48167	Ondryas, Dusti	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Dusti Ondryas</p>	A32.3A; A32.3F
39707	ONeal, Shannon	<p>No to construction in areas meant to be protected as roadless. No to new construction when better, smarter use and improvement of existing infrastructure has not been attempted. No to the gondola. Thank you for taking my input.</p>	A32.29VV

39895	Oquendo, Brandon	<p>The Gondola should not be subsidized by taxpayers. It purely benefits the resorts and if they think a Gondola is necessary, they should be responsible for paying the bill. As a local business owner, I don't get to ask the government and taxpayers to improve my business at their expense with no return on their investment. It makes absolutely no sense. We all know the cost will be substantially more than planned. Look at the relocation of the prison as an example. These projects almost always end up costing significantly more. Then the environmental impact is an entirely different issue. The bottom line is, the Gondola isn't the way. Issue a toll up the canyon. Create a canyon pass that local residents get a discount on. I am happy to pay to use our canyons if the revenue is going to benefit the canyons, not the resorts and it reduces traffic. Also, just to clarify. I really love our resorts. I use them often. I would love to figure out a way to improve traffic accessing them. The Gondola should be the lowest on the list of options.</p>	A32.29VV

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Natalie Orme</p>	
46310	Orndorf, Nathaniel	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Zachary Orton	A32.3A; A32.3F
54341	ORULLIAN, ALLY	To whom it may concern, I am a resident of Salt Lake County and strongly oppose the gondola. The people of Utah oppose it too. I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Regards, ALLY ORULLIAN	A32.3A; A32.3F
40391	Orum, Peter	I feel that a gondola is a fools errand. I think a better solution is limiting the number of people at each resort - create a max capacity - so to speak.	A32.29VV

40278	Osterman, Michael	<p>I'm a skier and rock climber in LCC and I, along with everyone I personally know who also uses the canyon for these activities, am absolutely opposed to the construction of a gondola.</p> <p>The "red snake" is a very predictable problem limited to maybe 20 days in winter out of the entire year when a great powder day falls on a weekend. Spening \$600M (at the low end) in constuction costs alone to ostensibly fix such a temporary issue is a terrible public investment and seems a pretty poor idea on its face for any public works project even if it did benefit the general public in some way (which this gondola certainly would not).</p> <p>Assuming a gondola actually alleviates traffic on those days is itself doubtful depending on how much a ticket costs to ride the thing; the proposed fee having been removed from the Gondola Works website makes it difficult to know. What is certain is that the only ones who'll benefit are the private ski resorts and interests who own the land at the base of the canyon (Snowbird and former legislators among them). That's not to mention the permanent scarring of the canyon required to build it and the fact that it'll be a permanent eyesore. Is there really no better use of public funds? I'd like to see investment in public transit throughout the valley that'd actually serve a year-round purpose and help alleviate road traffic for commuters generally, not this project which seems so baldly tailored to line the pockets of already wealthy businesses and individuals.</p> <p>If road tolls will be instituted to incentive people to ride the gondola as has been suggested by some proponents, why not simply institue variable tolling to encourage carpooling or bussing? It'd be so much cheaper to increase buses during peak season since it wouldn't require additional infastructure and wouldn't require mantianence year-round like a gondola. Look at somewhere like Zion NP as a model to follow. During peak visitation, cars aren't allowed at all; rather, busses run so frequently that you never have to worry about checking a schedule. That efficiently moves way more people around than would visit the LCC resorts even on their busiest days.</p> <p>Maybe even more fundamental of a problem is the issue of skier congestion at the resorts in the first place. Lines for lifts on the busiest days can easily exceed 45 minutes as is. Even were we to assume the gondola is the most efficient way of moving people up canyon, the bottleneck would just shift to the slopes. If the resorts could teleport people up from the base they'd still have a real estate problem. It seems to me the resorts either entertain some fantasy that they can expand endlessly or they're aware of the issues related to increased attendance and still want to cram in as many paying customers as possible anyways.</p> <p>So if construction of a gondola doesn't benefit skiers or the general population, what justification can there be for it? Just the drivel presented in the Gondola Works ads as flimsy guise to distract from the truth that it's a cynical and short-sighted money grab on the part of the interested parties. I realize contractors and developers have a lot of pull in Utah politics, but I beg UDOT not to cave to those interests and permanently deface what is one of the most beautiful canyons in the state.</p>	A32.29VV

		Regards, Eleanor Otis	
41852	O'Toole, Kayla	I am against the gondola. It is not the most logical solution to the traffic problem in LCC. It will damage the canyon forever and tax payers should not have to pay for it. Please listen to the public.	A32.29VV
47778	ott, claire	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. What reason is there to disrupt the nature of the canyon this drastically when there is so much public disapproval? Especially when there are other options to consider first that cost less money, would be less invasive, and would positively influence more of the people who use the canyon. I plead with you to reconsider the options and look towards options that are less invasive, less likely to leave permanent damage to the canyon, and will benefit the most people. The resort users who would be using the gondola to commute to Alta and/or Snowbird are not the only people that enjoy Little Cotton Wood Canyon and therefore are not the only people to consider in a decision like this.</p> <p>Regards, claire ott</p>	A32.3A; A32.3F

39643	Ownbey, Micah	<p>The gondola continues to be presented as the option with all upsides and now downsides. It neglects to note that from a functional perspective it is entirely suboptimal, and will do nothing to prevent crowding and traffic en route to what will need to be a massive parking structure. It also ignores the fact that all lifts are complicated, break down, and require significant maintenance except now people will be enclosed in gondolas for long periods of transit. It is a ridiculous proposal that I, as a weekly user of the LCC ski resorts with my wife and three children, would find entirely useless and a substantial cost to taxpayers. It strikes me as a proposal that is sponsored by taxpayers to benefit the resorts (which certainly do not require our financial support) and owners of empty land at the base of the canyon. I continue to be strongly against the gondola option.</p>	A32.29VV
42244	Oyama, Jerry	<p>ODE TO LITTLE COTTONWOOD CANYON</p> <p>Here's to the winters that weren't Here's to the winters that were, The deep powder snow so lovely In bowls and in spruce and in fir.</p> <p>On boards so wide they caused comment We'd glide through glades & through trees The bright, sweet feeling of soft snow So better than hard-pack on knees.</p> <p>And now there's talk of gondolas With rumble, with rack and with roar Swinging just above homesites It's hard to see what it's for.</p> <p>Distant parking and then on to the buses, Wait inline for a ride to the Bird Disembark, then another tram up to Alta To crowd the slopes even more.</p> <p>What do we give up with such nonsense? Beauty and peace evermore. Will Alta disappear in the ruckus? Will "improvements" threaten our core?</p> <p>Good intentions have drowned out Glen Canyon, Brought mongoose to Hawaiian shores, Laid waste to mountains and rivers Wilderness forests and more.</p> <p>Oh please relax for a moment To see what's really at stake To save what's truly unique here And give your ambitions a break.</p> <p>Jerry Oyama, [REDACTED]</p> <p>ODE TO LITTLE COTTONWOOD CANYON</p> <p>Here's to the winters that weren't, Here's to the winters that were, The deep powder snow so lovely In bowls and in spruce and in fir.</p> <p>On boards so wide they caused comment We'd glide through glades & through trees The bright, sweet feeling of soft snow So better than hard-pack on knees.</p> <p>And now there's talk of gondola With rumble, with rack and with roar</p>	A32.29VV

47823	Packard, Caleb	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Caleb Packard</p>	A32.3A; A32.3F

42318	Packer, Angie	<p>Roadless areas act as buffers for designated wilderness areas. Any incursion into these areas threatens the wilderness space. The narrow nature of this canyon means development of any infrastructure in the roadless areas will have a visual or residual impact on the wilderness experience as well as that in the inventoried roadless areas. Construction should not take place within Roadless Areas.</p> <p>There will be a need for access roads during construction and subsequent maintenance activity as well as in anticipation of emergency evacuation procedures. Research shows that wire rope systems are not infallible and there will come a time when evacuation will be required</p>	A32.29VV

41891	Page, Alec	I'm a daily recreator in the cottonwoods, and I'm concerned about the environmental impact of the gondola, primarily in its construction period but also over its operating lifetime. Whether the developers have a way around the technical requirements of the roadless areas, it's clear to me that constructing and operating the gondola in those zones would directly contradict the intention behind setting up those zones. The Cottonwood canyons, especially LCC, are an incredible gem of the Salt Lake area, and while we already have roads and ski resorts in them, we should do all we can to protect them and their natural wildlife moving forward. 40060	Palmer, Breanne	<p>I am greatly concerned that UDOT seems to be ok justifying proceeding with the gondola despite certain areas being protected as roadless areas. The gondola is a means of transporting people up and down the canyon which makes it a pedestrian highway. This absolutely should be considered an extension of a road, and therefore taken off the table as an option.</p> <p>If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.</p>	A32.3G; A32.10G

51106	Palmer, Payton	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Payton Palmer</p>	A32.3A; A32.3F
53167	Palmer, Preston	<p>To whom it may concern,</p> <p>As a born and raised Utahn, mountaineer, and ski resort worker, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in Little Cottonwood canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 40401	Papillon, Chantal	<p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	A32.3A
40400	Papillon, Chantal	<p>I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p>	A32.29VV
39382	Papillon, Chantal	<p>With all my respect, I believe this process failed from the very beginning to address the real problem AND to listen to those who are more concerns about it, naming the people. The ordinary people. Those who wants to live in a quiet neighborhood and from time to time, escape and enjoy the natural beauty of Little Cottonwood Canyon.</p> <p>The fact that, from the very beginning, UDOT didn't take into account the Roadless Rule is for me unexcusable. The fact that UDOT refuse to recognize the opinions and desires of a majority of citizens (88 % of the comments, don't want a gondola) is un-excusable. The fact that in 2023, UDOT is thinking AND PUSHING a project that goes against currant and common sense considering the need to protect and rejuvenate wild and natural places in a collapsing world is un-excusable.</p> <p>Please, listen to the people. Listen to your heart. The gondola is not the solution. The gondola will destroy this unique environment for ever. Please.</p>	A32.29VV

42207	Paradis, Andrew	<p>The gondola should not be constructed in Little Cottonwood Canyon and should not be exempted from the roadless rule. The gondola only benefits the customers of two privately owned businesses and amounts to a handout of public dollars to private businesses. These businesses already are responsible for substantial crowding and congestion in the canyons, which creates a negative impact for other users and the environment. Given the unique environment of Little Cottonwood Canyon, these businesses should be required to limit the number of daily customers (much like movie theaters must to meet fire code).</p>	A32.3A
42229	Paradis, Ann	<p>I feel that building a gondola in LCC violates the roadless rule. The construction of the gondola is a huge project and would have a significant negative impact on the wildlife and the wilderness. I don't think it will solve the congestion and parking issues in LCC</p>	A32.3A

39475	parker, clayton	<p>Hello,</p> <p>It's very obvious the proposed gondola will be a huge impact to LLC, as well as a road widening. Why not try the a less impactful option first? Triple the busses and provide more parking. Charge canyon tolls on busy days for vehicles carrying less than three people.</p> <p>I have been skiing Snowbird for 49 years. This year has been the worst by far! Of course there has been more canyon closures due to the extreme weather and I must say UDOT has done and excellent job getting the canyon open. The problem comes from lack of buses, which in turn has created more cars and a parking nightmare. Once I make it to the ski hill, the lift lines have been very manageable. So what has changed? It's the lack buses. Who is getting paid off here? Really, not enough bus drivers – BS. I see empty buses in the valley on weekends when the bus would be full in LLC (and BBC as well).</p> <p>Try it first. Significantly increase the busses and install a parking garage at all the Cottonwood resorts. Very low impact and the problem is solved. This will solve the BBC problem as well.</p> <p>Clayton Parker</p>	A32.29VV

40189	Parker, Michael	<p>I have been skiing at Alta for 60 years and continue to enjoy the slopes. I have followed this issue throughout the process. I haven't seen a single presentation regarding the capabilities of the system, i.e. how many people per hour; costs per passenger; accommodation of waiting riders during periods of maximal use and inclement weather. Friends of Alta presented their information but I'm unaware of an equivalent release of information by the DOT. Unidirectional travel during peak hours and inclement weather would solve the issues.</p>	A32.29VV
49614	Parker, Michelle	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple</p>	A32.3A; A32.3F

41664	parker, stephen	<p>A gondola is an expensive and, at best, an incomplete solution to the LCC transportation issues. It does nothing to solve the traffic issues at the base of the two canyons. It is a relatively slow and inefficient means of human transport. Very high price tag for the gondola would be better spent on; improved bus transport (including electric buses), snow sheds, road improvements, monitoring and limiting vehicles to the number of available parking spaces.</p>	A32.29VV
40149	Parkerson, Lindsay	<p>It seems the solution is a given no brainer with the enhanced bus at the lowest cost being the best financial decision as well as the lowest impact on the environment or the climbing community.</p>	A32.29VV
44037	Parkes, Quincy	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 56292	Parsons, Brady	<p>To whom it may concern,</p> <p>If you want to improve traffic congestion, extend the passenger train system from Provo to Logan. The project would gather more public support and prove far more lucrative upon completion. Furthermore, Utah State University would likely provide funding and passengers in response to recent needs of the local populace. I fully oppose the Little Cottonwood Canyon Gondola project—the desire for innovation is admirable, but would be better applied to other forms of transit. Save yourselves the trouble and build on what has already succeeded.</p> <p>Regards, Brady Parsons</p>	A32.29VV
39964	parsons, Matthew	<p>Please consider the impact on roadless areas as the last strike against the gondola. The impact on these sensitive areas is just another example of the disruption of our beautiful canyon. Sure seems like a corrupt ploy to create a Snowbird-Alta tram that only benefits 2 resorts to the detriment of bringing canyon congestion into our community and huge cost to all taxpayers in the name of a transportation solution. Please listen to public opinion and invest in more logical and less impactful solutions such as bussing and tolling. Please look into yourselves and stand up to Alta-Snowbird-political pressures to make the right decision for our canyon.</p>	A32.29VV
39910	Parsons, Maya	<p>I do not want the gondola. It will diminish the beauty of little cottonwood canyon and ruin existing climbing sites. Also, if the gondola we'd to built, there would still be traffic tog etc to the parking lot so stop with the signs saying that we need the gondola because the traffic is so bad. Getting a gondola will not stop traffic because cars will still line up to get parking at the La Caille parking lot.</p>	A32.29VV

39687	Parsons, Sue	NO to the gondola!! Please preserve our canyons and not implement a very expensive and taxing solutions for ONE purpose: Snowbird and Alta. Try other options first like Tolls and eBuses.	A32.29VV
42214	Parsons, TJ	<p>I am in opposition to the gondola, as it directly violates the Roadless Area Conservation Rule. The construction of gondola towers will have a serious impact on the local flora and fauna and watershed.</p> <p>Not to mention it's expensive, impractical, and unlikely to be a viable solution to canyon traffic, as it does nothing to address the arguably worse issues in Big Cottonwood Canyon.</p> <p>The gondola will benefit only two privately-owned ski resorts, and to ask taxpayers to pay for it is grossly irresponsible - especially when taxpayers will not even be able to use the gondola to access the public lands within the canyon.</p> <p>Please do the right thing and explore solutions that solve the actual problem, instead of lining the pockets of a select few.</p>	A32.3A; A32.3F

42398	Paterson, Danielle	<p>In regards to Little Cottonwood Canyon and the impact a large scale gondola would have on the canyon I would like to voice some reasons how this is a terrible idea. The riparian environment in Little Cottonwood Canyon is mostly wild and sensitive. A gondola would devastate this sensitive and unique environment by constructing roads to install and maintain gondola towers. The roads needed to maintain and install the gondola towers would jeopardize water quality by adding enormous disruption to the soils, plants and animals by creating roads and access points to the riparian. This would add enormous erosion increasing turbidity to the stream. We jeopardize our water quality by constructing this idea. The riparian plants and animals would be devastated in the construction of such a monstrosity. It is shocking to think this was not included in the original NEPA process!!!!</p> <p>Here are my main points of contention:</p> <p>1- This gondola is proposed to help with traffic. Yet, the number of people it would service is very few. Also, this year is a good case in point for how disastrous a gondola would function in the canyon. Gondolas cannot function with wind and high avalanche conditions. A gondola wouldn't be running much this year. The change in climate in our State of Utah and our nation should be obvious that this resolves nothing to help with transportation. It has been only proposed to be used during the winter months and only serves the 2 ski resorts. It does not consider back country skiers, climbers, or hikers.</p> <p>2- the cost to create such a contraption is astronomical. I grew up near the canyons, and they are precious and unique. The thought of turning them into some kind of amusement park is disturbing and horrific.</p> <p>3- there are many ideas for cost effective ways to promote less traffic, preserve the environment and create a safe and viable way to enjoy our mountains. We have not truly tapped into busing options, tolls and shuttles (which are far less costly and practical.</p> <p>4- what people don't realize is the amenity of our canyons is their natural geologic beauty and the uniqueness of them being situated so close to a city. This requires us to take special care and mindfulness of what we have versus selling our souls to the devil for two ski resorts. This proposal is unabashedly designed to help only the ski resorts and advertising a Disneyland like approach to skiing.</p> <p>5- I am also highly aware that there are migratory bird aspects to our riparian environments in the canyon. There are also archaeological remains that are sensitive in the canyon. These things should also be highly regarded and looked at in the environment, impact statement. It is reckless to move forward in my opinion without try and many other less expensive options first. Because Utah is growing fast, we should consider many solutions instead of an option of bankruptcy! The wealth and beauty of the canyons is our inheritance, let's not waste our canyon and our precious tax dollars</p>	A32.29VV
42376	Paterson, Joel	<p>I am opposed to the proposed gondola project in Little Cottonwood Canyon. There are better alternatives that will actually help with the traffic and improve transportation safety in Little Cottonwood Canyon that will be much more cost effective. The gondola will not improve traffic congestion and is designed to directly benefit two private businesses - Alta and Snowbird ski resorts and not address access for other activities and users of the canyon. Instead, the gondola will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I very disturbed that the proposal totally disregarded the roadless area regulations, demonstrating how difficult it is to trust that the proponents of the gondola really care about the environment and the ecosystems within the canyon.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while overwhelmingly benefiting two private businesses. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p>	A32.3A; A32.3F

46293	Patton, Catie	<p>To whom it may concern,</p> <p>I cannot stress enough how reprehensible and evil this entire process has been regarding Gondola construction plans and mitigation of Little Cottonwood Canyon traffic. Not only have you disregarded the consensus that this would be devastating to canyon recreation, natural ecology, and watershed conservation, but you have slapped every Salt Lake City resident in the face by completely ignoring the majority and concerns of the people. What an abhorrent and disgusting display of capitalistic power and bias for those who profit from the destruction of our natural environment. In fact, it is quite obvious that UDOT</p>	A32.29VV

		<p>is corrupted by the ski industry and other private companies that want to make lots of money from this project. You are going to use the money of the people to stomp over us and extend the impacts of climate catastrophe. Rather than using a bus shuttle system like Zion National Park, or other well controlled transportation systems you'd love to ruin a canyon forever. Permanently. Shame on you all. If this ever happens know that the people have the power and we will not let this project ever be built. I'll see you in █████ UDOT.</p> <p>Regards, Catie Patton</p>	
39755	Patton, Noah	<p>Rail, rail, and more rail.</p> <p>This is the best option we have, especailly if it can be connected with other trax/frontrunner routes.</p> <p>I would absolutely love to get on trax for it to take me directly to another train up the mountain.</p> <p>I know we aren't Europe, but maybe take a page out of their book, where essentially every mountain has rail going up to it. It may be more expensive up front but will pay for itself in the long term. Expanding road does nothing and only has diminishing returns due to constant upkeep, and environmental impact. Road expansion should never be the answer, it only throws away money in the long term, where rail consistently shows to pay for itself.</p> <p>Stadler has even put in their own proposal for putting rail up the canyon.</p> <p>Please, please go with the rail option. It is future proof, and is the most environmentally friendly.</p> <p>The gondola doesn't make sense, as people will still have to drive to it.</p> <p>If we truly want to expand our transit, this is a great step.</p> <p>Again, I will repeat, being able to take transit to the base of the mountain, and then continue to take it up would be great.</p> <p>Please go with a rail option.</p> <p>More trains please.</p> <p>Also, this could be nicely paired with an expansion of trax that ACTUALLY goes to the canyons.</p> <p>Especially if you could offer the option of taking trax directly from the airport to the canyons, how great that would be.</p> <p>Please, expand trax to the base of the mountains, with a train that actually goes up it.</p> <p>Rail is our best and only option.</p>	A32.29VV
40074	Patton, Ross	<p>I grew up in Little Cottonwood Canyon. I began skiing there as soon as I could stand up. My dad has worked in ski resort operations my entire life, including several decades at Snowbird.</p> <p>The roads built to construct the gondola do not violate the Roadless Area Conservation Rule. These are not permanent roads. Just like the roads that were built to construct the Snowbird Aerial Tram, they will be restored, and the forces of nature will erase them. Once the gondola is built, all service and maintenance will be done from service cart conveyances from the gondola itself, just like the Snowbird Aerial Tram and the countless gondolas around the world. I doubt that a single human being has had to physically climb a tram tower at Snowbird from the ground in more than 40 years.</p>	A32.29VV
39642	Patton, Thomas	<p>I am in support of the gondola option if (and only if) at least 80% of the costs are covered by the 2 LCC resorts. If this cannot be guaranteed then increased bus service with no personal cars allowed in the canyon (other than homeowners) should be implementd ala Zion NP.</p>	A32.29VV

40490	Paul, Lynn	<p>As a tax paying homeowner in Salt Lake County, a Gondola is the worst possible decision to address the overcrowding of Little Cottonwood Canyon. Even if you waste the tax payers money on such a moronic fleecing of the people, you have failed to show what would be the reason people would actually park and ride this monstrosity you think is gonna be the fix in LCC. Widen the road, tunnel it in the avalanche paths and limiting each resort to a limit of pass users everyday at each resort. See, problem solved without a overpriced gondola.</p>	A32.29VV

39651	Paulsen, Sarah	<p>I have a question. Why is it acceptable for UDOT and USFS to ignore the Roadless Rule? Does this mean anyone who wants to make money can ignore rules with no consequences if They Think it is justified? We are all held accountable and expected to obey written and legitimate rules and are held accountable for consequences of disobedience. EVERYONE should be expected to do the same.</p>	A32.29VV

39410	Paxton, Lisa	The gondola will be useful a few select days a year and barely used otherwise. A few days a year is not worth a billion dollars. It will create horrendous traffic to get to the gondola, terrible parking situations and long, long lines. I recently stood in line for the Snowbird tram, which was awful and inefficient. Chairlifts are better and faster, as are cars and buses. We should try more and better bussing before committing a billion dollars and irreversible ecological damage. Do not destroy our canyon.	A32.29VV

40377	Pechmann, George	Other options should be explored before the gondola. Using public money to create a transportation system that only goes to private businesses shouldn't even be a discussion. Use more/cheaper busses, restrict traffic to 2+ people per car during peak hours, etc. etc. Do not waste our taxes on this when other issues are more pressing.	A32.29VV
40372	Pechmann, Jessie	I do not support the gondola option. I think financially and logically makes more sense to start with lower risk options such as massively incentivizing bus riding by having buses every 15 minutes, making them FREE and tolling cars. Free lockers, more routes from the valley, bigger parking lots that the buses leave from, etc. Then, in 20 or so years if you need the gondola revisit. In this conservative state, it makes 0 sense not to start with lower risk and cheaper solutions first. Another advantage of incentivizing buses is this could be done in BOTH Cottonwood Canyons - and not spend so much money on just one canyon. The Gondola would permanently damage the view of the ENTIRE length of Little Cottonwood Canyon. I just can't support tax payer money going from near 0 solutions for traffic in the canyons to such a HUGE solution. There are steps that should be taken in between.	A32.29VV
40990	Pechmann, Judith	In regard to the impact of the various alternatives on the roadless areas, I think it is misleading to only consider the base of the gondola towers as the area affected. Only considering the surface footprint of the gondola towers may be technically allowed by the current regulations for IRAs, but the actual impact of the gondola far exceeds the area affected by the base of the towers. The gondola may not be a road, but it would be a major transportation corridor where none currently exists, like an elevated highway, which will affect wildlife, the beauty of the canyon, and the preservation of the wilderness and roadless areas.	A32.3A; A32.3F

40447	Peck, Josiah	<p>Irreversible & Rushed Decision</p> <p>There is simply no reason to invest \$550 million in a permanent project with so many unanswered questions. If common sense could prevail, we would implement cost-effective and environmentally-friendly options such as enhanced busses, tolling, reservations and enforcement of traction laws.</p> <p>We have seen parking reservations work throughout the Wasatch in the last few years. Tolling has proven to be an effective solution in Millcreek Canyon. As Salt Lake County Mayor Jenny Wilson said, these are "common-sense solutions that are fiscally sound." Tax-Payer-Funded, Serving Private Resorts</p> <p>Why are Utah taxpayers footing the \$550 million bill for a problem two private businesses created and for a solution that will only benefit those two businesses? As we know, resort executives stand to gain the most from a gondola and have been behind the majority of pro-gondola messaging. They view the gondola as a tax-payer-funded marketing ploy to increase visitation to their businesses. UDOT's EIS states, "The [gondola] would provide an economic benefit to the ski resorts by allowing more users to access the resorts." [Ch. 6]</p> <p>Ignoring Local Public & Political Opinion</p> <p>80% of Utahns oppose the gondola, according to a Deseret News/Hinckley Institute of Politics poll. Salt Lake County Mayor Jenny Wilson, Sandy Mayor Monica Zoltanski and many other elected officials agree. "Rather than rip up the canyon with a half-a-billion-dollar price tag, let's invest in common-sense solutions. Parking hubs in the valley, electric busing with regular routes, carpooling and tolling, reservations, common-sense solutions that are fiscally sound," Wilson said at the Truth About the Proposed Gondola event in June. With no trailhead or backcountry access, the gondola is far from a solution that benefits all of LCC's users throughout the year.</p> <p>Not a Convenient Solution</p> <p>If the gondola is built, your ski day will consist of parking off-site (or paying a premium for one of the limited parking spots near the base), taking a bus to the base station then riding the gondola 31 minutes to Snowbird or 37 minutes to Alta. And then doing it all in reverse order at the end of the day. How can it be assured the gondola will be used and actually reduce cars in the canyon? For the gondola strategy to be effective, there will need to be a major change in public habits. With no plan by UDOT to limit cars (it is our understanding they plan to implement bussing until the gondola is built but not continue the program afterward) or any analysis of demand, the original issue of traffic is not being solved. It will simply funnel more visitors to the resorts.</p> <p>Increased Visitation Stress on LCC</p> <p>If those invested in the gondola are so interested in preserving Little Cottonwood Canyon, the first thing they should do is support a capacity/visitor management study to better understand how many visitors LCC can support. As our friends at Students for the Wasatch pointed out, if the gondola is implemented, the number of cars visiting resorts will remain the same while skier visits will increase by 20%, per UDOT's EIS. The EIS states, "The [gondola] would provide an economic benefit to the ski resorts by allowing more users to access the resorts." [Ch. 6]</p> <p>What Will it Really Cost?</p> <p>The proposed budget to build the gondola comes in at approximately \$550 million. But many estimate that number would ultimately come in closer to \$1 billion. We know projects of this size tend to go way over budget. Our new airport (which could use a gondola from Terminal B) was budgeted for \$1.8 billion and ended up costing more than \$4 billion. If the gondola is built, it would cost \$10.6 million annually just to operate. Plus, UDOT estimates an additional \$12.5 million in capital costs, expected by 2037, followed by \$16.5 million by 2051, according to the Deseret News.</p> <p>Is a Gondola Even Necessary?</p> <p>How many days per winter are you in a complete standstill in Little Cottonwood Canyon? No doubt the red snake is real. But real enough for an expensive, permanent gondola? Plus, the gondola will not run when howitzers are active during avalanche mitigation in the lower canyon from Lisa Falls to Monte Cristo. And we can't even think of an argument for the gondola to be operating for the other eight months of the year.</p> <p>Preserving the Beauty of LCC</p> <p>Little Cottonwood Canyon is a true treasure of our local environment and attracts skiers, climbers and hikers from around the world to enjoy its beauty. Constructing more than 20 towers reaching 200 feet tall and stretching eight miles through the heart of LCC would destroy the canyon's natural beauty.</p>	A32.29VV

		<p>Altering the canyon's footprint will also destroy popular climbing and hiking areas including Alpenboch Loop Trail. Push Traffic onto Wasatch Blvd. The gondola will not solve traffic issues. It will simply push traffic out of Little Cottonwood Canyon onto Wasatch Blvd, I-215 and surrounding neighborhoods in the Cottonwood Heights community.</p>

45124	Pecora, Olivia	<p>To whom it may concern,</p> <p>My name is Olivia Pecora and I am writing to you today to express my thoughts on the proposed gondola project in Little Cottonwood Canyon. I was raised in Salt Lake City and spent nearly every winter during my childhood skiing at Alta. The memories I have in LCC are precious and dear to my heart. I hope to have children of my own someday with whom I can share some of the magic of skiing in LCC. Unfortunately, the proposed gondola threatens that dream.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. There are solutions that do not involve spending millions of tax payer dollars to fund destruction of nature.</p> <p>Regards, Olivia Pecora</p>	A32.3A; A32.3F

48411	Peifer, Elese	<p>To whom it may concern,</p> <p>I grew up in Utah. I skied in big and little cottonwood canyon for my whole life! I started rock climbing in the canyons 4 years ago. This project breaks my heart! With my past experience as a resort employee, additional busses during peak hours and throughout the day would provide the patrons of the resort perfectly adequate transportation . I have always been impressed by UTAs public transportation and think they are more than capable of providing more sustainable options than the gondola.</p> <p>The gondola serves a very small fraction of those who use the canyon. And the potentially high cost of a ticket, \$200, severely increases the barrier of entry for use of outdoor spaces that already exisits and perpetuates an elitist environment. As a child, I had the priviledge of being introduced to resort through skiing; by age 14 I was working at the resort and my pass was comped; presently, I have not skied more than once or twice in the past 7 years simply because I cannot afford it.</p> <p>Though I would love to go more and hope to soon, I have taken up climbing these past 7 years. Climbing has a barrier of entry itself, but as an industry worker, I have taken it upon myself to introduce many people to climbing with resources to decrease the entry cost (e.g. sharing promotional discounted day-pass opportunities, used gear stores, carpooling to climbing spaces, etc.). Maintaining the integrity of Little Cottonwood is imperative to welcoming new people into the outdoor community!</p> <p>For non locals and those who only use the resorts, the gondola is a huge head-turner, media-grabbing, attention hog. But for those of us who use the space in Little Cottonwood for more than just a ski resort, we respect all it has to offer in beauty and recreation - a peaceful and kind space to build community at the rock climbing areas or hiking with friends and family - unadulterated by constant hum of rampant consumerism.</p> <p>The fact that Patagonia is getting involved is not a surprise and should be a huge indicator that something is wrong. Patagonia's founding family recently dissolved the worth of the company (\$3 billion) into supporting preservation of outdoor recreational land. The immensity if that selfless act is exponential to the greediness the gondola serves. A fraction of the money needed for the gondola would cover the cost of sustainable alternatives.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p>	A32.3A; A32.3F

40548	Peifer, Gordy	<p>Hello,</p> <p>As a former employee and season pass holder of Alta/Snowbird since 1988 I am against the Gondola. I don't believe it will achieve the desired goal. I won't ride it and none of my friends will either. There are better solutions which don't involve huge towers going up our canyon. From a user standpoint imagine the lift lines for the gondola at the end of the day to get down the canyon. People won't ride it more than once. If you build this it will fail. There are better options. Please do not go against the people's will and sabotage future trust.</p> <p>Thank you,</p> <p>Gordy Peifer</p>	A32.29VV

39689	Peisner, Ian	<p>What more can I say? UDOT just refuses to get it. The public comment has been clear from the beginning--Utahns are OVERWHELMINGLY OPPOSED to this ridiculous project. This was, of course, before we all realized that the proposed gondola towers would be sited in IRAs, unquestionably detracting from their wilderness qualities and going against the spirit (if not the letter) of the law. I (still) VEHEMENTLY OPPOSE this project. It is too expensive, benefits far too few Utahns, has at best a debatably positive impact on traffic, and will diminish the scenic and wildlife values of LCC. When will UDOT realize that it is time to give up? Put this misguided project on the shelf alongside SkiLink, the Interconnect, etc.</p>	A32.29VV

40340	Pellegrino, Dustin	This winter has been an outlier compared with Utahs average winter. A recent KSL article states LCC averages 11 closure events and this winter has experienced 30. UDOT says the gondola would allow patrons to access ski resorts when the roads are unsafe yet the resorts are open. That scenario is an even greater outlier than the wild winter we all have experienced. The impact to the environment and the grandeur of LCC aside, Why spend billions of dollars on rare occasions. 		<p>It can be more efficient to put more money towards UTA, create an efficient bus plan with more drivers, and make reservations if people aren't carpooling. This gondola will only ruin access to the canyon and limiting climbing and backcountry. Not worth it when you'll have to pay money to ride the gondola, pay to park by it, and destroy land to build a big parking lot so people can access it. All for it to only run in winter *berring good condition* which is not often. Please think over this decision and support the UTA first</p> <p>Regards, Zach Pellikan</p>

41638	Pender, Tyler	<p>Building a huge gondola with towers absolutely violates the "is this a road" concept. The tower bases and infrastructure are absolutely as disruptive as a road. if the goal is truly to protect little cotton wood, the ski resorts can cap tickets. Powder Mountain does this. It is insane that the resorts can demand public funding from those who claim to protect the greater area. Rather, the government should demand the resorts cap tickets.</p> <p>since UDOT is responsible for the highway anyway, the bus options should be optimized. A series of renewable energy sourced buses should be optimized, with private vehicle options, and options for resorts with reserved parking and incentives for carpooling.</p> <p>the gondola max capacity does not begin to get up and down the canyon in volumes to support the resorts desired volumes. Thus, even from a resort centric point of view, the gondola is a failure.</p> <p>the massive bottleneck getting on the gondola would devastate the communities. There would be either no parking or require construction of massive garages. This also reinforces that this is as disruptive as a road.</p> <p>most importantly, consider the impact of construction, on the beauty of little cottonwood canyon. Just as bad as a road if not worse. At least a new road would not clutter the entire horizon. A fantastic view out of the canyon is the material of the dreams and memories of the people of Utah. Once altered, it cannot be restored. It is up to you to stop this atrocity.</p>	A32.3A; A32.3H

		<p>resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Juan Peon-Baker</p>	
52227	Peper, Cara	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project. This canyon is so much more than the ski resorts. My children and I spend summers hiking and exploring nature here. I want them to grow up seeing the beautiful views I love now— not a gondola. I urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. To take Utah tax dollars to fund this project is wrong, especially when other options are available.</p> <p>Please, consider us in this decision. Not just the ski resorts and those that monetarily benefit from them.</p> <p>Regards, Cara Peper</p>	A32.3A; A32.3F

39434	Pepin, Megan	<p>The gondola is not the solution. It doesn't even help both canyons. It can't run during avalanche control which is the only time LCC has traffic. It's an eyesore. It can't run during high winds so not even on powder days anyway. It's a waste of tax payer money...also you can't tell me construction isn't going to effect the environment. Teams, crews,</p> <p>Diesel trucks driving on untouched land??</p>	A32.29VV

40242	Perkins, James	<p>Do not do the gondola or cogwheel or enhanced bus. Do the bus. It would be crazy to choose the enhanced bus or cogwheel or gondola. Don't waste a bunch of money on anything extra. Thank you.</p>	A32.29VV
40982	Perkins, Jane	<p>I FAVOR the Final EIS Proposal of "Enhanced Bus - No Widening." I totally OPPOSE building a massive, intrusive gondola that will forever mar our treasured Little Cottonwood Canyon. I've lived in Sandy, UT for over 40 years, and fully know a gondola is NOT the answer. Keep the current roadway intact, add a variable toll, provide enhanced and electrified buses (no diesel buses), and commit to closing canyon roads to all traffic once certain daily limits are met - THIS is a smart approach that preserves a vital canyon ecosystem and minimizes environmental risks, AND would have a dramatic effect on traffic congestion with a minimum of cost. A gondola threatens the watershed with irreparable harm; visual blight from the massive twenty-two 200+foot towers, cable cars, and nighttime lighting; and increased traffic density in canyon-mouth communities already overwhelmed with vehicular congestion; a "Disneyland-esque" feature for ski traffic. Who thought of this ill-conceived, disastrous proposal that would only have partial decreases of traffic congestion at enormous costs?! The gondola proposal is opposed by the mayors of every directly affected local government (Sandy, SLC, Salt Lake County, Cottonwood Heights, and Alta Town), every conservation group, aligned faith leadership, and the majority of public commenters. The option of "Enhanced Buses - No Widening" is the best option to preserve the canyon, wildlife, air and water quality, and least cost. The public are speaking - LISTEN!</p>	A32.29VV

40649	Perrin, Celeste	<p>I beg you to listen to the residents of this state and the recreators of little cottonwood canyon. The sheer number of people leaving comments for this EIS should show you that it is not the preferred solution, regardless of what your technical study shows. Yes the study may lean towards one answer, but you are not creating this solution for engineers but rather for citizens who love this canyon. LISTEN TO YOUR TAX PAYERS! Do not fund and build this eyesore. As a frequent traveler of LCC in the winter, I can guarantee I will not use the gondola even if it were free. This is not the solution. Try something else before spending 6 billion dollars on a massive project that may sit dormant.</p>	A32.29VV

48806	Perry, Lexis	<p>To whom it may concern,</p> <p>As a utah native, i oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I will not support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Lexis Perry</p>	A32.3A; A32.3F

		<p>Regards, Salym Perry</p>	
46356	Perry, Skyler	<p>To whom it may concern,</p> <p>I have lived in the salt lake valley my whole life. Could ski as soon as I could walk. I understand the need for a solution to the traffic in our canyons but the biggest gondola in the world payed for by our taxes (most of whom oppose the idea) is not the solution. Little cottonwood canyon is more than the hole of snowbird and alta. Restricting use of the canyons by taking years and years to build a massive gondola with stops only at the resorts is stupid. I am sure i will not be heard or seen but to pay for something i don't agree with on top of having to pay for a gondola that will do nothing for me but create a headache upsets me. Find a new solution that fits the best interests of the community that will be paying for it. Thank you.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 39343	Petersen, Dan	<p>Shut it down. Shut down both canyons to traffic. Only allow deliveries/construction/badged and certified city officials etc. Build a transportation hub (obviously without the gondola) and only allow busses.</p> <p>In the summer toll both canyons like the HOV lanes.</p> <p>Boom done.</p>	A32.29VV
42365	Petersen, Dean	<p>As this comment period only pertains to the IRA areas and Air Quality, I will leave it to that. Anything beyond going green with electric buses will increase pollution. Salt Lake City has grown so much with so much smog that the gondola will just add to the smog. We need to toll people who aren't car pooling to reduce smog as well as switch to electric buses. I am certain you could buy alternative fuel buses for a fraction of the cost of a gondola. As for the IRA areas, you can't build a gondola without affecting them. Plain and simple. Any build job does this, thus should be out of the question. If we go back to the alternative fuel buses, then less pollution will occur and no land will be ruined. Building a tolling station will not affect the IRA spots. So you will accomplish your goal of addressing the traffic, not causing pollution and not affecting the land. This answer seems so obvious, not to mention the tax burden we will see and only be able to address 2 public ski resorts and not really open the beauty of the canyon to everyone. Make the smart decision and do not build the gondola no matter how cool it may look.</p>	A32.10G

41554	Petersen, Natalie	<p>Dear Director Braceras,</p> <p>I write this letter to thank you for your service to the citizens of Utah and request your serious consideration of the long term implications of the proposed gondola in Little Cottonwood Canyon.</p> <p>The first consideration is regarding the building of gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>I ask UDOT to expand its analysis, accounting for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy, such as electric buses.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations.</p> <p>The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p>	A32.3A; A32.3F; A32.10G

		<p>I am also very concerned about the impact of a gondola on plants and animals. As building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals.</p> <p>How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a tax paying Utah resident, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p> <p>Again, thank you for the dedication and hard work of your department in serving Utahns. I sincerely hope you will consider my concerns, shared by many Utah citizens, and make a decision based on the long term benefit of our state rather than political pressure.</p> <p>Sincerely, Natalie Petersen</p>

39548	Peterson, Andrew	<p>I am a cottonwood heights resident so these options do effect me directly. At one point, I was 100% in favor of the gondola. After giving the idea more thought and travel multiple times up the mountain to ski this, I have decide UDOT should do nothing. The cost of any of the plans do not outweigh the benefits. In general, the canyon is only congested a small portion of the year. If something had to be done, the additional of a few snow sheads would suffice. The additional bus service is a waste of tax payer dollars as they also are paralyzed in traffic. I will never ride the bus. Most people feel the same way as they are very inconvenient and uncomfortable. It is such an unpleasant experience. The gondola would be the next best option. I would ride this but it will be expensive to construct. Widening the road would be the worst option. The should put in a toll regardless. That will help cut down traffic in general. The fund can be used to improve all roads and reduce taxes in general.</p>	A32.29VV

42347	Peterson, Lance	<p>I am vehemently opposed to the LCC Gondola.</p> <p>I have loved and enjoyed LCC for 2 decades and witnessed the changes and increase in recreation demand over that time. Simultaneously, there hasn't been even an incremental improvement in infrastructure in that time. It's time we tried some of those incremental measures (snowsheds, tolls, better bus service etc) before we spend billions on an albatross of a project that benefits a few financial stakeholders tremendously, but does irreparable harm to the Little Cottonwood viewshed.</p>	A32.29VV

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Jacob Pettit</p>

39744	Pew, Meghan	<p>The gondola is an inefficient answer to a seasonal issue. The impacts it would have on all of the roadless areas mentioned (regardless of Udots argument that it isn't technically a "road" we all know this still impacts these roadless areas in same ways) will have negative consequences to our watershed. As someone who lives here I can confidently say that I don't know a single person who is for the gondola and am discouraged by the state of Utahs lack of acknowledgment of this widespread known fact when assessing whether to go forward with the gondola or not. Ski season is late November- April (at its peak). Destruction of our natural resources to slap a bandaid on a traffic issue is nothing more than a money grab for the resorts and UDOT. Simply put, you're redirecting traffic to the bottom of the canyon and truly destroying this canyon, not fixing a single thing.</p>	A32.3A; A32.3G

Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Zach Phillippy</p>	
42350	Phillips, Camille	<p>After reviewing the supplemental materials, it is clear to me, the enhanced bus and no widening of the road is the preferable choice because it has the least amount of impact to the roadless areas designated by the forest service. When reviewing the rating sheets in the supplemental material, both the widening rode and the Gondola proposals had more environmental impacts than did the enhanced bus proposal. The supplemental material only reinforces the argument that the Gondola is the worst decision to make for our canyons. Not only did is score terribly in the rating values for environmental impact, it will also be the most expensive, will cause irreversible damage to the canyon, and will cause undesirable traffic and parking congestion at the mouth of the canyon. NO GONDOLA!</p>	A32.3A
53097	Phillips, Caroline	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Caroline Phillips</p>	A32.3A; A32.3F

42379	Phillips, Patrick	After reading the 'Supplemental Information Report – Assessment of the Roadless Area Conservation Rule for the Final EIS Alternatives' I have seen no evidence that a gondola or rail alternative will satisfy all parties at stake. This is a solution which will benefit the ski resort access and only in the winter while ignoring the other uses of the canyon in the winter. Not taking in to account the impacts of other forms of recreation in the canyon other than resort access is a red flag in this report. Additionally there is marginal benefit regarding throughput in the canyon that can not be provided in a way that improved bus service and/or an additional lane for buses (which have the option to flex on or off peak hours). This supplemental does not provide additional evidence for a gondola over bus alternatives. The majority of the tax payers do not support and gondola and I do not either. Think about the total use of the canyon not just where the tourist dollars go.	A32.29VV

55842	Pickell, Robert	<p>To whom it may concern,</p> <p>I strongly urge you to remove the gondola as an option for addressing the LCC transportation and access challenges. The flaws with the gondola are almost too numerous to list. Foremost among them, is the fact that the gondola is operationally inefficient. It is only necessary a small number of days a year and on those days simply doesn't move enough people per hour to make sense. The combination of time to park, wait to board and the to ride the gondola likely means trips each way of 2-3 hours. Further, the total capacity relative to skier visits on a busy winter day is insufficient, especially given the cost. Beyond the operational flaws the environmental impacts are simply unacceptable. As are the visual aesthetics of a giant system in a protected environment and jewel of the Wasatch. Simple solutions often are the best, and moving to reserved parking on weekends, more buses, and potentially a number of additional lanes will solve the issue at a fraction of the cost of the gondola and without all the negative impacts. Locals strongly object to the gondola and given that UDOT is a public entity, shouldn't our own transportation department follow the wishes of the people that fund it? It was an interesting idea, but doesn't pass any feasibility test. It's time to move on from the gondola and focus on better</p>	A32.29VV

39489	Pickford, John	<p>This winter has again gone to show the difficulties with keeping the Little Cottonwood Canyon road open with heavy and even medium snow conditions. Busing will not alleviate congestion and will cause increased delays for visitors accessing the canyon recreational facilities. The gondola will be better, require less maintenance, have no impact on air quality and will provide a safe and efficient transport system up and down the canyon. Please pick the Gondola B plan.</p>	A32.29VV

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Samuel Pike</p>	
55095	Pike, Susan	<p>To whom it may concern,</p> <p>Below is the detailed response to this that I got from Patagonia. However, I want to make it clear that I support everything it says, and see no reason for something like this gondola. It's not fair to the taxpayers, and it's especially not fair to this protected natural area. It furthermore adds to the polarization of our country, dividing up, rich versus poor. We are becoming everything we've always despised in other less progressive nations.</p> <p>It isn't clear to me how this project will benefit the majority of people in Utah, and visit Utah? If you're going to use taxpayer money money for something, please use it for some thing that benefits all. Think about all the underfunded schools.</p> <p>I teach high school science and I see how demoralized the next generation is. I work in a low income school and these kinds of projects just reinforce young peoples impression that they are marginalized. Please really think about what it means to pursue this project.</p> <p>Please do not succumb to big money interests by building this gondola. Please set an example for future generations.</p> <p>Sincerely Susan Pike</p> <p>Regards, Susan Pike</p>	A32.3A; A32.3F

41233	Pikus, John	<p>I believe that consideration of the roadless rule demonstrates many of the most substantial problems with the idea of putting a gondola in Little Cottonwood Canyon. UDOT was tasked with finding a solution to the traffic problem based on mobility and reliability. Little Cottonwood is so much more than simply a road that leads to two privately owned ski resorts. It is a haven for wildlife, an essential part of our water supply in Little Cottonwood, a world class area for backcountry recreation, and so much more. The world's largest gondola will permanently change the character of this brilliant, glacially carved canyon, not to mention potentially shut down iconic rock climbing areas for several years and permanently destroy</p>	A32.3A; A32.3F

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>others. I greatly appreciate all of the work that UDOT does to manage roadways throughout Utah and keep us all safe during periods of high avalanche danger. However, a special place like Little Cottonwood deserves a more holistic approach. Please listen to the people AND their local elected officials and collaborate on finding a less invasive and impactful solution. Preferably one that can also be expanded to cover Big Cottonwood Canyon, which in my experience these past two years as a Cottonwood Heights resident has had significantly worse traffic problems than Little Cottonwood. Thank you for considering my comment, I hope we can all come together to figure out a better solution.</p>

49077	Pinegar, Allison	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p>	A32.3A; A32.3F

39598	Pirozzi, Cheryl	<p>No gondola in LCC. Please remove the gondola proposal from the RTP. It does not make any sense as a proposed solution to the canyon traffic problem. It is environmentally destructive, expensive, and does not actually effectively solve the problem (for one thing, it addresses only Lcc and does nothing for the congestion of BCC). LCC is a natural treasure to the people of Utah, and the gondola destroys the natural beauty, climbing, and wilderness experience. The obvious, cost effective and actually effective solution that does not destroy the canyon is electric bus service in both LCC and BCC. The people of Utah do not want the gondola. They have spoken again and again and it is time to start listening.</p>	A32.29VV

41005	Pittman, Michael	<p>Let's be honest; you do not really want public comment. If you did, you would have already abandoned the Gondola idea after having received many thousands of comments that are overwhelmingly AGAINST the Gondola. And yet, you continue to push forward with the agenda that is clearly driven by those few who stand to benefit from it. There are many possible, better solutions such as: required carpool on heavy traffic days (enforced by police at the mouth of the canyon); additional bus routes, avalanche sheds at White Pines and other prone areas, etc. Please abandon the Gondola idea until we have exhausted other more practical, and affordable options.</p>	A32.29VV

39820	Plaehn, Mike	Please stop trying to push for a gondola that the majority of citizens do not want. Please stop being greedy. Please don't destroy my favorite place in the world and where I grew up. If you want to solve traffic issues slap the resorts around and get them to drop support of mega passes like Ikon that are flooding our state with out of town traffic. Stop trying to push for infinite growth in a limited space.	A32.29VV
46884	Plancarte, Jasmine	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Jasmine Plancarte	A32.3A; A32.3F
40171	planelles, vicente	The gondola is impractical and expensive. The most important aspect of it is that it is not going to provide the solution everyone is looking for. People not going to ski in either of the two resorts will not benefit from it and will still have to drive their cars up the canyon. What is hard for me to understand is why not use the system that is already working, the buses, and simply enhance it with more buses and a wider network of stops. This would be so easy and so pleasant for everyone.	A32.29VV
54739	Plant, Basil	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 41620	Pohl, Audrey	<p>Dear UDOT,</p> <p>NO GONDOLA. Plain and simple. Construction of it will harm wildlife and the watershed. In unprecedented times like last week with all the huge slides onto the road, I wouldn't feel safe in a gondola. I'd be afraid of the towers getting torn down by the heavy wet snow. I don't like how exclusive the gondola is. It only caters to the resorts and doesn't consider all the spots along the road that people park to access the backcountry. Please invest in enhanced bus system before you make permanent infrastructure changes. Incentivize carpooling, have a cop at the base of the canyon checking snow tires and 4x4/AWD. I'd love to see busses leaving from the park n rides every 10 minutes during peak times. It's extremely suspicious to cut bus lines then promote the gondola. It's really obvious you're not trying every other option before the gondola. Make the bus system really good. So good people can't help but use it. I used to ride the bus all the time until you cut the bus lines. OBVIOUSLY canyon traffic gets much worse when fewer buses are traveling the canyon. Duh. You know this. It's all a big conspiracy and we see right through it. Exhaust your less permanent options before you install an eyesore into our beloved LCC.</p>	A32.29VV

42266	Poole, Cheryl	<p>The proposal to build a gondola will not solve the problem of traffic in the canyon. As long as an unlimited number of cars are allowed to drive up the canyon people will choose that option, especially if it is cheaper and more convenient than the gondola. The issue in LCC is mainly caused by Snowbird, who also stands to profit the most if a gondola is built since they own the land where the parking for the gondola would be built. While Alta requires parking reservations Friday-Sunday and weekends during the winter which limits the number of</p>	A32.29VV

		<p>people driving to the resort, Snowbird takes no such action allowing people to park all over the road and exceeding the capacity of cars that should be in the canyon. Snowbird has no incentive to solve this problem as long as parking in the road is allowed. The issue of overcapacity in the canyon could be fixed by requiring Snowbird to limit the number of skiers per day as Alta and many other resorts are doing and also enforcing traction laws in the canyons on snowy days, which is not currently being done. These solutions don't cost Utah taxpayers and solve all the problems without destroying the beauty of LCC. UDOT needs to look at the actual issue here and look at real solutions rather than expensive and unnecessary boondoggles that do not benefit the people of Utah and those who enjoy recreating in the canyon.</p>

40503	Porter, Cody	<p>I am adamantly against the proposed gondola. In my opinion this proposal is an irreversible option that was lobbied as a money grab for greedy developers and corrupt public officials. The gondola is not a nimble, or scalable solution that can fluctuate with demand for transport. Additionally Resorts and developers have committed nothing in regards to obligations for this proposal. I'm tired of hearing a flimsy argument that they have to subsidize the cost for riders but there is no language in the transportation proposal about what ski resorts and developers will commit to this plan. No commitment about the cost to ride, no commitment about the cost of parking. Actually the proposal says that parking will be available for a premium price to riders. Additionally this plan does not address the transportation needs and congestion surrounding Big Cottonwood Canyon which might be even worse than Little Cottonwood. This gondola proposal is a very expensive solution that will only operate 5 months out of the year, and if it doesn't work will be a massive wast of funds and cause the destruction of a natural place that makes Utah and Salt Lake City a special place.</p> <p>It is estimated that the gondola will transport about 1000 people per hour, but there are more than 10,000 people entering the canyon during peak season. A billion dollars to service 1/3 of the total volume is nonsense and once again does not address big cottonwood canyon transportation.</p> <p>We need to leverage our current infrastructure to improve transportation. Last year when snowbird had parking reservation system it was very manageable. This year Alta is very manageable with the parking reservation system. When 20% more busses were added to canyon transportation, they immediately filled up.</p> <p>Bottom line, we need to try more reversible solutions before we hit the panic button and destroy something special.</p>	A32.29VV

39424	Porter, Cody	<p>I strongly oppose the gondola project and would urge UDOT to consider improving resort shuttle options as an initial step toward understanding/improving the traffic situation in little cottonwood canyon.</p> <p>The gondola will create more frustration for the users of LCC. It will increase the amount of time it takes to get to the resorts, it will increase the cost of getting to the resorts, it doesn't take into account other user types such as hikers, bikers, climbers, etc, and it has a massive impact on the surrounding environment.</p> <p>The gondola has the potential to negatively impact our winter ski tourism by increasing the complexity of being able to ski in LCC.</p> <p>I would also like to make a note about the bigger traffic problem in the cottonwoods... Big Cotton Wood Canyon.</p> <p>It seems like the gondola project is driven by money and greed and not public input/environmental impact.</p>	A32.29VV

39841	Porter, John	<p>The impacts to the canyon for the improvements to the road and addition of a gondola seem minor to this taxpayer and canyon user. It does seem helpful to add sheds and other safety infrastructure to protect canyon drivers. The vegetation will grow back in time like it always does. I don't understand the resistance to canyon travel improvements by my neighbors.</p> <p>As for air quality concerns - thousands of cars idling (for hours) and driving seem environmentally bad no matter what. A few buses and construction dust to reduce the traffic seem to mean less pollution than the cars. And if we get too many excessively heavy electric cars (we need check stations for EV tire wear) and buses in the canyon, someone is going to crash one that contaminates LC creek or ignites a major forest fire. Stay with the diesel buses.</p>	A32.29VV
41168	Porter, Jordan	<p>Running the environmental impact study purely off diesel emissions is absolutely invalid. The future is moving towards all electric vehicles (ie. Amazon / Rivian / Tesla). The study needs to incorporate the future use of electric buses to be valid and properly compared to other options.</p> <p>NO GONDOLA.</p> <p>Thank you.</p>	A32.10G

41602	Porter, Lydia	<p>I do not wish to have the gondola built in the canyon for fact that it will cost the tax payers millions of dollars to benefit only 2 businesses. If the ski resorts want the gondola they need to come up with a plan to build it themselves or fund at least 75% of the project. This reason should be compelling enough, but there is also a list below of other reasons why it should not be built.</p> <p>It'll limit rock climbing and other recreation.</p> <p>It will displace wildlife.</p> <p>It could harm our watershed.</p>	A32.29VV

40886	Potter, Angie	The gondola is not the best solution to fix traffic problems in Little Cottonwood Canyon. It was cost tax payers dollars, just so that people can use private ski resorts. It will permanently mar the beautiful canyon scenery. Lastly, the traffic problems could be reduced by much simpler means, such as by using a fleet of busses and only allowing authorized vehicles to drive up the canyon. The cost of the gondola and the destruction of natural scenery far outweighs the benefits, especially since the same outcome can be achieved by simpler, far more efficient means.	A32.29VV

39486	Poulson, Jared	<p>In every proposed new project, the naysayers always scream the loudest. I am 100% for this gondola project, not only from an air quality and traffic perspective, but it will showcase SLC as a leading technology/engineering city that mixes well with the outdoors providing an aesthetically pleasing and progressive landmark for which we will be an example to the rest of the US. Having ridden many gondolas in France, Switzerland and Austria it was not only amazing scenery, but you could see the care and pride the locals had in their stewardship with Mother Nature. Please clean our air, clean our roads, and allow for us to enjoy this beautiful canyon from a stunning viewpoint. Thank you.</p>	A32.29VV
41766	Poulson, Marv	<p>With review of options intended to address the congestion in Little Cottonwood Canyon, the more clear it is that -- in addition to being the most expensive option proposed, the Tram system will also do the least to solve the transportation problems.</p> <p>While the Tram scheme offers novelty, it would not mitigate the threat to our watershed, would only serve two of the ski resorts, takes the least number of cars off the road, and would permanently mar the natural beauty of one of our world-class, and historically significant canyons. As many have pointed out, we shouldn't be paying the most to get the least, which is why the latest statistics show that between 61-75 percent of respondents oppose the Tram system idea.</p> <p>The tram system as identified in UDOT's DEIS and FEIS documents clearly has extremely limited public benefit, rather, it primarily serves only 3 commercial interests, that of Snowbird and Alta ski resorts, and La Quail. That exclusivity certainly cannot justify spending hundreds of millions of dollars of either Federal or State public funds. If that approach ultimately gains UDOT's favor, it will open an expensive legal process that will ultimately delay any beneficial public benefit that selecting the road widening, expanded bus option clearly offers broader public benefit. Don't waist time and public funds pushing the tram option that lacks substantial public support nor does it satisfy the need for the greatest transportation efficiency for the most canyon users.</p> <p>Road/bus improvements are going to have to be implemented in any event, making any Tram development a secondary, subordinate consideration, never primary!</p> <p>The Final EIS appears to deliberately underestimates impacts of construction and perpetual maintenance of not only the Tram towers and cables, but the actual ongoing maintenance of the ground access to assure function and safety of a tram system. Construction and maintenance access to each Tram tower must be fully described and included in the environmental analysis, and additional public comment scheduled for full public evaluation because inordinate public moneys are at stake.</p> <p>UDOT must go back to a draft stage of the NEPA Process to consider extreme conditions of the realities made evident the 2022-2023 winter season for any consideration of a Tram system to more fully evaluate the impacts of extreme avalanche impacts demonstrated by the numerous large, natural and UDOT implemented avalanches to determine additional protections for Tram Towers.</p> <p>Further, the inordinate number of avalanches during the 2022-2023 winter season forced more inter-lodge closures than ever, a purported Tram service might well exacerbate if avalanche damage interfered with Tram function and safe operation necessitating aerial rescues of Tram gondolas.</p> <p>These extreme possibilities are clearly of significant potential given experience in the 2022-2023 season. Such eventualities must be made part of the Final EIS as realities and no longer speculative!</p> <p>Impacts of wind on the tram cars are clearly understates risk given the frequency of high winds at various elevations in Little Cottonwood Canyon. History now shows wind events are increasing in both frequency and intensity, and arguably, duration as climate change effects have been predicted to increase.</p> <p>UDOT's favoring of a Tram system over road and bus improvements fails the credulity test for greatest public benefit, which MUST be the ultimate test. Stop wasting time and resources on the ridiculously useless Tram system and start concentrating on making road improvements to accommodate cars and more buses year around. Consider improvement that would protect the road similar to how Colorado has done for I-70 above Glenwood Springs and on US-550 above Ouray to Red Mountain Pass where structures protect against rock falls and avalanches.</p> <p>I oppose any further consideration of a Tram option in the strongest possible terms and will actively oppose any further UDOT consideration to pursue any such a plan!</p>	A32.29VV

40147	Powell, Jess	<p>The proposed gondola would require construction on 3 different designated roadless areas. Even if the gondola system is not defined as a road, it would be built for highway purposes and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan. It would be a terrible misinterpretation of the Roadless Rule to suggest that an 8 mile gondola system is exempt from that designation's protections simply due to the amount of environmental impact from its 10 year construction (watershed views, dispersed recreation, timber, vegetation, habitat). I am grateful that UDOT recognized this initial oversight and put in the time to consider the implications of building a system like the gondola on protected land like this, and hope that the learnings will lead them to less destructive solutions like enhancing/expanding an electric bus system on the road systems we already have</p>	A32.3A; A32.3G; A32.10G

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Christa Powers</p>

41024	Pradhan, Ian	<p>I must say, that I am not satisfied with any of the proposed solutions and believe that they are all a band-aid style solutions to the problem.</p> <p>UDOT cannot manage to retain bus drivers, how do they plan to increase bus service?</p> <p>A gondola has the potential to alleviate some issues and be a year round tourist attraction. But the larger problem is that it requires people to get to the base station in the canyon. Wasatch boulevard, and other tributaries to LCC are already overwhelmed, and as Utah continues to grow, our roads will become increasingly overwhelmed with the required capacity. The gondola. also only services the ski resorts.... If tax payers are going to pay for the final implemented solution, then the solution should benefit more than just skiers.</p> <p>A train solution that goes up the mountains with many stops would be ideal. It would be the most expensive option by far, but imagine: a family arrives for a ski vacation to SLC and can hop on a train that takes them directly to any of the resorts from the airport. It is a proven concept that trains can travel in all kinds of conditions, and carry many more passengers, equipment, luggage etcetera.</p> <p>Also, Utah should be thinking long-term. We could be the leading the national charge for renewable transportation, linking ski resorts, and neighboring cities like Ogden, Spanish Fork, Provo, Toole, and Park City. Not only would we be supporting the environment but there would be a huge opportunity for skilled jobs in our state, ranging from construction, engineering, and project management to marketing and branding for Utah.</p> <p>Imagine if when Utah hosts the Olympics again, we showed the world that we are modernizing and embracing renewable train travel! If we truly value our environment, then Utahns should look at the long term picture, which includes population growth, increased air pollution from people driving and advocate for planned solutions that can be enjoyed for generations and utilized far into the future. Not band-aid solutions that will need to be revisited in the next twenty years.</p>	A32.29VV
39732	Pradhan, Saphu	<p>I am an avid resort skier and there is insufficient evidence to warrant spending hoards of taxpayer dollars on a gondola. This is a substandard "solution" for overcrowding. Please do not force the residents of Cottonwood Heights into something they oppose. Other resorts have found less expensive and less environmentally damaging methods to address this problem such as shuttles from Banff to their 3 ski resorts. More buses or electric buses would also help. Reserved parking at Alta has already improved traffic. Snowbird can do the</p>	A32.29VV

39563	Praskieviz, Steve	<p>Dear Little Cottonwood Canyon EIS Committee:</p> <p>I have a few comments regarding this process. It seems to me that the Committee is kind of making a mountain out of a molehill. Problems with traveling on Little cottonwood Canyon have existed for over 50 years. It used to be just when there was new snow but now the travel problems exist almost every day of the ski season.</p> <p>My opinion is that cars should be completely banned on Little Cottonwood Canyon Road. All Cars! Skiers and guests would ride buses up and down the canyon road. With "bus only" traffic I think the ongoing "Congo Line" up and down would disappear. The problem is finding staging (parking)spot at the mouth of the canyon but that issue must have been solved with the current "Plan(s)".</p>	A32.29VV

40433	Primmer, Elias	<p>I believe that building a gondola in Little Cottonwood Canyon would conflict with The Roadless Area Conservation Rule. Considering that, I strongly oppose the building of a gondola in Little Cottonwood Canyon. There are many alternatives to building a gondola that are not being considered. I think it would be a scam to use tax payer dollars in order to provide more business to Alta and Snowbird. There should be increased bussing, which would benefit more user groups, such as hikers and climbers, not just wealthy skiers. I would support increased bussing, tolling, and the construction of snowshed as ways to address congestion in the canyon. Once again, I strongly oppose building a gondola in Little Cottonwood Canyon. Please consider public comments and opinions, as I believe that they are more important than the profits of snowbird and alta.</p>	A32.3A

41027	Pruitt, Steve	<p>1. I see nothing in the EIS that addresses the resident birds of prey – red tail hawks and eagles that regularly are visible in flight and perching in trees below the 209/210 junction. How are you addressing the elimination of them with the gondola?</p> <p>2. The loading of the additional bus cost only onto the La Caille alternative has the appearance of putting UDOT's fingers on the scale to produce a preferred outcome. Why would the small incremental distance between the two gondola alternatives mean one has to have a line item bus expense while the other does not if the ridership from the terminal and access thereto is the same?</p> <p>3. Of the 50 days per year this project is supposed to impact, where are the figures on the portion of these days when winds prevent the operation of this folly?</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>4. You have stated that there will be a projected 45% increase in southbound Wasatch traffic at peak periods but you have not provided anything to support this claim. As the east bench is virtually built-out limiting future traffic increases, where are the new trips being generated from that support this claim?</p> <p>5. Your plan makes all access to the parking solely from 210 and in doing so you have provided no study or support on the impact on Wasatch between 9400 South and the 210 signalized intersection; the impact on this signalized intersection itself; the impact on Wasatch Blvd. south of 9400 South; and 209 altogether particularly given that the alternative at the 209/210 intersection would level the traffic flow between 209 and 210 for such access.</p> <p>6. I see nothing in your gondola budget for legal defense of your selection which will most certainly occur and last for years and what is your defense to the destruction of the view corridor from all of the impacted property owners as such view corridors have been historically and legally defended when compromised.</p> <p>7. As the ordinary tax payer will have no benefit whatsoever from your preferred alternative but being asked to pay for it you need to provide more sunshine you should have to provided in the beginning with an assessment or explanation of the following:</p> <p>A. The projected economic value to the two ski areas that are the terminal beneficiaries of the gondola but will be shouldering none of the cost.</p> <p>B. Identification of the base beneficiaries including the names of all land owners, speculators and contract buyers such as Niederhauser, McCandless and La Caille together with any disclosures that may exist or be found through FOIA or otherwise between any of these beneficiaries and all other beneficiaries and/or their lobbyist with the State legislature and the Governor.</p> <p>C. What methods other than tax payer funding are being considered to pay for the project and what documentation do you have from potential vendors that support your cost analysis and in this era of continuing inflation, how stale are your budgets and what are the financial contingencies to the budget.</p> <p>9. For all ancillary commercial benefactors at the base, what provisions have you established that all such concessions will be subject to public bid.</p> <p>10. What agreements have been proposed with La Caille that would solely benefit La Caille such as ancillary development of their land as a result of your selection, identification of their business as the identification name of the base development and/or access from La Caille across Little Cottonwood Creek to otherwise benefit them.</p> <p>11. I see nothing in your preferred alternative that protects the privacy of any of the land owners who will become the fish bowls for each gondola cabin. If traffic mitigation is the real goal, then not having windows on the south side of each cabin will mitigate this intrusion into our privacy and as the cabins are assuredly not constructed, as those impacted want to see no southern visibility as part of the "preferred" design element to maintain our privacy.</p>

		<p>resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Natalie Pulsipher</p>	
41948	Pulsipher, Noah	<p>I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p>	A32.3A; A32.10G

42303	Quesnell, Maddy	<p>I am glad UDOT is recognizing the potential implications that gondola construction would cause in the designated roadless areas. Constructing a gondola will have the same environmental detemrnts as constructing a more literal road. Certainly, there will be significant impacts on the watershed, dispersed recreation, timber, vegetation, habitat, etc. if gondola construction is pursued. We should honor these protected spaces, and end plans for a gondola. Other options should be pursued to alleviated growing traffic congestion.</p>	A32.3F
40569	Quick, Alec	<p>Please,</p> <p>Enough already. This is a huge waste of tax money. No one wants this other than billionaires that will profit off of it as we pay for it. NO GONDOLA. A gondola will require roads to access towers, it will disrupt wilderness areas, it will NOT SOLVE TRAFFIC. LISTEN TO US THIS TIME!</p>	A32.3A A32.29VV
45869	Quick, Bryton	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 41118	Quick, Derek	<p>The general public is still strongly opposed to the implementation of the proposed gondola. Taxpayer money should not go towards funding something that does not actually benefit them. I have many concerns about the proposed gondola plans negative impact on the natural environment, our watershed, and the scenic views. Such a massive construction project in an already delicate environment is irresponsible and there are less destructive and less costly alternatives to the gondola. An expanded bus service would do more to reduce traffic and pollution than the gondola would, while also costing tax payers significantly less money. Please listen to the public. They have shown time and time again through every comment period that opens up that we DO NOT WANT A GONDOLA IN LCC! We will continue to oppose the gondola every step of the way.</p>	A32.29VV

46338	Racine, Alexandra	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Alexandra Racine</p>	A32.3A; A32.3F

42275	Rasmussen, Kara	<p>The gondola goes against the policy to conserve ecosystems by not building roads. It will also not improve traffic congestion. It will not be light construction to build and will result in more disturbance to wildlife. This is not a project that will create more harmony between humans and the Earth. There are lots of projects that would be better to use funding for, such as improving public transportation, and creating accessibility for all people in the valley not just those with money to enjoy nature. Another idea to decrease congestion is creating a lottery system people can choose to participate in. Please make decisions for our future that are for everyone.</p>	A32.3G

40919	Rasmussen, Marissa	<p>Save our canyons!</p> <p>I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and take away from many of the qualities that I cherish about Little Cottonwood Canyon: clean water, diverse wildlife, breathtaking views, and endless recreation opportunities.</p> <p>If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy.</p> <p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do.</p> <p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p> <p>Stop accommodating all of these new transplants who don't love Utah for what it already is and want to make it into something else that doesn't align with our values and how we honor our beautiful state.</p>	A32.3A; A32.3F

40276	Ratliff, Anna	<p>The proposed gondola is a bad idea. Please start with a less permanent option that includes parking away from canyon base areas and involves reducing number of private vehicles in BOTH little and big cottonwood canyons. Enhanced busing to the resorts as well as bus stops for backcountry ski access are an excellent way to reduce congestion in the canyons. This needs to include larger parking areas far from either canyon, charging private vehicles to drive up the canyons. No one will ride the gondola, it is an expensive eye sore that will not fix traffic.</p>	A32.29VV

39508	reader, cliff	<p>These further reinforce my support for the Gondola solution to the problem. Widening the highway, adding buses of any type, or continuing to rely on personal vehicles has more impact on the physical environment (landscape) and more impact on pollution than the proposed 35-person electricity powered gondola. I urge you to secure funding for the gondola in the immediate timeframe including parking for the gondola, and begin construction independently of any other highway funding or construction. I'm sure the Swiss can have the gondola in place within a couple of years. The issues of access to the parking for the gondola will become apparent upon operation, and will render obvious what, if anything, needs to be done to upgrade access below the canyon.</p>	A32.29VV

		<p>providing access to it for recreational use. In order to provide both access and preservation, we, the skiers, must sacrifice convenience (being able to drive our own vehicles up and down the canyon during ski season) for conservation. The Gondola is an attempt to avoid the inevitable truth that it is unsustainable for thousands of skiers to drive their own vehicles—often with no one else in the car—to ski areas. If the goal of UDOT is to provide transportation without forgetting conservation, then the gondola is not the solution.</p> <p>Thirty cars that each contain one person and their gear occupy 10-15 times as much space on the road as a bus that fulfills the same end. Another lane for busses is not the answer. A gondola is not the answer. The answer is public transit, and more of it. Little Cottonwood, like some sections of Zion National Park, simply receives too much traffic during its busy season to allow everyone to drive their own vehicle through it. It is simply not sustainable, and makes the experience worse for everyone, as the traffic extends commute time all while thousands of vehicles idle, worsening the winter air quality still further.</p> <p>The solution is for skiers to take the bus, but taking the bus doesn't save them any time if the bus is still stuck in the traffic caused by everyone else. In order to guarantee that the bus will save people time in general, we need to reduce traffic by making the bus the easiest way to get to these ski areas. Now, there are some issues to resolve in making this the case. First, there are cabins in the area that are occupied year-round, and those people need to be free to drive up and down the canyon. Also, in the case of backcountry skiers, the busses may not arrive to the places they need to go and may not be able to get them there early enough, or retrieve them late enough. There are a few other exceptions like that, that would mean that there would need to be a number of special driving passes handed out, should bussing be required generally. I believe that this might cause a number of difficulties and proving that you are going to ski in the backcountry and not at the resorts would be difficult to regulate.</p> <p>I see one easy solution to this: The ski resorts must restrict parking spots to a small fraction of the current amount, and do this as the relevant government organizations promise to provide sufficient bussing to deliver all of the skiers (and more) that currently frequent the resorts. This would allow for even more skiers to access the ski areas, as the parking lots frequently fill up and people make the drive up and down without skiing (a bad deal for them, a bad deal for the other people on the road that can't make it to their destination as easily, and a bad deal for the planet). Additionally, this solution would allow for the backcountry skiers and snowshoers to park on the side of the road, or at their respective parking lots, without needing a special pass. And as the cabin-dwellers have their own parking, they would not have to request a special pass either.</p> <p>In conclusion, the best solution to the problem of traffic in Little Cottonwood Canyon, and Big Cottonwood Canyon as well, is to make it very hard for all of the people traveling from the same point A (the mouth of the canyon) to the same points B and C (Snowbird and Alta) to travel in five-thousand individual vehicles, and to make it very easy for them to travel in much fewer busses. This is the solution that would deliver the maximum number of people within the shortest amount of time with the fewest emissions. Not to mention that this approach would make it unnecessary to widen the road for an additional bus lane and would make it unnecessary to ruin several crags for gondola towers. While this solution would be much less flashy than the 8-mile gondola, it is the best way to preserve our Canyon, and to allow all access to it.</p> <p>As one concerned with the environment of the Wasatch Front and access to it, I would love to be a part of the conversation to assist in providing the best solution for all involved.</p>

40944	Reed, Amber	<p>This gondola would be a tragedy for Little Cottonwood Canyon, disrupting the majestic views that belong to us all as Utahns. There are other more affordable ways to relieve canyon congestion (like more busses, requiring permits, etc) that wouldn't permanently mar the canyon, destroying it forevermore. This also seems to be a deal that lines the pockets of a few (like the land owner who wants the parking structure built on his land) but that comes at an unacceptable cost to us all as the gondola structures would permanently destroy</p> <p>The majesty and pristine beauty of LCC. Please do not proceed with this gondola plan. Utahns and nature lovers everywhere beg of you to look for other solutions.</p>	A32.29VV

42795	Reed, Beckett	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Beckett Reed</p>	A32.3A; A32.3F

Culturally, Utahns drive. They will not take the gondola. The gondola will be empty, except holiday weekends when it's partially full of tourists who are staying in the valley. Explore other solutions; limit traffic, don't enable crowds.</p> <p>Regards, Kristina Reeder</p>	A32.3A; A32.3F

40897	Rees, Robert	<p>As someone who is passionately engaged in environmental issues and who recently established a non-profit foundation to address them, I am gravely concerned about watershed issues as they relate to the proposed gondola up Little Cottonwood Canyon. tAs we are hopefully learning, water will be of increasing importance in the coming years. According to reliable studies the proposed gondola will have a negative impact on the greater Salt Lake metro area.</p>	A32.29VV

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Amy Reglin</p>

I would love to see 1.4 billion go to our schools, please and thanks.</p> <p>With consideration, Mckenzie</p> <p>Regards, Mckenzie Reidhead</p>	A32.3A; A32.3F
39436	Reilly, Carrie	<p>8 gondola towers, snow sheds, 2 angle stations, and vegetation removal would take place within Inventoried Roadless Areas that exist in Little Cottonwood Canyon. The Forest Plan prohibits, road projects and recreation projects, and as the EIS states these projects are for highway purposes.</p> <p>The public comment period reads as though Wilderness Areas are expanding, to the contrary, UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon.</p> <p>Roadless areas protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas. These places need to be protected!</p> <p>The Roadless Rule boundaries must be upheld over building gondola towers.</p>	A32.3A; A32.3G
40874	Reilly, James	<p>The best case scenario for the use of the gondola will materially increase the risk of fatalities and therefore the LCC gondola will be as insurable as a Russian oil tanker</p> <p>When your best-case scenario becomes your worst nightmare it is time to walk away.</p> <p>Last Thursday (4/6/23) the Chickadee slide at Snowbird delivered the knockout blow to the LCC Gondola.</p> <p>Had the LCC not been closed (Snowbird was open) this near miss could have become a tragedy. Instead of several hundred skiers on the mountain, there could have been several thousand.</p> <p>The slide occurred at the top of the beginner's slope where the bypass road intersects with 210. On most open LCC days there would be tens of people right in the slide path.</p> <p>The closing of the LCC for avalanche control work acts (and acted) as a canary in the coal mine-type circuit breaker. Because the canyon was closed only guests were able to ski. This situation is typically called a coveted "country club day".</p> <p>There can be no doubt that LCC commuters would love to participate in such a great skiing experience.</p> <p>The expressed purpose of the gondola is to bypass the LCC avalanche danger and deliver skiers directly to the mountain so they can ski on these very best powder days.</p> <p>Had there been a gondola successfully working during this explicitly planned scenario it would have deposited thousands of skiers near or directly on the slidepath.</p> <p>If one looks at the slide, at the map, and at the normal traffic for Snowbird there can only be one conclusion. The successful use of a gondola materially raises the risk of many people being killed.</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>One can debate how and when this would happen but these opinions are mere speculation.</p> <p>What is not speculation is the requirement to obtain insurance for both the gondola and for Snowbird.</p> <p>Ford Motor Company paid out a fortune because they cynically calculated how many would die from Pinto gas tank explosions and decided it was cheaper to fight the lawsuits than change the car. It is unlikely that SnowBird, Alta, and the gondola sponsors have such deep pockets.</p> <p>LCC has just given us all a nearly literal shot across the bow (or at least the road). Ignoring this risk is no longer possible without putting lives in unnecessary jeopardy.</p> <p>Even if you grant that all the pro-gondola arguments are true and the other anti-gondola arguments are false it does not matter.</p> <p>What makes the gondola into the gone-dola is that with such a known risk it is about as insurable as one of Vladimir Putin's oil tankers.</p>	
52673	Reilly, Kylynn	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40145	Renz, Ron	<p>I am absolutely against the gondola up the canyon plan. This is both an environmental and economically bad idea. The better plan is as follows.</p> <ol style="list-style-type: none"> 1) add snow sheds to the avalanche prone portions of the road 2) Increase Bus routes and run times, with dedicated bus only lanes 3) Charge a toll for ALL vehicles, and make it significant enough to discourage car usage, and encourage bus usage (say a \$50 toll at peak times, and a \$10 all other times) This would help pay for needed improvements BTW. 4) There is no need for adding lanes. Allow only up or down vehicle traffic at certain times. (i.e. up in the morning rush times, down in the afternoon rush times. This will further encourage bus use and discourage private vehicle use. 5) Charge a significant fee for all day parking. Say \$50 per day, \$100 per day on Weekends. This will further encourage bus use. 6) Strictly enforce parking along the road by almost instant towing and very high fines, say \$250 week days, \$500 weekends. This will almost instantly solve this problem. <p>If you think that the gondola would operate during peak avalanche times, dream on. An avalanche is capable of bringing down gondola towers.</p>	A32.29VV

39415	Reuling, Bart	<p>Would like to support the Gondola recommendation with the caveat that the 2 ski resorts should pick up 2/3 to all of the cost of that transportation system. Counties and state should provide mass transit approach to the mouth of the canyon(s) and parking in the valley.</p>	A32.29VV
40208	Reuling, Bart	<p>The assessment in regards to the roadless area seems very reasonable, especially with the minor amount of acreage that would be impacted. And with the longer term aspect of less car traffic</p> <p>(through a smart mass transit system) in the canyon especially in the winter months. The summer car traffic could be managed through some tolling provisions. I am also believing there could be additional management measures to maintain a balanced ecological environment. We absolutely want to maintain our watershed, and balance the recreation opportunities so everyone can have quick and reasonable access to and from the canyons, while maintaining the watershed and the pristine areas that we all have loved for years. With the recent heavy winter as an example, a gondola approach would have allowed the ski resorts more flexibility in staying open more and allowing guests more opportunity to come and go with out disruption. I am not in favor of Utah tax payors footing the bill for this transportation option. I do believe that the cities should all coordinate their efforts to bring the mass transit and parking facilities to reach the base of Mill Creek, Big & Little Cottonwood Canyons.</p>	A32.3A; A32.3F; A32.10G
39892	Reus, Sandra	<p>Asking for comments when UDOT has already made the decision to go with the Gondola option is laughable and pure hypocrisy. What a show!</p>	A32.29VV
47618	Reuter, Blake	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Blake Reuter</p>	A32.3A; A32.3F

41060	Reynolds, Dave	<p>I am adamantly opposed to the Little Cottonwood gondola. I use Little Cottonwood canyon year-round. I bike up this beautiful canyon 2-3 times a week. It makes me sick to think that this treasure will be permanently scarred with 20 unsightly towers and angle stations as high as 262 feet. And to be used only part of the year. And paid by salt lake tax payers.</p> <p>It appears to only strong advocate of this gondola is Snowbird Ski Area. And of course all they see is dollar signs with no regard into turning Little Cottonwood canyon into a Disney Land attraction. Contrarily this canyon will ruin the Little Cottonwood experience by putting even more people into the ski areas. Which Snowbird and Alta already cannot handle.</p> <p>And why is this Gondola exempt from the Roadless Rule? The foot print of the gondola is no different from a road.</p> <p>Lastly, this gondola will still have closures during avalanche mitigation. And many wind delays and closures.</p> <p>Please strongly consider alternates to the gondola and give Little Cottonwood canyon the respect it deserves.</p> <p>Dave Reynolds</p>	A32.3G
42270	Reynolds, Hayley	<p>Based on the supplemental report provided, it is clear that either of the enhanced bus service options are both cost effective and environmentally conscious with minimal footprint in all 3 IRAs. It is unethical to continue with the gondola and rail plans that will not speed traveler time or capacity and will damage the ecosystems on which they are built. This [REDACTED] resident and tax payer is not in support of any gondola or rail plans.</p>	A32.3A

39404	Rice, Bill	I am writing in regards to the Roadless Area Conservation Rule regarding the proposed gondola in Little Cottonwood Canyon. If the gondola is approved, from what I can see, there would be 8 gondola towers, snow sheds, 2 angle stations, and vegetation removal would take place within numerous Inventoried Roadless Areas that exist in Little Cottonwood Canyon. The Forest Plan prohibits, road projects and recreation projects, and as the EIS states these projects are for highway purposes. These areas need to be protected.	A32.29VV

39288	Richards, Holley	<p>I feel that all of the options to increase the number of people in the canyon especially in the winter will not solve the problem. Going forward the demand for canyon activities will only increase. The more capacity the more people. At some point in the future there must be limits on the number of people in the canyon. Environmental sustainability of LLC will come to an end. I question the rational of spending so much money for a fix that really doesn't solve the problem. Perhaps a reservation system and a fee would be a wise idea. Look at what has happened Arches National Park. A reservations system and a booth at the mouth could be staffed and maintained at a minimal cost compare to the current proposed alternatives. Thank you</p>	A32.29VV

		<p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Ruby Richards</p>	
55542	Richards, Sandra	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 40081	RICHARDS, TARYNN	<p>It makes a lot more sense to implement a frequent, efficient bus service before going to the expense and enduring the damage of building a gondola. This seems like a no brained to me. Our canyons are too precious to alter in such an intrusive way as a gondola. I don't know a single person in Utah who supports a gondola. Let's try the simple less invasive solution first!</p>	A32.29VV

41695	Richardson, Karen	I am retired and probably drive up canyon 200 days per year in all seasons to ski, hike, camp. I could not imagine having to take a gondola up each time and invest the time and money to do so. Considering these outlier winters we have, why can't we have more buses or an extra lane xs gondola. My vote is no for the gondola.	A32.29VV

39898	Richardson, Willis	<p>I feel busses are the only solution. Condemnation of a large parcel of land at the bottom of the canyon for a huge carpark is the solution without derogation of the canyon. If you build a ski lift how are you going to evacuate it if there is a storm? I feel buses only and no cars. The gondola approach is absurd and will never pay off.</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
40857	Richardson, Willis	I find the entire absurd. You need busses only, confiscate enough land at the bottle of Little Cottonwood Canyon. Have a parking lot for 10,000 cars and the problem is done. Quit trying to make a chicken program into reality.	A32.29VV

39596	Riedley, Susan	<p>As a resident living near Little Cottonwood Canyon, it is clear to me that the least environmental impact is to Enhanced Bus NO WIDENING. The loss of environmental boulders would be too significant to the landscape that makes Little Cottonwood unique. Gondolas or a Cog Rail would be destructive eye-sores. Please listen to those of us who live nearby. The resorts should be paying for the Enhanced Buses, not taxpayers.</p>	A32.29VV
40333	Riedley, William	<p>I don't necessarily support any of these proposals. If I had to pick, I'd go with the enhanced bus--same travel time to the resorts as a gondola, but without the construction and wilderness impact.</p>	A32.29VV

49912	Riffel, Riley	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Riley Riffel</p>	A32.3A; A32.3F
50034	Riffo-Jenson, Sophia	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>Why are you interested in destroying a great canyon? You would be heavily disturbing wildlife habitats of all kind and disrupting our watershed. This is not acceptable by any means and it is not fair that our taxes would be supporting your Destructive project. You need to choose a different solution that isn't going to be damaging our natural environments on such a large scale.</p> <p>I support solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, and enforcement of the traction law. Create more busing services and parking for the "park and ride option."</p>	A32.3A; A32.3F

41781	Rinkavage, Blase	<p>LCC is in a panic. Rushing for an expensive and expansive “solution” to roadway traffic, delays, and accidents. Air quality is also a concern that, while improved upon by the gondola when completed, has not had so much as an attempted solution to this point. A hurry to burn local taxpayers money is not the way to an answer. A toll should be placed on the canyon to incentivize riding an improved bus system, while rewarding carpoolers with less of a toll. The bus system can be expanded or shrunk depending on need, the gondola cannot. Let’s try a more malleable idea before committing to 9 figures worth of expenses paid by those who operate the mountain for tourists. LCC is just one of the problem canyons in the immediate area, yet there are no proposed solutions for anywhere else *cough, cough* BCC. The construction of the gondola will also bring noise, roadway closures and hazards as well as pollution to LCC for years, while the gondola will not even remain open year round. Not to mention that the gondola will result in increased traffic, congestion, and pollution in the neighborhoods just outside the canyon who are the ones paying for this atrocity of an idea. The infrastructure can not handle the 3,000 people who will ride the gondola back down to their cars, where they will be caught in a red snake out of the parking garage. Toll the road, limit the canyon to a certain number of cars, and then bus everyone else. Boom, multi-billion dollar problem solved. You’re welcome.</p>	A32.29VV

55291	Risheim, Simen	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Simen Risheim</p>	A32.3A; A32.3F
41038	Risley, Mike	I am firmly against the Gondola. It does nothing that more and better buses couldn't do, but at a much higher cost to the government. If we wish to reduce traffic and easier route would be a reservation system or something else. There are countless better options than this shameless money grab by the resorts.	A32.29VV

42228	Roa, Benjamin	<p>It's obvious that travel in the canyon during the winter is a huge issue for UDOT and the patrons of the ski resorts. However, it seems to me and the vast majority of the Salt Lake locals I've talked to that Gondola option B is not the correct solution, due to its permanent, brush, and unnecessary nature. Little Cottonwood Canyon is world renowned for its incredible access to not only skiing, but also hiking, climbing, mountain biking, and general outdoor access. A gondola is an irreversible and wildly expensive solution to the traffic problem, where it seems that other solutions exist.</p> <p>In your attached report, both bus options are described as 'scalable,' which I think is a key word in this conversation. Starting by enhancing the buses and making more stops all over the valley has some serious potential to make the bus option the path of least resistance to many ski resort patrons. If there was a continuous and regular bus line from the U of U campus to the ski resorts for example, that would likely eliminate hundreds of cars from the canyon every day.</p> <p>The landscape of this canyon means an immeasurable amount to thousands and thousands of people, both Utahns and otherwise. Companies as large as Patagonia and Black Diamond have taken up the cause against this project, which shows widespread investment in the resource that is Little Cottonwood. Personally I learned how to hike, mountain bike, and rock climb in this canyon. I have traveled the world in the pursuit of outdoor activities, and I can tell you that there are not many places next to a large city that have the access, diversity, and beauty of Little Cottonwood.</p> <p>I urge UDOT and those involved in the solution to heavily consider the scalable options before irreversibly marring this beautiful and unique canyon.</p>	A32.29VV

		<p>locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Ashley Roberts</p>	
39300	Roberts, Brian	<p>I am a resident of Salt Lake City, Utah. I have lived in Utah most of my life other than a few years I lived in New Zealand.</p> <p>I strongly oppose building a gondola in Little Cottonwood Canyon. It would make the canyon ugly and look like an amusement park. It would ruin the beauty of Utah that people come from all over the world to see.</p> <p>You should be ashamed for how you are conducting this process, not following the wishes of the majority of people who oppose the gondola. Twice UDOT asked for public comments. Thousands of comments were received, the majority against building it. Now you are asking for comments again. Why can't you read the previous comments? The majority of people don't want it!</p> <p>There are only about ten winter days per year the road has problems. Due to global warming, some scientists predict there won't be snow in North America by 2050. That is only 27 years from now. All across Europe ski resorts are experiencing little to no snow this winter. Ski races are being postponed or canceled due to lack of snow. Glaciers are melting fast, including in New Zealand in the Southern Hemisphere. The world is warming up fast. Snow is leaving. Skiing is a doomed industry.</p> <p>Therefore, an ugly gondola is not needed. It is a waste of taxpayer money.</p> <p>I went to a meeting about the gondola held in a high school. I sat next to David Fields, Snowbird's general manager. I had in my hands several printouts from UDOT estimating how many people each option could move per hour up and down the canyon. This included car, bus, gondola and train. Each option moved about the same number of people. I asked David Fields why not build a train like Europe does. He said it wouldn't carry enough people. But the Gondola, which he is for, carries about the same number of people as each option, including train, bus and car.</p> <p>Those few in favor of the gondola, including David Fields, are speaking out of both sides of their mouth. They say it is necessary because the road is icy and dangerous during the winter. If that was their main reason for a gondola, they would want to end road travel in the canyon. They don't want this. They want BOTH. Why? The ski resorts want as many customers per day as possible. Since the road can only move a given number of vehicles per day, they want it to continue (no matter how dangerous) and the gondola to run at the same time. You are being hoodwinked if you think the gondola is about improving safety!</p> <p>What the ski resorts want is more people to travel up the canyon at the same time. This will cause congestion at the ski resorts. When the ski resorts were built they knew it is a narrow canyon with one way in and the same way out. Now they want more.</p> <p>If the ugly gondola is built then the road should no longer be used for any private citizens going to the two ski resorts. Any private vehicles traveling to the two ski resorts should be ticketed. Emergency personnel, ski resort delivery trucks and maintenance vehicles would be allowed.</p> <p>Would the ski resorts want this? No! They want people to be able to travel by road and gondola at the same time. They want double the amount of people to be able to travel up and down the canyon, while falsely claiming the road is dangerous and this is about public safety.</p> <p>The gondola is also being promoted as being "clean." It will be powered by DIRTY COAL.</p> <p>I believe you are out of touch since you are even considering such a foolish thing!</p> <p>Just because something CAN be done does not mean it SHOULD be done. You are ignoring what matters most – keeping our Utah beautiful.</p> <p>Years ago I traveled by raft through the Grand Canyon. While in the Grand Canyon I saw old scars where the Federal Government drilled and tested different locations in the canyon to build a dam and fill the Grand Canyon with water. Luckily, people came to their senses and this didn't happen. I hope you come to your senses and don't build the gondola or widen the road. Don't do anything that will make the canyon ugly.</p> <p>What I also don't like about the gondola is it would NOT be safe. The ride will be 37 minutes long. Each car only has room for about 20 people to sit yet will be packed with up to 35 people. That means 15 people will be standing holding their skis. Ski resorts make a lot of money selling alcohol. Skiers will drink. Many will come back down the canyon drunk. Drinking and fighting go hand in hand. Fights inevitably will break out in the gondola cars. Many Utahns carry guns.</p> <p>The gondola will become a target for mass shootings. I highly doubt you plan to make every gondola passenger go through a metal detector and security prior to boarding the gondola. If you do that it will cost a lot of money for employees and equipment. It will slow down the boarding. If you don't do it, the gondola could be easily destroyed with only \$40 dollars (100 rounds of 9 mm x 40 cents per round equals \$40). If there is a mass shooting on the gondola, people will never want to ride it again. It will probably be taken down, just like some schools are torn down after mass shootings. The mass shooting at Trolley Square caused most people to stay away, most businesses to leave. It has never been the same.</p>	A32.29VV

		<p>If you ignore the majority of people who are oppose to the gondola and build it anyway, I expect many of them, including myself, will never visit the Little Cottonwood Canyon ski resorts ever again. I expect some of them will create websites and encourage out of state tourists to avoid skiing in this canyon. If this happens, it could put Snowbird and Alta out of business.</p> <p>Utah isn't unique in having transportation bottlenecks. One exists in New Zealand's Milford Fiord, a popular tourist attraction. It is many hours out of the way, one way in and one way out. There have been many proposals to solve it, including a new road, tunnel, monorail, and gondola. New Zealand's ecologically minded government has rejected every proposal.</p> <p>https://en.wikipedia.org/wiki/Transport_in_Milford_Sound</p> <p>I would much rather Utah spent the money saving the Great Salt Lake. It is what most Utah residents care about since it directly affects our health and our way of life. Due to the lake being the lowest level in recorded history, our summers are now unbearably hot and dry. The dust from the drying up Great Salt Lake contains mercury and arsenic. It is causing asthma and heart attacks. I've read it will shorten each of our lives by 2 years.</p> <p>What would help the ski industry in Utah more, build an unnecessary ugly gondola, which most people oppose, or help restore the Great Salt Lake, which most people are for and would provide more snow?</p> <p>The Catholic Church in Utah came out against building the gondola. It said the money could be much better spent, that it is enough money to pay for everyone in Utah to use mass transit for free.</p> <p>We are running out of water. Skiing in Utah is on borrowed time. It is a doomed industry.</p> <p>Come to your senses. Listen to the majority of the people and do what they want. Do NOT build the gondola that will make the canyon ugly!</p>

39293	Roberts, Keith	<p>It is ridiculous that the gondola plans are even being considered. They do not address equitable access in all seasons nearly as well as bus based alternatives. The overwhelming cost with a very low ROI should remove these options from consideration- but it is clear that the focus of the gondola options is to line the pockets of people associated with Snowbird / Alta / cottonwood Heights real estate at the expense of taxpayers. There is no rational justification for the additional cost of the gondola options beyond the brazen theft of public funds.</p>	A32.29VV

40511	Robinson, Hannah	<p>The gondola costs over 1 billion tax payer dollars and only benefits private ski resorts. It doesn't run in the off season and doesn't service back country stops. It doesn't run during any mitigation. You have to pay to use it. It doesn't decrease canyon traffic, it will increase it. It is being built on land that needs not be touched. It destroys bouldering routes. It hurts the water shed (we can't even Benny dogs up there, now you want to have all the pollution caused by construction?). It will cause traffic delays for years as it's being built. This makes the traffic problem WORSE. Nobody wants this. Please put the money toward increasing buses or anything that actually helps alleviate the issue</p>	A32.29VV

41250	Robinson, Kirk	<p>Hello,</p> <p>I am a long-time Utah resident who has hiked and camped in the Central Wasatch Mountains numerous times over the decades. I am also the founder and executive director of Western Wildlife Conservancy, a Salt Lake City-based non-profit organization with supporters throughout Utah as well as other states.</p> <p>I am writing to express my opposition to the proposed gondola that would be built in Little Cottonwood Canyon to service Alta ski resort and Snowbird ski resort. There are several reasons why I oppose this proposal and instead prefer an enhanced bus system. I list them below.</p> <p>1. The gondola would be an aesthetic impairment to the natural scenic beauty of the canyon. It is commonly said that "beauty is in the mind of the beholder," but while this is taken as a truism it is not entirely true. A pile of cow dung is not as beautiful as a waterfall. The sound of a chainsaw or ATV is not as beautiful as a Beethoven symphony. And 20 metal towers protruding 100 feet or more above the tree tops up 8 miles of LCC is not an enhancement of the natural tree canopy and creek cradled by the mountains. It would instead be a distraction and detractor from the natural beauty.</p>	A32.29VV

		<p>2. It would be unjust to require me and tens of thousands of other citizens to pay for something that will primarily benefit two for-profit businesses. We don't owe them anything and to go ahead with the gondola scheme would be tantamount to stealing from the public. Also, it is virtually certain that the final cost of the gondola would be far more than half a billion dollars, and may well exceed one billion dollars. This is too costly compared to other, less environmentally damaging alternatives. More people visit the canyon and its side canyons each year than all the people who ski at the resorts in a season. They deserve something that will serve their interests. Enhanced bus service could do that.</p> <p>3. Damage to watershed and to riparian wildlife habitat. There's no way the building of a gondola can fail to damage the watershed, resulting in increased soil erosion. This is a given and it is bad. Just as bad, if not worse, the riparian wildlife habitat will undoubtedly be seriously impaired. The riparian habitat is essential to dozens of species of native flora and fauna, including a multitude of vertebrates and invertebrates. The fact that most people, including evidently UDOT folks, may not knowledgeable about this or are not concerned about it, is beside the point. We have an ethical duty not to damage vital wildlife habitat just to get more skiers on the slopes and to make the owners of the ski resorts more wealthy and ought not to mindlessly disregard this duty.</p> <p>Conclusion: The proposed LLC gondola would be an abominations. Don't Do it!</p> <p>Sincerely,</p> <p>Kirk C Robinson, PhD, JD Executive Director Western Wildlife Conservancy Salt Lake City, Utah</p>	
53717	robinson, Marissa	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Marissa robinson</p>	A32.3A; A32.3F

42353	Rocket, Doug	<p>If you decide to make this horrible, disastrous, expensive, ill-advised, and corrupt mistake against the will of the people of Utah, please know that there will be physical disruption to the construction of the project. Don't forget who you work for. If you work against us, we will do the same.</p>	A32.29VV
41551	Rockets, Mace	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Mace Rockett</p>	A32.3A; A32.3F
50430	Rockets, Natalie	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 39846	Rodriguez, Fernando	<p>The gondola would directly violate the Roadless Rule and negatively impact wilderness areas. The Forest Service designated Roadless Areas where road construction and timber harvesting are prohibited to protect these areas from construction. In Little Cottonwood Canyon, White Pine and portions of Twin Peaks and Lone Peak are designated as Inventoried Roadless Areas (IRA). During the EIS process, UDOT failed to asses how constructing a gondola would violate the Roadless Rule.</p> <p>A gondola would require implementing towers, angle stations, snowsheds, and clearing vegetation in protected IRAs.</p> <p>UDOT claims building a gondola does not violate the Roadless Rule since it is not for motor vehicles, and any vegetation and timber removal would be incidental. A \$1 billion+ transportation project within IRAs, which will negatively impact wilderness areas, inhabiting wildlife, and the watershed, directly contrasts with the spirit of the Roadless Rule and the areas it protects.</p>	A32.3A; A32.3F; A32.3G

40159	Rogers, Kevin	I am an ex-Snowbird Employee, an Ex-Solitude Employee, and a 20 year veteran of the ski industry. I am a climber, and a hiker, and I have spent more than 30 years exploring the canyon. I am firmly opposed to the gondola. Not only will the gondola only serve an industry that for the last decade, has become financially unattainable for every-day Utahns, but those same Utahns are being asked to help pay for it. The canyon can only handle so many people at a time, and as long as resort Y.O.Y. growth continues to be the most important metric, I have to ask, where does this end? In another twenty years, the same talking heads will be out campaigning that the resorts cannot grow without a Hyperloop through the mountain to Park City. At some point, the canyon is destroyed in the name of expansion, of profit, of tourism, of tax revenue. At some point, we have to decide what it is that makes the canyon unique, what is it that is drawing people? I would hate to sacrifice the natural beauty of the canyon just to attract another thousand people a day to an over-priced man-made playground.	A32.29VV

45173	Rolek, Sarah	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Sarah Rolek</p>	A32.3A; A32.3F
41032	Rolen, Randall	<p>The entire project is a huge waste: unnecessary. This year's record snowfall will further obscure the reality- that we need to live with some inconvenience . Please don't spend all this money.</p>	A32.29VV
