannot support the gondola proposal by UDOT especially after reviewing the Supplemental Information Reports. The analysis is either biased, flawed, or both.</p> <p>The air quality analysis is skewed by claiming buses would be powered by diesel in 2050. That is a bizarre claim considering electric buses are already in the UTA fleet with goals to expand.</p> <p>Gondola construction would clearly violate the Roadless Rule. We have limited land in an already crowded Wasatch; the gondola construction would drastically impact Roadless Areas with heavy equipment and new roads. This is unacceptable.</p>	A32.29VV

41932	Suarez, Jose	<p>No...no gondola please!!!! . That is a recipe for destroying the canyon. Why don't we put restrictions on who can drive up the canyon and provide with buses every 10-15 minutes to move people up and down the canyon, with exceptions for residents. Cars with less than 4 occupants must park at the bottom of the canyon and take the bus. That along would probably reduce traffic by more than 50%. A Gondola seems like an easy fix but it is not. You will have to destroy the canyon to create roads to put the footings of the towers. You will literally destroy the beauty of the canyon. Most Utah residents want to preserve the natural canyon as it is!</p>	A32.29VV

40651	Sullivan, Briana	<p>Please do not build a gondola. More buses, snow shed building, tolling single use cars, discounting fees for those who car pool, and even limiting traffic up the canyon in general is better than building this gondola. Please try any other feasible option before this. This gondola would impact our watershed with any slight issue with hydrology and the towers + ruin the soil and ecosystems, the wildlife. This is truly damaging to consider for only winter and to the resorts.</p>	A32.29VV

39918	Sullivan, Emily	<p>In Little Cottonwood Canyon, White Pine and portions of Twin Peaks and Lone Peak are designated as Inventoried Roadless Areas (IRA). UDOT failed to asses how constructing a gondola would violate the Roadless Rule during the EIS process. Building a gondola in LCC would require implementing towers, angle stations, snowsheds, and clearing vegetation in protected IRAs which will negatively impact wilderness areas, inhabiting wildlife, and the watershed. This would be a violation of the 2001 Roadless Area Conservation Rule</p>	A32.3A; A32.3F
49313	Sullivan, Erin	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Erin Sullivan</p>	A32.3A; A32.3F

39336	Summers, Brian	<p>Enhanced bus service with no additional lane is the cheapest and the fastest alternative! This shouldn't be a vote. But the cheapest and fastest should be implemented. It also has the least impact. It could also stop at trailheads. No Gondola! Only people who own property should be able to drive up the canyon and maybe some some employees. Hotels should have shuttles otherwise buses should depart every 5 minutes. Buses should also be electric.</p>	A32.29VV

39631	Sutherland, James	Do not build a gondola using tax payer money in our city. Make the companies that stand to benefit, pay for it, not the people who live here. We don't want it. It will be closed an incredible amount from avalanche control work and inspection after. Offloading the ski resort will take hours. This is not a good solution to traffic congestion.	A32.29VV

41364	Sveiven, Chris	<p>I have absolutely no interest in a gondola for ONE Canyon! I can only imagine how much a project of the size and scope will run over budget. Gondolas need to be shut down when avalanche control is happening... so I'm a little confused. Other than making money for individuals who want to expand existing resorts and put a new parking at the bottom of the canyon. I'm sure anyone who owns property near look high or this proposed idea thinks it's a wonderful idea. I personally think it's absolutely idiotic and to install one extremely expensive gondola. I would love to see some sort of new and groundbreaking idea for public transit in both canyons. Somehow I highly doubt there's going to be electric buses, coming up and down both canyons anytime soon. I would absolutely settle for any kind of a traditional bus system with enough drivers And schedules that will actually cover when the [REDACTED] resorts are open and it's snowing. This is not landing on the moon. It is moving people up and down a canyon.</p>	A32.29VV
45597	Svendson, Catherine	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Catherine Svendson</p>	A32.3A; A32.3F
42213	Swaim, Matt	<p>I am commenting.....again.....to explain that I think the gondola is the most intrusive option being weighed. Expanded bussing and tolling during peak use hours could resolve much of the issues that are being faced. A gondola is an irreversible step to blight our roadless areas. This will be a move to benefit private industry at the top of the canyon at an expense to the taxpayer. In summary, I am strongly opposed to the gondola. Expand the bus service, not cut it.</p>	A32.29VV

54958	Tajiri, Rachel	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Rachel Tajiri</p>	A32.3A; A32.3F
41649	Takasaki, Roman	<p>I am strongly opposed to a tram transportation system in little cottonwood canyon. I feel it would mar the beauty of the canyon. I feel that are better and less expensive alternatives to the tram.</p> <p>Roman Takasaki</p>	A32.29VV
40510	Talbert, Tristen	<p>The fact that the gondola is considered exempt from the roadless area rule is absolutely asinine. The point of this rule is to protect the natural landscape of the areas it includes. By allowing the gondola, the rule is completely undermined. I stand with other Utahns and wilderness users to say No Gondola!</p>	A32.3A
47552	Talbot, Isaac	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 39653	Tanner, Richard	<p>As skier, property owner, and resident of the Dimple Dell neighborhood of Sandy I am vehemently opposed to the gondola proposal. This is pure corporate welfare and a desecration of our beautiful canyon. I have done some rough math on the construction cost, per skier, based on 100% capacity over 100 ski days per year, amortized over 20 years. It is north of \$40 per person NOT INCLUDING labor, maintenance, energy, and insurance. In what world does that make sense? Oh, of course, if you're a real estate developer....</p>	A32.29VV A32.29VV

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Maggie Tao</p>	A32.3A; A32.3F
50165	Tapia, Alberto	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40996	Taub, Peter	<p>I am a property owner at the foot of Little Cottonwood Canyon. I believe I understand the pros and cons of the proposed gondola. In the end, the most important factor has to be the environment. Our Great Lake is shrinking and we can't come together to limit valuable water use. If a gondola represents a true benefit for the environment of the Wasatch Range then it should be created.</p>	A32.29VV

49676	Temus, Alex	<p>To whom it may concern,</p> <p>Let's take it down a notch and not use \$1.5 billion just to benefit a few companies that profit from skiers in LCC.</p> <p>Let's used a small fraction of that to require shuttle bus use in the canyon during the winter and avoid building a massive gondola that may likely end up abandoned and useless like so many do.</p> <p>Regards, Alex Temus</p>	A32.29VV
39275	Temus, Alex	<p>reviewing the supplemental information, I'm glad to see that mitigation efforts are being addressed for the ecosystem and other aspects of the canyon, however I'm concerned that the estimates for the impact a gondola would have are being minimized far too significantly. The 1/2 a billion dollar price tag is only for the first phase on construction, and udot is ignoring that the majority of residents have said that they DO NOT want to spend their tax dollars on a system that ONLY benefits the ski resorts and people able to spend thousands on ski passes and equipment every year.</p> <p>The impact of construction equipment in the canyon is being minimized - It will cause significant road blockages for years while this obscene gondola is built. I am a resident who primarily uses the canyon in the summer, and I can't believe that I am expected to give up use of the canyon, pay for wealthy skier's convenience, and get a tremendous eyesore of a gondola with it's constant noise overhead.</p> <p>And when it was the last time a construction project went exactly as planned and didn't require numerous ad hocs or material delays that delayed the project? We don't even have the full cost, this is terrible.</p>	A32.29VV

Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Allison Terres</p>	A32.3A; A32.3F
41564	Terrill Wilson, Cayce	<p>Hi,</p> <p>I'm Cayce and I'm a resident of Sandy, UT, a Utah voter, and an avid user of Little Cottonwood Canyon (LCC). In fact, it was a large factor in the decision for my wife and me to purchase a home in Sandy last year. I rely on LCC year-round to fill my needs for enjoying and exploring nature - from trail running and rock climbing to skiing and hiking. On average, I probably spend 2-3 days/week in LCC. Suffice to say, I care deeply about the future of LCC and am deeply opposed to the plan of adding a gondola to the canyon.</p> <p>My opposition to the gondola is multi-faceted. First, LCC is part of the Uinta-Wasatch-Cache National Forest and the motto for all national forest land is "land of many uses" which is very true for LCC. The canyon is enjoyed and loved by rock climbers, mountain bikers, resort skiers/snowboarders, backcountry, skiers/snowboarders, hikers, trail runners, backpackers, birders, the list goes on. Yet, the gondola only seeks to serve one type of user - resort skiers/snowboarders. It's unfathomable to me that we'd consider a solution that is so limited in who it serves and so universal in who it burdens. The financial burden of the gondola is fiscally irresponsible. It seeks to primarily benefit the resorts of Snowbird and Alta at the cost of the taxpayer. Furthermore, the gondola will create irreversible damage to the aesthetic and natural habitat of the canyon in a way alternatives (such as more buses, imposing a toll on the road (especially a progressive one for private vehicles with single occupants, or widening the road) will not. The gondola is a 0 to 100 solution when there are plenty of reasonable intermediate solutions that are strong candidates to achieve the desired goals for the project.</p> <p>I hope you will reflect on the thoughts and sentiment I've shared and realize there are thousands of citizens that share my opinion. Please listen to the people that pay the taxes not the resorts and individuals that stand to gain fiscally from the gondola. Please protect and preserve LCC by saying no to the gondola and choosing the right path of finding a solution that meets the needs of the many people that access this sacred land of many uses.</p> <p>Thank you, Cayce Terrill Wilson Sandy, UT</p>	A32.29VV
41600	Terrill, Raneë	<p>Just NO!! It is an incredibly expensive both financially and environmentally, short-sighted, solution for the elite that serves the two resorts and no one else. Please consider that there are more options, less expensive, less invasive, that can be embraced to serve all.</p>	A32.29VV
50243	Terroir, Lewis	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple</p>	A32.3A; A32.3F

42231	Terry, William	<p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p>	A32.3A; A32.3F
39983	Tessier, Jacob	<p>I do not want a gondola impacting the wilderness and recreation area. Come up with a more efficient bus system and use existing infrastructure</p>	A32.3F; A32.10G

42237	Teton, James	<p>I am in favor of the phasing in of enhanced bus service and, after evaluating the results , if the widening of the road for a bus lane is necessary I would favor that instead of a Gondola. The air quality would improve if more busses and less vehicles is the goal. The cost for Gondola B, which I suspect is estimated but not what the real end cost would be as in the case of most projects it would probably double. And the fact that if we have winters like this in the future the Gondolas would not be safe transportation with the frequent avalanche warnings. I along with almost all of the people I've talked to and the local governments all favor NOT building the Gondola. Especially since it would mean that taxpayers like I who do not use the canyons for skiing will more than likely be left on the hook for paying the bonds for the infrastructure.</p>	A32.29VV

46931	Thomas, Afton	<p>To whom it may concern,</p> <p>You're killing everything that is good about LCC. I visit annually over going to any other state in the west BECAUSE of your bus system, I don't have to rent a car, it's so easy and convenient for a large group, and it's the best and safest way up the pass. This year, it took HOURS to get on a bus because you cut the fleet!!! WHY! So you can find this needless and harmful project? THIS IS NOT PROGRESS, THIS IS NOT THE FUTURE. THE BUSSES WORK. INVEST IN BUSESSES.</p> <p>Being from the east coast, coming to the canyons is literally the highlight of our year. I will have to move my annual trips (sometimes twice a year) elsewhere because of this we're missing out on the thing we love most, SKIING. AND FOR NO. GOOD. REASON.</p> <p>Please stop this nonsense (!!!) I know you know in your hearts it's wrong. Listen to them.</p> <hr/> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 40332	Thomas, Scott	<p>Why haven't we seen electric buses mentioned in the EIS? The gondola system as proposed is a horrible plan. It would be detrimental to the environment and beauty of Little Cottonwood Canyon. As far a traffic is concerned it would only be kicking the can down the road. It would create terrible traffic bottlenecks farther down into residential neighborhoods.</p>	A32.29VV

40706	Thomas, Tristen	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Tristen Thomas</p>	A32.3A; A32.3F
41238	Thomas, Will	The whole project continues to be unnecessarily underscoped. Sub sizing two private ski resorts in one canyon without a comprehensive regional plan that accounts for other user groups doesn't make that much sense at the price tag. Ask Alta and Snowbird for at least 100 million of cost-sharing. If the economics don't work for them to contribute as the primary beneficiaries then the economics of the project as a whole are not sound (even without considering all the other impacts).	A32.29VV

39276	Thompson, Christen	<p>The study needs to present a tunnel option. A tunnel would produce the least amount of disturbance to the canyon and allow for the tunnel to continue into Park City and the new MayFlower Resort by Jordanelle.</p> <p>Really the Wasatch Back needs a WasatchBackTrain and a tunnel up the canyon would be a great connecter and start to a unified mass transit system.</p> <p>The tunnel would be cheaper to build than the gondola, while allowing for faster transportation. See the SLTrib article pointing out a tunnel could be built for 1/3 of the cost of the Gondola.</p> <p>There are many excellent examples of tunnels being built in similar terrain in China, Europe and elsewhere.</p> <p>UDOT should invest in a tunnel system connecting our communities and resorts allowing for quick and rapid travel that the citizens of Japan, China, Europe already enjoy.</p>	A32.29VV

39476	Thompson, James	<p>As you should/might know, not only do both sides of western Little Cottonwood Canyon have nearby designated wilderness areas, there are a few areas even in the bottom of the canyon that were identified/inventoried as "roadless areas" by the Forest Service itself back in either 2001 or 2003. While it is true that some small sorts of development can occur on Forest Service roadless lands like additional or improved foot trails or small "ranger cabin-like" structures, large scale-type structures are or SHOULD NOT be allowed. One such type of structure would be the numerous towers (and cables) needed for a Gondola. Not only would these structures ruin many natural viewsheds up and down the canyon, I'm sure that plenty of surface disturbance will have to occur to build the towers. Again, if a Gondola is built, it will only detract from the natural beauty of the canyon--and never will enhance it, nor will it alleviate vehicular traffic congestion. I'm going to not mince words by saying the Gondola is one giant rip-off for the tax paying public of Utah. It will only serve 2 private companies (Snowbird & Alta Ski Resorts) and maybe a few out-of-state tourists. Building it is just too big of a price to pay to have something just blatantly intrude upon such a priceless beautiful public resource such as Little Cottonwood Canyon.</p>	A32.3A; A32.3F; A32.3G

40565	Thompson, Mark	<p>Hello,</p> <p>I moved to Utah from New Zealand and was excited to see the gondola project. Though since moving here, I have met so many people that seen against it based on cost. So I wanted to contact you for some information and be more informed when I'm talking about it.</p> <ol style="list-style-type: none"> 1. How much did the original road cost to put into the Little Cottonwood Canyon when it was first built and an inflation adjusted figure for that cost too. 2. How much would it cost to put a road in today if there was not one there already? 3. How much does the road cost to keep maintained each year? 4. How many people can safely use the road in a single day (averaged over the year) and how many vehicles and their combined emissions? 5. How many people can the gondola carry per day? <p>Lastly, a couple of additional gondola ideas.</p> <p>Big Cottonwood Canyon to Solitude or Brighton, (line 1) Then a Guardsman Pass gondola to the Park City, (Line 2). It would be such a great year round attraction and way for people to get to some amazing destinations easily.</p> <p>A State Street gondola. Ideally, nestled into the base of Ensign peak (if the State Capitol was happy to have a gondola running overhead). Or it could start at City Creek and run the length of State Street, over the Point of the Mountain and into Lehi near Thanksgiving Point or the Lehi railway station. Salt Lake City has some incredible views of the Wasatch, a gondola would offer the most tremendous views. And on the 4th of July an amazing experience as you travel along the valley. Stations along the way would offer easy access to a good percentage of what the city has to offer.</p> <p>Looking forward to your reply</p> <p>Kind regards Mark Thompson</p>	A32.29VV

40393	Thompson, Mindy	I would like to voice my concern about the gondola option for Little Cottonwood Canyon. As a 49-year resident of Salt Lake, and a 30-day per year skier, I am horrified at the precedent that would be set by building a permanent structure in these designated roadless areas. Encroaching on federally protected areas because the gondola isn't technically a road is disingenuous at best. Please protect these roadless areas so my daughters can experience what I love about the Wasatch.	A32.3A; A32.3F; A32.3G
44414	Thompson, Olivia	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p>	A32.3A; A32.3F

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Olivia Thompson</p>

40450	Thoms, Sofia	<p>What is the plan to avoid the roadless wildlife/wilderness areas in little cotton wood canyon? How are you going to build towers, do maintenance on the towers, or even do gondola evacuations in these areas. Protecting and upholding the roadless rules to these areas has not been considered and it needs to be. How can you justify putting a Gondola in this area and upholding the nature of the wilderness areas? This is a reason why the gondola is not the solution for the canyons. There are other less invasive, less destructive, and less costly solutions. You should at least try them before you knock them.</p>	A32.3A; A32.3F; A32.3H

39994	Thorn, Ben	<p>You seem bound and determined to put this gondola project in motion even with strong evidence against it being a viable solution. It is going to cost 2-3 times what is budgeted for the complete project, the impact aesthetically and environmentally is too great and can not be mitigated, the rate at which it transports people per hour is not sufficient to justify the cost, it is not self-sustaining as it can not survive or function without subsidies from the local and state government, it is not invulnerable to issues with design flaws - life span - weather - wear and tear and human operator error, and lastly it will only serve to move the traffic issue from moving up the canyon to placing it at the bottom of the canyon. The gondola does not work for those trying to visit the resort for only a few hours or for those seeking to access anywhere but where the gondola loads and unloads. Why not try other things first before continually pushing for the gondola solution? Access the canyon is not a right but a privilege that has conditions attached to it and those conditions should not be subsidized by the public. Try the following in this order: Return to having annual vehicle safety inspections then any and all vehicles owners that will be entering the canyons must have correct tires in order to get a sticker to access the canyons (this would save a lot of issues for safety in the canyons - the traction law is weakly enforced), Increase busing services during winter months (divert them from downtown as the % use of UTA downtown and around the valley does not justify use - UTA is not a right it is a privilege, public transportation subsidies are wrong, put the transportation where it is paid for not everywhere - no subsidization), next Charge an annual toll to drivers that choose to drive their own vehicles, making the busing services more readily available together charging for individual drivers to pay for access will help to spread those accessing the canyon according to their comfort level of cost and time. It would seem that these measure should be tried first unless of course the intent of the gondola is to increase visitors to the resorts if that is the case then the resorts can pay for it not the citizens of Sandy or Utah. If the ski resorts are not profitable without subsidies then maybe they should close and cease to operate subsidizing their growth or access at the expense of the taxpayer should not ever be an option.</p>	A32.29VV

		Regards, Alanna Thornton	
39743	Thornton, Barbara	I'm very concerned about the proposed Gondola's impact on some of the Wasatch Mountains protected areas and don't believe it should be exempt from the Roadless Rule. I believe that the Gondola's proposed benefits to the environment will not be worth the enormously detrimental impacts on our watershed, the soil integrity, the habitat of our wildlife and plants. I also believe the spirit of the Roadless Rule will be violated in constructing a means of transportation, even though it is technically not a road. I urge you to listen to the voices of the people who love our wilderness and wish to protect it. Recreational uses of the mountains are just one of the aspects of what make Utah great, but we also should be good stewards of this beautiful place we get to call home. It's a sacred responsibility to protect these areas for future generations and infringing on these Roadless areas that border on protected Wilderness areas will undermine that responsibility. Thank you.	A32.29VV
54909	Thornton, Robert	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Robert Thornton	A32.3A; A32.3F

40458	Thurman, Candice	<p>Stop The gondola!??☹</p>	A32.29VV
40454	Thurman, Josh	<p>One possible argument against building gondolas in Little Cottonwood Canyon is that a train solution could be a more practical and efficient alternative. While gondolas may be a popular and picturesque transportation option for tourists, they may not be the best choice for year-round, reliable transportation for locals and commuters.</p> <p>A train solution could provide a more reliable and consistent means of transportation, with the ability to transport larger numbers of people at once. Trains are also typically more weather-resistant and less affected by extreme conditions such as high winds or heavy snowfall, which could disrupt or even shut down gondola operations.</p> <p>Additionally, a train system could potentially have a lower environmental impact than gondolas. Gondolas require large support towers and cables, which could impact local wildlife habitats and ecosystems. In contrast, a train system could utilize existing rail infrastructure and minimize its footprint.</p> <p>A train solution could potentially be more cost-effective in the long run. While building a train system may require a larger upfront investment, the ongoing maintenance and operating costs of gondolas could add up over time. A train system could also have a longer lifespan and potentially generate more revenue through increased ridership.</p> <p>Overall, while gondolas may be an attractive transportation option for tourists, a train solution could provide a more practical, efficient, and environmentally sustainable alternative for year-round transportation in Little Cottonwood Canyon.</p> <p>Another advantage of a train solution in Little Cottonwood Canyon is that it could potentially utilize tunnels through the mountain to avoid inclement weather conditions. Gondolas are susceptible to being shut down in high winds, heavy snowfall, and other extreme weather conditions, which could disrupt transportation and cause inconvenience for commuters and tourists alike.</p> <p>On the other hand, a train system could potentially travel through tunnels, which would protect it from harsh weather conditions and ensure consistent and reliable transportation year-round. This would also minimize the risk of accidents and delays caused by weather-related disruptions.</p> <p>In addition to providing a more practical and reliable transportation option, utilizing tunnels could also have environmental benefits. Tunnels could reduce the need for extensive support towers and cables that are required for gondolas, minimizing the impact on the local ecosystem and wildlife habitats.</p> <p>Therefore, when considering transportation options in Little Cottonwood Canyon, a train system that utilizes tunnels could provide a more sustainable and efficient solution that is less vulnerable to inclement weather and has minimal impact on the surrounding environment.</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>Another argument against building gondolas or a train system in Little Cottonwood Canyon is the use of public dollars to fund a project that primarily benefits two private entities, Snowbird and Alta. While these ski resorts may benefit from increased transportation options that bring more visitors to the area, it could be argued that public funds should not be used to support private enterprises.</p> <p>Moreover, it could be argued that the project may not provide equitable benefits to the broader public. The transportation options primarily benefit skiers and snowboarders visiting the two ski resorts, while the local residents and communities may not see significant benefits. The use of public funds could potentially be seen as favoring private interests over public needs.</p> <p>Additionally, building a transportation system in Little Cottonwood Canyon could lead to increased traffic and congestion in the area, potentially causing environmental damage and affecting the quality of life for local residents. The impacts of increased traffic and congestion should be carefully considered before investing public dollars into a transportation project that primarily benefits private entities.</p> <p>In conclusion, while building gondolas or a train system in Little Cottonwood Canyon may provide benefits for tourists and ski resorts, the use of public funds to support private enterprises and potential negative impacts on the surrounding environment and communities should be carefully considered before moving forward with the project.</p> <p>I moved to Sandy in 2004 specifically to be in the midst of the beauty of LCC - This project threatens not only nature's well-being but those humans who have become one with LCC.</p> <p>I appreciate your consideration and pray that LCC's natural wonder and beauty isn't forever lost to human disregard... Local Utahn's are counting on you to do the right thing for ALL of Utah.</p> <p>Regards, Josh Thurman</p>

41416	Tietjen, Jacque	<p>Why has the Roadless Rule not been addressed? There are 3 areas on the map that are in RACR protected areas. You can't do construction, build roads, or harvest timber in these areas and UDOT should NOT be exempt.</p> <p>What about all the avalanche paths you want to put towers in? A number of towers as well as the angle station are in slide path areas. A massive slide in Tanners Gulch for example would completely wipe out that angle station, costing more money.</p> <p>The public has been VERY vocal about their concerns and we feel they are being ignored. We DEMAND the gondola be taken to a legislative vote if you want our tax dollars to pay for it.</p> <ul style="list-style-type: none"> -It will put more people in the canyon without improving transit and without studying how many daily visitors the canyon can handle. - It won't stop at non-resort backcountry trailheads, leaving non-resort users to deal with traffic. - It won't operate during active avalanche mitigation. - It will permanently disrupt trailheads, recreation and bouldering areas, marring views and causing constant noise. - Construction will cause delays and highway closures for at least 5-10 years. - Construction debris will jeopardize a critical watershed supplying most of the Salt Lake Valley's drinking water. -It will inevitably cost more than predicted due to ever rising building costs -It sill does NOTHING to solve the issues in Big Cottonwood Canyon where traffic is WORSE. <p>PLEASE. More busses, and make it year round. people will ride them if you add bus stops to other trailheads popular with backcountry users. toll the road or ban all non canyon vehicles completely and much like Zion NP runs their main road.</p>	A32.3A; A32.3F

47564	Tilly, Jeb	<p>To whom it may concern,</p> <p>Although I live in Colorado, I have spent a lot of time in LCC and the greater Salt Lake area.</p> <p>I oppose the Little Cottonwood Canyon Gondola project as it currently sits for two primary reasons:</p> <p>1) the cost is excessive, and not born by the people who stand to benefit from the project: resort users. Public opinion surveys overwhelmingly show support for private funding, meaning resorts would pay for the Gondola.</p> <p>2) It suggests no implementation plan or incentive to solve travel problems using simple, immediate measures. At the very least, resorts should be required to use occupancy-based tolling, enforcement of the traction law, and mandatory parking reservations. for people who drive to their lots.</p>	A32.29VV

40353	Timpson, Heidi	<p>No gondola, please! Little Cottonwood is a cherished Utah gem and constructing a gondola would destroy the iconic view, destroy the mountain including popular bouldering sites, and compromise our water quality. Funding such a massive project makes no sense for a system that will only be functional during the ski season. The rest of the year it would be a huge eye sore. Not to mention, it would not solve the traffic problem. People will still drive their cars because they won't want to pay for the gondola, traffic will still be congested getting the parking garage.</p> <p>Please support tolling and increased bus routes.</p>	A32.29VV

Regards, Katie Titley	A32.3A; A32.3F
39399	Titus, Reece	Not only will the gondola not help the cottonwood traffic it would affect the big cottonwood traffic forcing the mass of people trying to get up the canyon into a parking lot creating a new line of traffic. A big impact this year for me has been not being able to take the bus from the north entrance to the canyon. I used to park in the swamp lot and take the bus from there but haven't been able to this year. Better bus system in my eyes is much better than the biggest gondola in North America	A32.29VV

39887	Todd, Michelle	I am against the impact of the Gondola and the removal of rocks, encroachment on wildlife, watersheds and the extraordinary costs that should be spent elsewhere. If the bus system were more proficient, we could get many more people up the canyon. The one weekend the travel council helped implement more buses, it all worked much better. The Gondola will forever change what our canyon is and it will be an absolute desecration of our land.	A32.29VV
39542	Todd, Patricia	<p>I wish the comments actually counted, we SHOULD vote on this potential billion dollar project-paid by taxpayers...yet benefiting only two privately owned ski resorts.</p> <p>We SHOULD have voted on the NSA building-it's servers consume 1.7 million gallons of culinary water per DAY.</p> <p>We should have voted on the Taxless Amazon facility, it's servers also suck mass quantities of water. We should have voted on the outrageous over budget move of the prison from precious Draper Land.</p> <p>We should have voted on the inland port-and we should be voting on this ridiculous project.</p> <p>I vote NO.</p>	A32.29VV

40316	Topham, Melanie	<p>The fact that the gondola would be built within three federally protected roadless areas (Twin Peaks, Lone Peak, and White Pine roadless areas) means that construction should be prohibited in these areas. Protect our air, water, wildlife, and recreation opportunities. The gondola should not qualify as an exception to the roadless rule.</p> <p>Making the assumption that all buses would be diesel powered shows only part of the story. UDOT should adjust the analysis to consider electric buses. Without this, the report is incomplete.</p>	A32.3F
39438	Topham, Melanie	<p>Keep Little Cottonwood Canyon beautiful and scenic, without unsightly gondola towers. Keep the roadless rule areas intact, without gondola towers and the access roads that would be needed to build and maintain them. Keep working on year-round regular bus service to ski resorts and trailheads. Keep encouraging hikers and skiers to carpool through ride-share web sites and parking fees. Keep using tax dollars on roads and infrastructure that benefit Utahns, not just tourists and skiers. Make sense: no gondola in LCC.</p>	A32.3A; A32.3F

54670	Torrie, Clay	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Clay Torrie</p>	A32.3A; A32.3F

42086	Trembley, Jonathan	<p>Hell members of UDOT,</p> <p>I've been a long time resident of Holladay and a frequent user of Little Cottonwood Canyon year round. I sincerely ask that you please re-consider going forward with the recommendation to add the gondola to the Regional Transportation Plan.</p> <p>Research by "students of the wasatch" group shows 89% of Utah residents are opposed to building the gondola. The claimed 30% reduction in traffic can be accomplished with multiple other solutions that do not ruin the natural beauty of the canyon or cost Utah residents \$1.4 BILLION dollars. The canyon is used by many more people throughout the year beyond skiers/ riders of Alta/ Snowbird, none of whom would benefit from the gondola.</p> <p>As a frequent user of the canyon, I strongly advocate and practice carpooling, bussing, and parking reservations. Strictly abiding by those rules to preserve the canyon the best way I can, and I'm more than happy to. As a dedicated back country skier who finds myself in LCC daily, I rarely run into traffic issues as the only time there are traffic issues are predictable and typically busy times during the weekends. That's it. I believe there are plenty of other effective alternatives than this rather large waste of tax payer money would provide.</p> <p>Thank you</p>	A32.29VV

40581	Triolo, Phil	<p>Dear Person-</p> <p>I am writing, again, to express my extreme displeasure with a pending decision to allow a gondola system with associated towers and hardware be constructed in Little Cottonwood Canyon. The option is a bad solution as it will spend the public's money to allow skiers [arguably] better access to 2 privately held ski resorts. In other words, it represents a massive transfer of public money to benefit a limited number of people and, especially, privately held ski resorts.</p> <p>Further, it is now apparent (and it is interesting that this has only come to light recently) that portions of the gondola infrastructure would be cited in areas that are currently roadless and where minimum disturbance is allowed. I don't want a gondola tower in wilderness or roadless areas, or, for that matter, anywhere in LCC.</p> <p>The better options are, were, and always will be limiting / discouraging private car use in the Canyon and constructing one or more bus-only lanes in the canyon, to be traversed by electric buses, on a regular schedule, frequently enough to allow convenient access to ski and parking areas along the length of SR 210.</p> <p>Please remove from further consideration construction of a gondola system in LCC. Better options exist to address ski crowd transportation to the resorts that will have a lesser impact on the environment and have the added bonus of accessing parking areas all along SR 210. That is, they will much better serve the general public's interest.</p> <p>Thank you!</p> <p>-- Phil Triolo [REDACTED]</p>	A32.3A

40273	Tropsa, Sean	<p>Hello Udot LCC team,</p> <p>Thank you for collecting public comments. Here are mine related to the most recent released info:</p> <p>One major comment on your roadless area assessments. In the alternatives that call for "no roadside parking" it is stated that " With the Trailhead Improvements and No Roadside Parking from S.R. 209/S.R. 210 Intersection to Snowbird Entry 1 Alternative, the Maybird and Tanners roadside pullouts would be eliminated. There are no designated trails in these areas that are used by climbers and backcountry skiers"</p> <p>Although there are no officially recognized trails in these areas, both are heavily used yearround by both climbers and skiers with access routes and published trails. Removing parking from these areas would only help further concentrate traffic at already busy trailheads and would dramatically limit access to both areas which are beloved by climbers and skiers (as well as others, many non-climbers explore up tanners gulch, and tanners gulch has long been recognized as a mountaineering path to climb to the LCC/BCC ridgeline). Loss of roadside parking here would be a detriment to the community and i hope that is kept in mind before closures are announced.</p> <p>Secondly, as an active user and local resident (I live on the 994 bus route) it is frustrating to have so many local residents spend so much of their time reading through these documents and supplying comments, only for those to seemingly fall of deaf ears.</p> <p>This project, in its current design, should never have been considered. If we are going to evaluate a new traffic solution, we NEED something that will be YEAR ROUND, and work for ALL users, not just those at the ski areas. One needs only to drive up LCC on a nice day to see that there is demand for this. Trailheads overflow and roadside parking is present for up to a mile in either direction. The canyon is just as busy, if not more busy more regularly during octoberfest as well. It is my opinion that this project is inherently flawed and we, the tax payers, are shouldering a burden to give handouts to private organizations. If all users, summer and winter, resort and otherwise, are not considered, the cost of this project should go to the ski areas as they are the ones who stand to benefit, not the public at large. Please hear us! I live 1 mile away from this project's study area, i would love to see a proper solution, but it needs to benefit everyone! Please take off the blinders and stop being hyperfocused on getting users to ski areas, but rather look at the problem as a whole, summer and winter, so we can all benefit from your hard work!</p> <p>Thank you.</p>	A32.29VV
54337	Trost, Emily	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p>	A32.3A; A32.3F

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Emily Trost</p>

42342	Trubetzkoj, Leslie	<p>You can't take this thing back once it is done. There needs to be more in depth studying. This idea is mostly thinking of the ski areas. This does not take in the whole picture of all the people and their uses. Those towers and the mechanical features will desecrate and spoil the sacred/beautiful treasure we have that is known as Little Cottonwood Canyon which is part of the wonderful and incredible Wasatch. How will it be hiking up on to the peaks to look at the wonderful nature and there smack in the view will be a gondola whirring by. How sick!!!!!!</p>	A32.3A

40207	Truitt, Andrea	<p>It saddens me to imagine that the gondola project is potentially going to happen. I've lived in Utah for the past 23 year, a the beauty of wilderness is one of Utah's biggest treasures. I am an avid hiker, I enjoy skiing, and I simply cannot imagine having to experience such eye sore while trying to connect with nature. You believe the benefit will largely be to the ski resorts, if any at all.</p> <p>I would rather see our taxpayer money being used to save the Salt Lake. If we lose the lake, living in SLC will likely be impossible. That needs attention, serious investment. Spending all of this money on the gondola's very questionable project, makes no sense.</p> <p>If toxins from the dry lake make their way into the atmosphere, the weren't be skiers, nor residents in town.</p> <p>Please do not approve this project. Try increasing the buses, creating more park and ride spots.</p>	A32.29VV

		Regards, Jordan Tucker	
39716	Tucker, Nancy	Gondola option should be off the table until all other options are empirically tested. This eyesore costs the most, supports exclusively two private resorts for maybe 5 months per year and no one wants it. The cost is prohibitive. Abandon this terrible proposal.	A32.3I

42287	Turner, Robert	<p>No, no, no to the gondola.</p> <ol style="list-style-type: none"> 1. It will be an eyesore. Twenty towers and two angle stations! Towers from 130 feet to over 250 feet tall! No, no, no! 2. It will only provide service to two ski resorts, and they are private companies. Why should taxpayers pay to deliver customers to private companies? If Alta and Snowbird want a gondola to provide resort access for their skiers, they should pay for it themselves. 3. It will be too costly to build and maintain. Current construction cost estimates are around \$550 million and could easily end up surpassing \$1 billion. Ongoing maintenance costs of \$7 million per year, which could easily end up being much higher. The actual cost per rider looks like it will be a minimum of \$90 each and could be much higher, as high as \$200 each. There is no way UDOT will charge that much. They will probably charge somewhere between \$15 and \$25 per ride, leaving taxpayers to foot the bill for the difference. And all for the benefit of two private companies. No, no, no! 	A32.29VV

		<p>4. You cannot build your way out of congestion. Attempts to do it invariably invite more people. The congestion soon becomes as bad as it ever was. But now there are lots more people, lots more pollution, and much more overcrowding of the recreational areas we want to enjoy. No thank you! No, no, no!</p> <p>5. The best solution, actually, is to let congestion control the number of people who want to use the canyons and ski resorts. More than enough people can get up the canyons already. It is already crowded enough. It makes no sense to try to find a way to stuff ever more people up there. In my opinion, the whole project is environmentally, socially, and fiscally irresponsible. Do not do it!</p>

		Regards, Sydney Uber	
40141	Uchida, Amiko	I in no way support a gondola for multiple reasons - environmental/ecological, practicality, economically, or functionality. I have no idea why we're wasting all of this time and money even entertaining the idea of a gondola, it seems like a poor use of your time and resources. can we please move on now and ban single occupancy vehicles in the canyon, spend the money we otherwise would have blown on a gondola on paying bus drivers and increasing the # of buses in the canyon? we're all over this gondola madness. thanks!	A32.29VV

I discovered a passion for hiking and climbing from my days spent in Little Cottonwood Canyon. I cannot imagine having the same connection and awe of this natural beauty with an atrocious gondola sticking out like a sore thumb. Although it may be a solution, it's only temporary because sooner or later the tourism will surpass the gondola's capacity. Please don't do this.</p> <p>Regards, Ceyda Ural</p>	A32.3A; A32.3F

39622	Utgaard, Chris	<p>NO GONDOLA! Gondola does not serve all canyon users. Alternatives (additional buses, avalanche sheds, etc) better address problem at lower cost. Gondola does not mitigate traffic issues except on 210... still will have traffic along Wasatch and surrounding area. Gondola may impact water runoff and will certainly have a negative impact on the natural beauty of the canyon.</p>	A32.29VV

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, john uyetake</p>	
43067	Uzel, Camille	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Camille Uzel</p>	A32.3A; A32.3F

39843	Van Horn, Patrick	please build the gondola. The traffic is unbearable to keep doing this. It has been a nightmare this year, worst I have ever seen it	A32.29VV
39318	Van Orden, Bob	<p>I've been traveling to the SLC metro area to ski for most years over the last 15+ years. I just got back from 14 days on the Wasatch Front this year. Three times, we got stuck in traffic that took 3+ hours once to enter Big CC and twice to leave Little CC. Clearly, part of this was due to the best snow in 45+ years. But, there is also a huge problem with transit and parking in and out of these two amazing, unique canyons. And actions need to be taken. For me, several things are fairly simple. One is avalanche mitigation especially in LCC. Snow sheds in the 3-5 locations that account for 70% or so of the avalanche risk need to be built. Second, parking....each of the four ski areas should be required to build double or perhaps triple decks over their existing parking lots and on-street parking should be illegal and ended. Third, at a minimum on weekends, LCC and BCC should be tolled, so that single occupancy vehicles are quite expensive and reduced, and there should a declining scale of tolls for vehicles with higher occupancy. Fourth, I strongly advocate that in both canyons a third lane be added. This lane would be for buses, only, and would go east in the morning and west in the evening. Fifth, during ski season an extensive bus service must be built. Not with the current UTA buses but vehicles that are all-electric, have seats for ALL occupants (many people over 60 ski in the canyons and cannot stand!), and have storage for ski gear). Buses should run every 10-15 minutes in peak periods! The gondola might be fun to ride but is very BAD idea. It only addresses one of the canyons not both. It's very expensive and forces all users to converge on one point to enter it. In high winds, gondolas cannot operate. It's not clear what per use fees would be for the gondola. If fails to address the avalanche issues (as snow sheds would), or the parking issues, or the issue of single occupant vehicles. And, it will destroy to appearance of a stunningly beautiful canyon that has a traffic issue perhaps 50 days per year whereas snow sheds, parking, tolling, and a bus lane would solve all or most of these issues! If Snowbird or Alta want a gondola they ought pay for it, not taxpayers. And build it so it doesn't ruin the canyons --which may not be possible.</p>	A32.29VV
41950	Van Saun, Jocelyn	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Thank you.</p> <p>Regards, Jocelyn Van Saun</p>	A32.3A; A32.3F

40168	Vander Heide, Kathryn	<p>This has been a great winter. It has made us all realize that UDOT and the ski resorts are not equipped to handle large quantities of snow in our canyons (LLC & BCC). It also shows how impractical and unsafe a gondola would be. Let's focus on increased bus service and man-made tunnels to direct avalanches safely and cleanly over the roads. Keep people on the ground. Let the snow slide while people are not trapped at Alta and Snowbird. Gondolas are not for harsh weather. People need freedom to move from place to place and should not have to stand up for hours during "interlodge."</p>	A32.29VV

39798	VanderHeide, Peter	This winter and the abundant snowfall was very timely. It is now very clear that a gondola will not operate effectively or safely in winter conditions. Even the ski resorts could not operate their little lifts in wind and snow. At least we found out! Now we know to pursue increased bus service and avalanche sheds or tunnels. That will greatly help UDOT ensure safe travel and ease the road cleanup process. Wow! Mother Nature helped when help was most needed! Now there is no reason to add a huge blight to the canyon and to enrich a few people with taxpayer money. GO BUS SERVICE!	A32.29VV

41790	Vansteenkiste, Brian	<p>I am writing to submit my public comment on the Supplemental Information Report related to LCC EIS, specifically the Roadless Area Conservation Rule.</p> <p>Construction of a gondola will violate the RACR in 3 different wilderness areas.</p> <p>The NARROW definition of a "road" the gondola proponents are pushing to skirt the RACR is self serving and will harm millions of people by impacting our drinking water.</p> <p>Placing 20 towers via helicopter is another shoddy work around the gondola greed heads try to pawn off on the tax paying public to skirt our federal protections. This distractionary farce fails to address excavation, foundation work, maintenance and other considerations that require ROADS and other actions/behavior that violates the RARC.</p> <p>I shouldn't even have to be typing this. The Gondola should not happen for many, many common sense reasons. Private developers and 2 private businesses are trying to rob the public for a non-solution farce. The RARC is another barrier, this time of Federal Conservation Protections, that they're trying to stomp into the mud as they blindly march forward to the edge of a cliff.</p>	A32.3A; A32.3F

40475	Vargyas, Forrest	Hi, my name is Forrest and I am a 19 year old college student from Salt Lake City. Multiple areas in Little Cottonwood Canyon, such as White Pine, portions of Twin Peaks, and portions of Lone Peak, are all designated as Inventoried Roadless Areas (IRA). These IRAs were designated to keep these areas protected. The roadless rule is against the imposition of development. The gondola would violate the Roadless Rule. While the gondola is not a road, it will have many of the same negative impacts that a road would, and therefore should absolutely be covered under this protection. While maybe the letter of the law does not explicitly say that a gondola also falls under this category, please keep in mind the spirit of the law. The entire reason a gondola is being considered is to solve problems that the canyon is having. We should not be trying to skirt and sneak past laws meant to protect our wilderness areas. That is immoral. The gondola would clear vegetation and timber for angle stations, snowheads, and towers in these IRAs. The gondola is violating the Roadless Rule.	A32.3A
41623	Vargyas, George	<p>The Gondola proposal for LCC is misguided and will make conditions in the canyon worse for residents who use the canyon for multiple uses. It will make overcrowding and congestion worse, not better. it will negatively impact the inventoried roadless areas of Twin Peaks, Lone Peak and White Pine areas. There will need to maintenance roads to most of the gondola towers and other infrastructure that will negatively impact the watershed, view shed and a multitude of dispersed user activities, all for the benefit of 2 private businesses.</p> <p>Claiming the gondola is exempt from Roadless rule because not technically a road is disingenuous and disregards the purpose of the rule.</p> <p>Please reexamine scalable solutions like tolling, reservations, electric bus transit from farther away nodes, enforcement of traction laws, & limiting SOV's at certain times.</p> <p>Thank you</p>	A32.3H; A32.3A
40969	Vargyas, Joseph	UDOT's proposal to build a gondola up Little Cottonwood would require building of roads and other industrial activity in an area designated by law as "roadless". UDOT claims it isn't so. We should not take their word for it, as they appear to be biased in favor of road and infrastructure development, not compliance with the letter and spirit of environmental conservation laws. This matter should be decided by federal authorities with proper jurisdiction, not by developers and their enablers.	A32.3H

39545	Varner, Neil	<p>Spending that much money is nonsense. This is only for 2 resorts. Keep using busses.</p>	A32.29VV
39540	Varner, Neil	<p>Why would anybody in their right mind support building a gondola for just 2 ski resorts? The price is out of this world for a small population to use it. Tax on the population to pay for it is incompre-hensible!! Stick with busses.</p>	A32.29VV
39392	VARS, PETER	<p>NO GONDOLA. The gondola will not positively impact the heavy traffic in Little Cottonwood Canyon on snow days as promised. The uphill capacity is far too low and demand for powder skiing far exceeds the transportation capacity of the road and the gondola combined. Taxpayers, many of which never recereate in LCC, should not subsidize the private ski resort businesses. Parking reservations combined with strict enforcement of the traction laws and carpooling incentives would be vastly more effective and much less expensive. Avalanche sheds should also be considered. Furthermore, one of the greatest attractions of LCC is its natural beauty. This asset would be severely degraded by 200 foot high gondola towers with aviation obstruction lighting right down the center of the canyon. The traffic problems in recent years (post-IKON) have been concentrated in Big Cottonwood Canyon which, of course, would not be impacted by a gondola in LCC. Lastly, the gondola is extremely unpopular and citizens' comments should be strongly considered.</p>	A32.29VV

40965	Verseman, Sarah	<p>The gondola plan continues to be a waste of tax payer dollars. It will only put more people in the canyon without improving traffic and congestion. It will disrupt our backyard, our well loved trails, and the construction time alone will create additional negative impacts on our watershed. It is not a viable solution. Do better. Stop the gondola.</p>	A32.29VV

39737	Verzella, Lisa	<p>I oppose the gondola for 3 main reasons:</p> <ol style="list-style-type: none"> 1. 8 gondola towers, snow sheds, 2 angle stations, and vegetation removal would take place within Inventoried Roadless Areas that exist in Little Cottonwood Canyon. The Forest Plan prohibits road projects and recreation projects in these areas, and, as the EIS states, these projects are for highway purposes. 2. The public comment period reads as though Wilderness Areas are expanding but, to the contrary, UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon. 3. Roadless areas are protected under the 2001 Roadless Rule. 	A32.29VV

Changes like this and the proposed gondola have significant impacts on the local communities as well as ecosystems. More thorough research needs to be done on local capacity, changes in local capacity from the proposed gondola, and the environmental and social impacts for all local residents. A gondola would not give equal access to all visitors and community members, and would significantly disrupt the natural wildlife that is supposed to be protected in such a unique ecosystem.</p> <p>Regards, Challie Vicary</p>	A32.3A; A32.3F

41453	Villata, Richard	<p>The development plan for Little Cottonwood Canyon is fundamentally flawed on multiple levels. It fails to account for the overall planning that is required for Park City and Big Cottonwood Canyon. Aerial development via a gondola or conventional lifts over adjoining peaks is problematic for multiple reasons. A minimal approach using direct surface and subsurface access that links the Park City Canyons area with Brighton and Alta needs to be investigated. Conversations with technical qualified individuals revealed that it is possible at costs similar to the proposed projects on a scaled down level. Instead, the focus has been totally on LCC. This only solves 1/3 of the overall environmental impact. The Forest Service needs to consider a more comprehensive plan that would better utilize less sensitive access routes between Park City Canyons, Brighton, and Alta. Less development of LCC and enhanced access through BCC and Canyons is possible. It has already been done at Snowbird via the ski tunnel. You would be surprised by what is technically and economically possible following some detailed conversation. What is required is a total evaluation of all of the options with regards to all three areas. Development would need to proceed in a phased approach over a period of years. Engineering-wise consider the projects that were completed in Glenwood Canyon and Vail Pass. The transformation that occurred when comparing before and after was dramatic. It was done in a very environmentally sound manner that is esthetically pleasing as well. Granted it was part of the interstate highway system, but it is not a stretch to see what could be done here.</p> <p>BTW, I hold a BA in environmental biology from the U. of Colorado, a MS in environmental engineering from the U. of Utah, and an MD who is specialized in aerospace and occupational medicine (former USAF). UDOT and the Forest Service need to think out of the box and see the woods for the trees.</p> <p>Richard "Kott" Villata [REDACTED]</p>	A32.29VV

43687	Vollentine, Stephen	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Stephen Vollentine</p>	A32.3A; A32.3F

		<p>Sent from my iPhone</p> <p>On Apr 17, 2023, at 7:01 AM, Little Cottonwood EIS Project Team <littlecottonwoodeis@utah.gov> wrote:</p> <p>Can't read or see images? View this email in a browser</p> <p>Public Comment Period For Supplemental Information Reports</p> <p>Closes April 18 at 11:59pm MST Comments on the reports will be published and addressed in the Record of Decision Thank you for your continued interest in the Little Cottonwood Canyon Environmental Impact Statement (EIS).</p> <p>As many of you are aware, the Utah Department of Transportation (UDOT) released the Final Environmental Impact Statement (EIS) for Little Cottonwood Canyon in August of 2022 and held a public comment period, with the project team receiving over 13,000 comments.</p> <p>As a result of the comments received, the project team determined additional analysis was warranted regarding the impacts of the Final EIS alternatives to Inventoried Roadless Areas under the 2001 Roadless Area Conservation Rule (RACR) and the Forest Plan. The RACR required the USDA Forest Service to conduct an inventory of roadless areas for their potential to be designated as wilderness based on size (at least 5,000 acres) or location (contiguous to an existing Wilderness Area). If an area meets these criteria, it becomes an "Inventoried Roadless Area" (IRA) and, in general, the RACR prohibits road construction, road reconstruction, and timber harvesting (cutting, sale, or removal) in IRAs unless certain exceptions or circumstances exist. Little Cottonwood Canyon contains the White Pine IRA and portions of the Twin Peaks and Lone Peak IRAs.</p> <p>Also following publication of the Final EIS, the Federal Highway Administration (FHWA) requested that UDOT complete additional air quality analysis. In particular, FHWA requested evaluation of a scenario under the existing modeling where all ski buses would be powered by diesel fuel rather than the model default which consisted of diesel, compressed natural gas, and gasoline powered buses; and that all transit buses be evaluated at the maximum expected service life of 14 years rather than a variable age bus fleet.</p> <p>As a result of public and agency input, UDOT has issued two supplemental information reports to evaluate applicability of the RACR and the potential impacts to IRAs and for additional air quality analysis.</p> <p>The public review and comment period for the supplemental information reports is open until April 18, 2023 at 11:59pm MST and the project team is accepting comments on the analysis contained in these reports. Formal comments can be mailed or submitted through the project website, email, voicemail, and text messages. This information is listed on the Contact section of the website.</p> <p>Please note that as the public had the opportunity to comment on the entire Final EIS, comments received in this comment period that are unrelated to the supplemental information reports will not be addressed in the Record of Decision (ROD). View Reports Submit Comment</p> <p>Agency Coordination Some of the elements in the alternatives evaluated in the Final EIS are located on National Forest System lands managed by the Uinta-Wasatch-Cache National Forest under the 2003 Revised Wasatch-Cache Forest Plan. A Forest</p>

		<p>Service decision may be required pending the FHWA's determination of what, if any, National Forest System lands needed for the selected alternative may be appropriated under their authorities (23 USC 317). Appropriation of National Forest System lands by the FHWA would be a non-exclusive easement for highway use, with the Forest Service retaining jurisdiction over all other uses.</p> <p>The Forest Service decision would be to authorize UDOT's use of National Forest System lands for the selected alternative, as analyzed in the Final EIS, and may also include a Forest Plan amendment if the proposed use is inconsistent with the Forest Plan. A Forest Service ROD, if necessary, would be based on the Final EIS and supplemental information reports, and would be issued after UDOT's ROD is published. The Forest Service ROD would be subject to the Forest Service project-level objection process (36 CFR 218).</p> <p>Final EIS Information Due to the amount of public interest in the Little Cottonwood EIS, many sources are sharing project information and data with varying degrees of accuracy. Please see the tables below for the most current and accurate information directly summarized from the Final EIS regarding the alternatives being considered. View All Final EIS Materials</p> <p>EIS Process & Schedule It's important to note that the National Environmental Policy Act (NEPA) process UDOT follows doesn't tally comments as a "yes" or "no" vote like a referendum. The NEPA public comment process is not a vote, but rather an opportunity for UDOT to field concerns, suggestions or criticism for a project's purpose and need, alternatives, and to evaluate whether additional engineering or environmental analysis is needed, as well as the mitigation measures proposed to minimize environmental impacts.</p> <p>The public comment periods and input received throughout the EIS process provide opportunities for UDOT to improve the study documentation and make sure it's thorough, accurate, and complete. UDOT's final decision will consider how the alternative best meets the project purpose as well as an alternative's environmental impacts. View Final EIS Comments</p> <p>Informational Videos Watch Part 1 of the Final EIS overview provided by UDOT Project Manager Josh Van Jura to learn more about the preferred alternative and proposed phased implementation.</p> <p>Watch Part 2 of the Final EIS overview provided by UDOT Project Manager Josh Van Jura to learn more about the preferred sub-alternatives.</p> <p>View the video below for more information on the environmental study process the Little Cottonwood Canyon EIS is following.</p> <p>Connect with us.</p> <p>Website Email Facebook Twitter Instagram The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being or have been carried-out by UDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated May 26, 2022, and executed by FHWA and UDOT.</p> <p>This email was sent by littlecottonwoodeis@utah.gov to beat@alpentech.net</p>

41319	Vongsawad, Ashley	<p>Feedback on SIR (The Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives).</p> <p>Construction of the proposed gondola should not take place within the Roadless Areas as the required infrastructure and roads is in direct violation of and will result in, significant negative impacts which are protected by RACR. These impacts include, but are not limited to:</p> <ol style="list-style-type: none"> 1. "Protecting air and water quality, biodiversity, and opportunities for personal renewal are highly valued qualities of roadless areas" 2. The towers will be visible and audible from the entire Roadless Areas and from much of the two National Wilderness Areas that closely parallel it 3. The gondola system would clear timber, place towers and angle stations within the protected area of the Wasatch, impacting three Roadless Areas in Little Cottonwood Canyon (LCC): Twin Peaks, Lone Peak, and White Pine <p>Even if one wants to make the argument that the gondola system isn't defined as a "road" the intent is that the structure would perform the function of a highway and therefore is inconsistent with the Roadless Rule.</p>	A32.3A; A32.3F; A32.3G; A32.3I
40664	Vongsawad, Brandon	<p>The Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives ("SIR") leaves the door open to legal challenge by not evaluating critical assumptions. The Final EIS made several assumptions regarding impact on IRAs, which the SIR acknowledged but did not evaluate. For example, the SIR acknowledges that the Final EIS "assumes that a crane or helicopter could be used to deliver materials for construction" of several gondola towers, which would not require access road development in the IRAs. The IRA impact analysis relies on this assumption. If that assumption proves incorrect, additional access roads will be required that will affect the IRA impact analysis. Unlike telephone and power line towers, construction of gondola towers requires substantially more excavation, foundation strength, and structural reinforcement that seem unlikely to be accomplished merely by cranes and helicopters. These towers will also require access for year-around maintenance and emergency services, which will likely require road access. UDOT should be able to evaluate these assumptions based on prior construction, maintenance, and emergency services for comparable gondola projects and through consultation with structural engineers and gondola developers. However, neither the Final EIS nor the SIR evaluated these assumptions. Because this could have a material effect on the accuracy and reliability of the IRA analysis, it would be prudent for USDA and UDOT to evaluate these assumptions thoroughly before accepting the current incomplete IRA impact analysis.</p>	A32.3H

		locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Keiana Vreyens	
46969	Vroom, Peter	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Peter Vroom	A32.3A; A32.3F

40018	Vukin, Matthew	The LCC Gondola violates the roadless rule given how construction would adversely impact many areas disturbed in the creation and maintenance of the Gondola. While not a road for travel, as the final product, the spirit of the rule is violated with interruption of wilderness with man made structures and noise associated with their operation.	A32.29VV

41279	W, Emily	<p>This process is so long and agonizing, part of me wonders if it's on purpose. If you wait long enough, people burn out and lose interest, after all. I understand some things take time, but come on. This whole process from start to finish just reeks of political corruption and bureaucracy. I thought we were better than this, Utah. I hope someone out there is still fighting the good fight on this one. Let the cars back up every winter. Let the ski resorts pull in the same old profit they've always pulled in. If you put in a gondola, the roads will still back up because people will think "hey the road is less crowded, now we can go!" It's just another way to expand - to bring in more people and more cars and more money and more, more, more. We don't need more. We have enough. Just leave the whole freaking canyon alone. This idea that "we always have to be growing and meeting the new demand and making more profit than last year" is so, so stupid. We're good enough. The resorts have enough. Just leave it alone. Every study that's ever been done on expanding roads/lanes/putting in more transport options shows that none of it alleviates the problem -- it just makes more opportunity, which then gets used up by a greater number of people, until we're back to the same original problem. This is a lose-lose battle. The best choice is to just drop this whole mess and walk away.</p>	A32.29VV

39237	Wade, Angela	<p>Slow Down, let's try the enhanced bus service without widening the road to see what happens over several years before deciding to do things to the canyon that cannot be undone! Please Slow Down!</p>	A32.29VV
40075	Wade, Brennan	<p>This gondola would travel through the Wasatch-Cache National Forest, which is protected by the 2001 Roadless Area Conservation Rule.</p> <p>The 2001 Roadless Area Conservation Rule prohibits road construction and timber harvesting on 58.5 million acres of national forest land. The purpose of the rule is to protect these areas from development and preserve them for their natural and recreational values.</p> <p>The proposed gondola would require the construction of support towers and the installation of cables, which would be considered a form of road construction and would go against the Roadless Rule. The construction and operation of the gondola would have negative impacts on wildlife habitat, water quality, and the overall natural beauty of the area.</p> <p>Additionally, the construction of the gondola would likely lead to increased development and commercialization of the area, which goes against the intent of the Roadless Rule to preserve natural areas and limit development.</p> <p>Overall, the construction of the Little Cottonwood Canyon Gondola is in conflict with the 2001 Roadless Area Conservation Rule due to its potential impact on the natural environment and its promotion of development in a protected area.</p> <p>It would be a major mistake for UDOT to continue down the path of considering a gondola for Little Cottonwood Canyon. I appreciate UDOT recognizing this initial oversight and putting in the time to analyze this aspect of the project.</p>	A32.29VV
41644	Wade, Brian	<p>I am opposed to the gondola option based on 1) Environmental impact 2) Initial cost and ongoing costs which I believe are grossly underestimated. 3) Burden on Utah taxpayers 4) Alta/Snowbird should be liable for much of the cost as they are the primary beneficiaries.</p>	A32.29VV

39680	Wade, Ian	The proposed gondola is an appalling idea to benefit two ski areas while being a visual blight forever on a place I've spent many days, winter and summer hiking and skiing. The gondola project should not be exempt from the Roadless Rule. It is a permanent highway project that would have negative impacts on our watershed, plant and animal communities, recreation opportunities, and more. We all depend on the preservation of these areas. You should consider frequent electric bus/ van service on a year round basis before trying anything with the outrageous impact of a gondola.	A32.29VV

Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Autumn Wagner	A32.3A; A32.3F
40476	WAGNER, DEBORAH	Do not build the gondola! It is a subsidy for the private ski areas and will deface the backcountry for recreationalists. Improve busses and limit vehicles instead.	A32.29VV
52481	Wagner, Eric	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. 		Regards, Seth Wagner	
42211	Wagner, Tim	I am a Utah resident and I do not want roadless areas impacted or developed. Gondola towers clearly violate the Roadless Rule and should not be allowed. They will forever damage the flora and fauna in the canyon and put our crucial water supply in unneeded jeopardy. I am amazed that this is even under consideration. Why not increase buses and use electric buses? This is much more feasible and does not risk our essential water supply and does not violate the Roadless Rule. There are very few roadless areas and we need to protect them. When you develop in roadless areas they are forever marred. How will you ensure that the plants and animals currently in the impacted areas will not be destroyed? I do not support building a gondola in Little Cottonwood Canyon and I am appalled at the idea that tax payer monies would be used for this debacle.	A32.3F; A32.3G; A32.10G

40209	Walker, Diane	<p>UDOT study criteria seems to be basing its current EIS on the assumption that additional buses traversing up the canyon will be diesel powered. This assumption seems wholly biased to obtain your desired outcome (i.e, to green light the gondola). Stop rigging the game. Taxpayers deserve all the realistic options. UDOT should include in its assessment impacts of additional electric powered buses, as well. I also think a gondola only serving two private corporations should not be exempt from federal roadless protections. That bar should be way higher. Most residents know this abomination to the landscape will only benefit patrons of the private resorts. Do not wave federal protections without also weighing the extremely high PUBLIC cost of destroying our PUBLIC lands forever.</p>	A32.3I; A32.10G

41017	Walton, David	You have sent me FOUR reminders about replying to this useless survey. It does not matter one iota what we THE PEOPLE say. Just as you did on gerrymandering and the Inland Port, you people will do whatever makes the legislative cronies and big donors money. The gondola is the single most stupid, idiotic taxpayer-wasting boondoggle ever conceived but you will do whatever benefits those cronies. NOBODY wants the gondola!! NOBODY except a few politicians and their cronies.	A32.29VV
40424	Wambach, Angela	The only option that makes sense to start with is enhanced bus with no widening. Pay the drivers enough and invest in maintenance so they run on time. Even toll single vehicles. The reports are clear on environmental impact of all other options. Trying to shoehorn the gondola into the "activities not otherwise prohibited" loophole of RACR is a sad excuse. As a quality engineer, the data presented does not support any of the other proposed actions.	A32.3A

		Regards, Jamus Wangsgard	
42308	Waniger, Jarid	It is quite good to know that UDOT has recognized and acknowledged the potential implications that gondola construction would surely cause in the designated roadless areas in Little Cottonwood Canyon. The construction of a gondola will have the same environmental impacts as constructing a literal road. Without a doubt, there will be highly significant impacts on the watershed, dispersed recreation, timber, vegetation, habitats, hiking trails, camp spots, and climbing routes if the gondola's construction is pursued. We should protect and honor these spaces, and end plans for a gondola altogether. Other options can and should be pursued to alleviate growing traffic congestion as our city grows.	A32.3A; A32.3F

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Logan Wanlass	A32.3A; A32.3F
42534	Wannenmacher, Allison	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40455	Ward, Alec	<p>I would like to express my opposition to the proposed gondola project. There is no way to accomplish it without impacting the beautiful hiking, climbing, wildlife viewing, ski touring, biking and recreation areas enjoyed by hundreds of thousands of Utahans and visitors. Alleviating 5-10 weekend days of heavy traffic cannot be worth this impact - however well mitigated. Please help preserve our state's natural beauty through less high-footprint alternatives such as expanded bus and carpool options.</p>	A32.29VV

41243	Ward, Jerron	<p>This is ridiculous. Do you know how many potholes I deal with every day? Our roads are crumbling, and you want to build a gondola that will most benefit elite upper classers, many from out of state. Implement strict bussing regulations for people who use the ski resort, built a parking lot for their cars and charge fees for it while you set up bus routes. Boom problem solved.</p> <p>This entire affair reeks of cooperate corruption. If this goes through, I will push for a public enquiry into who accepted bribes for this.</p>	A32.29VV

		<p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Macie Washburn</p>	
56086	Washington, Dan	<p>I thought that the original plan for the train was to include stops at trail heads and also access Big Cottonwood Canyon and Park City. It would make much more sense to address the entire Cottonwood Canyons issues instead of doing only one canyon. Giving alternative transportation options for all recreation areas in the canyon should be included instead of spending all that money to benefit the two ski areas.</p> <p>Sent from my iPad</p> <p>On Apr 17, 2023, at 8:05 AM, Little Cottonwood EIS Project Team <littlecottonwoodeis@utah.gov> wrote:</p> <p>Can't read or see images? View this email in a browser</p> <p>Public Comment Period For Supplemental Information Reports</p> <p>Closes April 18 at 11:59pm MST Comments on the reports will be published and addressed in the Record of Decision Thank you for your continued interest in the Little Cottonwood Canyon Environmental Impact Statement (EIS).</p> <p>As many of you are aware, the Utah Department of Transportation (UDOT) released the Final Environmental Impact Statement (EIS) for Little Cottonwood Canyon in August of 2022 and held a public comment period, with the project team receiving over 13,000 comments.</p> <p>As a result of the comments received, the project team determined additional analysis was warranted regarding the impacts of the Final EIS alternatives to Inventoried Roadless Areas under the 2001 Roadless Area Conservation Rule (RACR) and the Forest Plan. The RACR required the USDA Forest Service to conduct an inventory of roadless areas for their potential to be designated as wilderness based on size (at least 5,000 acres) or location (contiguous to an existing Wilderness Area). If an area meets these criteria, it becomes an "Inventoried Roadless Area" (IRA) and, in general, the RACR prohibits road construction, road reconstruction, and timber harvesting (cutting, sale, or removal) in IRAs unless certain exceptions or circumstances exist. Little Cottonwood Canyon contains the White Pine IRA and portions of the Twin Peaks and Lone Peak IRAs.</p> <p>Also following publication of the Final EIS, the Federal Highway Administration (FHWA) requested that UDOT complete additional air quality analysis. In particular, FHWA requested evaluation of a scenario under the existing modeling where all ski buses would be powered by diesel fuel rather than the model default which consisted of diesel, compressed natural gas, and gasoline powered buses; and that all transit buses be evaluated at the maximum expected service life of 14 years rather than a variable age bus fleet.</p> <p>As a result of public and agency input, UDOT has issued two supplemental information reports to evaluate applicability of the RACR and the potential impacts to IRAs and for additional air quality analysis.</p> <p>The public review and comment period for the supplemental information reports is open until April 18, 2023 at 11:59pm MST and the project team is accepting comments on the analysis contained in these reports. Formal comments can be mailed or submitted through the project website, email,</p>	A32.29VV

		<p>voicemail, and text messages. This information is listed on the Contact section of the website.</p> <p>Please note that as the public had the opportunity to comment on the entire Final EIS, comments received in this comment period that are unrelated to the supplemental information reports will not be addressed in the Record of Decision (ROD). View Reports Submit Comment</p> <p>Agency Coordination Some of the elements in the alternatives evaluated in the Final EIS are located on National Forest System lands managed by the Uinta-Wasatch-Cache National Forest under the 2003 Revised Wasatch-Cache Forest Plan. A Forest Service decision may be required pending the FHWA's determination of what, if any, National Forest System lands needed for the selected alternative may be appropriated under their authorities (23 USC 317). Appropriation of National Forest System lands by the FHWA would be a non-exclusive easement for highway use, with the Forest Service retaining jurisdiction over all other uses.</p> <p>The Forest Service decision would be to authorize UDOT's use of National Forest System lands for the selected alternative, as analyzed in the Final EIS, and may also include a Forest Plan amendment if the proposed use is inconsistent with the Forest Plan. A Forest Service ROD, if necessary, would be based on the Final EIS and supplemental information reports, and would be issued after UDOT's ROD is published. The Forest Service ROD would be subject to the Forest Service project-level objection process (36 CFR 218).</p> <p>Final EIS Information Due to the amount of public interest in the Little Cottonwood EIS, many sources are sharing project information and data with varying degrees of accuracy. Please see the tables below for the most current and accurate information directly summarized from the Final EIS regarding the alternatives being considered. View All Final EIS Materials</p> <p>EIS Process & Schedule It's important to note that the National Environmental Policy Act (NEPA) process UDOT follows doesn't tally comments as a "yes" or "no" vote like a referendum. The NEPA public comment process is not a vote, but rather an opportunity for UDOT to field concerns, suggestions or criticism for a project's purpose and need, alternatives, and to evaluate whether additional engineering or environmental analysis is needed, as well as the mitigation measures proposed to minimize environmental impacts.</p> <p>The public comment periods and input received throughout the EIS process provide opportunities for UDOT to improve the study documentation and make sure it's thorough, accurate, and complete. UDOT's final decision will consider how the alternative best meets the project purpose as well as an alternative's environmental impacts. View Final EIS Comments</p> <p>Informational Videos Watch Part 1 of the Final EIS overview provided by UDOT Project Manager Josh Van Jura to learn more about the preferred alternative and proposed phased implementation.</p> <p>Watch Part 2 of the Final EIS overview provided by UDOT Project Manager Josh Van Jura to learn more about the preferred sub-alternatives.</p>

		Regards, Katelyn Waskevich	
41004	Waskowicz, John	Governor Cox recently gave a statement that the taxpayers shouldn't carry the burden of paying for a MLB stadium. HOW IS THE GONDOLA ANY DIFFERENT? Why should the taxpayers pay for something that only benefits several businesses? The people of Salt Lake are against this plan.	A32.29VV
39921	Wason, Mike	What used to be a beautiful view from the top of the canyon will now be ugly ugly with the gondola visible for a long way down. Please reconsider and stop this project.	A32.29VV
39924	Wason, Vicky	We have a timeshare at iron Blossam in Snowbird. We would like to continue to enjoy the peaceful quiet environment. The amount of infrastructure that will have to be put in place for the Gondola, is unacceptable. I am against the gondola. Thank you for considering my comments.	A32.29VV
39460	Wasser, Ben	How can you justify using taxpayer \$ for a project that will do nothing for 99% of Utah residents and only pad the pockets of executives at Snowbird and Alta? You are gaslighting us into thinking this is something we need. Make a bus lane and big old park and ride. Install a booth where traction law will actually be enforced. People driving up in rental cars and with bald tires cause by far and away the most problems	A32.29VV

41080	Waters, Megan	<p>I am disappointed to see this move forward this way. Your overview fact sheet describes the public comment themes as "supportive of the gondola", however in a quick scan of your comment database document, I can see there are definitely comments suggesting they are opposed to the gondola. Please accurately reflect that there is community and public opposition and the reasons you'd move forward this option given that opposition. I also noticed regarding the comments documents, you state that there hasn't been a full analysis of the comments - has that been completed now? I'd like to understand how that analysis has informed the path forward.</p>	A32.29VV

		As a Canyon user, I oppose the gondola option. It does not provide a solution that works best for the community and public as a whole, rather serves private interest. The watershed and environment are at risk if this is the way forward. Please reconsider the utility of this option given the important goals of preserving canyon access, protecting critical environment and watershed, and responsibly spending taxpayer dollars. Be creative and see how we can leverage an enhanced bus solution that provides more equitable access throughout the canyons.

I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Karen Watkins	A32.3A; A32.3F
39411	Watkins, Lauren	As a parent and resident of Utah it is important to me to respect the roadless statutes set out. The gondola base stations and supports would not respect these statutes. There will be areas cleared that will marr the natural landscape and bring increased traffic into areas that are designated as roadless. Please consider the bus Option A which is less cost, less impact on the environment, and will respect the roadless rules that are in place.	A32.3A
40937	Watkins, River	No gondola!! Save the canyon from the gondola!	A32.29VV
51515	Watkins, Sasha	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. 39597	Watson, Clay	<p>I'm very concerned that all of the proposed alternatives eliminate roadside parking in parts of the canyon that don't have established trails.</p> <p>1) From 4.3.1.3 Trailhead Parking Alternatives</p> <p>"Eliminating parking within 1/4 mile from the new Bridge Trailhead and the existing Lisa Falls and White Pine Trailheads would not impact popular roadside parking areas to access dispersed recreation. "</p> <p>I disagree because there are going to be 20-30 days a year when these parking areas will be completely overflowing with cars. People will end up parking 1/4 mile down the road and then will walk along the road to get to these attraction sites.</p> <p>2) Also from 4.3.1.3 Trailhead Parking Alternatives:</p> <p>"With the Trailhead Improvements and No Roadside Parking from S.R. 209/S.R. 210 Intersection to Snowbird Entry 1 Alternative, the Maybird and Tanners roadside pullouts would be</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>eliminated. There are no designated trails in these areas that are used by climbers and backcountry skiers."</p> <p>This is crazy! I've hiked in these areas for years. Just because the FS did not create a trail there does not mean people are not accessing those areas!!</p> <p>3) (continuing) "Note also that the China Wall pullout, which is in the Twin Peaks IRA and is used during the summer only for accessing side canyons and the informal White Pine bouldering area, would also be eliminated by this alternative (and by the snow sheds). These pullouts would not be replaced by formal parking areas (access would be provided by the White Pine Trailhead) and, therefore, the RACR would not apply to this alternative."</p> <p>Have you ever tried walking beside a road with a crash pad on your back? How about with two or three of them? When a car speeds by, the wind nearly pushes you down and it's crazy dangerous.</p> <p>This plan is flawed because forcing people to park at the White Pine Trailhead will inevitably force people to walk along the road, placing themselves at risk.</p> <p>Again, just because there are no designated/improved trails at a particular location does not mean people are not accessing those areas!</p> <p>This is particularly true for the 9 months of the year these areas are not covered in snow.</p> <p>4) Both Tanners and Maybird roadside parking access areas have informal trails leading to very rugged, steep side canyons. Adding another mile to the hike would effectively eliminate dispersed recreation in these areas.</p> <p>Unless the FS is actually planning on creating a trail network to link these locations? How would that be accomplished while also maintaining wilderness boundaries?</p> <p>There are many other areas in the canyon like this. Unless the FS is considering adding trail access to these areas, I hope you will please consider allowing parking access to remain open.</p> <p>5) Several versions of the proposed alternatives propose eliminating roadside parking in the town of Alta. Other portions of the EIS alternatives state that, "elimination of the other roadside pullouts would not alter the recreation opportunities of the Twin Peaks IRA."</p> <p>I propose that both of these sentiments are quite flawed and do not consider the timing and location that skiers access the canyon.</p> <p>I hope you will consider that the costs of skiing at the resorts has driven many people to access the backcountry. Eliminating the 230 parking sites would effectively clamp down and eliminate much of the back country skiing access.</p> <p>This is especially true for those who ski before work. There is a large slice of the backcountry skiing population who ski before work. They park at 5AM and leave before 9. Eliminating their roadside parking effectively eliminates their ability to ski before work.</p> <p>6) Several versions of the EIS alternatives state, "Some backcountry skiers destined for areas within and above the Twin Peaks IRA could use the gondola, which could increase backcountry use; however, increased backcountry use is difficult to predict. Increased backcountry use could increase the amount of human waste in the backcountry and indirectly affect water quality."</p> <p>The first half of this statement could be true, depending on the hours of operation of the gondola. I find it hard to believe the gondola will operate at the early morning hours that most BC skiers initiate their tour.</p> <p>The second half of this statement is crazy. Where is the research that verifies the incidence of human waste in the canyon? How do you know people aren't carrying their waste out? How many more people at the ski resorts urinate in the trees?</p> <p>7) From Table 3, the Project Effects on the Unique Characteristics:</p> <p>"For roadway users and forest users near the gondola alignment and snow sheds, the landscape would appear severely altered, and the snow shed infrastructure would dominate the visual setting in the immediate foreground and foreground areas. The gondola and snow sheds would diminish but not limit the management of the scenic byway by the USDA Forest Service to protect scenic vistas and intrinsic scenic qualities of the canyon overall. The medium (3) score for this roadless value would not change. "</p> <p>The gondola will absolutely destroy the scenic beauty of this canyon. No question about it.</p> <p>8) From Table 2: Roadless Values and Project Effects from the Enhanced Bus Service in Peak-period Shoulder Lane Alternative</p> <p>"Some backcountry skiers could take the bus to the resorts, which could increase backcountry use in the winter. See Chapter 20, Indirect Effects, of the Little Cottonwood Canyon Final EIS for more information regarding the potential indirect impacts."</p>	

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>This does not ring true, unless you had dedicated hours of bus service that catered to early morning or late tourers.</p> <p>9) "The minor amount (between 0.37% and 0.42%) of land disturbance adjacent to the existing road, the minor amount of impact to the existing Lisa Falls Trail, elimination of the China Wall roadside pullout, and elimination of the other roadside pullouts would not alter the recreation opportunities of the Twin Peaks IRA. The low (1) score for the primitive and semi-primitive recreation roadless value would not change."</p> <p>Not true because many of the areas accessed by these trails don't just go to the areas right by them. For example, much of the bouldering above the China Wall and adjacent gullies are accessed by an informal trail system that projects far into the back country.</p>	
40321	Watson, Elizabeth	<p>I do not support the installation of the proposed overhead gondola especially if it is funded by Utah taxpayers. The unfavorable short term disruption during construction and the long term impact on the environment, biota and natural resources is unacceptable and indefensible. Please vote against this proposal which is only business oriented and motivated and keep this pristine buffer between already existing developed and busy areas intact. The use of public funds is totally indefensible given the many other priorities and insecurities facing our State, especially when an enhanced bus system with reservations if done correctly would be far less expensive, usable year round, more accessible and far less expensive. Remove this from the budget permanently.</p>	A32.29VV

39556	WEAVER, JACK	<p>I am opposed to the gondola. The gondola would destroy so much of the natural resources in Little cottonwood canyon. And it would serve primarily skiers and the ski resorts. There are so many user groups like climbers and hikers that would bear the brunt of the gondolas negative impact and experience none of the benefits. It seems extreme to go from no. Or very limited traffic abatement measures to an incredibly expensive gondola. I would urge you to consider all the other solutions that are incredibly cheap compared to the gondola and more environmentally friendly. Methods like charging less parking for those the carpool or charging a higher amount to park at the resorts per car would encourage people to take fewer vehicles up the canyon. Increasing bus service could also help. Traffic may also be a natural inhibitor to reduce the number of people in the canyon. I understand that skiing is important for the economy and that people in salt lake love to ski, but we don't want our beautiful natural resources to be loved to death.</p>	A32.29VV

42238	Webb, Bryan	<p>As ski lift Electrician who has been in the lift industry for over 25 years and a local who has grown up in these canyons for over 50 years, I am in full support of the Gondola. It seems to me that most of the public opinion against the Gondola is based on misinformation, like the Gondola always being shut down for high winds or not being able to run during adverse winter conditions. These and many other arguments are simply not true, and I hope that you will base your decision off of facts. One aspect of these road closures that seems to not get brought up is the health and safety of those who are stuck up the canyon with no way out. If someone has a medical emergency or heaven forbid, we have multiple medical emergencies, how do we get them to the hospital? LifeFlight will not fly in low visibility, we can't put them on "more" busses. This is a very real situation that has happened more than once, and we have gotten lucky. The Gondola is the only proposal that can get people out safely when the road is closed, and the visibility is compromised. There are many more boxes that the Gondola checks that the other proposals don't, and there are many of us who support the Gondola proposal who are not vocal on social media. My hope is that you base your decision on facts and not a vocal group of people basing their opposition off of conjecture and misinformation.</p>	A32.29VV

42187	Weber, Stephanie	<p>Hello,</p> <p>As a resident of Salt Lake City and a frequent visitor of Little Cottonwood Canyon, I believe the best transportation alternative for SR210 is an enhanced bus service. Snow sheds will help keep existing roads clear and make use of the existing infrastructure, whereas the proposed gondola solution ignores a multitude of environmental risks that are posed by construction and continued operation. Operation of the gondola will require service roads and continued road maintenance, meaning the cost of the project will far exceed that of other alternatives. Little Cottonwood Canyon deserves to be kept wild, and its finite capacity respected. The gondola is not the appropriate solution, fiscally or environmentally, when simpler and friendlier solutions exist, like enhanced bus services.</p>	A32.29VV
40032	webster, shauna	I don't feel that a gondola is the solution, nor widening roads. There should be other options explored that have less environmental impact.	A32.29VV
39242	webster, shauna	I feel that gondolas are not the solution. Also do not widen the road. Rather electric buses.	A32.29VV
41475	Wechsler, Julia	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 40396	Weiler, Jennifer	<p>The 2001 Roadless Rule is meant to preserve wild areas from development. It works in Little Cottonwood Canyon by creating buffers from traffic on State RD 201 to some of the Wasatch's most protected wild areas. The gondola construction will impact not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Construction of the gondola goes against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals.</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless." The gondola project will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	A32.3A; A32.3F

41064	weinand, chris	<p>A gondola should not be apart of the proposed solutions because it will not help congestion in the canyon. It will only help the ski areas make more money at the expense of the tax payers. Salt Lake City should deal with the shrinking Great Salt Lake before dumping millions into a "solution" to LCC ski areas not making enough money.</p>	A32.29VV
41347	Weinberger, Alex	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 39439	Wells, Sharlene	<p>The push to construct the gondola needs to stop. It is not in accordance with the Roadless Rule. It is unrealistic to think that for the part of the year that there is pressure on the transportation up the canyon, which is less than half of the year, that the expensive, intrusive, and unpopular gondola is the solution. Let the gondola idea go and find a better solution that is compliant, less expensive, less intrusive on the environment, and more suitable year round.</p>	A32.3A
39325	Wells, Sharlene	<p>The amount of time that traffic in Little Cottonwood Canyon is problematic is only during the ski and snowboarding months. I object to the gondola option which is a year-round solution. I object to the damage to the environment that it would cause. I think it would be an eyesore and I object to it being installed. I object to the burden it would put on tax payers, especially those of us who are elderly and would be required to pay for an ugly, year-round machine we would never use it.</p>	A32.29VV

40442	Werner, Luke	<p>I am against the gondola, which is an irresponsible use of taxpayer funds which would only serve the interests of two corporations. It would increase the people in the canyon and make it more expensive to sue the canyon. It would not solve traffic issues. It will not stop at any trailheads along the way and would permately ruin the canyon. It should not get a special exemption from the Roadless Rule.</p>	A32.3A; A32.3F

40095	West, Sara	<p>It's a joke to think that people will magically start using the buses when they haven't to date. Build the gondola and a parking lot for the people using the gondola. We're already paying for parking at Alta and Snowbird so there's no reason why we can't either buy a season pass to a gondola or pay per day. A gondola is the only logical option. I live here and I'm not going to take the bus, and I'm just one of many.</p>	A32.29VV

45070	Westermann, Lia	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Lia Westermann</p>	A32.3A; A32.3F

39658	Westlen-Boyer, Karin	<p>8 gondola towers, snow sheds, 2 angle stations, and vegetation removal would take place within Inventoried Roadless Areas that exist in Little Cottonwood Canyon. The Forest Plan prohibits, road projects and recreation projects, and as the EIS states these projects are for highway purposes.</p> <p>The public comment period reads as though Wilderness Areas are expanding, to the contrary, UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon.</p> <p>Roadless areas protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas. These places need to be protected!</p> <p>Furthermore the Gondola project will be far too costly and will not greatly decrease traffic up the canyon.</p>	A32.29VV

39252	Weston, Robert	<p>I am a shuttle driver taking out-of-state skiers to/from Salt Lake International Airport to Alta and Snowbird lodging accommodations. This is my third season, which would validate that I am very familiar with LCC road UT 210. The way I see it, there is a traffic problem, but not from the mouth of the canyon but to the mouth of the canyon. Building a parking lot for access to a gondola at La Caille still means a snake on Wasatch Boulevard and UT 209. Little Cottonwood Canyon is a treasure and gift that needs less intrusive solutions. The Gondola is like an orthopedic surgeon performing a total knee arthroscopy prior to prescribing possible less invasive treatments. From a taxpayer perspective I oppose the Gondola as it is simply a taxpayer funded parking lot exclusive to Alta and Snowbird customers. As a Utah resident, hiker, skier, ice climber, rock climber I find the idea of scaring the canyon rather repulsive. Alta and Snowbird are private enterprise and should seek private enterprise solutions. I would suggest launching a two canyon, two-part cost-effective solution. The first you already have; it's called the Express Pass. Charge \$10 per vehicle and scale price up to \$40 during red snake situations. Essential services and legitimate private enterprise vehicles would be exempt. The second utilizes technology to improve dynamic bus routes. The majority of skiers have purchased Epic, Ikon or Season passes. Each one of those users has an address. An analytical study might map out home areas of large portions of the users. Temporary and rotating quick stop bus routes could be identified each season. Smaller capacity electric buses might be nimble in getting skiers to the slopes. I believe there is an opportunity to double the size of the parking lot at Trax 72nd South and maybe Real Salt Lake. Based on analysis mini-stops could be identified where there are clusters of pass holders. Expansion of larger perhaps multi-story parking lots and express bus service may be more effective. Heck, there is even a bus stop at the Hampton Inn in Mill Creek. Snowbird Headquarters is across the street. Why not add more floors were management resides. The city of Salt Lake built a nice multi-story parking lot at the airport. Put a monster lot by I-15 or I-215 with service to all four ski areas. Perhaps that significantly downsizes the red snake. Essentially, find creative alternative remedies before your surgically destroy the canyons we love. You could also outsource mini-bus service to private enterprise! Just saying.</p>	A32.29VV

40296	WEULING, ANDREW	<p>After reading the Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives it appears that the only option that has no detrimental impacts on the plant and wildlife in the canyon is the enhanced bus service without road widening.</p> <p>The report makes no mention of the massive excavation and footings required to support the gondola towers. These massive structures cantilevered hundreds of feet out of the ground will need significant footings that must be dug out and then filled with concrete. The excavated soil needs to go somewhere. The concrete needs to be poured in and cannot be lifted in. Areas with poor soil would require ground nails. There can be no construction of gondola towers without roads being cut through the roadless zones.</p> <p>Also, the idea a crane or helicopter can carry tons of steel into the area is absurd. Roads and trails would need to be built for the construction and maintenance of the towers. Also, the fossil fuel use of moving this material by crane or helicopter absolutely would offset any benefit proposed by the project on top of the already massive carbon footprint of millions of tons of steel and concrete the build the gondola. Has the project budget accounted for the cost of cranes and helicopters? Has there been any consideration that when these activities occur the road will be closed? Can the road support a crane safely? In the winter how will the construction site be protected from avalanches, especially in the Tanners region?</p> <p>We beg UDot to please choose the lowest impact, scalable, and safest solution that the voice of people calls for; Please enhance the current bus system and do not stamp a gondola into our beautiful canyon.</p>	A32.3H
41195	Weuling, Andrew	<p>On the air quality survey has a study been done to determine the air quality impacts of powering the gondola? The sheer energy required to move the gondola cars and cable is far more than running a bus. In periods of lower demand less busses can be used and therefore emissions are cut down. The gondola cannot be scaled as easy and will still require immense power and fossil fuels to run.</p> <p>There is also the question of the breathtakingly high emissions output that will be generated by the creation of millions of pounds of steel and concrete needed to construct the world's largest gondola. This cannot be ignored. Even if local plants aren't used it just means another community has to bear the brunt of the emissions...</p>	A32.29VV

40498	Whalen, Christina	<p>I am adamantly against the proposed gondola. In my opinion this proposal is an irreversible option that was lobbied as a money grab for greedy developers and corrupt public officials. The gondola is not a nimble, or scalable solution that can fluctuate with demand for transport. Additionally Resorts and developers have committed nothing in regards to obligations for this proposal. I'm tired of hearing a flimsy argument that they have to subsidize the cost for riders but there is no language in the transportation proposal about what ski resorts and developers will commit to this plan. No commitment about the cost to ride, no commitment about the cost of parking. Actually the proposal says that parking will be available for a premium price to riders. Additionally this plan does not address the transportation needs and congestion surrounding Big Cottonwood Canyon which might be even worse than Little Cottonwood. This gondola proposal is a very expensive solution that will only operate 5 months out of the year, and if it doesn't work will be a massive wast of funds and cause the destruction of a natural place that makes Utah and Salt Lake City a special place.</p> <p>It is estimated that the gondola will transport about 1000 people per hour, but there are more than 10,000 people entering the canyon during peak season. A billion dollars to service 1/3 of the total volume is nonsense and once again does not address big cottonwood canyon transportation.</p> <p>We need to leverage our current infrastructure to improve transportation. Last year when snowbird had parking reservation system it was very manageable. This year Alta is very manageable with the parking reservation system. When 20% more busses were added to canyon transportation, they immediately filled up.</p> <p>Bottom line, we need to try more reversible solutions before we hit the panic button and destroy something special.</p>	A32.29VV

49218	Wheatley, Rachel	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Rachel Wheatley</p>	A32.3A; A32.3F

41054	Wheeler, Dan	<p>I encourage you to use the Enhanced Bus Service with no widening. This will be the least expensive and will do least environmental damage. If after several years of the bus service widening the road could be reviewed. The other option is to limit the number of cars and skiers going up the canyon. The ski resorts can cap the number of skiers using the resorts and offer discounts for car pooling. Golf courses and movie theaters have capacity restrictions; ski resorts can also restrict the number of lift tickets sold.</p>	A32.29VV

39628	WHEELER, JACQUELINE	<p>If this project goes through it will be a big mistake. This will not resolve the traffic problems in LCC, it will just redirect more traffic to a highly congested zone. It is unrealistic to think a local will and can pay to ride the gondola. Is this misinformation it will cost \$20-\$40 per ride? Not to mention, what measures do we take now? We need a solution that mitigates the issues now, not in 15 years! I live at the base right near the base station and I am a skier. I see how this will benefit me with access to the gondola, but it will also create additional issues with traffic issues. I already can't get home from taking my kids to school in the morning! This issue needs to be rethought... We need to mitigate the traffic at the mouths of both canyons, LCC and BCC, by increasing bus routes in the valley so there are less cars coming to the mouth. Yes, UDOT can't find drivers because they aren't paying enough. A higher pay that is subsidized by the resorts and a toll system could help raise money to ensure a driver supply to both canyons. The gondola will only serve one canyon. In my experience BCC has a bigger traffic problem. What is the plan for that canyon?</p>	A32.29VV
39357	Wheeler, Luke	<p>Hello,</p> <p>My name is Luke Wheeler, I have been living in Millcreek for almost three years now. I ski 5 days a week primarily in LCC and I am writing this to submit my suggestions for the traffic problems we are seeing. I am not in favor of the gondola and think it would be an eye sore, a misuse of taxpayer dollars, and most importantly, a poor solution to our problem.</p> <p>My suggestion to fix this would be to invest in an electric bus fleet of church vans that would run every 5-10 minutes at the already built bus stops. These buses would carry 15 to 20 people at a time and would be constantly running from 7am to 10:30am and 2-5:30 pm. The current bus system is great but they only run every 30 minutes. Because of this locals don't want to wait for a bus in the morning where they most likely won't have a seat and may not be able to get on the first or second bus that comes depending on how many people are waiting. Also the current buses are massive, slow and hard to maneuver.</p> <p>My solution of frequent smaller buses solves all of these problems and is much cheaper than the proposed gondola plan. Ideally the vans are electric and can be converted to self driving as the technology develops. The major costs would be the vans and hiring drivers. This takes advantage of the systems that are already in place, and will not destroy sacred land and wildlife. If you can instill confidences in the buses us locals will take them.</p>	A32.29VV

		<p>The gondola will not only cause an even bigger traffic jam at the mouth of the canyon, it will not allow people to travel while they are shooting bombs from the ski in a helicopter. Nor will it be faster than just driving up yourself. There is no incentive for me to take the gondola unless parking is not free at the resorts. Overall, I think the financial cost of the project along with the sacred space in LCC it will destroy, greatly out way the marginal benefit of being able to ride the gondola 45 minutes before they open the road for traffic.</p> <p>I'm sure you get emails like this everyday, figured I would share my two cents.</p>

40420	Whelan, Peter	Thanks for checking back in! Still vehemently opposed to the gondola idea. I'm not even going to rehash any of my old arguments; the public has clearly made their point and it feels unnecessary to make some poor intern re-read that. Also, I hadn't even realized a cog railway had been on the table; I'm also entirely opposed to that. The idea of a monorail above the roadway briefly popped into my head, but I imagine between avalanches, snow removal, and boulders that would be totally infeasible. Anyways, no gondolas please and thank you :)	A32.29VV

40082	Whitefields, Sofia	<p>I am not in support of the gondola. Me along with many other locals believe that this will not solve traffic problems and delays in the canyon. Rather it will increase wait times and the amount of people able to get into the canyon. This will have a grave environmental impact, as the capacity for the canyon is limited. I want this canyon to be able to be used by my kid s and grandkids and I think the gondola will inhibit this. The attraction from out of state people who don't understand LNT concepts will also further the impact in the canyon , as the gondola itself will be an attractant rather than the ski resort themselves.</p> <p>The gondola will not serve Utah locals and would cause me to consider not buying an Alta/bird pass in the future.</p>	A32.29VV

42309	Whitehead, Tyler	<p>I cannot see how a gondola makes sense over the other actually scalable options. Construction to build and maintain a gondola would be catastrophic to much of the canyon, in particular the areas which are currently under protection.</p> <p>Additionally it's an obscene amount of money to spend on something that won't run the majority of the year, and won't be ready for maybe a decade. The option which seems much more feasible is enhanced bus service (supplemented by additional parking / ride share options at canyon mouth and carpool incentives to reduce congestion in the canyon). Before committing to such an invasive, expensive, and environmentally detrimental path, please, please consider an alternative approach which would be scalable and benefit all Utahns who use the canyon rather than the two resorts at the top.</p>	A32.29VV

42292	Whitmore, Kathy	<p>Many aspects of the proposed gondola project will encroach upon the Inventoried Roadless Areas which have been designated to preserve our treasured wilderness areas of Twin Peaks, White Pine and Lone Peak. We are obligated to preserve and protect. During construction and on-going maintenance, roads and access will disturb vegetation, timber, wildlife and their habitat. The visual intrusion of gondola towers, cables and cars will be a never-ending eye-sore. Please protect our wilderness and preserve the beauty that exists for all to savor now and in the future. Preservation of this gift of nature is our responsibility.</p> <p>We would ask that USFS conduct their own independent EIS and please give careful consideration to electric bus use as a viable source of transport when assessing potential encroachment upon the Inventoried Roadless Areas. Electric buses would cause far less negative impact than diesel when comparing a busing alternative as a solution versus the gondola. Utilizing only the comparison of diesel powered buses versus the gondola is not giving adequate consideration to the least intrusive solution to the current traffic problem. There is no assurance that those gondolas will be able to financially sustain themselves for any period of time. A bus system could be adjusted to meet varying demands and would not necessitate road enhancements or snow sheds - both of which will cause degradation to the canyon. Most importantly, regardless of what financial burden is placed upon the public, state or federal government for funding, the ultimate price will be the on-going degradation of our treasured Little Cottonwood Canyon.</p>	A32.3H; A32.10G

39712	Whittaker, Diane	<p>The cost show on your comparison table is about 1/3 of what the current cost estimate reports. This is deceptive. Please STOP trying to push this ridiculous tax / debt burden onto the taxpayers of Utah.</p>	A32.29VV
40394	Whittaker, John	<p>Why is the estimate for the gondola only showing \$.56 billion when the new estimates are closer to \$1.5 billion?</p> <p>The footings for the 200' towers will be massive which means there will be a major disruption to the quality of water, vegetation and wildlife. Just the construction vehicle alone will do a lot of damage to the bottom of the canyon.</p> <p>Why are they considering this massive project with 200 foot towers which has never been done before and is being built on a fault(s)?</p> <p>Will this project be funded by a bond? Which is taxpayer funded and will be taking funds away from a vast majority of Utah's who will never use the gondola?</p> <p>Are Snowbird and Alta paying for a portion of this project? If so how much?</p> <p>In short, the gondola project is a waste of valuable funding, unproven engineering and construction and could very well be a disaster.</p>	A32.29VV

40978	Wiebe, Cicely	<p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p>	A32.3A; A32.3F

40373	Wilcox, Roger	<p>I've been to S. France and Switzerland. There, gondolas are either up on the mountain, like Snowbird, or they drop down into a village, where restaurants and shops can serve the riders. They do not drop into residential neighborhood. A 2,500 car garage and huge towers up and down the canyon will destroy the view of this pristing, U-shaped, glacier-formed canyon. The benfit will only be to a handful of owners/investors in two resorts. Traffic will not be reduced. When the gondola goes in, those who use it will temporarily shorten the car traffic. Once other skiers find out, they will rush in fill the gap. This will take but a month or two. No traffic solution at all. The gondola "solution" is a billion dollar plus scam, and only corruption would allow and enable it to happen. UDOT should be more honest and visionary than to settle for such a costly, destructive "solution."</p>	A32.29VV

39664	Wilk, Peter	<p>I would like to voice my opinion that the Roadless Rule areas within Little Cottonwood should be respected. The building of a gondola up the canyon is not an acceptable exception to modifying the Roadless Rule. At a higher level the gondola is a flawed approach to transportation within the Cottonwoods. Bending or modifying existing restrictions on construction within LCC is not permissible.</p>	A32.29VV

42364	WILKINSON, WHITNEY	<p>There are many reasons why the gondola in LCC is a bad idea especially when it comes to the roadless areas act. One main concern is that UDOT fails to note significant impacts on USFS land, omitting the impacts of construction, paving, and new road construction on federal land in inventoried roadless areas, including an EPA superfund site. Given these errors and omissions in the UDOT NEPA process, I urge the USFS to conduct its own EIS and issue its own ROD to accurately represent and prevent these impacts to federal land and inventoried roadless areas. The USFS ROD needs to recommend against a gondola constructed in Little Cottonwood Canyon.</p> <p>Furthermore, The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do. I do not support a gondola in LCC because of these and many other concerns.</p>	A32.3A;A32.3G

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Caroline Willemssen</p>	
52025	Willes, Whitney	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 41675	Williams, Michael	<p>This LCC Gondola project needs to be dismissed. This beautiful canyon will be permanently affected by this Gondola. It will never be the same if this is allowed to proceed. "City of Cottonwood Heights stands firmly against the 22 towers of the gondola project, five of which encroach on the "Roadless" designation within LCC. Each tower base will significantly disrupt and degrade the natural habitat for living creatures, flora and fauna but will also degrade the aesthetic and recreational experience for all canyon users. To be "roadless" is to infer that the area be kept natural, towers for the purpose of transportation should fall within the category of a "road facility". Please keep our beautiful canyon the way it is now and has been since the days of the first miners. NO to the Gondola!</p>	A32.3A; A32.3F
40258	Williams, Morgan	<p>The Gondola plans (A and B) directly violate the 2001 Roadless Area Conservation Rule (RACR) and the Forest Plan. The area in question contains both the White Pine IRA and portions of the Twin Peaks and Lone Peak IRAs and therefore qualifies as an IRA. These areas cannot be disrupted by the gondola and it would be a direct violation to do so. For the 1000th time, please do NOT build the gondola and listen to the thousands of people asking you not to.</p>	A32.3A; A32.3F

40236	Williams, Steve	I am not against the Gondola per say. I am against how it is proposed to be paid for. If Alta and Snowbird think the Gondola will be a good thing, let them pay for it. It is unfair to have the citizens of Utah pay for something that will only benefit 2 private companies. UDOT can help those two resorts get all the permits needed. Having said that I don't think the Gondola would have increased ease of transportation this past year. There still would have been lots of times the Gondola would not have operated. During times of high winds, avalanche mitigation in the canyon, or inter-lodge at the resorts, the Gondola would be useless. Even if weather permits the Gondola to operate there will still be long lines of cars on Wasatch and 94th South trying to get into the parking structure in hopes of getting up the canyon. And there will be long lines of folks in the parking structure hoping to get on the Gondola for the 55 minute or so ride up the Canyon.	A32.29VV
54160	Williams, Sydney	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Sydney Williams</p>	A32.3A; A32.3F

45264	Wills, Trevor	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Trevor Wills</p>	A32.3A; A32.3F

39458	Wilson, Amelia	<p>1. Eight gondola towers, snow sheds, 2 angle stations, and vegetation removal would take place within Inventoried Roadless Areas that exist in Little Cottonwood Canyon. The Forest Plan prohibits, road projects and recreation projects, and as the EIS states these projects are for highway purposes.</p> <p>The public comment period reads as though Wilderness Areas are expanding, to the contrary, UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon.</p> <p>Roadless areas protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas. These places need to be protected!</p>	A32.3A; A32.3F

40345	Wilson, David	<p>It seems ridiculous that you are still pursuing a gondola after receiving now 3 waves of comments with most against that option.</p> <p>The best path forward for all canyon users is still widening the road and improving the access for ALL users instead of just the ski resorts. The Gondola is a horrible plan that has a major impact on all canyon users but only benefits the ski resorts.</p> <p>Widening the road opens access to people that want to use the canyon year round, hike the trails, and enjoy nature without seeing towers and gondola cars overhead.</p> <p>A toll, restricting access, or leaving it as be are all better alternatives than the gondola. The gondola is all that is wrong with corruption and government. This is the last alternative that should be proposed.</p>	A32.29VV
40933	Wilson, Gabriel	<p>I oppose the Little Cottonwood Canyon Gondola project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>The current vision and proposal for the gondola directly contrasts with the spirit of the Roadless Rule and the areas it protects. I do not support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>As a lover of the Little Cottonwood recreation and wilderness area, I urge you to consider lower cost, more effective solutions that do not disrupt these acres of precious wilderness. Lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts would be far easier to support in our beloved canyon.</p>	A32.3A; A32.3F

41708	Wilson, Ida	<p>Thank you for allowing further input regarding Little Cottonwood Canyon. I am strongly opposed to the Gondola idea for a solution to Little Cottonwood Canyon traffic. The congestion is VERY sporadic, definitely not a 365 day per year problem. The cost to build and maintain a gondola is prohibitive and not a cost-effective solution to the State of Utah taxpayers, many throughout the state who NEVER use that canyon road.</p> <p>The Gondola Negatives: Price Prohibitive Environmental Impact Limits access to the canyon for the poor. Limits skiing for the general public. Limits access to the public, year round. Unwise use of taxpayer's money.</p> <p>PLEASE: NO, NO, NO Gondola.</p> <p>Ida Wilson</p>	A32.29VV

39474	Wimmer, Jacob	Bus/enhanced bus is so obviously the solution here. Nobody wants an eyesore of a gondola take takes an hour to get from the mouth to alta. Just don't build a [REDACTED] gondola. Canyon traffic is only a problem like less than 10% of days during a year. Just ban or toll cars on heavy traffic days and run more busses. Whoever decided to cut bus service in half this winter needs to be fired	A32.29VV

39640	Winger, Brenda	<p>Is the data utilized for Bus Travel Time for peak periods only? Typically, it is only a 20 minute ride up the canyon versus the 40 minutes in this report. The Gondola is for business and tourism. Locals commonly are able, to ski and enjoy the canyon for a few hours before or after work. Restricting single occupancy, reduce local utilization of the canyon during winter.</p>	A32.29VV

		Promoting the options in the report are for Tourist Industry and business. These options are the interests of business, tourism and do not support reducing Environmental Impact but support increasing Environmental impact. Reading the report it is clear that the transportation improvements are focused on increasing revenue, specifically for two ski resorts, and LaCaille.	
39639	Winger, Brenda	If the point is to get more people to the Ski Resorts, increase revenue to a few businesses, and have multiple years of construction then build a Gondola. This report does not support one alternative over another. The Environmental impact is devastating to Little Cottonwood Canyon. The high traffic, traffic delays are related to the Nature of LCC. Nature of feet of snow, avalanches, and steep terrain, none of which can be mitigated. Once the force of nature and storms hit the canyon, any and all transportation will be slowed, delayed and impacted. Increasing the number of people, by additional options will only worsen the delays, traffic issues, environmental impact and risk more lives. Little Cottonwood Canyon during times of natural storms is treacherous, challenging and cannot be mitigated by transportation options. Please do not destroy the canyon by increasing transportation. The last big storm, there were few people (estimated 1000 to 2000) trapped in interlodge, and still traffic delays, not because of number of people, but because of Nature's Force. Additional transportation options would have no impact, buses were not running, a gondola in that wind would not be running. Increase transportation would only increase the number of people within the canyon, during natural events (storms) and increase risk.	A32.29VV

40326	Winholtz, Betty	It's very simple: no proposed gondola in Little Cottonwood Canyon. Do the right thing.	A32.29VV
39431	Winholtz, Betty	<p>--8 gondola towers, snow sheds, 2 angle stations, and vegetation removal would take place within Inventoried Roadless Areas that exist in Little Cottonwood Canyon. The Forest Plan prohibits, road projects and recreation projects, and as the EIS states these projects are for highway purposes.</p> <p>--UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon.</p> <p>Roadless areas are protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas.</p> <p>--Roadless Rule boundaries must be upheld over building gondola towers.</p>	A32.3A
51598	winkel, Asher	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 54247	Winston, Barry	<p>To whom it may concern,</p> <p>Please do not build this monstrosity of a gondola. This project has an astronomical cost that will likely increase as time goes in.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times.</p> <p>In addition to buses, building snow sheds like they have on Rogers Pass in British Columbia is a much more reasonable project at a fraction of the cost.</p> <p>The proposed gondola will not change winter operations on Hwy 210, so those costs are fixed in addition to gondola construction and maintenance. The snow sheds plus more public transit is a much more reasonable solution before building the billion dollar lift with significant environmental impact.</p>	A32.29VV

49346	Wipfler, Briana	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Briana Wipfler</p>	A32.3A; A32.3F

39527	Wireman, Eleanor	<p>Utah has a SERIOUS air quality problem that leads to high rates of asthma, miscarriage and other health impacts.</p> <p>You need to be getting people out of their cars ASAP.</p> <p>Shame on UDOT for the ridiculous gondola proposal. With climate change staring you in the face the gondola could be a 'stranded asset' twenty years after construction. The only RESPONSIBLE choice would be a light rail system with stops for people to get off at hiking areas or near their homes and then close the canyon to all but service vehicles and the disabled.</p> <p>The light rail should go straight to the airport for visitors from out of state to utilize most effectively.</p> <p>For a state run by religious folk, your track record on caring for God's Creations is completely unacceptable.</p>	A32.29VV

39412	Wirts, Joni	<p>The gondola proposal is an absurd solution to the traffic problem up Little Cottonwood Canyon. Increased bussing is the only solution. Lack of bus drivers has a very simple solution - offer drivers more money.</p> <p>It is absolutely corrupt to use Utah taxpayer money for something will only benefit private enterprise, namely Snowbird and Alta. A small percentage of Utahns ski at those resorts. A recent report showed that with the proposed gondola and its capacity, there could be up to a five hour wait to get up the canyon (based on UDOT's FEIS data). The gondola proposal is a waste of taxpayer money, it will cause irreversible environmental damage, it will ruin the aesthetics of the canyon, and in the end it won't get people up the canyon any faster or better than what we have right now.</p> <p>Pay bus drivers more and have busses run every ten minutes - problem solved.</p>	A32.29VV

40119	Wise, Kevin	I am strongly against the gondola option in Little Cottonwood Canyon. It violates the road construction prohibition in Roadless Areas. UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon. I am advocating for the protection of these inventoried roadless areas. The proposed gondola should not be exempt from the Roadless Rule. It is a permanent highway project that would have negative impacts on our watershed, plant and animal communities, recreation opportunities, and more.	A32.3A; A32.3F; A32.3G; A32.3H

40104	Wise-Steffen, Bette	Construction of a gondola in LCC definitely violates the Roadless rule and would negatively impact wilderness areas visually, impact wildlife, and impact vegetation. Please NO gondola!	A32.3A
39341	Wismer, Doug	Hi, and thank you for listening. I believe these endless studies are only delaying action on correcting the single-car access issues in Littlecottonwood canyon. There are too many cars in the canyons, not too many people. A gondola in Littlecottonwood canyon going from the La Caille property to Snowbird and then Alta is a wonderful proposal and would solve so many problems. Please build the Gondola	A32.29VV
40884	Wisneski, Dave	<p>I'm from Wisconsin and a member of a local Ski Club. This year our club skied Little and big Cottonwoods ski resorts. The traffic was horrible, and we lost a lot of time skiing. I believe that the gondola would be a bad idea. I think this should be handled like Copper Mountain where everyone parks in parking area and rides the bus to their preferred drop off point.</p> <p>Thanks,</p> <p>Dave W</p>	A32.29VV

40445	Woeste, John	Inventoried Roadless Areas can not have gondola towers or roads built on them. Do not build the LCC gondola. Wilderness Areas are not expanding, but UDOT's proposal diminishes the roadless characteristics of LCC. Do not build the gondola. Roadless areas are protected under the 2001 Roadless Rule. The 2003 Revised Forest Plan does not include development in this area nor for the building of a gondola. Please do not build the gondola.	A32.3.A

42168	Wolf, Jakob	<p>I am extremely against the idea of building a gondola in Little Cottonwood canyon. I worry that building the gondola would have heavy negative impacts on the local wildlife, watershed quality, foliage, recreational resources such as hiking and climbing routes, and the overall views of the canyon. Not only would the construction of the gondola ruin the local areas due to construction, but the ongoing maintenance to keep the gondola up and running would prevent Little Cottonwood Canyon from ever looking the same again. All of the above are</p>	A32.3A; A32.3F

41156	Wood, Bruce	<p>I submit this comment on behalf of the Friends of Little Cottonwood Canyon Foundation, a 501c(3) non profit group whose mission is to identify and fund comprehensive efforts to educate the broad community of Utah residents and our many visitors about the special treasure we possess in Little Cottonwood Canyon (LCC). We are concerned residents of the Salt Lake Valley who are volunteering our time and energy to help preserve LCC in its' beautiful natural state.</p> <p>With respect to UDOT's Supplemental Report on Roadless Areas, we take issue with UDOT as follows:</p> <ul style="list-style-type: none"> - There will be access roads, heavy earth moving equipment and timber cutting required to install, maintain and provide emergency access to the towers. Airlifting will provide only minimal support. <p>UDOT grossly underestimates the tower footprints as it excludes land needed for protective berm construction and maintenance/emergency equipment sheds, etc., in addition to just the tower footprints.</p> <p>Furthermore, given the true and pronounced invasive nature of all aspects of the gondola from construction to ongoing maintenance, the Forest Service should be required to produce its' own EIS and issue its' ROD to independently assess the impact of a gondola.</p> <ul style="list-style-type: none"> - It is disingenuous that UDOT regards a gondola as a non-road, thereby side stepping Roadless Rule requirements. The gondola is a supplemental transportation system to SR 210 and should be regarded as a road for Roadless Area rules. Moreover, it will result in additional human capacity utilization, when a meaningful LCC capacity study has not been attempted. 	A32.3G; A32.3H; A32.I

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>- The second planned angle station sits inside an IRA which contains a former smelter site that will likely require EPA assessment and remediation, which UDOT has recognized but has not assessed the environmental impact thereof, particularly on the watershed.</p> <p>- UDOT greatly downplays the visual and noise pollution caused by an 8 mile long structure with 22 towers and 2 angle stations overlooking SR 210 by asserting the tower footprints are a very small percentage of the total LCC acreage, IRA and otherwise. This calculation is totally irrelevant to the holistic visitor view of such an invasive infrastructure on the natural beauty and quiet of LCC.</p> <p>With respect to the Air Quality Supplemental Analysis Report:</p> <p>- It is incomprehensible that the FHWA is requiring UDOT to evaluate the use of 100% diesel buses when electric buses are available, and have been successfully demonstrated in LCC in the past year. UDOT should be including electric buses in the Air Quality Analysis, and should also reflect electric energy source (i.e., coal fired and other sources) for both the Gondola and Electric Buses, to be fair.</p> <p>UDOT Agency Coordination</p> <p>- As mentioned above, it is imperative that the Forest Service conduct its' own independent environmental assessment, EIS and ROD, to develop a comprehensive alternative view of the impact of a gondola. This is a necessary requirement to report back to the Federal DOT/Highway Administration, which must have the Forest Service assent or objections before allowing UDOT to appropriate any LCC land for the gondola.</p> <p>To summarize, we are very concerned that UDOT has grossly underplayed the impact of a gondola on LCC in its' supplemental reports, and strongly recommend that it engage with the community to design, test, and implement the common sense solutions proposed by many individuals, municipalities, and organizations such as ours, to solve the infrequent traffic problem in LCC. We are confident that these solutions which include measures successfully adopted in ski areas and national and state parks, will work, and eliminate the need for a gondola.</p> <p>Submitted Respectfully, Bruce Wood President, Friends of Little Cottonwood Foundation</p>

53636	Wood, Josh	<p>To whom it may concern,</p> <p>I'm really not a fan of the Little Cottonwood Canyon Gondola project, and I think we should look at cheaper and better ways to fix the traffic mess in the canyon. The gondola won't make traffic better, but it will mess up Twin Peaks, Lone Peak, and White Pine Roadless Areas, mess with our water, wreck some awesome rock climbing spots, and get in the way of running, backcountry skiing, and hiking around there.</p> <p>I just can't get behind a plan that cuts down on "Roadless" land, especially if it means paying more taxes for a project that won't make the canyon any easier to get to for most people while only helping a lucky few. Saying the gondola doesn't count for the "Roadless Rule" 'cause it's not a road is just twisting the rule on purpose.</p> <p>I'd rather see us go for cheaper solutions that use what we've already got, like encouraging carpooling (like charging tolls based on how many people are in the car), better bus service all year round with stops in more places and more often when it's busy, making sure people follow the traction law, and making skiers book parking spots at the resorts.</p> <p>Regards, Josh Wood</p>	A32.3A; A32.3F

39937	Wood, Matthew	<p>I do not want a gondola in Little Cottonwood Canyon. It's a bad decision for many reasons including environmental impact, aesthetics in an iconic beautiful location, and more. But the most important aspect is that the gondola appears to be pushed forward as "the only option" before trying other options with the existing road, due to special interest groups with lots of funding and conflict of interest- a small minority looking for financial gain.</p>	A32.29VV

41310	Woolley, Cassidy	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Cassidy Woolley</p>	A32.3A; A32.3F

41020	Wsrdr, Nicholas	<ol style="list-style-type: none"> 1. Require 3 plus people in a car to go up the canyons Friday Thru Sunday. 2. Have resort dedicated buses. If I ride a bus to Solitude, to get back down, I have to load the bus, go to Brighton, stop at Solitude again on the way down before heading down the mountain. Same thing at Snowbird. Same thing going up, it takes 30 minutes to make all of the stops at snowbird before I get to Alta. 3. Require reservations fir buses so you know the necessary volume. 4. On weekends and holidays, run buses from local high schools to each resort, dedicated to each resort and nonstop from the high school. Require reservations so you know the volume. 5. Run a bus from the new hotel above the 7-11 at the mouth of Big Cottonwood Canyon. There is a lot more public marking there than at the bus stop at the base of the canyons. Those lots are too small. <p>The above suggestions should be implemented before considering a gondola.</p> <p>Look at the bus system they have in place in Stockholm Sweden. It is very efficient.</p> <p>People will ride buses if they are more efficient than driving snd parking.</p>	A32.29VV

40110	Wynn, Eric	<p>There are many reasons not to construct a gondola system in Little Cottonwood Canyon. I won't rehash them all here, as I have made comments to these points previously. There are less destructive solutions like enhancing/expanding an electric bus system on the road systems we already that should be implemented instead of the ill-advised gondola.</p> <p>Specifically when it comes to the issues raised in this Supplemental Information Report - the gondola proposal is clearly inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan.</p> <p>Even if the gondola system is not defined as a road, it would be built for highway purposes, have similar impacts, and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan, since it require construction on three different designated roadless areas.</p> <p>The impact of constructing the gondola and its mere presence in three designated roadless areas should be enough to invalidate its construction. When combined with all the other reasons not to build it, it is clear that the gondola proposal is ill-conceived and should not be approved. Less impactful solutions exist and those should be implemented to address the traffic problems in Little Cottonwood canyon.</p>	A32.29VV

40981	Yedlin, Mary	<p>UDOT's position does not take the following points into account:</p> <p>1. The Inventoried Roadless Areas are specifically intended to minimize human activity and development in order to create an area of protection for wilderness areas. Building the towers for the gondola would necessarily encroach on these Roadless Areas that are supposed to be conserved, negatively impacting the natural ecosystem, wildlife (plants and animals), the watershed and the natural beauty of this narrow canyon.</p>	A32.3A; A32.3F; A32.10G

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>2. The construction of 22 towers with an average height of 200' (some with flashing lights required by the FCC and FAA) will visually dominate the entirety of Little Cottonwood Canyon. This is currently an official Utah State Scenic Byway that draws visitors to its scenic, natural beauty. The proposed gondola will forever eclipse and destroy that beauty. Additionally, it has been reported that some of the land that would be developed is in federal roadless areas. Has the US Forest Service conducted its evaluation of the impacts to these areas?</p> <p>3. As more and more wilderness areas continue to disappear to development, the increasing scarcity of roadless areas is alarming. The 2001 Roadless Rule was designed to protect key wilderness areas. We should be responsible for and take action to protect these natural ecosystems both for their intrinsic value and for their role in helping to ensure water and air quality and the natural habitats for animals and plants. The proposed gondola is particularly concerning in respect to the high protected areas that would be impacted by the towers, angle stations and snowsheds placed within the Twin Peaks, Lone Peak and White Pine Roadless Areas.</p> <p>4. It appears that UDOT has neglected consideration of a key alternative: electric buses. Particularly as the country is moving towards more sustainable and cleaner energy options, UDOT should include a thorough assessment of current technologies being used in electric buses. It was reported that a 3rd generation bus borrowed from out of state successfully navigated the resorts in the Wasatch Front. Why is this not one of the key alternatives on the table?</p> <p>Thank you for taking my comments into consideration.</p>

40462	Yeo, Cynthia	<p>Can we please use common sense. The gondola is an expensive terrible idea that impacts the canyon, climbing, people's homes and backyards and still doesn't address the problem. Shuttles, extra buses, reserved spots, even a small fee to park in the canyon are much simpler solutions that actually solve the problem in both canyons for a fraction of the cost. And bonus everyone can use these services.</p>	A32.29VV
53018	Yeoman, Renee	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the</p>	A32.3A; A32.3F

41593	Yip, Jackson	<p>Time and time again, the public comments, experts, and now the forest service all agree that a gondola is an unviable option for Little Cottonwood Canyon. This is not only due to the undue costs that the public has to pay for the resources that commercial entities in upper Little Cottonwood Canyon will solely profit from, but also because it doesn't solve congestion problems, it will infringe on a designated roadless rule area where infrastructure development is intentionally excluded, and it will prevent other canyon users from accessing non resort</p>	A32.3A

39327	Young, Nathaniel	<p>I continue to not support the gondola proposal nor the currently proposed enhanced bus proposal. The gondola does not solve the problem and the bus proposal is more than we need now. The environmental impact of both proposals seems high and unnecessary.</p> <p>The gondola proposal only takes 1,000 people up the canyon and only has 2,500 parking spots. Currently, people don't go skiing because of limited parking. The gondola will simply allow more people to go up, rather than reducing congestion. This is a huge win for the resorts, not the tax payers. In addition, it has no flexibility and can only stop at Snowbird and Alta. While these are popular summer destinations, the gondola can't address popular trail heads like a bus system can.</p> <p>There are so many other simple solutions that can be tried immediately that have NO impact and cost next to nothing:</p> <ul style="list-style-type: none"> - The reservation system in LCC has worked well for me. It allows people to spread out when they arrive while still knowing they will have a spot. This can easily be implemented in both canyons with minimal cost. - Stagger opening and closing times. This will spread the traffic out further allowing for less traffic. - No downhill traffic (except emergency) during peak bus hours in the morning (8-9?) and no uphill traffic during peak hours in the afternoon to allow for the busses to move quickly up the canyon if there is congestion. - The avalanche issue is one that gondola sort of solves. However, around the world, including in the US, snow sheds are used to address this issue. Not only would this allow the 	A32.29VV

		<p>Decision Thank you for your continued interest in the Little Cottonwood Canyon Environmental Impact Statement (EIS).</p> <p>As many of you are aware, the Utah Department of Transportation (UDOT) released the Final Environmental Impact Statement (EIS) for Little Cottonwood Canyon in August of 2022 and held a public comment period, with the project team receiving over 13,000 comments.</p> <p>As a result of the comments received, the project team determined additional analysis was warranted regarding the impacts of the Final EIS alternatives to Inventoried Roadless Areas under the 2001 Roadless Area Conservation Rule (RACR) and the Forest Plan. The RACR required the USDA Forest Service to conduct an inventory of roadless areas for their potential to be designated as wilderness based on size (at least 5,000 acres) or location (contiguous to an existing Wilderness Area). If an area meets these criteria, it becomes an "Inventoried Roadless Area" (IRA) and, in general, the RACR prohibits road construction, road reconstruction, and timber harvesting (cutting, sale, or removal) in IRAs unless certain exceptions or circumstances exist. Little Cottonwood Canyon contains the White Pine IRA and portions of the Twin Peaks and Lone Peak IRAs.</p> <p>Also following publication of the Final EIS, the Federal Highway Administration (FHWA) requested that UDOT complete additional air quality analysis. In particular, FHWA requested evaluation of a scenario under the existing modeling where all ski buses would be powered by diesel fuel rather than the model default which consisted of diesel, compressed natural gas, and gasoline powered buses; and that all transit buses be evaluated at the maximum expected service life of 14 years rather than a variable age bus fleet.</p> <p>As a result of public and agency input, UDOT has issued two supplemental information reports to evaluate applicability of the RACR and the potential impacts to IRAs and for additional air quality analysis.</p> <p>The public review and comment period for the supplemental information reports is open until April 18, 2023 at 11:59pm MST and the project team is accepting comments on the analysis contained in these reports. Formal comments can be mailed or submitted through the project website, email, voicemail, and text messages. This information is listed on the Contact section of the website.</p> <p>Please note that as the public had the opportunity to comment on the entire Final EIS, comments received in this comment period that are unrelated to the supplemental information reports will not be addressed in the Record of Decision (ROD). View Reports Submit Comment</p> <p>Agency Coordination Some of the elements in the alternatives evaluated in the Final EIS are located on National Forest System lands managed by the Uinta-Wasatch-Cache National Forest under the 2003 Revised Wasatch-Cache Forest Plan. A Forest Service decision may be required pending the FHWA's determination of what, if any, National Forest System lands needed for the selected alternative may be appropriated under their authorities (23 USC 317). Appropriation of National Forest System lands by the FHWA would be a non-exclusive easement for highway use, with the Forest Service retaining jurisdiction over all other uses.</p> <p>The Forest Service decision would be to authorize UDOT's use of National Forest System lands for the selected alternative, as analyzed in the Final EIS, and may also include a Forest Plan amendment if the proposed use is inconsistent with the Forest Plan. A Forest Service ROD, if necessary, would be based on the Final EIS and supplemental information reports, and would be</p>

		<p>issued after UDOT's ROD is published. The Forest Service ROD would be subject to the Forest Service project-level objection process (36 CFR 218).</p> <p>Final EIS Information Due to the amount of public interest in the Little Cottonwood EIS, many sources are sharing project information and data with varying degrees of accuracy. Please see the tables below for the most current and accurate information directly summarized from the Final EIS regarding the alternatives being considered. View All Final EIS Materials</p> <p>EIS Process & Schedule It's important to note that the National Environmental Policy Act (NEPA) process UDOT follows doesn't tally comments as a "yes" or "no" vote like a referendum. The NEPA public comment process is not a vote, but rather an opportunity for UDOT to field concerns, suggestions or criticism for a project's purpose and need, alternatives, and to evaluate whether additional engineering or environmental analysis is needed, as well as the mitigation measures proposed to minimize environmental impacts.</p> <p>The public comment periods and input received throughout the EIS process provide opportunities for UDOT to improve the study documentation and make sure it's thorough, accurate, and complete. UDOT's final decision will consider how the alternative best meets the project purpose as well as an alternative's environmental impacts. View Final EIS Comments</p> <p>Informational Videos Watch Part 1 of the Final EIS overview provided by UDOT Project Manager Josh Van Jura to learn more about the preferred alternative and proposed phased implementation.</p> <p>Watch Part 2 of the Final EIS overview provided by UDOT Project Manager Josh Van Jura to learn more about the preferred sub-alternatives.</p> <p>View the video below for more information on the environmental study process the Little Cottonwood Canyon EIS is following.</p> <p>Connect with us.</p> <p>Website Email Facebook Twitter Instagram</p> <p>The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being or have been carried-out by UDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated May 26, 2022, and executed by FHWA and UDOT.</p> <p>+-----+ This email was sent by [REDACTED] Not interested? 56215	Z, Anonymous	Stop charging us tax for skiers .I am done	A32.29VV
42422	Z, Anonymous	The gondola idea is stupid and you're wasting everyone's time and energy with his [REDACTED] idea.	A32.29VV
44519	Z, Shyanne	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Shyanne Z</p>	A32.3A; A32.3F

41557	Zeigler, Wendy	<p>The roadless act was applied to these areas to protect them. Building the gondola towers, which will require there be roads to the towers, and maintenance of those roads, will violate the roadless areas. I am opposed to this. Each tower will have to have a road to it for construction of the tower, also for maintenance of the towers and because if you have to offload people from the gondola you have to be able to access the bottom of those towers. The latest information about icing of cables and Highwinds indicate that the gondola will have times when it has to stop and, worst case scenario, download or off load the passengers. Also the towers will require maintenance. This will require roads. We should not disregard the existing roadless areas. The roads to the towers will further scar our canyon and our watershed. NO Gondola.</p> <p>Furthermore, to the point of air pollution, I do not believe you have adequately evaluated the cars parked on Wasatch Blvd waiting to get into the parking garage. And the people running their cars waiting for the gondola to open when there is avalanche mitigation happening or inter lodge, or a breakdown of the gondola.</p>	A32.3A; A32.3F; A32.3H

41629	Zitnay, Rebecca	<p>Thank you for your thorough analysis and careful consideration of public comments. I really appreciate the phased rollout and think the snowsheds alone will have a substantial impact on the congestion issue. I'm glad to see they are in the phase 1 of all plans. One of my main concerns going forward is canyon tolling. I think a canyon-wide parking reservation system may be a better option, especially on busy days in the winter. This system has been working incredibly well at Alta the past 2 seasons. I think most of the traffic that builds on Wasatch Blvd on canyon closure days is because Snowbird has kept their parking on a first-come basis. This results in powder panic and people lining up early in the morning to ensure they have a spot. Since I know my parking is guaranteed at Alta, I make sure the canyon is open and check traffic cams before I hit the road to head up. Parking reservations alone have drastically changed my behavior and I imagine there are many others like me. Notably, having a reservation has forced me to plan ahead and coordinate with friends and family to figure out carpooling, so I almost always have more people in the car than before the reservation system was enacted. While I understand there may be more demand to get up the canyon, there is a limited number of parking spots in the canyon, so there needs to be a mechanism in place to restrict the number of cars. A car should not be able to go up the canyon if there is nowhere for it to park. A car that drives up the canyon, has no parking, turns around, and drives all the way back to a bus stop has the highest emissions footprint and will create some very hostile people if they must pay a toll before driving up and getting turned around because there isn't anywhere for them to park.</p> <p>While I think enhanced bus service is the best option because it seems more scalable depending on the time of year and has more flexibility in pickup and dropoff locations depending on the season. I understand the emissions and cost analysis on the gondola make sense. I really like that the top station for the gondola will have a locker room with a place to put on boots ect. I rode the bus quite a bit in years past, however, I didn't ride the bus at all this year because the bus dropped off at goldminers where they strictly forbid any bags or shoes unless you paid \$11 for a relatively small locker. Once Goldminers got rid of the boot bag shelf in the entryway, we started going to Albion because you can actually use it like a base lodge with cubbies where you can toss your shoes.</p>	A32.29VV

41264	Zobell, Trevor	<p>None of the Alternatives have stops at the trail heads. I think this is a big overlook. While summer traffic for hiking may be more distributed throughout the day compared to winter skiing traffic, summer traffic is still not insignificant and will probably only grow as the Wasatch front's population continues to explode. Any transportation solution up the cottonwood canyons must address popular stops at ski resorts and trail heads throughout the year.</p> <p>Another overlook I see is that the plans are not well integrated into existing, or planned, transit infrastructure. The cog rail, gondola, and enhanced bus service all require one to drive their car to a parking lot outside the canyon. All of plans also seem to have quite a bit of disconnect between the parking lot and the primary mode of transportation up the canyon, requiring a 12-minute walk from the parking lot to the mode of transit. I'm skeptical of the success of a gondola, cog rail, or enhanced bus service if it still requires individuals to drive their car just outside the canyon entrance and park it there, walk 12 minutes, and then get on a mode of transit that will take you up the canyon. These plans at the very least should be updated to have the parking lot and the mode of transit right next to each other to eliminate the need for a 12-minute walk. Ideally these plans should be updated to have the starting terminus of the transit mode at a single, or multiple front runner stations so that they can be more readily incorporate into existing transit infrastructure and reduce the need and length individuals must drive a car to get up the canyon. Additionally, the bus priority should be continued along Little cottonwood rd. to the point it intersects again with Wasatch blvd, or until it gets to the planned parking lot/mode of transit, on all the plans. There are turning lanes along that stretch of road that could be made bus only lanes.</p> <p>My understanding is that there was a rail line up LCC 100 years ago, there should be an alternative to the existing cog rail plan that simply restores that rail line with minimal road widening and that starts at a single or multiple front runner stations.</p> <p>So in short UDOT should update its alternative plans to have:</p> <p>Gondola plan C: gondola starts at a front runner station and stops at trail heads</p> <p>Gondola plan D: bus priority going from a single or multiple front runner stations ALL THE WAY to the gondola base station with the gondola stopping at trail heads</p> <p>Enhanced bus service alternative: bus priority going from a single or multiple front runner stations ALL THE WAY to the alta/snowbird making any turning lanes or stretches with two lanes on one side into bus only sections past the point of wasatch blvd becoming little cottonwood road being.</p> <p>Cog rail alternative: existing cog rail plan as is but going all the way to a single or multiple front runner stops</p> <p>(Cog?) rail alternative B: restore rail route from 100 years ago, no or minimal road widening and have it go to a single or multiple front runner stops.</p>	A32.29VV

47113	Zoller, Taavi	<p>To whom it may concern,</p> <p>The little cottonwood canyon does not need a gondola. It is an unnecessary attempt at a solution that has much easier more cost effective methods of solving traffic. The gondola is not only a huge cost, but also would be a huge damage to the landscape and beautiful canyon. I believe that a gondola would lead to more problems than it solves.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Taavi Zoller</p>	A32.3A; A32.3F

41138	Zucca, Alex	<p>The very first sentence from the National Forest website on IRAs says, "IRAs are inventoried tracts of National Forest System land characterized as having an undeveloped character." A gondola passing overhead above an IRA is development, plain and simple. The Forest Service also states, "IRAs also do not generally contain structures, improvements, or obvious landscape alterations that would indicate the presence or influences of man." Since they include overhead power transmission lines as not allowed, a gondola overhead would be characterized the same. The only utility development the Forest Service allows in an IRA is a buried pipeline with grass grown over it. Because of these reasons, there should not be a gondola constructed and running over IRAs.</p>	A32.3A; A32.3G

41468	Zuckerman, Paul	<p>Hello,</p> <p>I approve of the phasing in of this project to see the effects of each and to see how far the funding will go. I believe enhanced bussing is the best alternative for its flexibility when droughts decrease skiing demand with the resulting decrease in skier days. From visits to Zion National Park and attractions on a scale of Disneyland, it is best to get people out of their cars and onto more busses/trolleys for the small numbers of days of ski seasons. Widen Wasatch Boulevard, build snow sheds and use troling to dissuade folks from driving if cars are to be allowed on SR210 along with busses. Anything that runs on tracks or cables is rigid, enable to adapt to changing conditions. In the end however, our canyons have only so much carrying capacity. Finding ways to get more people there will only negatively impact the human experience, wildlife health and the natural beauty of the canyons. They are not amusement parks.</p>	A32.29VV

41568	Zumbrennen, John	If this winter shows anything it is a need to have a way to go up and down Little Cottonwood Canyon without the road. The gondola will also be a world class all season tourist attraction like Niagra Falls or the St' Louis Arch and will pay for itself sooner than expected.	A32.29VV
49815	Zumwalt, Jeremy	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon.
