40392	boyer, janae	<p>Little Cottonwood Canyon is a world class geologic wonder. Text books typically provide a shot of the canyon to describe a perfect U-shaped valley carved by a glacier. Installation of a gondola would ruin this famous geologic feature. In addition, a gondola serves limited public and is a waste of taxpayer funds.</p>	A32.29VV

40067	Bradshaw, Miranda	<p>Do not build a gondola. UDOT should research the feasibility of a permit program with some of these characteristics: No one is allowed to drive a private vehicle up the canyon unless they have a resident permit or a work permit. Residents could have guest permits. Everyone else can enter the canyon on free (electric) buses.</p> <p>With a permit system, no roads would need to be widened and everyone would have equitable access to the canyon and its amenities. Buses would no longer be stuck in traffic because fewer private vehicles would be allowed up the canyon.</p> <p>Originally I favored the gondola, but after reading about its impacts and the cost, I cannot help but believe that there are better, cheaper, more equitable, and eco-friendly solutions.</p>	A32.29VV
41791	Bradshaw, Redd	<p>Let me start with the fact that I OPPOSE THE GONDOLA IN ALL FORMATS. I think that widening the road and building avalanche sheds is the most sensible solution. It provides the access needed to the resorts and backcountry in the winter, and can be converted to a bike only lane outside of ski season. That said, I know you guys don't give a rats [REDACTED] what the public says and are trying to team through your gondola [REDACTED] through attrition with the incessant comment periods that you don't even listen to. I am extremely disappointed by how blatantly you are ignoring the public and clearly some people in power are in the pockets of the gondola industry. You disgust me.</p>	A32.29VV

41637	Brakke, David	<p>I've been following the plans for improving the traffic situation in little cottonwood canyon and did not have strong opinions either way until this summer. The fact that none of the options covers trailhead access is a huge oversight and only kicking the can down the road. Traffic to trailheads during the summer has gotten out of control and to not address that at this time is missing a huge pollution, traffic and public impact issue. It is almost impossible to get to the trail heads and find parking anymore during the summer. Traffic up the canyon is not only a winter issue anymore and solutions for the summer need to be addressed. Winter is easier as Alta and Snowbird are the major destinations and the low hanging fruit but during the summer months the public spreads out over the canyon but still generates a massive impact on the environment. If we are going to spend the money to try and improve the situation then we need to look at stops that cover some of the major summer trailheads as well. A small investment now is much cheaper than changing things in the future when it's a huge problem.</p>	A32.29VV

40045	Branch, Tanner	<p>Hello, my name is Tanner Branch and I have lived under little cottonwood for most of my life now. I am against the construction of the gondola because of the effect it will have on our watershed, the preservation of the beauty of our canyon and its features, the preservation of the irreplaceable boulders and history connected to them, and the nationally protected land which should not be constructed on. I believe the gondola only benefits the financially wealthy people who can afford to ski in the winter (including non local tourists) and does not benefit the local people of Utah. I also think before UDOT chooses to abuse our taxpayer money to pay for this gondola we need to explore cheaper options including tolling the canyon in the winter and parking reservation at the resorts.</p>	A32.3F
39303	Branch, Thomas	<p>Clearly, it is time to explore electric buses or natural gas buses. It would be a beautiful thing to be able to park outside of the canyon and take a non-polluting bus up the canyon to rock climb, ice climb, hike or backcountry ski without having to take an hour gondola ride followed by a backward bus.</p> <p>Remember that we are a few years away from having driverless electric buses that can serve the canyon. This is a short enough road to have GPS beacons guiding all buses up the road in all conditions. Electric buses are the only option that can serve all 11 recreational areas located along the State Road in a non-polluting fashion.</p>	A32.29VV

39745	Brandon, Robin	I have worked in the construction industry for more than 30 years and I have seen what happens when you start tearing up the Land, I don't know how you can say it may help to keep Avalanches from happening when you're opening up the Land and Creating more than Avalanches! Dirty water ?,mud slides, taking away from the poor little Animals that have come accustom to, you are messing with their Food and Water supply and in the End, After you have Torn up the Land, You Money Hungry People are ALL out to Make A Buck, But STOP and Look At ALL of The Damage You Are Doing IF You Go Through With Your Plans! 41571	Brannon, TheaandBob	<p>Re the Supplemental Information report on building gondola towers in the 3 impacted Inventoried Roadless Areas in LCC, we believe that this plan is in diametric opposition to the purposes for which this land use was reserved. That is, construction of roads to build and maintain the towers will reduce water quality for wildlife and humans, disturb the soil and drastically change the natural appearing landscape with high scenic quality. (Per FS 2001 Rule) To claim that the gigantic infrastructure of a gondola system should be allowed because it is not a road is ludicrous and seeks to subvert the public interest by focusing on semantics. There will be permanent roads to these things and they cannot be</p>	A32.3A; A32.3F

54713	Braudt, David	<p>To whom it may concern, I am an active member of the climbing and outdoor community that uses LCC every year to find solice, peace, and meaning. I'm unequivocally opposed the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion and is exorbitantly expensive! Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the law and shows a complete disrespect amd disregard for the efforts to preserve our wild places. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Lastly, after living on [REDACTED] and speaking with my neighbors about the gondola, i found NO ONE in support of it's construction. It's shocking that UDOT is ignoring the people that live in the area and the laws that govern the land the gondola would permanently damage! Regards, David Braudt</p>	A32.3A; A32.3F

39719	Braun, Michael	<p>I continue to oppose the Gondola alternative item. Reasons: 8 gondola towers, snow sheds, 2 angle stations, and vegetation removal would take place within Inventoried Roadless Areas that exist in Little Cottonwood Canyon. The Forest Plan prohibits road projects and recreation projects in these areas, and, as the EIS states, these projects are for highway purposes. The public comment period reads as though Wilderness Areas are expanding but, to the contrary, UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon. Roadless areas are protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a. it was not in these units and b. not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas. These places need to be protected! I would never ride it. I will ride the bus. The GFondola should not be provided by TAX PAYOR money. Snowbird and Alta are private entities making bank off of taxpayer money? All should go to a referendum vote on the November ballot. The citizens of Salt Lake County should decide. I continue to oppose the idea and plan for a Gondola in LCC.</p>	A32.3A; A32.3F

50712	Bray, Jaisee	<p>To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Jaisee Bray</p>	A32.3A; A32.3F

39913	Brehm, Michael	The IRA's evaluated in the Supplemental report are clear in their finding that these areas have important environmental value, and high scenic integrity. It is unfortunate and inappropriate that this document dodges the intent of the 2001 RACR by casually concluding a Gondola system does not meet the definition of a "motor vehicle travelway". In fact, Gondola cabins, powered by motors, and occupying more than a 50" wide travelway, and which move people, does meet this definition, even though no rubber tires are in contact with ground. When technology advances to the point where autonomous "people-moving cabins" are able to fly and hover all over the IRA, will we conclude that this is ok because it doesn't meet UDOT's skewed, pro-Gondola interpretation? This dangerously convenient posture violates both the spirit of RACR, and, with certain irreversibility, the high scenic integrity UDOT has so thoroughly assessed.	A32.29VV

		Taxpayers should not be held responsible to make the wealthy businesses even wealthier and create an everlasting impact in the canyon.	
40280	Bridgeman, Suzanne	A gondola in Little Cottonwood Canyon is a bad idea for Utah PERIOD. It will ruin the beauty of the canyon and all it stands for. It will be an eyesore causing frustration and sadness for Utah residents. Even more importantly it will disrupt the ecosystem of the canyon and in some cases cause permanent damage to flora and fauna. A gondola would be a tragic step because it is urbanization of what many believe is an untouched canyon and deserves to stay that way. Other forms of transportation as well as increased parking lots need to be explored before a gondola is even considered.	A32.29VV

		Regards, Ellen Brigance	
41634	Brigance, Jon	Build the gondola, we don not need more roads and busses, the gondola can safely move people up and down in more conditions than the busses, except maybe in high wind conditions which are rare. Europeans have phenomenal gondola and lift systems and this is the future. LCC is too narrow of a canyon as it is, NO MORE ASPHALT AND CARS AND BUSSES. Build the gondola and parking structures. Thanks. I live just [REDACTED]. Gondolas are the answer.	A32.29VV

40266	Brocius, Brocius	No gondola should be built anywhere NEAR a roadless area....and three federally protected Roadless Areas (Twin Peaks, Lone Peak, and White Pine roadless areas) no less. Road construction is typically prohibited in these areas to protect air, water, wildlife, and recreation opportunities. The gondola should not qualify as an exception.	A32.29VV

41684	Brockmeyer, Meghan	I am against the gondola proposal as this option does not take into consideration the construction of gondola cables and use of cars/vehicles as part of the impact on the Inventoried Roadless areas. This is a very narrow definition of a road. As the gondola site is very close to a watershed, the impact to surrounding wildlife as part of it intruding into a designated roadless and wildlife area could be severe.	A32.3H; 32.3G

39262	Brocoff, Brian	If this winter has proven anything it's that the current situation is unacceptable. They should start a pilot, utilizing our transit centers and priority to busses. Start with Saturdays from 7am -10 am. Canyon closed to all but busses. Charter busses to assess viability. This can be done tomorrow. Charge \$10/person. Resort employees get priority. Still think a train up BCC and tunneling over is a better solution.	A32.29VV

41033	Brooks, Matt	Hi - As a resident and multi-season user of Little Cottonwood Canyon, I'd like to submit that the single biggest challenge to my experience is the constant ramp up in resort visitation. There is a crowding out effect with resorts, where large increases in visitation pressure other user groups. To the extent UTA is a vassal of private ski resorts, the gondola is an expected move. In terms of most user groups accessing LCC, it's a nightmare. Please stop putting narrow business interests over those of the local environment and residents. It's frustrating watching Ski Utah's marketing machine drive the user experience into the ground.	A32.29VV

46951	Brothers, Rachel	<p>To whom it may concern, I oppose this gondola. I enjoy what the canyon has to offer. With building this gondola it would take away so much of what it has. Not only for those who visit near and far but the animals that are inhabited to the area. This gondola does not solve any problems but only creates a whole list of new ones - permanently destroy peaks, hiking areas, destroy our much needed watershed, and more. I urge you to listen to my voice. To the voice of all of the people. How is it that you can not see that a gondola would only be destroying land. Natural beautiful land we can not get back if it is destroyed by construction. We need to preserve and protect nature, so that we can enjoy it for future generations. So we can protect what is there long before us. Proposed at the end of this email are a list of low cost solutions that I and many others do support. I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 41579	Brown, Dell	<p>Thank you for seeking public input on the LCC project, focusing on minimizing environmental impact while improving access. I would like to propose the incorporation of covered roads, similar to those seen in Switzerland, as an innovative solution.</p> <p>Covered roads in avalanche-prone areas could enable lane expansion, reducing congestion at the canyon entrance. Additionally, these roads could connect directly to covered parking at key destinations, further minimizing environmental disruption. Importantly, this option would still be compatible with potential future rapid bus transit systems.</p> <p>Please consider this environmentally-conscious infrastructure solution for the LCC project.</p>	A32.29VV
49552	Brown, Devin	<p>To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. 39600	Brown, Ian	We do not need a gondola in little cottonwood canyon, a gondola should certainly be considered a roadway in the RACR, building the towers would be physically invasive to the land as well as the scenic integrity of little cottonwood canyon. I personally feel little cottonwood canyon is just fine the way it is and the winter traffic should just be something people need to deal with, but if something must be done id strongly recommend going with the enhanced bussing service. Thank you.	A32.3G; A32.3I

52229	Brown, Marlee	<p>To whom it may concern,</p> <p>I approve this email and strongly encourage those who read it to LISTEN to the citizens of this state.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Marlee Brown</p>	A32.3A; A32.3F
39323	Brown, Marshall	<p>The point is to protect and preserve the natural state of the canyon. So don't pour tons of concrete into the ground for a gondola. Don't string up cables and towers for the gondola. What in the world are you thinking? Come to your senses. No Gondola.</p>	A32.29VV
47410	Brown, Megan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 39396	Brown, Nate	<p>8 gondola towers, snow sheds, 2 angle stations, and vegetation removal would take place within Inventoried Roadless Areas that exist in Little Cottonwood Canyon. The Forest Plan prohibits, road projects and recreation projects, and as the EIS states these projects are for highway purposes.</p> <p>UDOT and the USFS are proposing to diminish the roadless characteristics of Little Cottonwood Canyon.</p> <p>Roadless areas are protected under the 2001 Roadless Rule. While the 2003 Revised Forest Plan allowed for some development to take place in certain roadless units: a) it was not in these units and b) not for the purposes of building a gondola, which detracts from, rather than enhances the roadless characteristics of these Inventoried Roadless Areas. These places need to be protected!</p>	A32.3A; A32.3F; A32.3I

39467	Brown, Stephen	<p>At each step of its advancement, the public discovers more significant problems with the gondola plans. First we discovered it is by far the most expensive plan. Second, we know it is by far the longest time frame, probably not in service for decades compared to a bus plan that could be implemented in years. Third, we understand the gondola is the most environmentally destructive. The latest news about not upholding Roadless Rule boundaries makes that clear once more. Why is UDOT pursuing gondola plans? Enhanced bus service is clearly a more cost-effective, timely, environmentally sensitive, and flexible alternative. Please do NOT go forward with gondola plans and instead FOCUS on the better alternatives.</p>	A32.3A

Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Daxton Browning</p>	A32.3A; A32.3F

55890	Bruett, Carter	<p>To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. These vital aspects of the canyon are critical to the natural wonder, charm, and longevity of Utah's outdoor scene. Destroying any of the natural ecosystem for this transportation project is ridiculous. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I do not believe enough research has been done into this issue and I would urge the UDOT to return to the planning process and consult actual experts. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Frankly, a complete ban on single occupancy vehicles would be welcome as well. As a doctor, scientist, avid skier, citizen steward of the outdoors, and with all the knowledge and experience that has afforded me, I see the gondola as a irredeemable and flawed proposal riddled with poor logic. Return to the experts- those who care the most about preservation and who care about the natural wonder of Utah, and come up with a new plan. Regards, Carter Bruett</p>	A32.3G; A32.3A; A32.3F

Regards, Jessie Brunelle	A32.3A; A32.3F
41458	Bruner Harris, Crystal	I care deeply about the environmental impact of this project. If UDOT can adjust its analysis to consider the possibility of using higher emissions fuels like diesel, why can't it also assess the impact of electric buses? UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy. This also goes far beyond air quality. I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.	A32.3A
48932	Bruner, Cambria	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 40063	Brunhart, Lise	I am pleased to hear of the potential for a bus shuttle system for Little Cottonwood Canyon...could this be entirely instead of the gondola?! There should NOT be a gondola in Little Cottonwood Canyon.....it will ruin the viewsheds of this amazing Canyon. I love and admire UDOT for its expert,safety- minded handling of the dangerous winter we have had in 2023.Could this same wisdom PLEASE be employed when considering mass transport if humans up Little Cottonwood Canyon! A year- round shuttle bus system would allow for stops at trailheads, and many more visitors could afford to ride ,if a bus shuttle were employed,rather than a gondola. The bus shuttles have served Zion National Park very well,and could do the same in LCC. NO Gondola, please!!	A32.29VV

Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Kelly Bryan</p>	A32.3A; A32.3F

39698	Buchholz, Bryce	<p>I live in Cottonwood Heights, Utah and am writing to let you know that I strongly oppose the proposed gondola in Little Cottonwood Canyon. In addition to not solving traffic congestion, threatening our critical watershed, and not serving all users of the canyons, the gondola would be built in three federally protected Roadless Areas where road and recreational construction is typically prohibited.</p> <p>The three protected areas (Twin Peaks, Lone Peak, and White Pine Roadless Areas) would have their beautiful natural qualities diminished by eight gondola towers, snow sheds, angle stations, and extensive vegetation removal. This is an unacceptable proposition, and lower impact alternatives must be considered.</p> <p>Rather than diminishing the roadless characteristics of Little Cottonwood Canyon with gondola construction, I urge you to consider lower-cost solutions that utilize existing infrastructure, like enhanced bus service, carpooling incentives, enforcement of the traction law, and required reservations to park at ski resorts.</p> <p>After all of the widespread opposition from local constituents, communities, and public officials, I'm disappointed that the gondola is still being considered. Please continue to advocate for common sense, environmentally friendly solutions that will benefit ALL canyon users year round.</p> <p>Thank you</p>	A32.3A; A32.3F; A32.3I

55171	Buckmaster, Laura	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Laura Buckmaster</p>	A32.3A; A32.3F

39747	Buel, Brock	The gondola brings a destruction of our home wildlife which we are already failing at preserving. It also brings a wave of tourism that we cannot control. Our roads are already bad enough and can you imagine trying to complete construction with traffic backed all the way up to 39th south. Sure you make a ton of money but you're on a one way train to making the people hate you	A32.29VV

40920	Buonocore, Janet	<p>Again, please listen to the people who live here, no gondola! Save our canyons beauty! Please don't put a financial burden on the people of Utah who would not use it. The ski resorts should pay for it anyway. Please listen to the people, not the ski resorts. I'm not against skiers, I skied for years and they bring money to the economy. However, the beauty of the canyon shouldn't be effected by people who come here for a few days during few months of the ski season. Please listen for a change!</p>	A32.29VV
40918	Buonocore, Janet	<p>I feel you asking for people's opinion is a joke. The people asking do what they want no matter what the majority wants. So sad.</p>	A32.29VV
55283	Burack, Montana	<p>To whom it may concern, As a junior in high school that loves to ski and snowboard, protecting the resorts and backcountry terrain I use frequently and love now and into my future is a top priority. For me, that means protecting the wildlife that lives there, protecting the watershed, and protecting access to trails that aren't at major resorts. I love visiting Snowbird and Alta. But this gondola wouldn't improve my access to them at all, and might make it. more difficult to access it. Spending over a billion dollars on a gondola that would harm the environment and do little to solve the problem at hand, traffic, is simply unacceptable. Please put the money elsewhere instead of supporting this harmful project. I urge you to stop this project. I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower-cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 42316	Burdett, Tom	<p>Little Cottonwood Canyon EIS 4/18/2023 The mission of the U.S. Forest Service is: "To sustain the health, diversity, and productivity of the Nation's forests and grasslands to meet the needs of present and future generations." And the Forest Service motto is: "Caring for the Land and Serving People," capturing the spirit of its mission is accomplished through five main activities: • Protection and management of natural resources on lands we manage. • Research on all aspects of forestry, rangeland management, and forest resource utilization. • Community assistance and cooperation with State and local governments, forest industries, and private landowners to help protect and manage non-Federal forest and associated range and watershed lands to improve conditions in rural areas. • Achievement and support of an effective workforce that reflects the diversity of the American people. • International assistance to formulate policy and coordinate U.S. support for the protection and sound management of the world's forest resources. Federal agencies prepare an Environmental Impact Statement (EIS) if a proposed major federal action is determined to significantly affect the quality of the human environment. This is the situation with the EIS for Little Cottonwood Canyon. The EIS should be recognized and implemented as a planning mechanism in conjunction with an environmental</p>	A32.3F; A32.3H

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>impact action statement. Several principal vision statements over time should guide the alternative actions with this EIS for transportation enhancements for Little Cottonwood Canyon. It is not to be observed as a set of hoops (and regulations) that a project must execute. This preferred alternative is not valid when all of a broad-range of alternatives, over differing time periods, have been addressed to satisfy the EPA and Forest Service goals & objectives. It is necessary to meet the hierarchy to avoid, minimize, remediate and offset environmental impacts and associated accumulative impacts over-time. This final EIS, recommending Gondola Alternative B, is flawed on several levels including:</p> <ul style="list-style-type: none"> • Protecting forests and grasslands • Assistance with protecting watersheds • Improving conditions in rural areas • Community assistance and cooperation with emergency services • Impacts to wildlife migration <p>1. Protecting forests and grasslands: The impact of high wire conveyance systems requires the forest to be cleared of tall trees below it. It also requires the removal of trees, habitat and maintain fire clearance for a certain radius around support structures and service roads. 2. Assistance with protecting watersheds: The removal of the trees, habitat and grass lands will promote erosion in the canyon, interrupt natural drainage and cause sediment to be deposited into the streams. 3. Improving conditions in rural areas: Only two American cities have gondola commuter systems — New York’s Roosevelt Island Tramway and the Portland Aerial Tram. None in smaller communities. All other gondola solutions in ski areas are privately owned and operated. Why would UDOT consider supporting such a private-sector oriented solution? The selected alternative should improve community structure by enhancing access for year-round residents of the canyon, not simply cater to destination skiing. In high wind conditions, an aerial gondola is shut down and useless. And, that maybe the time in an emergency situation when enhanced transportation is needed most. 4. Community assistance and cooperation with emergency services: One of the reasons that the 2002 Olympics could not hold events in Little Cottonwood Canyon is because it lacks two routes of travel for evacuation. Emergency services should be weighted higher with the selection of alternatives. It is particularly egregious for this EIS to gloss-over and lacking inclusion of a second access point to the Town of Alta and the Snowbird resort. Doing so, reflects the prejudiced favor for a long cul-de-sac with snow sheds. It is lacking a broad range of alternatives from the outset. In 10-20 years, additional improvements will be necessary, contributing to accumulative environmental impacts. Snow sheds are an accessory improvement to the transportation solution, not the solution. The scoped-size of snow sheds can only be fixed when a long-range transportation solution, which is lacking in this study, is determined. Transit is best implemented with a straight line between multiple points. There is such a linear alignment for Alta, Brighton and Dear Valley. This alignment needs to be studied further with its associated tunneling. 5. Impacts to wildlife migration: Visual impact of a gondola in motion within a narrow V-shaped canyon will impact wildlife habitat and migration of birds (owls, hawks, etc.) and possibly terrestrial mammals in Little Cottonwood. The planning effort for Little Cottonwood Canyon is one that requires meeting a greater set of objectives as identified by community planning and Forest Service statements. UDOT is very good at building modern highways and expressways to move vehicles. That is the mission of UDOT and its culture. It does it well and is creative within its mission. UDOT is not experienced with moving people using different modes of travel. With this EIS, alternatives were not proposed or were eliminated that could better meet the community, environmental (EPA), US Forest Service missions and avoid cumulative impacts. An EIS should be used to enhance the environment and community objectives, not just a series of boxes to check-off. A comprehensive analysis of alternatives in sensitive environments necessitates a broader approach. There are many examples of EISs that meet and enhance local objectives. Please consider and review other efforts like these. Little Cottonwood requires one of those analyses. It should be started over with a new set of scoped alternatives. Future administration of an EIS should be directed to the US Forest Service, Salt Lake County, UTA or joint management of some combination thereof. Tom Burdett, South Jordan</p>	
42919	burdge, mason	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as “Roadless,” let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, mason burdge</p>	A32.3A; A32.3F

44397	Burick, Tess	<p>To whom it may concern,</p> <p>I was born and raised in Salt Lake City and am a current Utah resident living in Sugarhouse. I am a season pass holder at Alta and Snowbird and thus my winter weekends are spent cherishing Little Cottonwood Canyon. I grew up skiing these resorts, and feel an immense sense of pride in the historic magic that Little Cottonwood Canyon managed to hold onto.</p> <p>As an Alta-Bird season pass holder, I am intimately aware of the traffic challenges and congestion that the canyon faces. I have sat in the red snake for 5+ hours, waiting patiently for UDOT to give the green light for safe passage up the canyon (I am beyond grateful for the incredible work they've done to keep us safe during this historic season). We need solutions to address the growing number of recreational users in the canyon, but these solutions that are funded by Utah tax payers need to serve all recreational users including backcountry skiers, ice climbers, and climbers who recreate in all parts of these canyons beyond the bounds of the resorts. I firmly believe that we as a community also need to evaluate what visitor capacity the resorts can responsibly, and safely bear, and consider the honorable decision to preserve place over profit.</p> <p>I am inspired to see Patagonia speaking in favor of saving Little Cottonwood Canyon and am in full agreement with the arguments they have crafted below. I oppose the Gondola project and urge you to consider alternative solutions that preserve the natural beauty and integrity of our canyon.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. Finally, and most importantly the gondola will only benefit a small portion of the greater salt lake area. Using such a large amount of tax payer money for a vanity project is preposterous. There are Enviornmental issues that this money could help benefit. By creating something that will be used by the snowbird elites and and the wealthiest individuals is not a solution I want to support. Little cottonwood canyon is one of the most unique bioms in the United States. Do you really want to ruin its beauty? Please reconsider the gondola, for the sake of future visitors of LCC. Regards, Conor Burns</p>	A32.3A; A32.3F

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that	A32.3A; A32.3F

39422	BURT, MELODY	<p>The gondola's impacts on non-resort visitors to the canyon will be staggering. These include potentially irreparable harm to the watershed according to those responsible for our water supplies; visual blight from the massive 200+foot towers, cable cars, and nighttime lighting; and increased traffic density in canyon-mouth communities already overwhelmed with vehicular congestion. The character of Little Cottonwood Canyon would forever be compromised, while unacceptable road conditions continue.</p>	A32.29VV

42325	Burton, Kayla	<p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt outdoor recreation in the area. Moreover, the gondola would only serve two private businesses, rather than cater to the much larger variety of canyon users. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. Naturally, there will have to be construction in and around planned towers, the disturbance of which could have drastic- and irreversible- effects. The analysis of these effects in the current documents is inadequate. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p>	A32.3A; A32.3F

41667	Bussell, Katie	<p>Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do. I also do not support this solely being funded by the taxpayer when this will primarily serve private ski resorts. Public dollars should not be used to help provide better access to multi billion dollar resorts on public land. A better solution must be found, and the resorts can provide some funds to find it.</p>	A32.3A; A32.3F

39828	c hochberg, bruce	No Gondola/Tram! It's a waste of money. Like every other construction project it will end up way over budget. Build 2 lanes up and 2 lanes down with snow sheds over the avalanche prone areas. Nature will recover from the construction phase. Use the 4 lanes for 3 up canyon in the morning and 3 down canyon in the afternoon. Stop Snowbird from roadside parking. It's dangerous.	A32.29VV

45209	C, Katie	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Katie C</p>	A32.3A; A32.3F

39835	C, Miles	<p>A bus system with avalanche sheds is a far more cost effective and less intrusive wilderness option than an absurdly expensive gondola. With the current parking reservation systems at Alta and Snowbird, traffic is far less of a problem than in Big Cottonwood. There are thousands of other public projects in Utah you could better allocate these funds to help resolve instead of a gondola. I have zero friends who are climbers, skiers and bikers who support this project.</p>	A32.29VV

42206	Cahill, James	<p>I am wholly against the construction of a gondola. The plans of constructing a gondola through IRA areas should be enough to realize that it is the wrong solution. White Pine, Twin Peaks and Lone Pine are all pristine recreation areas that would be destroyed just to place a tower. They say that that construction of the towers won't impact these areas, how will the foundations be dug and poured? How will the be maintained? Placing gondola towers is only the beginning of the removal of all protected areas of the Wasatch. Alternative solutions with lower impact should be considered first, toll everyone \$50 to go up the canyon and your congestion would decrease significantly. LCC is already over developed, why destroy it any further? If a gondola is going to be built you might as well just add a chairlift to the top of MT Olympus so that the congestion on that trail can be eased as well.</p>	A32.3F; A32.3H

40942	Calhoun, Kitty	<p>I do not want gondola towers in protected roadless areas. Gondolas would interfere with clean water, diverse wildlife, the view shed, and recreational opportunities - all not worth the proposed benefit to skiers visiting Snowbird ski area. To service the gondola, UDOT would need to allow more roads into LCC to service the gondola and for potential evacuations - which is against the intent of the Roadless Act. As a person living in Utah, I can't support a proposal that would reduce acres classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas.</p>	A32.3A; A32.3H

53245	Callor, Marissa	<p>To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Marissa Callor</p>	A32.3A; A32.3F

56190	Camperchioli, Dominic	<p>To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. Importantly, I find it terrifying that this is truly considered an appropriate use of an exorbitant amount of taxpayer (my) money when it would only benefit so few. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Personally, on days when I am headed up to ski at the resorts, I do utilize the busses with ease. They work as is and have tons of room for easy adjustments, in particular increasing their frequency. This could alleviate the congestion on the highway much more immediately and in a much more cost effective manor than a gondola. Regards, Dominic Camperchioli</p>	A32.3A; A32.3F

40132	Canakes, Joe	<p>The proposed gondola would require construction on 3 different designated roadless areas. Even if the gondola system is not defined as a road, it would be built for highway purposes and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan</p> <p>It would be a terrible misinterpretation of the Roadless Rule to suggest that an 8 mile gondola system is exempt from that designation's protections simply due to the amount of environmental impact from its 10 year construction (watershed views, dispersed recreation, timber, vegetation, habitat)</p> <p>We are grateful that UDOT recognized this initial oversight and put in the time to consider the implications of building a system like the gondola on protected land like this, and hope that the learnings will lead them to less destructive solutions like enhancing/expanding an electric bus system on the road systems we already have in both Big and Little Cottonwood Canyon.</p> <p>I will also say, this whole project and the fact that 80% of locals do not want this, nor want to pay for it, and that it is still getting pushed through, stinks of corruption. It is terribly sad that these canyons will be permanently altered in order to pad the pocket books of politicians and a few private businesses. Just an absolute joke and broad sweeping failure of our political system, and the individuals that are a part of it. The building of the gondola will be the end of Utah receiving my tax dollars.</p>	A32.29VV

Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Miles Cannon	A32.3A; A32.3F
40700	Cannon, Norah	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Tara Cannon	A32.3A; A32.3F
40435	Cantelmo, Cameron	I believe it would be necessary to add an additional stop at a backcountry trailhead, run summer services, as well as ensure low-cost (less than \$50 even on peak days) fares. Additionally should be done in conjunction with strict caps on the number of private cars entering the canyon, to reduce total congestion. Should also install renewable energy sources dedicated to operating the gondola, to make the project carbon-neutral in the long term (or carbon negative if you consider the removal of car traffic).	A32.29VV
53404	Cantera, Caroline	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. 		Regards, Caroline Cantera	
42169	Canterbury, Sean	The people have spoken! We DO NOT want a Gondola going up Little Cottonwood Canyon impacting our public lands. We DO NOT want our taxes subsidizing a project that solely benefits two private businesses. We DO NOT want the eye sore that will be the pylons and cable running up the canyon. We DO NOT want hazardous run off from construction getting into our water supply. We DO NOT want new roads cut for transportation of materials for construction. We DO NOT want to forever alter the landscape of the canyon. We DO NOT want to line the pockets of the developers and stakeholders who are foaming at the mouth to move this project through. WE DO NOT WANT A GONDOLA IN LCC!	A32.29VV
52396	Cantin, Jacob	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 54336	carlson, Meghan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Meghan carlson</p>	A32.3A; A32.3F

40348	Carney, Benjamin	<p>The gondola is a horrific tax handout to a massive corporation and will not solve this issue. Increased bus services is the only smart solution. A gondola is only a solution for a few days out of the year at the expense of a massive eyesore, noise pollution, destruction of climbing areas, and most importantly, one of the biggest corporate handouts in SLCo history. I go up LCC all the time and I almost never go to the resorts, so this won't change anything for me. I'm a single-issue voter with this. Do the right thing.</p>	A32.29VV

The steep forested granite and shist formation walls of Little Cottonwood Canyon are a natural wonder of Beauty and recreation space located abutting a major metropolitan area. THE SIGHTLINES and Natural Beauty of this unique canyon must be preserved. Over 80% of Utah Residents are opposed to the Unsightly - Tram Towers that would permanently Degrade and Mar the natural and functional beauty of Little Cottonwood Canyon. As a State agency - your decision making processes should absolutely take into account the Sentiment and will of the MAJORITY of Utahs and Salt Lake Valley residents. I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Camron Carpenter</p>	A32.3A; A32.3F

40346	Carpenter, Lori	<p>I am against the Gonodla. It will ruin the natural beauty of the canyon. It is too expensive to build and the fact that the costs would be paid by the taxpayers instead of the ski resorts who are the ONLY ones benefitting, is a criminal sham! The ski resorts are just being greedy. They need to limit the ski passes sold, not only to preserve the experience (less crowded), but to preserve the canyons use. Limited tickets would need to be sold online only, and that is your "ticket" up the canyon as well. To sum up, this is unacceptable that this could possibly pass with so many Utahan's against it. It is pure greed on the developers and ski resorts part. I say, limit the ski passes, win win: less traffic, better ski day experience. NO GONDOLA!</p>	A32.29VV

39453	Carroll, Brett	I believe that several of the values in the Assessment of Roadless Conservation Rule report have been severely miscalculated, specifically in regards to alternatives that include a gondola. I agree with the assessment that changes to infrastructure like building snowsheds and improving trailheads have minimal impact, as they are relatively small changes being made to an already existing highway (though I do oppose adding an extra lane). I believe that the impacts that a gondola would have on several roadless qualities are underrepresented in this report. In assessing the gondola's impact on plant and animal communities, the report only took into account the small amount of land area that the gondola towers would occupy. The report failed to account for the impact that gondola cars moving through the air would have on birds that nest in the canyon, and the stress that the gondola cars and associated noise would have on animals moving through the canyon. The highway already stresses the wildlife in the canyon, and the gondola would add a second, separate stressor. The report says that "no long term impacts" would occur to peregrine falcon nesting sites. This seems clearly wrong, as these birds will likely not choose to nest near the obstruction of the gondola even once constructed. Similarly, the report only accounted for the relatively small number of acres that the gondola would physically occupy in assessing its impact on Landscape Character and Integrity. In reality the gondola would negatively impact thousands of acres of "naturally appearing" area, scarring the beauty of Little Cottonwood Canyon permanently.	A32.29VV
42248	Carroll, David	<p>I'm submitting the following comments in response to the Supplemental Information Reports comments request. The proposed gondola in Little Cottonwood Canyon will have significant impacts on roadless areas within the canyon. The intent of the 2001 Roadless Area Conservation Rule (RACR) is to prohibit intrusions, like road construction and timber harvesting, in Inventoried Roadless Areas (IRAs) unless certain exceptions or circumstances exist. A gondola is not a road, but the scale of impact is certainly at least equal to, if not greater than a road. The gondola plan, if not in literal violation of the RACR, certainly violates its spirit. I also believe it unlikely a gondola can be built without creating new roads to address maintenance needs that would by necessity be within one or more of the IRAs.</p> <p>The Little Cottonwood Canyon IRAs: White Pine, Twin Peaks and Lone Peak buffer the adjacent wilderness areas. As such they are vital to preserving the natural integrity of the canyon and must be protected from the potential destructiveness of gondola construction and its subsequent operation and maintenance. I believe it is laughable to suggest that the gondola could either be built or subsequently maintained without extensive vehicle use and inevitably roads. Looking comparatively at the construction and maintenance of electrical transmission line towers or resort ski lift towers anywhere makes this fact patently obvious.</p> <p>The portions of the IRAs adjacent to or within the proposed gondola alignment are all on the downstream side of hydrological basins that contribute significantly to the Little Cottonwood drainage. The proposed gondola poses a risk, unacceptably high in my opinion, to the integrity of a watershed that is important to tens of thousands of residents in the valley below. The types of disturbances to IRAs that the RACR was intended to forestall are primarily environmental, but in this instance environmental will also have a significant and direct impact on the water relied on by Utah's largest urban areas.</p> <p>The Federal Highway Administration (FHA) requested two additional analyses for emissions from buses. An underlying assumption baked into the Utah Department of Transportation (UDOT) Environmental Impact Study (EIS) was that diesel buses were the only buses that could be analyzed as part of bus-based alternatives. This did fit neatly with UDOT's desire to make the gondola more attractive in comparatively addressing potential air quality impacts from buses. Though frequently suggested in the past, all electric buses were routinely dismissed by UDOT and the Utah Transit Authority (UTA) as impractical for ascending highway 210.</p> <p>A year ago, in March a ProTerra electrical bus made the trip from the State Capitol up highway 210 fully loaded with passengers to Alta proving decisively that an all electric bus was in fact practical. Disregarding what was proven and acknowledged UDOT did not include an analysis of the pollution, or the absence thereof, if electric buses were used. The entirely relevant comparison of electrical buses to buses fueled by hydrocarbon should have been included as part of an honest response to the FHA. A finding that the FHA requested analysis would not appreciably change the conclusions in the EIS was predictable. UDOT has again selectively used "facts" and represented itself as an impartial arbiter to sell a patently partisan idea.</p> <p>Throughout the EIS process I have increasingly developed a perception that UDOT is determined to sell us the gondola idea regardless. It should be cautionary that public trust in UDOT is at stake. So far UDOT has consistently declined to answer opposition to the gondola on either its technical and conceptual merits, or the concerns of taxpayers about a project whose advertised benefits are grossly disproportionate to its probable cost. Since backroom deals and good old boy politics still seem to trump common sense in Utah perhaps potentially violating federal law will take it out of the morally bankrupt purview of UDOT. We can only hope since UDOT and its cadre of supporters seem hell bent to give use the gondola regardless of public concerns.</p>	A32.3A; A32.3H; A32.10G
51023	Carroll, Emalee	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. LIKE BUSES! The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. As a resident of SLC I cannot support the destruction of our beautiful canyons and suck reckless spending of our taxpayer money. This is clearly not equitable. Regards, Emalee Carroll	A32.3A; A32.3F

42377	Cartwright, VicandLynne	<p>Air Quality Rocky Mountain Power claims to be transitioning away from coal burning to other form of generating electricity. Two issues with this: 1. The gondola will pull a huge amount of power and so a lot more coal will be burned until the transition is completed. Between skiers and cyclists, the gondola likely will run almost year round. 2. Both solar and wind power require the right kind of weather conditions. On overcast, still days the plants may struggle to provide enough power. It means using coal as a backup. The construction will raise a huge amount of dust during construction and also while vehicles run along the tower access roads for maintenance. Maintaining the roads will also raise additional dust. All this maintenance will be pretty on-going, based on the estimate of \$550 M for maintenance costs. Construction for parking lots and other staging areas will also put a lot of dust in the air. The traffic at the mouth of the canyon will be a mess and create poorer air quality. Once done, many wanting to use the gondola will wait in their cars, idling the engine to stay warm, until they can move to the gondola entrance. As we all know, idling creates a lot of pollution but people don't want to freeze during the winter or bake during the summer. During high winds, the gondolas won't be safe to use, so we're back to running busses up and down the canyon to transport everyone back to the valley. What kind of back-up of busses does UDOT have to do that? People are really going to be mad having to wait hours at the ski resorts. Environmental impact Building the towers on those steep hillsides will create havoc with the environment. Roads will need to be slashed through forested area with a lot of shoring up from the downside to keep them stable. As mentioned in the air quality section, this will be an on-going effort because the moisture in the canyons really tears away at any cuts to the forest floor. Little Cottonwood Canyon is such a beautiful canyon and seeing the hillside marred by ugly large gondola towers will degrade the look immeasurably. One of the best things about it right now is how pristine it looks, even with the road. Once construction begins, it will forever scar the mountainside. Is this the legacy we want to leave?</p>	A32.3H; A32.10G
49695	Caruso, Garrett	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Garrett Caruso</p>	A32.3A; A32.3F

42197	Case, Julia	I am firmly opposed to the gondola B solution, in particular with how it impacts the three inventoried roadless areas. I don't believe enough consideration has been given to how the construction of the gondola will require additional infrastructure. It is impossible to build the gondola without also building more roadways for excavation and maintenance work. As such, the gondola - in its construction, its cables, and its cars - will inevitably have a large impact on the inventoried roadless areas. These designated wilderness areas need to be protected, and statutes are in place for this exact purpose. Including a gondola in the EIS, even in a phased approach, is antithetical to our values and our economics as it threatens vital wilderness areas. This construction adjacent to inventoried roadless areas also threatens our watershed, which - in a state plagued by drought - is foolish, unnecessary, and downright dangerous.	A32.3H; A32.3A

40908	Casper, Brady	<p>I would first like to thank you for your work on this important issue. I will keep this comment brief as I'm sure there will be many to review. After reviewing the EIS I am concerned about the following with the proposed gondola B option:</p> <ul style="list-style-type: none"> - Climbing area impac - visual impact (loss of visual wilderness feel) - cost of Implementation to only address the issue in one canyon. -lack of trailhead access from gondola for hikers, climbers, and backcountry skiers. -traffic build up at the base of the canyon and extending further into the into the valley. <p>The gondola is a creative solution to a poorly defined problem. As someone who grew up recreating in the Wasatch I hope the project scope is reconsidered and more value is placed on preserving the canyons natural beauty for future generations.</p> <p>Thank you again for your time and effort.</p>	A32.29VV

55556	Casper, Phil	<p>How is individual vehicle tolling not one of the alternatives? \$40 for 1 occupant \$20 for 2 occupants \$9 for 3 occupants Free for 4 or more occupants. Problem fixed immediately. This is low hanging fruit. No huge investment. Easy. Come on guys! Phil On Mon, Apr 17, 2023, 8:04 AM Little Cottonwood EIS Project Team <littlecottonwoodeis@utah.gov> wrote:</p> <p>Can't read or see images? View this email in a browser</p> <p>Public Comment Period For Supplemental Information Reports</p> <p>Closes April 18 at 11:59pm MST Comments on the reports will be published and addressed in the Record of Decision Thank you for your continued interest in the Little Cottonwood Canyon Environmental Impact Statement (EIS).</p> <p>As many of you are aware, the Utah Department of Transportation (UDOT) released the Final Environmental Impact Statement (EIS) for Little Cottonwood Canyon in August of 2022 and held a public comment period, with the project team receiving over 13,000 comments.</p> <p>As a result of the comments received, the project team determined additional analysis was warranted regarding the impacts of the Final EIS alternatives to Inventoried Roadless Areas under the 2001 Roadless Area Conservation Rule (RACR) and the Forest Plan. The RACR required the USDA Forest Service to conduct an inventory of roadless areas for their potential to be designated as wilderness based on size (at least 5,000 acres) or location (contiguous to an existing Wilderness Area). If an area meets these criteria, it becomes an "Inventoried Roadless Area" (IRA) and, in general, the RACR prohibits road construction, road reconstruction, and timber harvesting (cutting, sale, or removal) in IRAs unless certain exceptions or circumstances exist. Little Cottonwood Canyon contains the White Pine IRA and portions of the Twin Peaks and Lone Peak IRAs.</p> <p>Also following publication of the Final EIS, the Federal Highway Administration (FHWA) requested that UDOT complete additional air quality analysis. In particular, FHWA requested evaluation of a scenario under the existing modeling where all ski buses would be powered by diesel fuel rather than the model default which consisted of diesel, compressed natural gas, and gasoline powered buses; and that all transit buses be evaluated at the maximum expected service life of 14 years rather than a variable age bus fleet.</p> <p>As a result of public and agency input, UDOT has issued two supplemental information reports to evaluate applicability of the RACR and the potential impacts to IRAs and for additional air quality analysis.</p> <p>The public review and comment period for the supplemental information reports is open until April 18, 2023 at 11:59pm MST and the project team is accepting comments on the analysis contained in these reports. Formal comments can be mailed or submitted through the project website, email, voicemail, and text messages. This information is listed on the Contact section of the website.</p> <p>Please note that as the public had the opportunity to comment on the entire Final EIS, comments received in this comment period that are unrelated to the supplemental information reports will not be addressed in the Record of Decision (ROD). View Reports</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>Submit Comment</p> <p>Agency Coordination Some of the elements in the alternatives evaluated in the Final EIS are located on National Forest System lands managed by the Uinta-Wasatch-Cache National Forest under the 2003 Revised Wasatch-Cache Forest Plan. A Forest Service decision may be required pending the FHWA's determination of what, if any, National Forest System lands needed for the selected alternative may be appropriated under their authorities (23 USC 317). Appropriation of National Forest System lands by the FHWA would be a non-exclusive easement for highway use, with the Forest Service retaining jurisdiction over all other uses.</p> <p>The Forest Service decision would be to authorize UDOT's use of National Forest System lands for the selected alternative, as analyzed in the Final EIS, and may also include a Forest Plan amendment if the proposed use is inconsistent with the Forest Plan. A Forest Service ROD, if necessary, would be based on the Final EIS and supplemental information reports, and would be issued after UDOT's ROD is published. The Forest Service ROD would be subject to the Forest Service project-level objection process (36 CFR 218).</p> <p>Final EIS Information Due to the amount of public interest in the Little Cottonwood EIS, many sources are sharing project information and data with varying degrees of accuracy. Please see the tables below for the most current and accurate information directly summarized from the Final EIS regarding the alternatives being considered. View All Final EIS Materials</p> <p>EIS Process & Schedule It's important to note that the National Environmental Policy Act (NEPA) process UDOT follows doesn't tally comments as a "yes" or "no" vote like a referendum. The NEPA public comment process is not a vote, but rather an opportunity for UDOT to field concerns, suggestions or criticism for a project's purpose and need, alternatives, and to evaluate whether additional engineering or environmental analysis is needed, as well as the mitigation measures proposed to minimize environmental impacts.</p> <p>The public comment periods and input received throughout the EIS process provide opportunities for UDOT to improve the study documentation and make sure it's thorough, accurate, and complete. UDOT's final decision will consider how the alternative best meets the project purpose as well as an alternative's environmental impacts. View Final EIS Comments</p> <p>Informational Videos Watch Part 1 of the Final EIS overview provided by UDOT Project Manager Josh Van Jura to learn more about the preferred alternative and proposed phased implementation.</p> <p>Watch Part 2 of the Final EIS overview provided by UDOT Project Manager Josh Van Jura to learn more about the preferred sub-alternatives.</p> <p>View the video below for more information on the environmental study process the Little Cottonwood Canyon EIS is following.</p> <p>Connect with us.</p> <p>Website Email Facebook Twitter Instagram The environmental review, consultation, and other actions required by</p>

39632	Casper, Phil	Those of us who use the canyon do not want the gondola. It is only still on the table due to the significant money involved. Just implement a fee structure. \$40 to drive up the canyon alone, \$20 to drive up with one person. \$9 with 3 people, and Free with 4 or more people. Problem solved over night! Prove me wrong.	A32.29VV
43326	Casselman, Brittany	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Brittany Casselman</p>	A32.3A; A32.3F

48165	Castano, Ayla	<p>To whom it may concern,</p> <p>As an employee at Snowbird resort for the better half of a decade –7 years– I understand the call to improve transportation solutions for SR210. However, the proposed gondola would provide limited relief for both those trying to enjoy & staff our resorts.</p> <p>It is crucial that further research is done to examine the maximum capacity at which the resorts and mountain can operate safely. Overloading the resort's hotels, restaurants & bars, along with the physical mountain with patrons without proper analyzation of what our resort can handle is reckless and</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>unreasonable. Furthermore, the gondolas inability to operate during avalanche mitigation is a huge downfall. As anyone that has commuted up the canyon for years will tell you– avalanche mitigation and road closures go hand in hand – these are the moments when traveling up SR210 becomes particularly challenging and hazardous. These are also the moments that create massive congestion at the mouth of our canyon and beyond to the neighborhoods of Sandy. This year in particular has been unprecedented in terms of closures.</p> <p>Even if the Gondola is able to operate before a road would open for instance, prioritization of employees transporting up canyon before guests should be routine, however there are no protocols in place for this and it could potentially create conflict with the general public commuting - resulting in waiting in more long lines to hop on the gondola... another issue here is payment – if this gondola is paid for by tax payer money, yet there are intentions to have a sliding scale payment of \$20-200 to ride, serious ethical considerations surrounding access are prevalent. You cannot tout that this proposition improves transportation for all while offering unreasonable prices intended for profit primarily from tourism.</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at both resorts.</p> <p>Regards, Ayla Castano</p>

41229	Castle, Brooks	I am against the gondola.	A32.29VV
41154	Castle, Leslie	<p>I'm against the gondola. First, I don't trust the folks behind it to protect anyone's interests except their own. This plan was hatched to protect the interests of the resorts, not the interests of the eco system or of the general public.</p> <p>It is also a permanent intervention. It can't be reversed! It's like doing plastic surgery on someone's nose and then trying to change your mind if you don't like it. Think, "Michael Jackson."</p> <p>It's reckless, especially considering my third reason to object; not much else has been tried in an affront to address the traffic problem. (In fact, I feel the efforts to try other things have been stonewalled, thwarted and undermined by the wealthy influencers behind the gondola.) There are many policy changes (tolls, busses, better parking at the base of the canyon, carpool incentives, even limiting access at the base of the canyon like is done with national parks) that could be implemented and can be altered if they aren't effective. Much smaller impact on the environment!!!!!!</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		Please, please don't let this happen. Don't let wealthy special interests be more powerful than environmental impacts and the greater good for the community.	
50122	Castrellon, Chelsea	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 39815	Cavalieri, Christopher	<p>If a gondola were added to the canyons I would no longer travel here to ski on vacation. Please find a better solution. No Gondola.</p>	A32.29VV
39277	Cavalieri, Courtney	<p>Plenty of other ski resorts along canyon roads with limited access have very successful busing systems without having to spend millions of taxpayer dollars to implement a wasteful gondola system. Invest those dollars in enhanced busing and implement a toll system for passenger cars. Other canyons in the Salt Lake Valley have tolls already; this is nothing novel. Have a pass for LCC/BCC residents with proof of address and for verified workers in the canyons. Then prorate the toll based on car occupants. Enhance the bus system so their are buses available every 15 minutes. There is no need for a huge and expensive construction project that will only hurt the locals more.</p>	A32.29VV

42392	Cavazos, Dennis	<p>Gondola B (From La Caille) alternative is what I support. It has greater environmental benefits. The electric gondola will have decibel levels less than noise levels in the canyon today. Improve air quality, lower impacts to watershed & wildlife crossing and remove few climbing boulders (2). The fare is less than the toll. It is the future for generations to come. The gondola towers will displace less acres than expanding to a four-lane highway for buses. Approximately 2 acres vs. 50 acres. Wildlife is impacted significantly less with the gondola option. It is also a safe and reliable transportation option. And increases access for those with mobility challenges or disabilities. Lastly it will benefit are economy and overtime the ROI.</p>	A32.29VV
42382	Cavazos, Mark	<p>I am in support of Gondola B (From La Caille). The fare will be significantly less than toll and less impact on the environment (Improves air quality, low impacts to watershed & wildlife crossing, 2 climbing boulders removed). It is a long term solution with a greater ROI. A gondola doesn't require expansion of Wasatch Boulevard to four lanes.</p>	A32.29VV

39979	CccccccccccchriChristensen, Josh	<p>Analogy: • Ski resorts in Little Cottonwood Canyon = Stadium with limited seating • Prime times at ski resorts (weekends, powder days) = High-demand events at a stadium (games, concerts) • Capacity constraints: Limited space on slopes, lines, and chairlifts = Limited seating in a stadium Proposed solutions: Ignore capacity constraints: Ski resorts: Allow more skiers on the mountain, expand parking, and provide alternative transportation options (e.g., buses, gondolas) Stadium: Allow more people into the stadium than there are seats (e.g., sitting on stairs, standing in parking lots) Adjust pricing: Ski resorts: Increase season pass prices or introduce dynamic pricing during peak times to manage demand Stadium: Increase ticket prices to find an equilibrium where the stadium consistently sells out without excess demand Expand capacity: Ski resorts: Expand skiable terrain to accommodate more visitors without overcrowding Stadium: Invest in a stadium expansion to add more seating Build additional facilities: Ski resorts: Open new resorts in the region to spread out demand Stadium: Construct additional stadiums for different event types to distribute attendees across multiple venues In conclusion, the analogy between ski resorts and a stadium with limited seating illustrates the capacity constraints faced during peak times. The proposed solutions offer various ways to address the capacity issues, allowing readers to understand the potential options and their impact on the skiing experience. Solutions That Won't Work: Gondolas: Ski resorts: A gondola with limited capacity (e.g., around 1,000 people per hour) cannot handle the influx of visitors during peak times, leading to overcrowding and a compromised skiing experience Stadium analogy: Adding a slow-moving escalator or elevator to transport a small number of attendees at a time will not resolve the issue of a limited number of seats in the stadium Increased bus services: Ski resorts: More frequent buses may transport more visitors to the resorts during peak times, but this does not address the capacity constraints on the slopes, lines, and chairlifts, resulting in overcrowding Stadium analogy: Providing more shuttle buses to the stadium during high-demand events may bring more people to the venue, but it does not address the limited seating capacity inside the stadium Widening the road or building a train: Ski resorts: While these transportation options may improve access to the resorts and reduce congestion, they do not address the capacity constraints on the mountain, leading to overcrowding and a compromised skiing experience Stadium analogy: Expanding roads leading to the stadium or constructing a train line may help fans reach the venue more easily, but it does not resolve the issue of limited seating capacity within the stadium These solutions fail to address the core issue of capacity constraints at ski resorts and in the stadium analogy. By focusing on transportation options instead of managing the number of visitors during peak times, these solutions may exacerbate overcrowding and diminish the overall experience for skiers and event attendees.</p>	A32.29VV

Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, John Celski</p>	A32.3A; A32.3F

Regards, Michaela Chamberlain	
40926	Chamberlain, Michaela	I do not believe the gondola to be the correct solution for LCC. I am concerned about the environmental impact to existing natural and recreational areas, the watershed, and impact on traffic and congestion over the course of construction. I am not convinced the gondola will solve the problems it has been contrived for. I do not think the solution is equitable for all residents. I believe we should re-examine solutions and approach the issues in a more iterative manner.	A32.29VV

39718	Chambers, David	I am against building a gondola in Little Cottonwood Canyon. We not limit the number of people who can go up the canyon? Odd license plates can go up early. Even license plates go up after 10:00 AM. Switch off every other day. Lottery systems work well for river running.	A32.29VV

41625	CHANCELLOR, DENISE	<p>April 17, 2023</p> <p>In its final Environmental Impact Statement (EIS) UDOT did not examine how the Roadless Rule impacts the following inventoried areas: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Inventoried roadless areas are large undeveloped National Forest lands or those bordering designated Wilderness.</p>	A32.3A; A.32.3F

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>UDOT claims that the proposed gondola and associated towers are not a "road"; that associated timber cutting and clearing are incidental effects; and that the snowsheds promote safety. As such, UDOT claims the project is "exempt" from the Roadless Rule.</p> <p>UDOT is mistaken. The EIS is an analysis of the transportation system for SR210. In this case the gondola is UDOT's preferred transportation alternative. The areas in question contain valuable watersheds and prime habitat for elk deer, bears, eagles and other unique animal and plant species.</p> <p>Any exemption from the Roadless Rule would have negative impacts such as degradation of water quality, increased erosion and slope instability, habitat fragmentation for wildlife, loss of recreational opportunities and diminution of aesthetic values.</p> <p>For these and other reasons, the Forest Service should reject UDOT's proposal to construct towers and associated work for the gondola system.</p>	
39751	Chandler, Andrew	<p>Inventoried roadless areas must be protected and take precedence over building gondola towers. The fact that you need to send out this supplemental, at this stage in the process, much reduces the trust I have in UDOT's ability to conduct this process in a fair and unbiased way. The encroachment upon roadless areas was a material fact not disclosed when the NEPA process was started.</p>	A32.3A

41643	Chapman, George	Gondola maintenance or issues will require shutting down vehicle traffic in the canyon! That will significantly increase idling vehicles and pollution. The best action, with the least environmental damage is to build snowsheds first (money available from Federal Infrastructure Bill) and then see what the proper course of action is recommended. Snowsheds will decrease idling of vehicles and decrease pollution. In addition, gondola operations will require new power and foothill power poles (note Tooele fight) to supply power. That impact on foothill and mountain views is an environmental negative impact.	A32.29VV
54666	Chapman, Lori	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Lori Chapman</p>	A32.3A; A32.3F
51308	Chapman, Sam	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 41652	Chappell, Jessica	1. I do not want gondola towers in protected roadless areas. The gondola would directly violate the Roadless Rule and pose a risk to Little Cottonwood Canyon's clean water, diverse wildlife, breathtaking views, and endless recreation opportunities. 2. UDOT should expand its analysis to account for sustainable fuel options that exist and more accurately represent our nation and state's shift toward cleaner energy. 3. Inventoried roadless areas possess social and ecological values and characteristics that are becoming scarce in our nation's increasingly developed landscape. Protecting air and water quality, biodiversity, and opportunities for personal renewal are qualities of Roadless Areas that I highly value. Conserving Inventoried Roadless Areas leaves a legacy of natural areas for future generations. The proposed gondola system would situate towers, angle stations, snowsheds, and clearing of vegetation within one of the Wasatch's most protected areas, impacting not just one, but three roadless areas in Little Cottonwood Canyon: Twin Peaks, Lone Peak, and White Pine Roadless Areas. Going against everything the 2001 Roadless Rule is intended to do. 4. Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas? 5. As a person living in Utah my entire life, and as one who lives in a neighborhood impacted by canyon traffic, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.	A32.3A; A32.3F; A32.10G

Regards, Kelsey Chappell	A32.3A; A32.3F
39561	Charat, Ann	The gondola will only bring more people into an already overcrowded WINTER canyon. It will be paid for the taxpayers and will benefit ONLY skiers who ski at Alta and Snowbird. It will be expensive and time consuming to ride. Certainly NOT AFFORDABLE to the average skier. When the rich skiers arrive from out of state and find out how user unfriendly the gondola is they will seek other more affordable and accessible areas in other states to spend their money. The gondola WILL INCREASE GRIDLOCK in getting to Little Cottonwood canyon! Skiers will flock to Big Cottonwood instead. What? Build another gondola for skiers at taxpayer expense? PLEASE, think of everyone who will use the canyon. There are MANY more reasonable solutions!	A32.29VV

39375	Chatelain, Jeff	<p>The Gondola situation will not improve traffic. It will only allow the resorts to take in more paying customers at the expense of the taxpayers... The canyon traffic will be the exact same and will not take care of emissions, traffic, and safety... Transit should include electric buses, dedicated lanes, toll booths And not allow the ski resorts to benefit at the cost of the taxpayers... Merely to have out of state people continue to come to our state and wait in line at the gondola, or on the road .</p>	A32.29VV

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Skye Chaves</p>	A32.3A; A32.3F
40512	Chavez, Adriana	<p>I am completely opposed to the gondola as an option to reduce congestion in the canyons. Building a gondola is not only financially irresponsible but environmentally as well. There are other less costly and damaging options that should be considered and implemented first</p>	A32.29VV
46044	Chavez, Ana	<p>To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. 42015	Chesnut, Zachary	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Zachary Chesnut</p>	A32.3A; A32.3F

42150	Chick, Izabelle	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. I have chosen to attend the University of Utah this upcoming fall in large part because of the incredible outdoor recreation opportunities Salt Lake City affords, and it breaks my heart that as I'm just beginning to explore the Wasatch range, those natural areas may be disturbed and forever changed by the gondola. So many students come to Utah for its natural offerings, and Little Cottonwood Canyon plays a big role in that. Instead of erecting a gondola which would not solve traffic congestion and create more problems in it's wake, let's teach those students how to be more environmentally friendly in their transportation by enforcing tolls if not carpooling, enhancing and promoting bus/community transportation, and show them that changes can be made through environmentally friendly and public-approved solutions instead. The gondola would be a huge disappointment to me and so many other people.</p> <p>The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p>	A32.3A; A32.3F

		<p>Restaurant: Increase menu prices or implement dynamic pricing during peak dining hours to manage demand</p> <p>Expand capacity:</p> <p>Ski resorts: Expand skiable terrain to accommodate more visitors without overcrowding</p> <p>Restaurant: Invest in a restaurant expansion to add more seating</p> <p>Build additional facilities:</p> <p>Ski resorts: Open new resorts in the region to spread out demand</p> <p>Restaurant: Open additional restaurants in the area to distribute diners across multiple locations</p> <p>Solutions That Won't Work:</p> <p>Shuttle services or valet parking:</p> <p>Ski resorts: More frequent buses may transport more visitors to the resorts during peak times, but this does not address the capacity constraints on the slopes, lines, and chairlifts, resulting in overcrowding</p> <p>Restaurant analogy: Providing shuttle services or valet parking may make it easier for diners to reach the restaurant during peak hours, but it does not address the limited seating capacity inside the restaurant</p> <p>Expanding parking or building a pedestrian bridge:</p> <p>Ski resorts: While these options may improve access to the resorts and reduce congestion, they do not address the capacity constraints on the mountain, leading to overcrowding and a compromised skiing experience</p> <p>Restaurant analogy: Expanding the parking lot or building a pedestrian bridge may help diners reach the restaurant more easily, but it does not resolve the issue of limited seating capacity within the restaurant</p> <p>The analogy between ski resorts and a popular restaurant with limited seating illustrates the capacity constraints faced during peak times. The proposed solutions offer various ways to address the capacity issues, allowing readers to understand the potential options and their impact on the skiing experience.</p>	
39977	Christensen, Josh	<p>Title: Addressing Capacity Constraints in Little Cottonwood Canyon: A Comprehensive Solution for Peak Times Introduction: Ski resorts in Little Cottonwood Canyon, such as Alta and Snowbird, face significant capacity constraints, similar to a stadium with limited seating during prime events like games or concerts. The Utah Department of Transportation (UDOT) has proposed solutions like gondolas or alternative transportation options to increase the number of visitors. However, these proposals overlook the core issue of capacity at the resorts, especially during peak times like weekends and powder days. Capacity Constraints: The ski resorts' capacity is primarily dictated by the number of skiers and snowboarders they can safely and comfortably accommodate on their slopes, lines, and chairlifts. Over the years, factors such as population growth, decreasing season pass prices, and increased winter sports participation have contributed to the capacity problem. Despite this, no new skiable terrain has opened in Little Cottonwood Canyon since 1999, and season pass prices have not increased proportionally to manage demand. Inadequate Transportation Solutions: During prime times, transportation solutions like gondolas, which may transport only around 1,000 people per hour, do not adequately address the influx of visitors. Furthermore, increasing the number of visitors during peak times may compromise the skiing experience, as the resorts will be overcrowded. A gondola may address environmental or safety concerns, but it fails to solve the capacity problem and primarily serves to increase revenue for the resorts, potentially compromising skier safety and the overall skiing experience. Comprehensive Solutions: A comprehensive solution should consider multiple approaches to manage capacity constraints, particularly during peak times when the experience and enjoyment of skiing are most at risk. Expanding Skiable Terrain: Increasing the available skiable terrain could help distribute visitors more evenly across the resorts, reducing overcrowding on the</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>slopes and in lines. Opening New Resorts: Developing new resorts in the region can alleviate pressure on existing ski areas, providing skiers with additional options and spreading out the demand. Implementing Price Increases: Increasing season pass prices or introducing dynamic pricing during peak times can help manage demand and encourage visitors to choose off-peak periods for their skiing trips. Exploring Alternate Routes: Assessing different routes to access ski areas can help distribute traffic and reduce congestion during high-demand periods. Limiting the Number of Visitors: Implementing visitor limits during peak times can ensure a better skiing experience for those who do visit the resorts while preserving safety and comfort. Conclusion: Focusing solely on transportation options in Little Cottonwood Canyon misses the broader issue of capacity constraints in Utah's skiing industry. A comprehensive solution must consider multiple approaches to manage capacity and ensure that the skiing experience remains enjoyable and safe during peak times. By addressing these capacity constraints, ski resorts in the region can continue to thrive and provide memorable experiences for visitors without sacrificing the quality of the experience or the safety of the skiers.</p>	
44348	Christensen, Joshua	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 39245	Christensen, Landon	Autonomous, electric, busses is technology available today. The best solutions for canyon transportation are not far out. Diesel bussing can work in the meantime. Please no gonodola.	A32.29VV
40177	Christensen, Landon	It is NOT a stretch to assume that self-driving electric busses will be the solution to canyon travel in 10 years. The technology for this is already commercially viable—today. An investment like a gondola is not forward thinking, will be environmentally destructive and will eventually become outdated.	A32.29VV
48536	Christensen, Lily	<p>To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Lily Christensen</p>	A32.3A; A32.3F

40533	Christensen, Stan	<p>Building a gondola would be a violation of both the letter and spirit of the Roadless Rule. It would take away as well as damage existing recreation opportunities all to service two ski resorts. It would have negative visual as well environmental impacts including impact on watershed and wildlife. The USFS has inventoried roadless areas and the obvious negative impacts to those areas needs to be considered. If a gondola were built, impacts both during and after construction would change the physical, visual, and aesthetic landscape. The idea that helicopters will be used during construction to solve access problems is preposterous. The roadless areas of Twin Peaks, White Pine and Lone Peak will all be impacted and need to be taken into account for planning purposes. The same issue goes for Big Cottonwood Canyon which was left out of the EIS--it seems crazy to just look at Little Cottonwood in isolation. The reason a gondola this long hasn't ever been built in a narrow canyon is that it doesn't make sense a a transportation system. The towers would be visible from virtually every point in the canyon and it would become "the" essential feature of the canyon. Watershed impacts have been addressed by Salt Lake City and the Forest Service hasn't given this sufficient attention. I spoke with the Forest Service person in charge of this region and it was obvious that she was rubber stamping the project. She told me "I'm satisfied that the water issues have been mitigated." It has been surprising that UDOT has seemed to do everything in its power to discourage other options. Looking only at worst case scenarios for bussing and saying they can't try tolling until new buses are in place are examples of this. The pollution comparison (gondola vs. bussing) is short-sighted. Electric buses aren't considered and are an obvious partial solution. Tolling should be tried as soon as next year since it is the most obvious low cost potential solution. Snowbird should also be encouraged to develop more parking (see Park city) and better parking management in the interim. The process of UDOT driving a planning process is flawed in of itself. They are not experienced in either planning or gondola construction. This would be a high risk/high cost gamble in a canyon that has so many stakeholders other than two ski resorts. The process has been steamrolled by private interests and is vulnerable to NEPA lawsuit on innumerable issues. I hope that UDOT will take seriously the need to find alternatives and spend the \$150M wisely rather than continuing to be in the back pocket of private interests. Taxpayers deserve better use of their money. The ongoing maintenance costs of the gondola haven't been adequately considered, and the initial capital cost has been radically underestimated.</p>	A32.3A; A32.10G

40306	Christiansen, Tristan	<p>I can't believe how carried away with greed this once great state of Utah has become. We do not want the gondola and we most definitely do not want the parking lot, construction & devastation to the natural environment that goes along with it. Every acre of green space & natural environment that our valleys used to have is being eliminated due to greedy development. These mountain valleys are not meant to house millions. This is why turning the Wasatch Front into an urban waste is detrimental to the environment, in particular the obvious pollution problem due to over population between gigantic mountains. This area is supposed to be a resting place for migratory birds. That is being stopped and nobody cares about the birds or other animals God, Heavenly Father, the Creator or whatever you choose to believe in or not, created. These valleys, lakes & canyons were and are sacred to Native Americans. Do not destroy our sacred lands any further!</p>	A32.29VV

39401	Church, Andy	<p>A gondola is NOT the answer. Improve the road some and close it for the winter except to emergency vehicles, delivery truck and residents of Alta. And run buses for all other users. That way bus frequency and stops can be easily adjusted , all of which a gondola can not do. Then open the canyon road again in the summer and decrease bus service. The gondola will destroy the natural beauty of the canyon and does not offer the flexibility that users require.</p>	A32.29VV
40480	Church, Linda	<p>Please earnestly pursue alternative transportation methods for Little Cottonwood Canyon congestion. Congestion that involves at most 10-15 days of the ski season. To spend \$500 MILLION up to one BILLION dollars (referencing cost overruns for the new State Prison) of taxpayer money and ruining an iconic canyon with 22 towers (or more) is not only wasteful mand an eyesore but benefits a very, very small portion of Utahns, only 2% who are skiers. The gondola would set a precedent for other canyons where less costly options and more forward thinking are needed. Tolls on low occupancy vehicles, electric buses; alternatives exist that are more friendly to the overall value of the canyon and don't put skiers' enjoyment above the desires of other Utahns. Please consider non-drivers and non-skiers even though they aren't your primary concern. Please do what benefits all of us and the canyons most.</p> <p>I take this opportunity to mention that I have little faith in having the desires of the majority of Utahns considered when it comes to the legislators and other bureaucrats who stand in our stead. Recall all 3 ballot initiatives of 2018. Every once in awhile it would be heartwarming for THE WILL OF THE PEOPLE to be honored here in Utah</p>	A32.29VV

Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Stephanie Cifarelli</p>	A32.3A; A32.3F

39468	Clark, C	Roadless Rules must be adhered to. No gondola towers or stations in Roadless areas. Roadless areas must be preserved, not diminished.	A32.3A
40436	Clark, Charlie	Like most Utahns, I am against the Gondola. I believe widening the road to include a bus lane and incorporating snow sheds is the best course of action. The snow sheds installed at rogers pass in British Columbia work great, and I think that solution would be much better for both cost and effectiveness.	A32.29VV

		<p>gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Janelle Clark</p>	
42627	Clark, Jaxon	<p>To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. 40301	Clark, Michael	<p>You could be hip and ahead of the time with something cheaper such as heated roads and shuttles, or you can be trashy and make a permanent and expensive mistake, such as a gondola. Have heated roads even been considered? I know there is at least one company that is close that can take the risky winter ditching out of the equation without such an extreme environmental impact.</p>	A32.29VV

40446	Clarke, Scott	<p>The gondola would do absolutely nothing to ease/eliminate/fix the traffic issue (the red snake) on Wasatch blvd, which is arguably the primary issue. The congestion in both Cottonwood Canyons is a very close second primary issue. Whatever "fix" is agreed upon and implemented needs to address both congestion issues, Wasatch Blvd and the Cottonwood Canyons. Is the north end of the quarry still for sale? That would be an ideal place to look at creating some type of expanded parking and transportation service</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		(expanded bus service, some type of light rail, etc). It'd be nice if the proposal could look at serving all the various trailheads in both canyons, and not just the ski/snowboard resorts.

40229	Cline, Christine	<p>PLEASE do not build this Gondola!! It is a waste of taxpayer money in so many ways: I won't solve the traffic problem, it short-changes public users by only having stops at two ski resorts (not the numerous trailheads and other access points in the canyon), it will be an eyesore, it's not flexible. I'm sure you've already read the multitude of detailed comments about why these facts are true, so I'll save you the time. Just put me down as a solid NOOOOOO!!! for the gondola. I am an advocate of increased mass transit (including bus-privileged passing lanes), which is very flexible (add more buses for peak times and have resort-directed express buses) and much less expensive. The gondola will also be a significant added expense to ride, which further disadvantages people of modest economic means. An easy alternative to that is to charge an occupant-based toll for using the road (more expensive if you're driving up solo, free if you've got 4 or more in your car). The EIS somehow manages to come up with a conclusion that expanding bus service will somehow have less of an environmental impact than the gondola, but many aspects of the EIS are an exercise in defending a foregone conclusion. SO many things wrong with the gondola "solution" that it's hard to know where to start or stop, and as I've already said, you have numerous, well thought-out responses to this bad proposal. Please read them and consider them as voicing my opinion. NO. GONDOLA. UP. LITTLE.COTTONWOOD.CANYON. Period!!!!</p>	A32.29VV

40112	Close, Alex	<p>I believe that giving this much money to a community that already has access to leisurly sports on weekdays would be a huge mistake. We could revitalize trax to take people up the canyons or have a simpler method of public transportation for people. This would help people that work in the ski industry, and provide an alternative for granola people that act like they give a █████ about the environment even though they drive toyota 4runners up the canyon by themselves 4 days a week.</p>	A32.29VV

The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Catherine Coakley</p>	A32.3A; A32.3F

		Regards, Lauren Coenen	
39610	Coffelt, Allison	I write in strong support of the Enhanced Bus (no widening) alternative. With the proper number of buses running—which is to say, enough to meet demand in a way that allows for seating on all buses—this is clearly the best option. It is the lowest cost for the riders, the least initial environmental impact, the least ongoing environmental impact, and the least negative impact on existing recreational spaces (e.g. climbing). At a minimum, this option should be thoroughly tried for five years. If needed, the community could then look into more costly, high-impact options.	A32.29VV

42289	Cohen, Elizabeth	<p>I'm concerned the gondola will create more traffic issues than we already have while significantly impacting water quality in the drainage. Traffic backups due to avalanche mitigation and general volume are two of the biggest issues facing LCC. The fact that the gondola will not run during avalanche mitigation or high risk times makes it not worth the money and impacts. I think making LCC a toll road and building avalanche sheds over the road in high risk areas would be a much better solution to our traffic woes.</p>	A32.29VV
40367	Cohen, Jonathan	<p>I believe the gondola is an unsustainable and destructive solution. The damage to the land and feeling of remoteness in the Wasatch would be irreversibly altered. In addition, the proposed gondola would require construction on 3 different designated roadless areas. Even if the gondola system is not defined as a road, it would be built for highway purposes and is thereby inconsistent with the Roadless Rule and the 2003 Wasatch-Cache National Forest Plan</p> <p>It would be a terrible misinterpretation of the Roadless Rule to suggest that an 8 mile gondola system is exempt from that designation's protections simply due to the amount of environmental impact from its 10 year construction (watershed views, dispersed recreation, timber, vegetation, habitat) I am grateful that UDOT recognized this initial oversight and put in the time to consider the implications of building a system like the gondola on protected land like this, and hope that the learnings will lead them to less destructive solutions like enhancing/expanding an electric bus system on the road systems we already have in both Big and Little Cottonwood Canyon</p>	A32.29VV

43595	Cohen, Robin	<p>To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Robin Cohen</p>	A32.3A; A32.3F

		<p>locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Zinnia Collins</p>	
42312	Collinson, Jim	<p>You have the cart before the horse with only 600 stalls in mind at the gravel pit by BCC. Ten times that many won't be enough.</p> <p>And why is BCC being neglected in this?</p> <p>The gondola oughta come outta Summit County where the accommodations, restaurants, Olympic folk will be based, and those car rentals generate 30% of our traffic and most of our inadequate vehicle/tire problem in the canyons. If it came outta Summit County it could tag the head of BCC on the way...</p>	A32.29VV
40478	COLLINSON, JOHN	<p>I oppose the gondola and urge UDOT to consider lower cost and more effective alternatives to reducing the congestion in Little Cottonwood Canyon. I have spent my entire life in the canyon- growing up at Snowbird ski resort, and enjoying the wasatch mountains ever since. This gondola will permanently alter the Twin Peaks, Lone Peak, and White Pine roadless areas. People move to Salt Lake city to enjoy the proximity to world class skiing, climbing and mountain biking- all of which will be disrupted by the proposed gondola. This project would support taxation of everyone- and only benefit ski resort users- a small percentage of outdoor recreators.</p> <p>I am in support of lower cost solutions that would utilize the existing infrastructure (carpool incentives, year round enhanced bus services, enforcing the traction law and continued parking reservations at the ski resorts themselves. I also am in support of additional parking at the proposed grit mill lot- as well as I would urge there be additional land dedicated to more parking in the area. No matter what travel solution is implemented up Little Cottonwood Canyon- there needs to be more parking to support it.</p> <p>This proposed gondola is NOT a viable solution to the congestion in the area, and will forever change the wilderness that people can enjoy today. These beautiful lands in close proximity to Salt Lake City should be protected and cherished so future generations can enjoy them- not exploited by a gondola that is a misinterpretation of the current "Roadless Rule".</p> <p>thank you</p>	A32.3A; A32.3F

39724	Columb, Josh	<p>I live in Cottonwood Heights, Utah and am writing to let you know that I strongly oppose the proposed gondola in Little Cottonwood Canyon. In addition to not solving traffic congestion, threatening our critical watershed, and not serving all users of the canyons, the gondola would be built in three federally protected Roadless Areas where road and recreational construction is typically prohibited.</p> <p>The three protected areas (Twin Peaks, Lone Peak, and White Pine Roadless Areas) would have their beautiful natural qualities diminished by eight gondola towers, snow sheds, angle stations, and extensive vegetation removal. This is an unacceptable proposition, and lower impact alternatives must be considered.</p> <p>Rather than diminishing the roadless characteristics of Little Cottonwood Canyon with gondola construction, I urge you to consider lower-cost solutions that utilize existing infrastructure, like enhanced bus service, carpooling incentives, enforcement of the traction law, and required reservations to park at ski resorts.</p> <p>After all of the widespread opposition from local constituents, communities, and public officials, I'm disappointed that the gondola is still being considered. Please continue to advocate for common sense, environmentally friendly solutions that will benefit ALL canyon users year round.</p> <p>Thank you</p>	A.32.3.A

40022	Combs, Sach	Simply put, the Gondola is inflexible and doesn't serve the needs of all the users of the canyon. Buses are flexible, can be surged as need, service all users, and can be implemented, and grown as user volume needs. Additionally, only resort visitors and employees (if even them) should be allow to drive the canyon during heavy use periods.	A32.29VV

42294	Condie, Cheri	<p>The protected roadless areas of Little Cottonwood Canyon are a big part of the breathtaking nature of this beautiful asset in the Wasatch Mountains.</p> <p>The prospect of a gondola built there should obviously be subject to the 2001 Roadless Area Conservation Rule (RACR), meant to protect against reduced water quality, increased erosion, habitat degradation, and human disturbances in areas subject to fire. The water quality in the valley would be impacted. The safety of those visiting the Roadless Areas would be imperiled by slope instability.</p> <p>The environmental values of our local Roadless Areas would be negatively affected by a gondola system of angle stations, towers, snow sheds, and especially, the removal of trees and vegetation. The views, watershed, habitat and wilderness-quality recreation of no less than three Roadless Areas would be changed -- Lone Peak, Twin Peaks, and White Pine. Do not destroy the safety and intact habitat of these areas that have gone through the Roadless Area Conservation Area process, an expensive and necessary result for Little Cottonwood Canyon. My tax dollars were spent to protect and maintain year-round habitat and watershed there and I don't want UDOT to minimize their protections.</p> <p>A gondola would be a permanent UDOT highway project that violates the legacy of the natural areas I value for future generations.</p>	A32.3F; A32.3G

41756	Congram, Lillie	<p>The proposed gondola to be built in LCC should be reconsidered for many reasons. My main concern is the zones that have been designated as no-road zones where roads cannot be built, and the important sensitive watershed. The claim that has been made is that the towers for the gondola will be helicoptered in, but there are many flaws with that argument. The foundation to uphold those towers needs to be built, construction crews, building materials, foundational structure materials etc. all need a way to these locations where the towers will go in. In order to do that a ground pathway will have to be an option and the no-road zones will be violated and have unimaginable impacts on wildlife, our watershed, and the quality of nature in LCC. When people go to the mountains it is to get away from urban areas and enjoy solitude in the beautiful nature around us. This will be jeopardized and thousands of animals will be displaced disrupting the balanced ecosystem. There is a large probability the watershed will be disrupted as well which will cost hundreds of thousands of dollars and harm the water source many residents rely on for clean water. Say 'NO' to the Gondola for the good of the people and the environment.</p>	A32.3H

		<p>This proposal also threatens wildlife in the canyon and will reduce the number of raptors that will nest. The proposal is also subject to extreme risk related to large avalanches damaging gondola infrastructure as the angle station overlaps multiple large slide paths.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. 44889	Conti, Melanie	<p>To whom it may concern,</p> <p>I am an Ikon pass holder and user of Snowbird and Alta ski resorts. I oppose the gondola project in Little Cottonwood Canyon. The canyon is a unique and special natural land area and should not be further disturbed by further man made infrastructure. With the funding proposed to build the gondola, the existing highway infrastructure and transit programs could be highly improved to solve traffic and congestion issues. Passenger vehicles are a disturbance on our environment beyond usage in the canyon. We need a systemic change in our transportation systems, and mass transit into the canyon could be a perfect opportunity to start behavior change and encourage increased transit ridership. Ideas include not allowing passenger vehicles into the canyon, expanding transit infrastructure, eliminating all transit rider costs. As an Alta and Snowbird skier, I would be happy to take mass transit into the canyon if the infrastructure could provide easy to use and convenient services, including more buses and more stops. Make mass transit the norm. You are in a unique position to create an impetus for behavior change in transit ridership, and I urge you to not throw taxpayer money into further destroying this beautiful canyon, but rather utilize already existing resources and find creative solutions to drive skier behavior change into more sustainable solutions. As a person who works in government, I understand the challenges in creating behavior change and asking users to give up the convenience of their personal cars. But we are in a time where we must start stricter measures to force that action. Your agency represents the community, and I urge you to listen to the requests to NOT build this gondola!</p> <p>Further ideas to reduce passenger vehicles on the road include: carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Please try all that you can to make our existing infrastructure work before taking such a large, costly, and permanent action that will change the natural resources of Little Cottonwood Canyon forever.</p> <p>Regards, Melanie Conti</p>	A32.29VV

41647	Cook, Chris	Please do not build the gondola and disturb the beauty, serenity and rawness of nature that exists in Little Cottonwood Canyon. Something we can all count on is driving down the canyon and coming to the the top of Seven Sisters and seeing the prehistoric-like view of this glacier-carved magnificent canyon. Can we please keep the world as raw as we can and protect this unique canyon from more steel towers and cables? I want my kids to show their kids this special canyon without the stain of industrial blight.	A32.29VV
39363	cook, david	NO Gondola!! Enhanced bus service with 2 lanes up, one lane down in the am and 2 lanes down and 1 lane up in the pm. Restrict private vehicles Nov. 1 - May 1 with exceptions for residents and critical personnel. Make supply meet demand, expand Park and Ride lots, make everyone take the bus during the Winter. Institute a parking pass for summer with toll and reasonable bus schedule for recreation. DO NOT DESPOIL the natural beauty of this prime example of a glacially carved canyon with gondola towers, ever!	A32.29VV
39824	Cook, Dustin	The gondola would directly violate the Roadless Rule and negatively impact wilderness areas.	A32.3A; A32.3F

41704	Cooke, Kimbra	<p>I do not like the billboards that promote the gondola up the canyon as if that is the only answer to the problem. There are better answers to the problem (such as buses like they use in Zion's national park or trains like they use in Europe.) gondola's are so limited in their use—if it's too windy they can't be used and they cannot transport nearly as many people at one time as a bus or train. If there were a train visitors coming from the airport could ride the train from the airport to the canyon or in-state people could catch the train closest to their home and ride it up to the canyon, which would eliminate some of the parking problem.</p>	A32.29VV
53973	Cooley, Aidan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule.</p> <p>I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts.</p> <p>Regards, Aidan Cooley</p>	A32.3A; A32.3F
52781	Cooley, Sarah	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. 42011	Copner, Nick	<p>Is there a reason that increased bussing/ parking and not allowing private vehicles like Zion National park does isn't an option? To me allowing only residents or employees of the businesses up the canyon to drive and just having bus stops at trail heads along the way would be the most ideal scenario for everyone. Other forms of recreation slow down in the winter but climbers would still be able to access crags via the bus and it's stops and then once ski resorts close or things slow down we open the canyon back up to private vehicles. After reviewing the proposed options it is my humble opinion that this would be the most productive option that everyone benefits from. Thank you for your time.</p>	A32.29VV
41967	Copner, Nick	<p>We know the ski resorts have already paid the government officials to push this gondola through so we need someone who isn't a coward to stand up to them and shut this ludicrous idea down. It's such a bad idea objectively. UDOT get your act together and do what's right for everyone who uses the canyon for things other than skiing.</p>	A32.29VV

39385	Corkery, Georgie	<p>People don't want a gondola and the 2001 Roadless Rule prohibits new road construction and reconstruction in inventoried roadless areas on National Forest System lands. Inventoried Roadless Areas are characterized by their intact ecosystems that provide wildlife habitat, clean drinking water, rich soil, endless recreation opportunities, and much more. The Roadless Rule protects many popular areas in the Wasatch, such as White Pine Lake, Rock Canyon, and the Timpooneke trailhead that provides access to Mount Timpanogos.</p>	A32.3A; A32.3F
42344	Corkery, Reanna	<p>Building gondola towers in Roadless Areas will greatly impact over 1,200 different plants and animals. How can we as a community help this process to ensure the flora and fauna won't be pushed out of their habitat? Does the "Purpose and Need" of UDOT's preferred alternative of the gondola allow for a shared habitat to continue to thrive or even be restored, when we are building into Roadless Areas?</p> <p>As a person living in Utah, I cannot support a proposal that would reduce acres of land that are classified as "Roadless", let alone know that the taxes being collected each month are going to a project that would permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas. I say no to a gondola in LCC because of the impacts to the Roadless Rule.</p>	A32.3A; A32.3F
39299	Corkery, Wilma	<p>No Gondola!</p> <p>Very upset with the new bus schedule.</p> <p>Need more frequent busses, every 15 minutes, and more than just 944 bus. Reinstall 953 bus, every 15 minutes.</p> <p>That will decrease car traffic.</p>	A32.29VV

39437	Cortez, Emma	<p>What you guys are doing is entirely ridiculous and anyone with a working brain can see right through it. I understand that tourism is a big chunk of our economy but I can't comprehend why you would chose tourists over locals. The people who's tax money pays for your fancy desk chair. If you gave a ██████ about the people you're supposed to be representing you would listen to what we have to say. We put you in office, we have the power to take you out of that role. I hope you have the sense to consider that when you make your decision. The only reason I'm so passionate about this issue is because of how much I love this state. Everyone who lives here is in the same boat in that sense. Please I'm begging you, don't let anymore big corporations ruin what we have here. God would want you to protect what he created for us. Please represent us, please advocate for the people. Or be prepared to be voted out.</p>	A32.29VV

41641	Cottle, Daren	<p>Thank you for this opportunity to comment on the Assessment of the Roadless Area Conservation Rule. LCC transportation will always be a challenge in winter, and as this winter showed, no transportation plan (including a billion dollar + gondola) can fully overcome 64 slide paths and significant snow. I will add my voice to the large contingent of canyon lovers dismayed that a gondola could be built in violation of the spirit and letter of the Roadless Area Conservation Rule. Building gondola towers and access points through IRA's adjacent to wilderness will cause significant and irreversible harm. UDOT now has one last chance to back away from this publicly funded boondoggle that only benefits 2 private businesses in a single industry. Please take advantage of this chance avoid simply moving the traffic problem into the valley while ignoring the fundamental problem of exceeding the carrying capacity of a very small area.</p>	A32.3A; A32.3H

41019	Coury, Zach	<p>There are many reasons why the gondola is an extremely misguided suggestion to "fix" Little Cottonwood's congestion. first off, it is a service that exclusively benefits private companies Alta and Snowbird, but is payed for by Utah's taxpayers. Second, it won't do anything to fix issues or reduce traffic. This historic avalanche cycle from early april is an excellent example. If the gondola had even been able to survive the onslaught of major avalanche debris, theres no way it would have opened at any time during that period due to the need to have the road open to check on it. There are tons of other reasons why I am against the gondola, but I will keep it brief.</p>	A32.29VV

40144	Cowan, Michelle	<p>Scenario #1 Heavy snowfall + canyon closure + resort interlodge (guests confined to buildings) Will a gondola eliminate waiting? Absolutely not. UDOT says the gondola would not operate under interlodge conditions. Even if a gondola were to operate, riders would not be allowed to move through the resort and, as important, the lifts would not be operating.</p> <p>Scenario #2 Heavy snowfall + canyon closure + active avalanche mitigation Will a gondola eliminate waiting? Doubtful. A gondola has to remove cabins prior to mitigation activity. During mitigation, the gondola cannot operate during the use of active explosives. Operators have to inspect all cables and systems, and then, replace cabins before loading passengers. If there is no or minimal avalanche run out to the road, vehicles will be moving before the gondola inspection is complete.</p> <p>Scenario #3 Heavy snowfall + canyon closure + delayed opening</p> <p>Will a gondola eliminate waiting? No. Canyon closures create vehicle backup and gridlock on Wasatch Blvd. Cars will be queuing to get in the gondola parking garage. Then another queue to buy tickets. And you guessed it, another queue to wait in line to get to your gondola cabin. Once passengers are finally standing in that gondola cabin, you wait for a 30-40 min ride up the canyon. Think Snowbird Tram lines on a busy powder day, and that's a lot shorter distance than the gondola and only snowbird customers. At least you have other ski lift options to get you up the mountain if the Snowbird tram is a 2hr wait.</p> <p>Scenario #4 Heavy snowfall + canyon open post-avalanche mitigation + resort heavy snow accumulation</p> <p>Will a gondola eliminate waiting? No. There will be waiting at the resorts as described above. In addition, it can take a day or more for a resort to be fully dug out and safe to operate. At best there may be fewer and lower elevation lifts operating and the waiting time will be long, like we've experienced this year.</p> <p>GONDOLA FACTS The Gondola can't operate in winds in excess of 60 mph of which there has been a significant amount this year The Gondola can't operate during/following incidents of thunder and lightning which exist regularly in LCC The Gondola is impacted by rime ice which shut down the tram for 2 1/2 days</p>	A32.29VV

Comment ID	Name (last, first)	Comment	See Responses in Appendix A of the ROD
		<p>The Gondola is subject to the same mechanical and operator problems of any “wire rope and pulley” device. This has caused many lifts to shut down or be delayed this year</p> <p>Reality: LCC is a very unique canyon. It’s topography helps create some of the greatest snow on earth, as well as an occasional transit challenge. It comes with the territory. Congestion this year is an outlier. Our record snowfall coupled with UTA reducing ski bus service by over 2/3 has pushed people into private cars which has increased traffic exponentially. On average years a dozen or less closures happen per year with wait time totaling 56 hours. UDOT plans to build snow sheds prior to any gondola construction. They project snow sheds will drop closures to as few as 4 per year and reduce closure time to as little as 2 hours total.</p> <p>Bottom line: A gondola would not be needed.</p> <p>The gondola is not the panacea promoters want you to think it is. It would cost you the taxpayer \$1.4 billion dollars, benefiting only two private businesses. It also moves congestion to the mouth of the canyon instead of away from the canyon.</p>

41046	Cowan, Scott	<p>I can't understand for the life of me, why the Gondola is still being considered for Little Cottonwood Canyon.</p> <p>First, It simply does not make any financial sense nor does it do anything to alleviate the overall problem in the canyons which is strictly tied to capacity.</p> <p>Two, looking at it from strictly a business standpoint, the only benefit to a Gondola solution is PERCEPTION on the part of the resorts. I pulled Both Alta and Snowbird D&B reports and they can't even begin to make a financial business case for investing that much money into a construction project like this because it simply makes no financial or economic sense whatsoever and any responsible fiscal manager would shoot this project down without a second look.</p> <p>Third, The biggest issue facing the canyons is simply capacity and putting up a billion dollar boondoggle to bring more people into the canyon for a very short period of time also makes no sense whatsoever as once word gets out that lines to get to the mouth of the canyons are long, lines at the resort to get on the lifts are long and your actual time on the slopes is diminished due to the larger crowds, the supply side economics of this equation will see a natural decline in demand as people will look for other alternatives that give them much greater utility (satisfaction) for their dollars at other resorts.</p> <p>Fourth, The pure cost of people using the gondola will price a lot of folks out of the market as spending an extra \$100.00 per day for a family of 4 to ride up and down the mountain on top of the lift pass will make this even a more elitist activity and will continue to drive down local numbers which the resorts can't afford to do.</p> <p>Fifth, going back to the capacity issue, having a flexible transportation system that can scale up when busy and scale down during low demand times makes far more sense than tying up a fixed cost infrastructure that does not or would not get used at capacity for the vast majority of the year. Flex trans buses would be the more economical and best use alternative if we keep wanting to cram more people up the canyons.</p> <p>Sixth, aesthetic desirability, there is nothing aesthetically appealing or enhancing that would warrant putting concrete towers and stringing cables in certainly one of the most beautiful and pristine canyons in the US at the expense of maintaining natures beauty, This one argument alone should be enough of a compelling reason to dump this horrific idea.</p> <p>I could go on and on about the reason why this idea makes no financial sense, makes no environmental sense etc. and why we should not destroy the natural beauty of the canyon, but the simple truth is that if you just step back and remove the local politics from the equation, The gondola is simply a poor excuse to stroke certain peoples egos, use pubic monies to line the pockets of developers who only have their own egotistical and financial interests that will be padded at the expense of destroying our canyons, putting up a failed concept and pricing the vast majority of people who would be best be served by less expensive alternatives for the short periods of time additional transportation capacity might be needed.</p> <p>Enough already, stop this insanity, it will be another very expensive, failed public policy decision much like the dormant pumps that were deemed so necessary for the Great Salt Lake.</p> <p>We simply can't afford to say hindsight is 2020 on this project, it is a bad idea from the start, so stop trying to make justifications that go against every lick of common sense.</p>	A32.29VV

40315	Cowdell, Jason	<p>How many days a year (excluding 2022/23) is there a "significant" delay? Less than 40? Does this justify the expense and permanent change to the canyon? Don't widen the road and add sheds and bus lanes. Don't build a gondola, permanently change the view and burden the tax base. Let the market figure it out. Encourage Alta and Snowbird to incentivize car pooling for parking privileges. The State/County should not enforce the solution. We The People will figure it out.</p> <p>Sincerely,</p> <p>Jason Cowdell (life-long Salt Lake County resident and 40+ year skier at Alta and Snowbird)</p>	A32.29VV
40085	Cowie, Eliza	<p>Don't use air quality as an excuse for bad public policy.</p> <p>I write to urge UDOT to reconsider their stance on Gondola B as the preferred alternative in Little Cottonwood Canyon. In their original Environmental Impact Statement, UDOT noted that Gondola B will "improve air quality, protect the watershed, and increase the quality of life for residents and canyon users by reducing traffic congestion" as well as reduce in-canyon emissions by 56%. However, this proposal does little to directly address air quality, especially as it relates to transportation emissions, and will cost Utahns over \$550 Million to just get off the ground. This proposal retracted a provision that would include public transportation to parking areas, in lieu of 1,000 more parking spaces, and its end stage does little to restrict cars going up the canyon. As our friends at Save Our Canyons stated, by widening the road and simply adding a gondola, UDOT is encouraging more cars to go up the canyon, not less.</p> <p>UDOT's purpose in studying the gondola was addressing skier traffic. It wasn't to ask what was best for Little Cottonwood. And it wasn't to solve the Wasatch Front's air quality challenges. If Utah wants to address air quality, let's spend the cost of the gondola—\$550 million—on real transportation solutions with broad benefits, like an emissions-free FrontRunner. But don't use air quality as an excuse for bad public policy.</p>	A32.29VV
52786	Cowley, Morgan	<p>To whom it may concern,</p> <p>I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area.</p> <p>I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-</p>	A32.3A; A32.3F

40815	Cozzens, Skyler	<p>A gondola has no place in our canyons. The gondola should not be exempt from the roadless rule. UDOT should focus on a solution that will serve all canyon users and not cause irreparable damage to such an amazing canyon. UDOT should also be serving utahns and creating solutions that locals (the taxpayers) are in support of rather than pushing a terrible proposal forward that would only serve 2 ski resorts. Not only will the gondola deface and destroy many other areas within the canyon but construction puts all of utahs drinking water sourced from LCC at great risk from construction and the hazards that arise through a project of this size and time length. I am not in support of the gondola and hope that you'll listen to the people who call utah home and who hold a great love for the canyons in our hearts.</p>	A32.3A

Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. I cannot support a proposal that would reduce acres of land that are classified as "Roadless," let alone support taxation for a project that would fail to improve canyon access for non-resort users while benefiting a slim few. Claiming that the gondola is exempt from the "Roadless Rule" because it's not technically a road is a willful misinterpretation of the spirit of the rule. I support lower-cost solutions that utilize our existing infrastructure, such as carpool incentives (ex. occupancy-based tolling), year-round enhanced bus service with stops at multiple locations and more frequent service at peak times, enforcement of the traction law, and mandatory parking reservations at ski resorts. Regards, Kaleb Crabb	A32.3A; A32.3F
39373	crable, jan	Why do we continue to threaten our wildlife and their designated areas? please do NOT infringe on our wildlife by putting gondolas in the roadless area.	A32.3A
40570	Crafa, James	To whom it may concern, I oppose the Little Cottonwood Canyon Gondola project and urge you to consider lower cost and more effective alternatives to reducing traffic congestion in the canyon. The gondola will not improve traffic congestion. Instead, it will permanently alter Twin Peaks, Lone Peak, and White Pine Roadless Areas, threaten our critical watershed, destroy popular rock climbing areas, and disrupt running, backcountry skiing and hiking in the area. 		I am a resident of the Little Cottonwood Creek area. I am very opposed to a gondola being installed in Little Cottonwood canyon just to please the big companies and skiers. You are doing great damage to this magnificent place if you follow through on this plan.	
40881	Cramer, Tyler	This is a joke. Why are you building this thing? It will hurt the environment and ecosystem in the Cottonwoods. You are turning Utah into Europe!	A32.29VV
